किसी भी चोट को नजरअंदाज न करें खिलाड़ी, पूरा इलाज जरूरी

जागरण संवाददाता, लखनऊ: खेल के दौरान चोट लगने की भी पूरी संभावना होती है। राष्ट्रीय और अंतरराष्ट्रीय स्तर के खिलाड़ी अक्सर चोटिल होते हैं। फुटबाल, क्रिकेट, हाकी और बैडमिंटन के दौरान हाथ-पैर में खिंचाव, मांस पेशियों में तनाव और मोच हो जाते हैं। अगर बार-बार चोट लगे और आप उसे नजरअंदाज करें तो भविष्य में काफी कठिनाइयों का सामना करना पड़ता है। इसलिए एक खिलाड़ी को समय रहते अपनी चोट का पूरा उपचार करवाना चाहिए। अब स्पोर्ट्स इंजरी का आधुनिक इलाज मौजूद है। ये बातें केजीएमयू के स्पोर्ट्स इंजरी विभाग के डा. अभिषेक अग्रवाल ने कही।

वे मंगलवार को केडी सिंह बाबू स्टेडियम के सभागार में खिलाड़ियों को संबोधित कर रहे थे। उन्होंने कहा कि खेल में लगने वाली चोटें स्वाभाविक होती हैं, जो अभ्यास या मैच के दौरान लगती हैं। अगर पूरी सुरक्षा के साथ खेला या अभ्यास

केडी सिंह बाबू स्टेडियम में खिलाड़ियों को चोट से बचने के उपाय बताते डा. अभिषेक किया जाए तो इसकी संभावना कम हो जाती है। खिलाड़ियों को चिकित्सकों से चोट के संबंध में अवश्य बताना चाहिए, ताकि समय रहते इलाज किया जा सके। मैच के दौरान जब भी कभी किसी को मांसपेशियों में चोट लगे या सूजन आए तो हमें प्राइस नियम का पालन करना चाहिए। प्राइस का मतलब है प्रोटेक्स (सुरक्षा), रेस्ट (आराम), आइस (बर्फ), कंप्रेशन (दबाव) और एलिवेशन (ऊंचाई)। इस मौके पर क्षेत्रीय क्रीड़ाधिकारी अजय कुमार सेठी भी मौजूद रहे।

KGMU put on the event "Online Outreach Activity –Department of Nephrology" in 2023 and 2024, which had 6 students and 7 faculty members. The event helped spread information and get people involved in their communities, and it raised awareness about academic, health, or social issues, depending on the theme.

Report on Online Outreach Activity Conducted by the Department of Nephrology on the Occasion of World Kidney Day – March 2024

On the occasion of *World Kidney Day* in March 2024, the **Department of Nephrology** organized an **online outreach activity** aimed at raising awareness about kidney health among school-going children. The initiative targeted students from **Classes 6 to 12**, with the primary goal of educating them about kidney function, risk factors for kidney diseases, and the importance of early lifestyle modifications.

Activity Overview:

The outreach was conducted via a **Google Form** that consisted of **14 multiple-choice questions (MCQs)**. These questions were carefully designed to assess and enhance the students' understanding of:

- **Basic kidney functions** and their role in the human body
- **Common co-morbidities** like **Diabetes Mellitus** and **Hypertension** that increase the risk of kidney disease
- **Family history** of such conditions and its implication on personal health risk
- **Preventive strategies and lifestyle modifications** to reduce the risk of kidney diseases

Some questions allowed **multiple correct answers**, and the questionnaire also included a few **"golden rules"** for kidney health prevention.

Purpose and Motto:

The primary objective of this initiative was to instill awareness about kidney health at an early age. By understanding how family history and lifestyle choices affect long-term health, children were encouraged to adopt healthy habits, undergo regular health check-ups, and motivate their families towards preventive care.

Outcome and Engagement:

Upon completion of the quiz, students received **instant feedback** with:

- The number of correct responses
- **Correct answers with brief explanations** about diabetes, hypertension, diabetic kidney disease, and the importance of lifestyle changes and family screening

This format ensured that even if students selected incorrect answers, they gained valuable knowledge by the end of the activity.

The outreach received an **overwhelming response**, with **297 students participating**. A majority of the responses demonstrated a good understanding of the topics, indicating the effectiveness of the questionnaire as both an evaluative and educational tool.

BRANCH :
LUCKNOW ZONE 60-(A)

Date: 16-04-2023

To
Head of Department,
Department of Transfusion Medicine/ Blood Bank
King George's Medical University
Lucknow, UP

Subject: Regarding organising Blood Donation Camp at Sant Nirankari Satsang Bhawan, ID Sringer Nagar, Alambagh, Lucknow.

Dear Sir/ Madam
Greetings

1. Sant Nirankari Mission (SNM) is a spiritual movement that believes in self-realisation through God realisation. SNM believes that the goal of universal brotherhood, with love and peace can only be achieved through spiritual awakening of mankind by the means of God-Knowledge.

2. Besides spiritual awakening SNM also carried out social welfare activities like Blood donation camps, cleanliness drives and tree plantation, thus rendering social services to mankind in the fields of health, education and human development, without any consideration of caste, religion, creed, colour, culture or nationality. Since 1986, SNM has been organising blood donation camps in different parts of the world. This year SNM is also organising a **Pan India Mega Blood Donation Camp** in different parts of the world.

3. In this context, it is humbly requested to kindly depute a team of doctors and other support staff for organising a **BLOOD DONATION CAMP** at Sant Nirankari Satsang Bhawan, ID Sringer Nagar, Alambagh, Lucknow on **23rd April 2023** from **10 am to 2 pm**, in which around **100** volunteers are ready to donate their blood for the service of mankind.

