Quality Control, Clinical Audit,
Accreditation & Future Planning

MINUTES OF MEETING

20/02/2020

A meeting with all quality managers was organised on 20 February 2020, to discuss invite suggestions for quality improvement of education in King George's Medical University. Following suggestions were given by a vigorous brainstorming session:

- E portfolio development workshop was proposed for students that would help them in self assessing their progress and growth in professional career.
- E-logbook to be introduced as digital assessment tool
- Interprofessional education to be emphasized by inviting members from management and engineering. This would help in broadening the professional prospects of our students and give them directions in these collaborations
- Arrange a competition of 'Documentary storytelling' every month on key healthcare awareness issues. A calendar for the monthly competitions was proposed. It was planned to use these documentaries in assessing change in knowledge on a different set of students
- It was suggested to organise a debate on 'Impact of social media on mental productivity' for students

- Another activity proposed for students was to invite them to give suggestions on 'Best practices' in outpatient, Operation theatres, and laboratories in healthcare settings.
- Patient satisfaction questionnaire data to be enquired from IT cell of the university.
