Institutional Ethics Committee Meeting,

OFFICE OF THE ETHICS COMMITTEE

Administrative Block

Minutes of 97th ECM held on 12th July, 2019

(Registration No.:ECR/262/Inst/UP/2013/RR-16)

Minutes of the ***"Institutional Ethics Committee"*** Meeting was held on **12th July, 2019 from 2.00 p.m. onwards** in the **'Board Room'**, Office of the Vice Chancellor, Administrative Block of this University.

The following members were present in the Meeting

1- Prof.S.P. S Gaur	*-Chairman*
2- Dr. Surajit Bhattacharya	*-Member*
3- Dr. Vimal Kumar Paliwal	*-Member*
4- Prof. Amita Jain	*-Member*
5- Prof. Rajendra Nath	*-Member*
6- Prof. A.A. Sonkar	*-Member*
7- Prof. Anoop Kumar Verma	*-Member*
8- Prof. Rajeev Garg	*-Member*
9- Prof. Balendra Pratap Singh	*- Member*
10- Prof. R. K. Garg	*-Member-Secretary, Ex-officio*

The following Members were not present:

1- Justice Hin'ble Vishnu Sahai	*- Member*
2- Dr. Manju Agrawal	*-Member*
3- Mr. Ram Niwas Jain	*-Member*
4- Dr. Preeti Agarwal	*-Member*

Institutional Ethics Committee Meeting,

OFFICE OF THE ETHICS COMMITTEE

Administrative Block

Minutes of 97th ECM held on 12th July, 2019

(Registration No.:ECR/262/Inst/UP/2013/RR-16)

I. (A) Action taken

IA	Action Taken on decisions of previous Ethics Committee Meeting
	Part (a) 91st ECM
a1	Clarification of research proposal entitled ***"Effect of magnesium sulphate as an additive to spinal anaesthesia in pre-eclampsia patients undergoing lower segment caesarean section: A randomized control trial"*** submitted by Dr. Vijay Bahadur JR-II, Department of Anaesthesiology of this University via letter no. nil dated 18-05-18. **EC Comment on 3rd August, 2018:** • This RCT involves intrathecal Mg injection with anesthesia. • Investigatotrs claim no side effect; however a new born and mothers in put eclampsia are the study population. • 70 patients of pre eclampsia will be targeted; through calculated sample size is 60. • CONSORT guidelines are not followed. • Data score sheet for measuring pain is to be provided. • Variable under study need to be listed. **EC Decision on 3rd August, 2018:** Revise & Re-submit ***The above clarification was forwarded to Dr. Amita Jain, reply received from Dr. Jain with following comments:*** • ***Consort is yet not followed. This is RCT should be allow. At one point investigator mention that no harm has been reported by using Mg. while and additive record its efficacy & this is for MD thesis.*** *The above comment send to the P.I. reponse received from P.I. which is again forwarded to you for your kind review, reply received from Dr. Jain & approved.* **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 91stII B-Thesis/P3*** ***(Primary Reviewer : Dr. Amita Jain)***
	Part (b) 92nd ECM
b1	Clarification of research proposal entitled ***"A prospective study of orbital floor reconstruction"*** submitted by Dr. Sneha Gupta, JRI, Department of Oral and Maxillofacial Surgery Faculty of Dental Sciences of this University via letter no. nil dated nil.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	EC Comment on 14th September, 2018: • There too many variable so, sample sizes seem to be low. **EC Decision on 14th September, 2018:** Approval after justification ***The aboe comment forwarded to the P.I. which was reviewed by Dr. R.K. Garg, Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 92nd ECM II B-Thesis/P9*** ***(Primary Reviewer: Dr. S.P.S. Gaur)***
	Part (c) 93rd ECM
c1	Clarification of research proposal entitled ***"Nanostring nCounter based screening for molecular typing and target based therapeutics of TNBC in the Indian population"*** sponsored by C.S.I.R., New Delhi submitted by Dr. Neetu Singh, Associate Professor, Department of Molecular Biology Unit, Center for Advance Research of this University by via letter no. CFAR/2018/176 dated 30th August, 2018. **EC Comment on 2nd November, 2018:** • Applicant is moving on to next step of validation as if she knows the answer to research question? • Primary objective is not defined. • Was Nano string, Ncounter used in previously studies? • If yes then review of literature is not appended? **EC Decision on 2nd November, 2018:** Provisionally approved ***The above proposal was already Provisionally approved in the last meeting.*** **EC Decision:** Approved ***Ref. code: 93rd ECM II A/P5*** ***(Primary Reviewer: Dr. A.A. Sonkar)***
c2	Clarification of research proposal entitled ***"Comparison of routine versus high dose antisnake venom in critically ill neurotoxic snake bite patients"*** submitted by Prof. Avinash Agrawal, Department of Critical Care Medicine of this University via letter no. nil dated nil. **EC Comment 2nd November, 2018:** • Point No. 8 Interaction is written in past tense as if the study has already been done. • Sample size – 50 disease samples and 50 age sex matched normal control. Was a statistician consulted to arrive at this sample size?