Thank You,

camp time, 9 AM to 2 PM
Dr. Adesh Kumar
9838104546

Yours Sincerely,
Ritesh Tandon

CAMP REPORT

Venue : G.S.M Public School, Sarojni Nagar, Lucknow

Date : 06/05/24

Camp in Charge : Dr. Sumit Kumar

PhD Scholar : Dr. Nishita Kankane

Junior Resident : Dr. Sifpsa Diwakar

Interns : Dr. Ritu Rajput, Dr. Ritul Verma, Dr. Surotsala

Supporting Staff : Sunny

Organized through: FODS, KGMU, Lucknow

REPORT:

Time: 10:00 AM to 1:00 PM

Camp Activities:

Oral Screening: 99 students (50 females, 49 males) were screened; 61 students were referred to Sarojni Nagar PHC.

Oral Health Education: Proper brushing technique instructions and good oral hygiene habits were promoted through pamphlets to all students and teachers who attended the camp.

Commemoration of World No Tobacco Day: Interactive lecture involving multiple activities was conducted among students and teachers to sensitize them for choosing a tobacco free life under “Choose Health by Avoiding Tobacco” (CHAT) program.

Through posters, information about the health risks of tobacco, harmful ingredients of tobacco, second hand smoke, Do's and Don'ts for leading a tobacco free life, and the benefits of quitting were emphasized upon. Copies of the posters were affixed onto students' notebooks to make the session more retaining.

The session ended with “No Tobacco Pledge” and at the end of session, feedback was collected from students and teachers through forms.

FACULTY OF DENTAL SCIENCES
DEPARTMENT OF PUBLIC HEALTH DENTISTRY
BIRSA MUNDA JAYANTI
NOVEMBER 16, 2024

Program Report

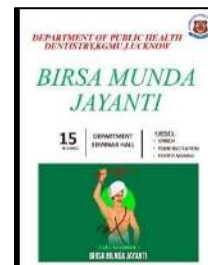

On 15th November, the Department of Public Health Dentistry at King George's Medical University (KGMU) organized an event to commemorate Birsa Munda Jayanti, celebrating the life and legacy of Birsa Munda, a tribal freedom fighter and social reformer. The event aimed to honor his contributions to the struggle for tribal rights and his pivotal role in India's fight for independence.

Interns and Junior Residents from the department delivered speeches on Birsa Munda's vision of social justice, highlighting his efforts to protect the rights and identity of tribal communities. The speakers elaborated on his leadership in the Indian independence movement and his dedication to empowering indigenous populations through education and social reforms. The session included an interactive discussion, where attendees reflected on the relevance of Birsa Munda's values in today's society and the ongoing challenges faced by tribal communities.

The event also featured a speech competition for interns and junior residents focused on Birsa Munda's legacy, with participants exploring his role in the tribal empowerment movement.

The winners of the competition were announced as Dr. Amit (First Prize) and Dr. Satiksha (Second Prize).

Additionally, there was poem recitation and poster-making by interns also to further engage participants in honoring Birsa Munda's contributions. This celebration not only honored Birsa Munda's legacy but also served as a reminder of the enduring importance of social equity and the protection of tribal rights.

REPORT:

On 26.11.24 an awareness program was organized at Bhikampur, Madarsa, Lucknow by Centre of Excellence for Adolescent Health & Development (Sathiya Clinic), Queen Marry Hospital, King George Medical University Lucknow, in joint collaboration with National Health Mission (U.P Govt.) & MAMTA Health Institute for Mother and Child, New Delhi.

An outreach activity on breast cancer and cervical cancer was conducted to raise awareness among young females about these significant health issues.

The session was led by Dr. Sujata Deo (Professor, Gynaecologist) and Counselor Saumya, guiding adolescents on health-related topics. The program aimed to educate the participants about the symptoms, prevention, and early detection methods for breast and cervical cancers, empowering them to take proactive measures for their health.

The session commenced with an introduction by Dr. Sujata Deo, who explained the importance of understanding breast and cervical cancers. She highlighted how early detection can save lives and emphasized the need to overcome social stigma and fear associated with these diseases.

Participants were taught the technique of self-breast examination (SBE) through a step-by-step demonstration.

Dr. Sujata emphasized performing SBE monthly and consulting a doctor immediately if any abnormalities were detected. Additionally, the importance of maintaining a healthy lifestyle, including a balanced diet, regular exercise, and avoiding harmful habits, was stressed to reduce the risk of breast cancer. The role of Human Papillomavirus (HPV) in causing cervical cancer.

Symptoms such as abnormal vaginal bleeding, pelvic pain, and unusual discharge.

Aradhana
Registrar
King George Medical University
Lucknow

The significance of HPV vaccination as a preventive measure.

She discussed the importance of routine Pap smears for early detection of precancerous changes in the cervix. The participants were reassured that these preventive measures are simple, effective, and widely available.

The session was interactive, with participants asking insightful questions about cancer prevention and detection. Myths and misconceptions were addressed, creating an open and supportive environment. The students and staff were particularly curious about the availability of HPV vaccines and the accessibility of regular screenings.

The program left a profound impact on the participants, equipping them with essential knowledge and practical tools to safeguard their health. Many expressed their determination to practice self-breast examinations and spread awareness in their families and communities. The madrasa authorities praised the initiative and emphasized the need for regular health sessions to foster a well-informed community.

Conclusion:

The outreach activity was a resounding success in achieving its goals. By creating awareness and addressing misconceptions, the session empowered the participants to take charge of their health. This event marked a significant step towards breaking taboos surrounding women's health issues in the community and highlighted the importance of preventive care.

uate
-being.

Following the health screenings, Counselor Saumya and Dr. Sujata Deo conducted interactive sessions on the following topics:

The importance of maintaining a balanced diet rich in essential nutrients was emphasized, with a special focus on incorporating iron and calcium to combat deficiencies like anemia. Practical tips were shared, including affordable and accessible food options, encouraging participants to adopt healthier dietary habits.

