

PressNote

It gives us immense pleasure to inform you that Emergency Crisis Management Solutions (ECMS) in association with the National Health Mission, Government of Uttar Pradesh, is conducting Unified Resource Juncture for Academics (URJA); a two-phase medical training program at the KGMU, Lucknow. The first phase of URJA will be held from 22/10/18 (Monday) to 27/10/18 (Saturday) and will be attended by 75 medical officers from across the districts of Uttar Pradesh. The Inaugural program was held today at 9.00 am. The dignitaries included Chief Guest Hon'ble Cabinet Minister Prof. Rita Bahuguna Joshi ji, GM Training National Health Mission - Dr. Anil Mishra, Dean - Skill School, KGMU - Dr. Ajay Singh, Medical Director ECMS - Dr. Nitin Chawla, Program Director ECMS - Dr. Ankita Roy. The training is for Emergency Medical Officers (EMO) wherein the program will focus on the management of a broad range of acute and critical emergencies such as road traffic accidents, heart attacks, poisoning and cerebro-vascular accidents, maternal and child emergency handling among others. Alongside theoretical and practical training, URJA provides continuous medical education through online resources in association with prestigious institutions from Canada, Australia, USA, Canada and Singapore. Throughout the program, the attending medical officers will be monitored and their performance will be evaluated. Emergency Crisis Management Solution (ECMS) a consortium of acute and critical care physicians a provider of simulation based health and safety training programs, has launched an exclusively designed training program URJA (Unified Resource Juncture for Academics) for Emergency Medical Officers across all districts of Uttar Pradesh. Team ECMS believes the early identification of sick, prompt management and appropriate disposition of patient is the key for reduction in morbidity, mortality and unnecessary referrals of patients. Over the last few years, the Government of India has put strong impetus on improving healthcare outcomes across the nation. One of the focal points of this ambitious enterprise has been to skill healthcare providers so that they are able to provide comprehensive medical treatment. In spirit with this vision, URJA strives to provide a blend of academic and experiential learning to medical officers so that they become skilled and thorough professionals. Through their training, these officers will be able to perform in several emergency situations and manage preventable morbidities and mortalities thereby significantly improving healthcare outcomes across the districts and villages of Uttar Pradesh. In addition, better healthcare outcomes in rural areas will reduce the unnecessary patient flow to urban areas thereby improving access in both the settings. Prof. Rita Bahuguna Joshi ji informed that this program is the need of the hour and it is important to reduce the number of preventable deaths that happen in Uttar Pradesh and India, which is fixed for several years. She also insisted on similar training programs for every healthcare provider including ambulance drivers and first responders. The participating doctors will be evaluated for their performance and the change that is brought in will be measured over time to ensure the goal of better healthcare provision is delivered. She also was glad to flag off the workshop which was the first of its kind by any of the state governments throughout India. She shared a few of her personal experiences with medical emergencies and mentioned that she has huge respect towards the profession. She informed that gathering that the onus of improving the healthcare provision mainly lies on the doctors and workshops such as URJA would provide a platform to reform themselves.