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• Data collection chart has not been included. What will be observed, over how long period of time in the two groups? • Have we assured the clinical safety of high dose of anti-snake venom? Where is the background literature and bibliography to support it? • Kindly submit as per CONSORT guidelines **EC Decision 2nd November, 2018:** Approval after justification ***Dr. Anoop Kumar Verma did not take part in the discussion*** ***The above comment forwarded to P.I. reply has given by P.I. which was forwarded to Dr. Surajit Bhattacharya, reply received from Dr. Bhattacharya with following comment.*** ***Comment:-*** ***In the first 6 months all patients will receive low dose ASV and in the next 6 months high dose. This is a bad study model. Snakes are seasonal and different types of snakes come out at different time of the year. Snakes are most active in the spring and autumn. Some snake species are highly seasonal in their activity; others are active all during the warm season, so this study design will not work. Both the limbs of the study have to be started simultaneously.*** ***Reply received from Dr. Avinash Agarwal which was forwarded to Dr. Surajit Bhattacharya, Response has given byDr. Bhattacharya & approved.*** **Action Taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 93rdECM II A/P17*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
c3	Clarification of research proposal entitled ***"A study of Paediatric tuberculosis cases in Lucknow"*** submitted by Dr. Ambrish Kumar Rai, JR-II, Department of Community Medicine & Public Health of this University via letter no. nil dated nil. **EC Comment on 10th May, 2019:** • Provide clear aim with objectives • Describe methods clarification on the title. • It is too "non-descriptive" • No CRF attached **EC Decision on 10th May, 2019:** Revise & Re-submit ***The aboe comment forwarded to the P.I. which was forwarded to Dr. Amita Jain, reply has given by Dr. Jain & approved.*** **ActionTaken:** Provisionally approved