This session aimed to break the silence surrounding menstruation, promoting awareness about menstrual hygiene practices. Dr. Sujata highlighted the significance of using sanitary napkins, maintaining cleanliness, and dispelling myths associated with menstruation. Attendees were encouraged to openly discuss their concerns, fostering a safe and supportive environment.

The importance of personal hygiene in preventing infections and maintaining overall health was discussed. Demonstrations on proper hand washing techniques and tips for daily hygiene were shared, encouraging participants to adopt simple yet effective practices.

To further support menstrual hygiene, sanitary napkins were distributed to all participants. This initiative aimed to reduce the challenges faced by women and girls in accessing menstrual hygiene products, especially in underserved areas.

The camp saw enthusiastic participation from women and adolescent girls, who actively engaged in the sessions, asked questions, and shared their experiences. The interactive nature of the program ensured that the key messages were well understood and appreciated by the attendees.

Outcome:

The outreach activity successfully created awareness about essential health topics, empowering women and girls to take charge of their health. The combination of health screenings, informative sessions, and the distribution of sanitary products contributed to a holistic approach to promoting preventive healthcare.

By addressing critical issues such as anemia, menstrual hygiene, and overall health, the event left a positive and lasting impact on the community, reinforcing the importance of regular health checkups and healthy living practices.

REPORT ON BODY DONATION AWARENESS PROGRAM

The Anatomy Department of KGMU organized Body Donation Awareness Program "Yug Dadheechi Deh Daan Abhiyaan".

The first donated body came to the Department of Anatomy in the year 1993. The body donation program paced up in the year 2001 with the help of "Gayatri Parivaar", when Dr. Ashok Sahai along with other colleagues of the department started taking lectures for the awareness of body donation in the nearby rural & urban areas. Since then, many people of different caste & creed have been coming to the department for filling the body donation forms and getting their bodies registered for donation to the Department of Anatomy, KGMU UP for teaching, learning and research purposes.

The form is filled in duplicate and is signed by the spouse or children (near & dear ones) so that at the time of death, the body can be donated to the medical college without any problems.

The body donation form is available on the official KGMU website.

From the year 2017 to 2021, total 621 bodies are registered for donation.

This activity was conducted in collaboration with the National Medicos Organisation (NMO), Awadh Prant and Gorakh Prant, whose support was instrumental in facilitating coordination with local schools. Approximately 400 participants were involved, with all procedures adhering to ethical and biosafety standards. No awards were associated with the activity. The document is to be signed and stamped by Dr. Nitu Nigam, Additional Professor, Cytogenetics Lab, CFAR, KGMU.

8. MDA for filariasis

Mass Drug Administration (MDA) for filariasis is a public health initiative aimed at eliminating lymphatic filariasis, a parasitic disease transmitted by mosquitoes. MDA involves the annual distribution of antifilarial medications such as Diethylcarbamazine (DEC) and Albendazole to entire at-risk populations, regardless of infection status. These medicines help kill the microfilariae in the blood, interrupting the transmission cycle. The programme relies on community participation, proper awareness, and consistent implementation over several years to be effective. By taking the prescribed dose during MDA campaigns, individuals not only protect themselves but also contribute to eliminating filariasis from their communities and the country.

13. Mobile health clinic

Dated :2022

King George's Medical University (KGMU) launched a Mobile Health Clinic initiative to bring healthcare services directly to underserved communities. The mobile clinic, equipped with essential medical tools, traveled to rural and remote areas, offering free consultations, diagnostic tests, vaccinations, and basic treatments. It aimed to provide immediate healthcare access to those unable to visit hospitals due to distance or financial constraints. Doctors and medical staff from KGMU provided expert care, focusing on preventive health, maternal care, and chronic disease management. The initiative fostered health awareness, reducing healthcare disparities and improving community health through convenient and accessible medical services.

14. Rabies Awareness week

Dated :2022

King George's Medical University (KGMU) observed Rabies Awareness Week to educate the public about the dangers of rabies, prevention methods, and the importance of timely medical intervention. The week featured informative talks, workshops, and free rabies vaccinations for pets. Medical professionals highlighted the significance of post-exposure prophylaxis (PEP) following animal bites and the need for immediate care. The program also focused on responsible pet ownership and the role of community awareness in controlling the disease. Through posters, pamphlets, and community outreach, KGMU aimed to reduce rabies cases, promote early treatment, and empower the public with life-saving knowledge.

15. Anti-Dengue Campaign

Dated:2022

King George's Medical University (KGMU) launched an Anti-Dengue Campaign to combat the growing threat of dengue fever. The campaign focused on educating the community about preventing mosquito breeding by eliminating stagnant water in and around homes. Health experts conducted awareness sessions on the symptoms, transmission, and importance of early diagnosis and treatment. Volunteers distributed pamphlets and posters to highlight preventive measures like using mosquito nets, repellents, and wearing protective clothing. KGMU also collaborated with local authorities for widespread fogging and sanitation drives. The campaign aimed to reduce dengue cases, promote health awareness, and encourage proactive community participation in prevention efforts.

25. Post MDA Coverage Evaluation Survey at Bani, Dadupur, Pahadpur and Sikandarpur village

Post-MDA Coverage Evaluation Survey was conducted at Bani to assess the effectiveness of the recent Mass Drug Administration campaign for lymphatic filariasis. The survey aimed to evaluate drug coverage, community compliance, and awareness about the MDA programme. Health officials and trained surveyors visited households to collect data on the number of people who received and consumed the antifilarial drugs. Community feedback was also recorded to identify gaps in drug distribution or communication. The survey results help improve future MDA rounds, ensuring better coverage and compliance. Such evaluations are crucial for achieving the goal of eliminating filariasis in endemic areas like Bani.

