Swacch Bharat Abhiyaan "Swacchata Pakkhwada"

Welcome Message

It gives us immense pleasure to invite you to join us and celebrate Swacchata Pakkhwada being organized by Department of Microbiology and MRU, KGMU. The objective is to provide an opportunity for learning and implementation of the desired practices to manage it to maintain high standards of cleanliness in hospitals.

On 2nd October 2014, Swachh Bharat Mission was launched throughout length and breadth of the country as a national movement. The campaign aims to achieve the vision of a 'Clean India' by 2nd October 2019. The level of cleanliness of public spaces in our country including in health facilities is a cause for concern. Cleanliness is important not only from the point of view of aesthetics, but also because lack of cleanliness and hygiene are a major cause of ill-health. Swachh Bharat Abhiyaan presents a unique opportunity to initiate action and demonstrate our commitment by launching an all out effort to ensure the highest standards of cleanliness in our health facilities. There is no more visible parameter about "Quality" than this is because hospitals cure patients and also save lives. The awareness about this lurking danger is very low. This is a serious occupational threat in healthcare establishments as well as to the public. The healthcare workers, environment, the flora and fauna in the vicinity get affected immensely due to the hazard posed by ineffective and low standard cleanliness.

Hospital Acquired Infection (HAI) transmitted through transfusion fluids, growing incidence of Hepatitis B, HIV infection, environmental, air and water pollution all contribute increasing health risks to the patients and public. Therefore, like so many disciplines that call for efficient management control, "Cleaning" should also be considered as a "must" activity in a hospital.

The events and workshop have critical importance in the health delivery as a whole. We hope to see you in the event!

On Behalf of
Organizing Committee

Workshop

"Role of Automation in Hygiene & Infection Control in Hospitals"

Date: 12th April, 2018

Time: 10:00 A.M.-1:00 P.M.