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	EC Decision: Approved ***Ref. code: 93rd ECM II B-Thesis/P38*** ***(Primary Reviewer: Dr. Amita Jain)***
	Part (d) 95th ECM
d1	Clarification of research proposal entitled **"*Prosthetic satisfaction and body image among lower limb amputee of north Indian population*"** submitted by Dr. Sudhir Mishra, Assistant Professor, Department of Physical Medicine & Rehabilitation of this University by via letter no. 1235/18 dated 22nd November, 2018. **EC Comment on 22nd February, 2019:** • Title to be revised. It is Northern India and not North India. North Korea and South Korea, North Sudan and South Sudan are independent countries and hence their name is thus. Northern India is a part of India • The review of literature has no reference from this millennium. In the last two decades lower limb prosthesis have undergone quantum improvement and so a better and more recent literature review is needed • Objective is clear. Inclusion and exclusion criteria are acceptable • Why are patients using their prosthesis intermittently excluded? The prosthesis obviously did not improve their quality of life otherwise they would have used it regularly • It is a cross-sectional study • Sample size is derived statistically • Data collection sheet is very elaborate and thorough–clinic-demographic data, Revised Trinity Amputation and Prosthesis Experience Scale and Amputee Body Image Scale are in it. **EC Decision on 22nd February, 2019:** Approved after justification ***The above comment forwarded to P.I. reply has given by P.I. which was forwarded to Dr. Surajit Bhattacharya, reply received from Dr. Bhattacharya with following comment.*** ***Comment:-*** • ***Medical or surgical problem in the stump needs further clarification. As I understand, once the prosthesis has been fitted and then the amputee stops using it, it is a prosthesis failure. These patients have to be included and labeled failures otherwise we are planning to manufacture favorable results.*** ***The above comment forwarded to P.I. via letter no.843/Ethics/19 dated7th June, 2019,reply has not provided from Dr. Sudhir Mishra. Reply pending from P.I.***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	ActionTaken: None **EC Decision:** Pending ***Ref. code: 95th ECM II A/P2*** ***(Primary Reviewer: Dr.Surajit Bhattacharya)***
d2	Clarification of research proposal entitled ***"Success, survival and satisfaction for implant supported prosthesis in anterior region: a retrospective cross-sectional study"*** submitted by Prof. Pooran Chand, Head, Department of Prosthodontics, Faculty of Dental Sciences of this University by via letter no. nil dated. 10th January, 2019. **EC Comment on 22nd February, 2019:** Kindly clarify about study design: • As this the design of study is retrospective, have to taken the data (questionnaire) already with the consent of the patients? • How many years' retrospective data you will include in the study? • Kindly attach complete record sheet which will be used in this study. **EC Decision on 22nd February, 2019:** Approval after justification ***The aboe comment forwarded to the P.I. which was reviewed by Dr. R.K. Garg, Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 95th ECM II A/P19*** ***(Primary Reviewer: Dr. Balendra Pratap Singh)***
d3	Clarification of research proposal entitled ***"Demographic profile, etiology, clinical presentation and prognosis in patients with pericardial effusion in a tertiary care centre, north India"*** submitted by Dr. Akshyaya Pradhan. Associate Professor, Department of Cardiology of this University by via letter no. nil dated 12th January, 2019. **EC Comment on 22nd February, 2019:** • The study seems to be already over, if no, please tell when will first patient is this likely to be enrolled? **EC Decision on 22nd February, 2019: Not approved** ***The aboe comment forwarded to the P.I. reply has given by P.I.which was forwarded to Dr. Amita Jain, reply has given by Dr. Jain & approved.*** **ActionTaken:** Provisionally approved

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	EC Decision: Approved ***Ref. code: 95th ECM II A/P23*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
d4	Clarification of research proposal entitled ***"Urodynamic study in spinal cord injury patients- a cress sectional study"*** submitted by Dr. Chandan Sharma, JR-II, Department of Physical Medicine & Rehabilitation of this University via letter no. nil dated 26th November, 2018. **EC Comment on 22nd February, 2019:** • Study duration is not mentioned • When will first patient be enrolled in your study? **Study Design:-** • It is not a cross sectional study as mentioned in protocol. **Sample size:** • Arbitrary sample size is not acceptable for cross sectional study. • As suggestion is to redescible the protocols disenptive study. A sample size calculation may not be of much importance for descriptive studies. • Lot of data is proposed to be collected. What will be done with data plan for data analyesed is not mentioned, Include **EC Decision on 22nd February, 2019: Revise & Re-submit** ***The aboe comment forwarded to the P.I. reply has given by P.I. which was forwarded to Dr. Amita Jain, reply has given by Dr. Jain with following comment:*** ***Please re-submit the whole revised protocol.*** ***The above comment forwarded to P.I. response has given by P.I. which was reviewed by Dr. R. K. Garg & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 95th ECM II B-Thesis/P2*** ***(Primary Reviewer:Dr. Amita Jain)***
d5	Clarification of research proposal entitled ***"To study prevalence and association of microalbuminuria in chronic obstructive pulmonary disease patients"*** submitted by Dr. Mudit Kotwal, JR-II, Department of Medicine of this University via letter no. nil dated 28th November, 2018. **EC Comment on 22nd February, 2019:** Study duration is not mentioned. • When will first patient be enrolled in your study?