26. Post MDA Coverage Evaluation Survey at Mullahikheda, Darogakheda, Natkur

A Post-MDA Coverage Evaluation Survey was conducted in the villages of Mullahikheda, Darogakheda, and Natkur to assess the reach and effectiveness of the recent Mass Drug Administration (MDA) for lymphatic filariasis. Health teams visited households to verify the number of individuals who received and consumed the antifilarial drugs, including DEC and Albendazole. The survey aimed to identify coverage gaps, reasons for non-compliance, and public awareness levels. Community participation and feedback were crucial for evaluating the programme's success. The findings will help strengthen future MDA rounds, ensuring better coverage and moving closer to the goal of filariasis elimination in these areas.

30. A NMC visit was held at Alambagh for our Family Adoption Program

National Medical Commission (NMC) visit was conducted at Alambagh as part of our Family Adoption Program. The team assessed the implementation, documentation, and overall impact of the program on community health. Students and faculty actively participated, showcasing their regular visits, health education sessions, and support provided to adopted families. The NMC officials appreciated the structured approach, student involvement, and the positive outcomes observed in the community. This visit not only highlighted our commitment to community medicine but also motivated us to strengthen our efforts further. It was a proud moment reflecting our dedication to public health and service

31. Health Camp organized by NMO

Dated :2022

A Health Camp was organized by the National Medicos Organisation (NMO) at King George's Medical University (KGMU) to provide free healthcare services to underserved communities. The camp offered general health check-ups, consultations, and screenings for common illnesses like diabetes, hypertension, and anemia. Doctors, interns, and volunteers from KGMU actively participated, ensuring quality care and spreading health awareness. Educational sessions on hygiene, nutrition, and preventive healthcare were also conducted. Medicines were distributed free of cost, and referrals were made for advanced treatment when necessary. The initiative reflected NMO and KGMU's commitment to community service, health equity, and promoting a healthier society.

33. Outreach activities (information on Millets, Quiz, Role Play) on occasion of POSHAN MAAH in Dadupur village

As part of POSHAN Maah celebrations, outreach activities were conducted in Dadupur village to raise awareness about nutrition and healthy eating. The event focused on the benefits of millets, highlighting their nutritional value and role in a balanced diet. Informative sessions were held, along with engaging activities like a nutrition-themed quiz and a role play performed by students, emphasizing the importance of proper nutrition, especially for mothers and children. Community members participated enthusiastically, showing great interest in adopting healthier food habits. The event successfully spread awareness and promoted the key messages of the POSHAN Abhiyaan in an interactive manner.

34. Road Safety Awareness Programme

A Road Safety Awareness Programme is vital to educate people about the importance of following traffic rules and regulations. It aims to reduce road accidents, injuries, and fatalities by promoting safe driving habits, use of seatbelts, helmets, and avoiding distractions like mobile phones while driving. These programmes also highlight the dangers of speeding, drunk driving, and jaywalking. Schools, colleges, and workplaces often conduct workshops, rallies, and demonstrations to spread awareness. By encouraging responsible behavior among drivers, pedestrians, and cyclists, road safety initiatives help build a culture of caution and respect on the roads, ultimately saving lives and ensuring safer travel for all.

59. World No Tobacco Day Poster Competition

join us in raising awareness about the harmful effects of tobacco! Take part in our World No Tobacco Day Poster Competition and showcase your creativity. This year's theme focuses on the importance of protecting youth from tobacco and promoting a healthier, smoke-free future. Use your artistic skills to inspire change and spread the message of quitting tobacco. Prizes will be awarded for the most impactful and creative posters. Open to all age groups. Let's unite to fight tobacco and save lives!

60. Blood donation

Dated :2023

A blood donation camp was organized by the Department of Transfusion Medicine at King George's Medical University, U.P., Lucknow, on 13th March 2018. During the event, a unit of A+ blood was donated, and an appreciation certificate was awarded for the contribution. The initiative aimed to raise awareness about the importance of voluntary blood donation. It encouraged students, residents, and faculty members to participate actively in such life-saving activities. The event highlighted the noble message: "Donate Blood, Save Life," inspiring many to support the cause and contribute to the well-being of others.

147th Birth Anniversary of Sardar Vallabhbhai Patel"
Speech Competition
Date: 31st October 2022

61. 147 birth anniversary sardar vallabhbhai patel speech competition /poster or slogan

The 147th birth anniversary of Sardar Vallabhbhai Patel is a moment to honor the legacy of the “Iron Man of India.” Born on October 31, 1875, Patel played a vital role in uniting over 560 princely states into a single nation after India’s independence. A key leader in the freedom movement, he was admired for his courage, leadership, and firm resolve. As India’s first Deputy Prime Minister and Home Minister, he laid the foundation of a strong and united India. On this day, we remember his immense contributions and pledge to uphold the unity and integrity of our great nation

"Awareness program" (Climate Change)
Slogan Competition on the topic of Climate change
Date: 26-May-2023

62. Awareness program(climate change)

Dated :26/05/2023

A climate change awareness program plays a vital role in educating communities about the urgent need to protect our planet. These programs highlight the causes and effects of global warming, such as rising temperatures, melting glaciers, extreme weather, and sea-level rise. Through workshops, campaigns, and interactive sessions, people learn how human activities like deforestation, pollution, and excessive carbon emissions contribute to climate change. The goal is to encourage eco-friendly habits like recycling, conserving energy, and using renewable resources. By spreading awareness, we empower individuals to take meaningful action and work together to build a sustainable, greener, and healthier future for all.

