Sub: 3rd National Workshop cum CME on Health Systems Strengthening Dec 7-11, 2017

Dear Sir/Madam,

You will agree that district health systems are not able to perform optimally. This is due to - both lack of clinical and managerial skills, in addition to other problems. India is committed for Universal Health Care Coverage. This means that our system should be able to tackle key communicable diseases like Malaria, HIV and MDR Tuberculosis, Non-communicable diseases like Diabetes, Hypertension, Osteoporosis, Hypothyroidism and cancers, in addition of pregnancy complications and newborn care.

We also need to improve quality of care, and strengthen our laboratories. There is new thrust on innovations and communication technologies like telemedicine, and mobile health. Needless to say, that managerial skills of health professionals are sub-optimal in terms of doing bottleneck analysis, governance, leadership, motivation, attitude building and communication etc. There is also recent change in procurement rules and Biomedical Waste Management. System also needs to understand various health financing models.

3rd National Workshop on Health Systems Strengthening at Department of Community Medicine, PGIMER, Chandigarh from Dec 7-11, 2017, will try to address these gaps. Eminent faculty will deliberate. Brochure for the same is attached.

Please nominate upto 5 medical officers or program officers/ faculty of your state to be part of this. Please also direct the nominated officers to deposit the registration fee online, before the due dates. I also request to give it wide publicity through your notice boards and putting it on your websites/ social media.

Regards

For (Dr. Arun K Aggarwal)