	Part (e) 96th ECM
e1	Clarification of research proposal entitled ***"Promoter methylation of DNA repair genes and correlation with treatment outcome in cervical cancer"*** submitted by Prof. Monisha Banerjee, Molecular and Himan Genetics Laboratory, Department of Zoology, Lucknow University, Lucknow sponsored by ICMR, New Delhi through Prof. Kirti Srivastava, Department of Radiotherapy of this University via letter no. nil dated 12th January, 2019. **EC Comment on 10th May, 2019:** • This is no justification to samole size • In consent form at place the potential funding agency is mentioned as ICMR-SRF scheme while at other it is DST. Hindi & English consent

Chairperson IEC
King George's Medical University
U.P., Lucknow

	forms are different. • Budget is not disclosed. **EC Decision on 10th May, 2019:** Approval after justification The aboe comment forwarded to P.I., reply has given by P.I. which was forwarded to Dr. Amita Jain response received from Dr. Jain & approved. **Action Taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P1*** ***(Primary Reviewer: Dr. Amita Jain)***
e2	Clarification of research proposal entitled ***"Study of severity of airflow limitation in treated post- TB COPD subjects in India"*** submitted by Prof. Suryakant, Department of Respiratory Medicine of this University via letter no. nil dated 29th January, 2019. **EC Comment on 10th May, 2019:** • Sample size is written as 1000. Is it achievable in the study duration of 6 months? How the sample size calculated? • Methods are not provided. A detailed elaboration of methods needs to be provided. In patient information document, the authors claimed that they will use a questionnaire prepared by RRNI (?). What is RRNI? What is the role of RRNI in this study? No questionnaire is provided for review of ethics committee. • Patient information document in English and Hindi are grossly deficient. The headings like risk from the study, complication, compensation cannot be written as Nil. Things have to be described in some detail. How will the confidentiality be maintained? What are the rights of the patient? What if patients refuse to take part in the study? What are the alternatives? All these headings have to be described as it is an important part of informed consent. **EC Decision on 10th May, 2019:**Approval after justification ***The aboe comment forwarded to P.I., reply has given by P.I. which was forwarded to Dr. Vimla Kumar Paliwal, response has not received from Dr. Paliwal.*** **Action Taken:** • The answer to most of our comments are satisfactory, However, the PI will use a questionnaire provided by RRNI (Respiratory research Network of India) which the PI claims to be non-profit organisation. The participant information sheet and the questionnaire provided by PI has a study code published on the foot note of each page that mentions study number as RRNI/2017/10. Therefore, it is not clear whether it is an

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	investigator initiated study or a study funded by RRNI? Since, it is an observational cross-sectional study, no intervention is likely to be used. In my opinion, the ethical clearance may be granted if the above mentioned information is obtained from the PI. ***The above comment forwarded to P.I. response pending.*** **EC Decision:** Pending ***Ref. code: 96th ECM II A/P3*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
e3	Clarification of research proposal entitled ***"Quantitative analysis of TNF-α and TGF-β in serum and saliva of oral lichen planus patients"*** submitted by Dr. Akhilanand Chaurasia, Assistant Professor, Department of Oral Medicine and Radiology of this University via letter no. 118/OMR/19 dated 18th February, 2019. **EC Comment on 10th May, 2019:** • Primary objectives are not defined. • Self funding- What do you mean by that? **EC Decision on 10th May, 2019:**Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed by Dr. R. K. Garg & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P17*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
e4	Clarification of research proposal entitled ***"Identification and validation of gene signature profile to predict the recurrence and progression of urothelial cancer: a cohort study"*** sponsored by ICMR, New Delhi submitted by Prof. Vishwajeet Singh, Department of Urology of this University via letter no. nil dated 25th February, 2019. **EC Comment on 10th May, 2019:** • Kindly submit follow up plan as it is a cohort. It will help in validation of gene signatures to predict recurrence and progress in ***urothelial*** cancers. **EC Decision on 10th May, 2019:**Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was forwarded to Dr. Rajeev Garg, reponse received from Dr. Garg & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P18*** ***(Primary Reviewer:Dr. Rajeev Garg)***