63. World environment day

Dated :05/06/2023

World Environment Day, celebrated every year on June 5th, is a global event dedicated to raising awareness and encouraging action for the protection of our environment. Led by the United Nations, it highlights critical issues such as pollution, climate change, deforestation, and biodiversity loss. Each year focuses on a specific theme, urging individuals, communities, and governments to take meaningful steps toward a sustainable future. From tree planting to clean-up drives, people across the world unite to show their commitment to the Earth. World Environment Day reminds us that caring for nature is not just a responsibility, but a necessity for survival.

SADAK SURAKSHA PAKHWADA (17-07-23 TO 31-07-23) (ROAD SAFETY WEEK) 28.07.2023

64. Sadak Suraksha pakhwada (road safety week)

Dated :28/07/2023

Road safety awareness is crucial for reducing accidents and saving lives. It educates people about traffic rules, safe driving practices, and responsible behavior on roads. Awareness programs emphasize the importance of wearing seat belts, helmets, obeying speed limits, and avoiding distractions like mobile phones while driving. They also highlight the dangers of drunk driving and the need for pedestrian safety. Schools, communities, and governments conduct campaigns, workshops, and rallies to spread this vital message. By promoting road safety awareness, we encourage safer habits and a culture of responsibility, helping to make roads safer for drivers, passengers, and pedestrians alike.

Paediatrics dental camp

A paediatrics dental camp is an important initiative aimed at promoting oral health among children. These camps provide free dental check-ups, treatments, and awareness sessions in a friendly, child-focused environment. Dentists educate kids and parents about proper brushing techniques, healthy eating habits, and the importance of regular dental visits. Early detection of cavities, gum problems, and other dental issues helps prevent long-term complications. Fun activities and interactive sessions make learning enjoyable for children, reducing their fear of dentists. Paediatric dental camps play a vital role in building healthy smiles and encouraging lifelong oral hygiene habits from an early age.

A **paediatrics dental camp** is an important initiative aimed at promoting oral health among children. These camps provide free dental check-ups, treatments, and awareness sessions in a friendly, child-focused environment. Dentists educate kids and parents about proper brushing techniques, healthy eating habits, and the importance of regular dental visits. Early detection of cavities, gum problems, and other dental issues helps prevent long-term complications. Fun activities and interactive sessions make learning enjoyable for children, reducing their fear of dentists. Paediatric dental camps play a vital role in building healthy smiles and encouraging lifelong oral hygiene habits from an early age.

67. School Health camp

A **health camp** is a temporary medical facility set up to provide healthcare services to underserved communities, especially in rural or remote areas. These camps are typically organized by healthcare organizations, non-governmental organizations (NGOs), or government bodies to address the lack of access to medical facilities.

Key Features:

- **Services Offered:** Health camps provide a range of services, including general medical check-ups, vaccinations, dental care, eye care, maternal and child health services, and screenings for diseases such as diabetes and hypertension. They also focus on health education, raising awareness about hygiene, nutrition, and preventive healthcare practices.
- **Accessibility:** These camps are often set up in areas where healthcare facilities are scarce, ensuring that medical care reaches those who need it the most.
- **Cost-Effectiveness:** Health camps are usually free or charge a nominal fee, making healthcare accessible to individuals who may not afford regular medical services.
- **Community Engagement:** They play a vital role in raising health awareness, promoting preventive measures, and encouraging communities to seek regular medical care.

69. Telemedicine

Telemedicine is a modern healthcare service that allows patients to consult doctors remotely using digital technology. It offers medical advice, diagnosis, and treatment through video calls, phone calls, or online platforms, eliminating the need for in-person visits. Telemedicine is especially beneficial for people in rural or remote areas, those with mobility issues, or during emergencies like pandemics. It helps save time, reduces travel costs, and ensures timely access to healthcare. Patients can receive follow-up care, mental health support, and even prescriptions online. Telemedicine is transforming healthcare by making it more accessible, efficient, and patient-friendly across all age groups and regions.

70. Mobile cancer detection unit

A mobile cancer detection unit is a specialized vehicle equipped with advanced medical technology to screen for cancer in remote or underserved areas. These units provide early detection services such as mammograms, ultrasounds, and blood tests, helping to identify cancer at a treatable stage. Staffed by trained healthcare professionals, they bring essential diagnostic care to populations with limited access to hospitals or clinics. By reducing travel barriers and increasing awareness, mobile units play a vital role in public health outreach, especially in rural communities. Their mobility and convenience contribute significantly to early diagnosis, timely treatment, and improved survival rates.

71. Telemedicine

Telemedicine is the use of digital communication technologies to provide healthcare services remotely. It allows patients to consult with doctors via video calls, phone, or online platforms, reducing the need for physical visits. Especially useful in rural and underserved areas, telemedicine improves access to medical care, saving time and travel costs. It supports diagnosis, treatment, follow-ups, and even mental health counseling. During the COVID-19 pandemic, telemedicine played a crucial role in ensuring continuity of care. As technology advances, telemedicine continues to expand, making healthcare more accessible, efficient, and patient-centered while bridging the gap between patients and healthcare providers.

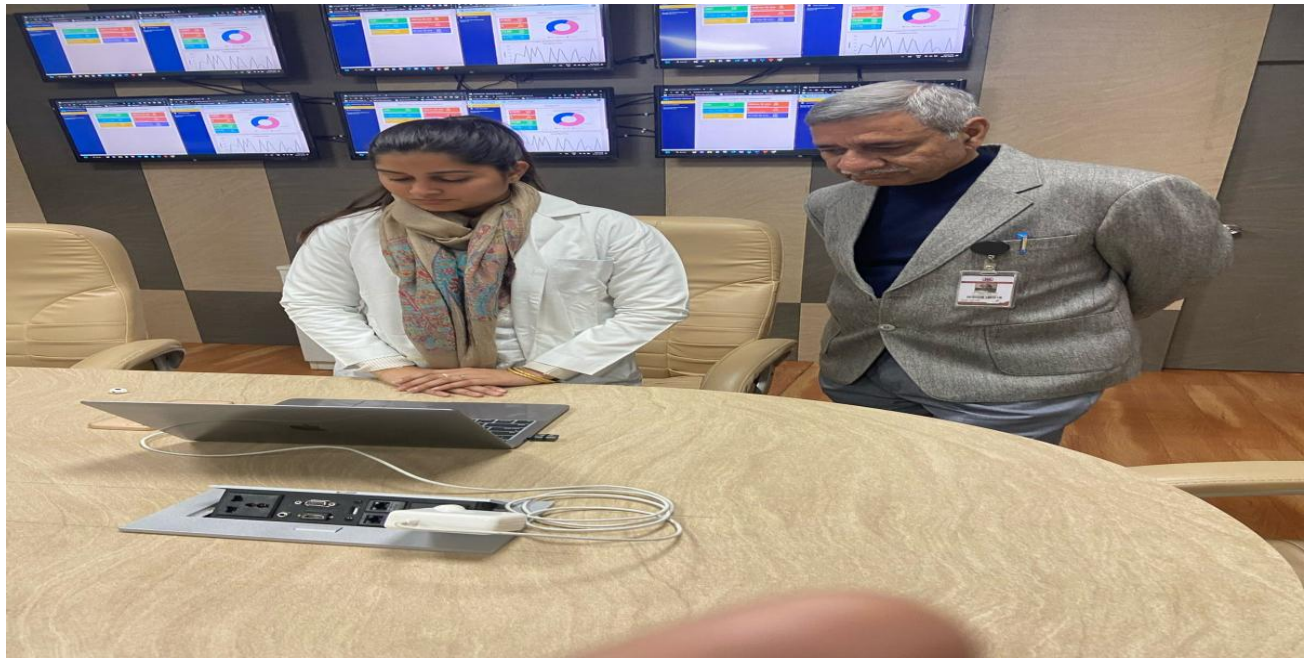

72. Tele medicine consultancy HealthRADAR initiative

The **HealthRADAR** initiative is a telemedicine platform developed by **Evolko Systems** to enhance chronic care management and remote patient monitoring. Designed to bridge the healthcare accessibility gap, especially in rural and underserved areas, HealthRADAR enables patients to record vital health parameters such as blood pressure, temperature, pulse, and oxygen levels using a mobile app. Doctors receive alerts for any abnormal readings, allowing them to provide timely interventions, prescribe medications, and schedule follow-up appointments remotely. This system has been instrumental in improving patient outcomes, increasing doctor-patient engagement, and reducing healthcare costs by minimizing the need for physical visits .

73. Tele-education

tele-education is the delivery of educational content and instruction through digital platforms, enabling learning from a distance. It uses tools like video conferencing, online courses, and virtual classrooms to connect teachers and students regardless of location. Especially beneficial in remote and underserved areas, tele-education promotes equal access to quality education. It supports various formats including live lectures, recorded sessions, and interactive discussions. During the COVID-19 pandemic, tele-education became essential in maintaining academic continuity. With advancements in technology, it continues to evolve, making education more flexible, inclusive, and accessible while encouraging self-paced and lifelong learning across all age groups.

74. International Telemedicine Network

An **International Telemedicine Network** connects healthcare providers and patients across borders using digital technologies, enhancing access to medical services worldwide. Organizations like the **International Society for Telemedicine & eHealth (ISfTeH)** facilitate global collaboration by disseminating knowledge, supporting national telemedicine organizations, and organizing international events .

Subject: Regarding organising Blood Donation Camp at Sant Nirankari Satsang Bhawan, 1D Sringer Nagar, Alambagh, Lucknow.

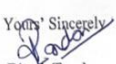

Dear Sir/ Madam
Greetings

1. Sant Nirankari Mission (SNM) is a spiritual movement that believes in self-realisation through God realisation. SNM believes that the goal of universal brotherhood, with love and peace can only be achieved through spiritual awakening of mankind by the means of God-Knowledge.

2. Besides spiritual awakening SNM also carried out social welfare activities like Blood donation camps, cleanliness drives and tree plantation, thus rendering social services to mankind in the fields of health, education and human development, without any consideration of caste, religion, creed, colour, culture or nationality. Since 1986, SNM has been organising blood donation camps in different parts of the world. This year SNM is also organising a **Pan India Mega Blood Donation Camp** in different parts of the world.

3. In this context, it is humbly requested to kindly depute a team of doctors and other support staff for organising a **BLOOD DONATION CAMP** at Sant Nirankari Satsang Bhawan, 1D Sringer Nagar, Alambagh, Lucknow on 23rd April 2023 from 10 am to 2 pm, in which around 100 volunteers are ready to donate their blood for the service of mankind.

Thank You,

Yours Sincerely,

RefNo: BC_BB_2023_057 Date: 30.07.2023

To,
Dr. Tulika,
Head of the Department, Transfusion Medicine,
King George's Medical University, Lucknow.

Subject: Proposal for organising a Blood Donation Camp on 14th August, 2023 at
Dr. Ram Manohar Lohiya National Law university, Lucknow.

Dear Ma'am,

Bloodconnect is a non-profitable organisation that endeavors to remove the shortage of blood in India. It was an initiative of some students of IIT-D, started in 2010. It now spans over almost all major cities of India. The Lucknow chapter of Bloodconnect has been regularly organising blood donation camps with various government blood banks in India. It has previously organised blood donation camps with various institutes like Institute of Engineering and Technology, Lucknow, Amity University and offices like Larsen and Toubro, Future Generali Life Insurance Company etc.