Chairperson IEC

U.P., Lucknow

e5	Clarification of research proposal entitled ***"To study epidemiology, clinical parameters, and inflammatory markers- clara cell protein-16, surfactant protein-D and matrix metalloproteinase-9 in chronic obstructive pulmonary disease"*** submitted by Dr. Ajay Kumar Verma, Department of Respiratory Medicine this University via letter no. nil dated 18th February, 2019. **EC Comment on 10th May, 2019:** • Budget is not disclosed: Who is going to fund this study? **EC Decision on 10th May, 2019:** Approval after justification • ***The above comment forwarded to P.I. response has given by P.I.which was reviewed by Dr. R.K. Garg, Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P26*** ***(Primary Reviewer:Dr. Amita Jain)***
e6	Clarification of research proposal entitled ***"Retrospective analysis of traumatic cervical spine injury patients: Our experience of last 5 Years"*** submitted by Dr. Amit Kumar Shrivastava, SR-II, Department of Neurosurgery of this University via letter no. nil dated 31st January, 2019. **EC Comment on 10th May, 2019:** • Consent waiver can only be granted if this is only Chart review and patient identity remain concealed. **EC Decision on 10th May, 2019:**Approval after justification ***The above comment send to P.I. reply has given by P.I. which was forwarded to Dr. Vimal Kumar Plaiwal, response received by Dr. Paliwal.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P1*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
e7	Clarification of research proposal entitled ***"A Comparative study of pigtail catheter v/s malecot chest tube insertion in the management of empyema thoracis"*** submitted by Dr. Vignesh K, JRII, Department of Respiratory Medicine of this University via letter no. nil dated 11th February, 2019. **EC Comment on 10th May, 2019:** • The study hypothesizes that the pigtail catheter is better than malecot catheter in the management of empyema thoracis in terms of efficacy,

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	radiological improvement, duration of hospital stay and patient mobility after tube insertion. • When the title says that the subjects will be those who have Empyema Thoracis, then why do the inclusion criteria include Hydropneumothorax? The effulent in pyothorax and empyema is more viscid and so why add the variable of the the relatively less viscid effluent of hydropneumothorax? The radiological recovery is also different in these two sets of patients. So, either change the title or remove hydropneumothorax from your inclusion criteria. • Sample size is 50 in each group. Was it statistically calculated? Please show the calculations. • What will be studies in these two groups drained by pigtail or malecot is not mentioned. We need a data collection sheet which should have the demographic details, details of his disease, details offered by the physician like ease of insertion / retrieval, time taken etc. and responses obtained from the patient like pain (measured on a pain scale), ease of mobility from 0 to 5, requirement of pain killers, comfort during catheter retrieval. • Radiological improvement and duration of hospitalization too should find a place in the form. • Ideally, it should be in form of RCT **EC Decision on 10th May, 2019:** Approval after justification ***The above comment send to P.I., reply has given by P.I.*** **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P4*** ***(Primary Reviewer: Dr. Surajit Bhattachrya)***
e8	Clarification of research proposal entitled ***"The effect of duration of preoperative biliary stenting on postoperative outcomes after pancreaticoduodenectomy"*** submitted by Dr. Nitin Kumar, SR-II, Department of Surgical Gastroenterology of this University via letter no. nil dated 2nd June, 2018. **EC Comment on 10th May, 2019:** • It is a retrospective study. Please remove the word prospective and retrospective cohort study. • The study duration is written as June 2009 to August 2019. The duration of retrospective study cannot exceed the date of application for ethical clearance. • The methods of collection of retrospective data is not mentioned for example: manual collection from the discharge summaries or by using certain key words in the hospital information system (computerized system)