We now propose to organise a blood donation camp at Dr. Ram Manohar Lohiya National Law University, Lucknow on 14th August, 2023. The donations will take place in an air-conditioned room which will be provided by us. The camp details are as follows:

complete 14 August 2023
Venue: Dr. Ram Manohar Lohiya National Law University
Timings: 11:00 am - 3:00 pm camp Time - 11 AM to 2 PM
Expected number of donations: 60-70.

A team of doctors is requested from your institution for the same. Volunteers from BloodConnect will be there to assist in the organization of the camp. We are glad for your cooperation. Blood donation is a noble cause.

Thanking You,

Abdul Haseeb

105.Awareness Campaign to Prevent Oral Cancer Held at Vidya Kanya PG College, Urmoor on 05-08-2022

An awareness program was organized on Friday at Vidya Kanya PG College, Urmoor, focusing on the causes, symptoms, and prevention of oral cancer. The goal was to educate people about this serious disease and how to prevent it.

Chief guest Prof. Dr. Vibha Singh from KGMU, Lucknow, gave detailed insights into oral cancer, emphasizing its link to the consumption of tobacco and pan masala. She explained that oral cancer often begins in the inner cheeks, tongue, or throat, and symptoms may include persistent sores, red or white patches, and pain during eating or speaking.

She strongly advised avoiding tobacco and areca nut products and stressed the importance of early detection. If diagnosed early, oral cancer is treatable.

106. Oral Health Awareness and Screening Camp – Behtamujawer, Uttar Pradesh

An oral health screening and awareness activity was conducted on 13th February 2023 at Behtamujawer, Uttar Pradesh,

As a part of the outreach initiative to educate rural communities about oral hygiene and early detection of oral diseases. The team of Dr U S Pal conducted thorough examinations, with a special focus on identifying early signs of oral cancer and other mucosal lesions.

The GPS-tagged photo captures the on-site interaction between healthcare professionals and local residents. The session involved direct screening, patient education on harmful habits such as tobacco use, and guidance for follow-up treatment where necessary.

The presence of medical staff, including a clinician performing an oral examination, highlights the commitment to community engagement and preventive healthcare. This initiative plays a vital role in bridging the gap between urban medical facilities and rural populations.

131.Free Meal Distribution to caregiver

As part of the community outreach initiative, free meals were distributed to caregivers of chronically ill and elderly patients in rural areas. The activity was conducted to acknowledge the selfless efforts of caregivers who often remain neglected despite their crucial role in patient care. Organized under the guidance of healthcare professionals, the event aimed to offer both nutritional support and emotional encouragement. The gesture was well-received and highlighted the importance of compassion and community support in healthcare.

Smokeless Vehicle

133. A **smokeless electric patient transport vehicle** was inaugurated at **King George's Medical University (KGMU), Lucknow**, aimed at promoting eco-friendly practices within the hospital premises. The vehicle, donated under a CSR initiative, supports sustainable healthcare by reducing carbon emissions and providing safe, quiet patient transfers. Faculty, staff, and donors attended the launch ceremony, emphasizing the institution's commitment to green healthcare solutions. This step aligns with environmental responsibility while enhancing patient convenience and comfort.

Cancer Awareness Session

134. On the occasion of **World Cancer Day (4th February 2023)**, a **cancer awareness session** was conducted in collaboration with the **Raktpushp Charitable Foundation** and the **Department of Radiotherapy, KGMU**. The event focused on educating the public about early detection, prevention, and treatment options for cancer. Participants were provided with informative materials and addressed by healthcare experts. The session emphasized lifestyle changes, timely screenings, and the importance of awareness in reducing cancer-related mortality

The event promoted cultural unity and the spirit of togetherness, with messages of positivity and well-being. The celebration served as a joyful break, reinforcing the importance of cultural events in creating a harmonious work environment.

136.Awareness generation program Menstrual Hygiene , Sanitation , Nutrition - 18th october 2022

PLACE: CMS SCHOOL, GOMTI NAGAR LUCKNOW

- Awareness meetings/workshop were conducted in collaboration with CMS in the CMS School, Gomti Nagar Lucknow, branch in this month. Theme of the October month was nutrition decide by RKSK, NHMUP. Sessions/meetings were started from welcoming of all the participants (Girls) and giving a small introduction of COE-AHD and briefly explained about services provided at COE-AHD, KGMU Lucknow.
- Doctor Sujata Dev told that the onset of menstruation is a sign of sexual health in a girl and a woman. There are many misconceptions related to menstruation in the society, due to which many problems have to be faced. Ignoring these misconceptions, we should adopt healthy behaviours. Special care should be taken of cleanliness during menstruation.
- During the session Dr. Vandana Solanki told that special care should be taken of nutrition in adolescence because physical and mental development takes place in this stage and menstruation also starts, in such a situation we need more and more nutritious food. Along with this, we should also take care of hygiene and wash our hands with soap every time before eating.
- After discussion, feedback from participants was taken by the counsellor and given thanks to girls for active participation in the program. Total 615 Girls and teacher were participated in the meetings/workshop.

Subj:- Request of participation as a panellist in Panel Discussion in Queer Eve event

Dear Sir,

Suramya Life Foundation is organizing a **Queer Eve**, an event for the community on 4th Sept 2022. The purpose of this event is to provide a platform to the community individuals to showcase their hidden talents, create a safe space where they can express their identities. The event encourages them to meet and interact with like-minded allies, while being themselves.

The Queer Eve will have multiple events, which will have active participations from the community only. We will be inviting eminent personalities from the community as well. Other eminent personalities from the different field like education, medicine etc will be invited to bless the event.

In order to make this programme possible and successful your assistance is highly appreciated. We request your presence and confirmation to participate in the Panel Discussion on Mental & Emotional Health.