Chairperson, IEC
King George's Medical University
U.P. Lucknow

	• In the methods section, the "preoperative evaluation and perioperative management", "procedure" is not required. The type of data that the PI intends to collect from the hospital records should be elaborated in this section. The PI should enlist the data that is needed to compare between the pre-operative short-duration and long-duration biliary stent. • The PI should add in the methods that the missing data of the patient in the hospital records will be telephonically enquired from the patients. • Do the PI have records of follow-up stored in the computerized hospital records? How will the follow-up data be collected? • How the PI intends to collect mortality data especially in patients with out-of- hospital mortality? • The project is written in past tense as if the study has already been done. • The patient information document is filled as if it is an interventional prospective study. **EC Decision on 10th May, 2019:** Revise & Re-submit ***The above comment sent to P.I. reply has given by P.I. wich was forwarded to Dr. Vimla Kumar Paliwal, reply received from Dr. Paliwal with following comment:*** • ***The explanations provided by Dr. Nitin Kumar are incomplete. Please provide a point wise "answer to reviewer's comments" with mentionin the page number and paragraph where the PI has made the corrections.*** ***The above comment again send to P.I.reply has provided by P.I. which wa reviewed by Dr. R.K. Garg, Membe-Secretary, IEC.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P8*** ***(Primary Reviewer: Dr.Vimal Kumar Paliwal)***
e9	Clarification of research proposal entitled ***"Comparative study between conventional Vs3 DCRT for early and late toxicities in locally advanced inoperable Head and Neck squamous cell carcinoma"*** submitted by Dr. Surya Kumar Shukla, JR-II, Department of Radiotherapy of this University via letter no. nil dated 6th March, 2019. **EC Comment on 10th May, 2019:** • Study type: Prospective or retrospective study? If prospective, how can a study start in retrospect (1st August 2018 to 31st July 2019)? If retrospective, how can the duration of data collection exceed the date of application for ethical clearance? "Patients enrolled in the study 25th September 2018"- The enrolment of patients into the study cannot be done without taking ethical clearance for the study. • We can only presume that the study is a prospective interventional study with two arms that compares two ways of administering the radiotherapy in head and neck malignancy. This has to be clearly stated in the methods of the study. • In the inclusion criteria please spell out KPS. • Which randomization method will be used to offer either of the radiotherapy method? • Is any of the two radiotherapy methods proposed for this study is a standard of care? If

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	yes, then PI has to give justification of using the other method for the purpose of study. • The sample size estimation appears incorrect. The expected drop out % of study subjects are required to be added to the estimated study population. Here, the PI assumed a dropout rate of 25% which needs to be added to the estimated sample size. In my view, the PI can take the help of a biostatistician for sample size calculation. • The patient information document needs to be filled properly. In the "study procedure" the PI should inform the patient regarding the two methods of radiotherapy. The pros and cons of the either method of radiotherapy should be disclosed to the patient. The patient should be informed why he or she is chosen for the particular radiotherapy method. The complications of the either method should be discussed in the complication method. Compensation should be discussed. • Patient's performa is not provided. **EC Decision on 10th May, 2019:**Re-submit ***The above comment sent to P.I. reply has given by P.I. wich was forwarded to Dr. Vimla Kumar Paliwal, reply received from Dr. Paliwal with following comment:*** **There are following issues:** **1. The answer to first question is not clear.** **2. Simple randomisation 1;1 will not achieve randomisation. How will 1:1 randomisation be achieved. For example by flipping the coin, by computer-generated randomisation chart, or any other method?** **3. Are both methods of delivering radiotherapy namely - conventional method and 3DCRT method standard of care?** **4. Are there no complications known secondary to either of the radiotherapy method? Is Cisplatin entirely safe? The possible complications of the treatments have to be discussed.** **5. PI should discuss the compensation if any patient in the study becomes sick secondary to study treatments and chose to go to court for compensation for physical and psychological harm. These points should not be ignored and they are meant to safeguard the PI.** ***The above comment sent to P.I. reply has given by P.I.*** **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P10*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