It will be a wonderful opportunity to extend our hands and reach out to the LGBTQIA+ community to create an inclusive atmosphere.

Thank you once again for your support.

Kind Regards

विषय - टीम इंसानियत ब्लड डोनेशन द्वारा आयोजित रक्तदान शिविर कार्यक्रम के संबंध में।

महोदय,

आपको अवगत कराना है कि टीम इंसानियत ब्लड डोनेशन द्वारा गंभीर बीमारी से पीड़ित गरीब, असहाय, लाचार और जरूरतमंद लोगों तथा बच्चों को खून देकर उनकी जान बचाने की कोशिश लगातार जारी है। इसी कड़ी में टीम इंसानियत ब्लड डोनेशन द्वारा एक बड़ा रक्तदान शिविर लगाया जा रहा है।

अतः आपसे सादर अनुरोध है कि इस रक्तदान शिविर में मुख्य अतिथि के रूप में आने की स्वीकृति प्रदान करने का कष्ट करें।

आयोजन का विवरण

अमर उजाला व यूनिसेफ जिंदगी मास्टर क्लास सीजन-2 के वेबिनार में विशेषज्ञों ने दिए तनाव प्रबंधन के टिप्स

चुनौतियों से लड़ें, दूसरों का दर्द समझें

लखनऊ। साहिल के सुकून से किसे इन्कार है, लेकिन तूफान से लड़ने में मजबूती और है...। ये चंद लाइनें नहीं बल्कि जानगी है उस जोश, जल्मे और धरोसे की जो युवाओं की कहानियों और विशेषज्ञों द्वारा दिए गए तनाव प्रबंधन के टिप्स का हिस्सा था। मौका था अमर उजाला जिंदगी मास्टर क्लास सीजन-2 के तहत मंगलवार को आयोजित वेबिनार का। मिशन मेंटल हेल्थ और कोविड की चुनौतियां विभाग पर आयोजित वेबिनार में लखनऊ, बरेली समेत विभिन्न जिलों के युवा प्रतिभागियों ने हिस्सा लिया। तनाव व चिंता प्रबंधन पर बताने के लिए मौजूद थे किंग जॉर्ज मेडिकल यूनिवर्सिटी के मानसिक रोग विभाग के डॉ. आदर्श त्रिपाठी और लखनऊ विश्वविद्यालय के मनोविज्ञान विभाग की असिस्टेंट प्रोफेसर डॉ. मानिनी अवस्थी। इस मौके पर युवा प्रतिभागियों ने कोविड के दौरान के अपने अनुभव, मानसिक तनाव और उस पर विजय पाने की कोशिशों के बारे में बताया।

तनाव प्रबंधन : कोशिश करें कि आपका रूटीन न टूटने पाए

परेशानियां आती हैं, तनाव बढ़ता है तो अक्सर हमारा रूटीन पट्टे से उतर जाता है। इससे दिक्कतें और बढ़ती हैं। अफसोस का तनाव बढ़ता है। सबसे पहली जरूरत है कि हम अपनी दिनचर्या को बनाए रखें। तनाव बढ़ने पर हमारे शारीरिक सेहत, खानपान प्रभावित होने लगता है और घनत्विक स्वास्थ्य पर गहरा असर पड़ता है। हमें मुश्किल घड़ी में कोशिश करनी है कि हमारा खानपान सही हो, खाली वक़्त में किताब पढ़ें, प्रयोजक सुनें, टहलें, एक्सरसाइज या योगा करें। डॉ. आदर्श त्रिपाठी कहते हैं कि समस्या के समाधान पर फोकस करें, हालात बदलते देर नहीं लगती है।

चिंता प्रबंधन : आज में जिएं, अपनी बातों को साझा करें

लखनऊ विश्वविद्यालय में मनोविज्ञान विभाग की असिस्टेंट प्रोफेसर डॉ. मानिनी श्रीवास्तव ने चिंता प्रबंधन पर बात की। उन्होंने कहा कि कोविड के माहौल में लोगों ने अपने को एक दूसरे में बांधा, जिससे चिंता पर लोगों का फोकस हो गया। सबसे पहली बात जो आज में जीने की कोशिश करें। दूसरा अपनी बातों को जरूर साझा करें। संवाद करें, चुप रहने से दिक्कतें बढ़ेंगी। समस्याओं का हल बात करने से निकलेगा। इसके अलावा खुद से पूछें कि परेशानी कहाँ है और क्यों है। इसके बाद समस्या का हल निकल आएगा।

कल रोजगार और कैरियर की बात

लखनऊ। कोविड ने रोजगार और कैरियर की चिंता बढ़ाई है। अब हमें आगे बढ़कर विकल्पों पर विचार करना है। बेहतर कैरियर का विकल्प चुनना है और रोजगार के अवसरों पर नज़र रखनी है। इस दिशा में विशेषज्ञों की सलाह युवाओं के काफी काम आएगी। अमर उजाला और यूनिसेफ इसी को ध्यान में रखते हुए रोजगार व कैरियर के विकल्पों पर बात करने के लिए 22 अक्टूबर को वेबिनार का आयोजन कर रहे हैं।

Jindagi Master Class – Season 2 is an inspiring series that explores real-life stories and lessons from remarkable individuals. Through heartfelt conversations and transformative journeys, it offers viewers wisdom, motivation, and practical guidance for personal growth. Season 2 deepens the impact, encouraging self-reflection, resilience, and a renewed perspective on life.

56.Erectile Dysfunction Swasthya plus Hindi 21/06/2021

Erectile Dysfunction (ED) is the inability to achieve or maintain an erection suitable for sexual activity. It can result from physical conditions like diabetes or heart disease, psychological factors such as stress or anxiety, or lifestyle habits. ED is common, especially with age, and is treatable with medication, therapy, or lifestyle changes.