- This is a retrospective study and not a prospective study. So, kindly change the title to retrospective study.
- The AIM no. 3 is self sufficient and will also cover the AIM 1 and 2. So, to compare the outcome of patients undergoing ETV versus shunt will include the demographic and clinical profile of these patients and also the complications of shunt and ETV.
- Rest all other points written in the "aims and objectives" should be written in the "methods" section.
- The PI had written that the study duration will be from July 2011 to November 2019. A retrospective study duration cannot exceed the date of application for ethical approval. The PI also writes that the duration of prospective study will be from December 2016 to November 2019. A prospective study cannot enroll any patient before the date of ethical approval. Therefore, it is advisable to keep this study retrospective and keep the duration from any date till April 2019 and not beyond.
- Study design says that once the patient's parameters are collected, the patients will be randomized to either of the procedures. This is not possible for a retrospective study. So, the PI needs to rewrite the methods.
- The follow-up is written in future tense. Follow-up details of the patients in a retrospective study has to be gathered from the patient's registry if that was maintained by the concerned department.
- If the PI plans a prospective study, then it can only be a randomized open-label study to compare the outcome in TBM patients undergoing ETV versus shunt for the treatment of hydrocephalus.
- Patient information document has to be re written in detail regarding the study procedure, type of study, benefits from the study, complications and compensation after the PI decide which type of study they plan to do.
- Patient's performa is required to be submitted with the study proposal.

EC Decision on 10th May, 2019: Re-submit

The above comment forwarded to the Principal-Investigator of the proposal, reply has given by the P.I.which was forwarded to Dr. Vimal Kumar Paliwal, after review Dr. Paliwal he has given following comments:-

- The aims have not been modified,
- 2. Will the css examination be done prospectively?
- 3. Will the follow-up of patients be done prospectively or the follow-up details will be collected from the old records like case files etc?

Reply has not given by P.I.

Only healthy subjects will be chosen. • Examination, photograph, alginate tongue impressions will be collected to create a database of tongue morphology. • A data collection sheet needs to be added which should tell us what

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	all will be observed – surface morphology, shape, presence or absence of fissures, their pattern, their distribution – central / vertical and their numbers – single / multiple / how many, whether deep or shallow. • What are your reference points to consider the shape of the tongue – U or V? I suggest 3 points – with tongue maximally protruded the two points of contact with angle of lips and the tongue tip. • Who all will observe the tongue impressions and the clinical photographs? Will you have a neutral observer, who has not taken the photographs or the impressions? • Why are you restricting yourself to gender estimation only? 200 is a big sample size and if you distribute it in 4 age groups you may find some changes that take place with age? • Committee is of view that no single person can do so many projects simultaneously. **EC Decision on 10th May, 2019:** Re-submit ***The above comment send to P.I. reply has provided by P.I. which was reviewed by Dr. R.K. Research proposal entitled "***A molecular and clinicopathological expression study on USP9X, MLL 4 and ARID 2 genes as markers of progression of oral precancer***" submitted by Prof. Shaleen Chandra, Head, Department of Oral Pathology and Microbiology of this University via letter no. 776/Oral/Path/19 dated 2th May, 2019. **EC Comment:** • How will you perform so many projects? Please explain • Committee is of view that no single person can do so many projects simultaneously. **EC Decision:** Approval after justification ***Ref. code: 97th ECM II A/P10*** ***(Primary Reviewer: Dr. Amita Jain)***
11.	Research proposal entitled "***Isolation of mesenchymal stem cells from human adipose tissue and effect of modulation of the level of different epigenetic regulators on tri- lineage differentiation ex vivo***" sponsored by ICMR New Delhi submitted by Dr. Pramod Kumar Singh, Department of Stem Cell/ Cell Culture Unit Center for Advance Research of this University by via letter no. nil dated 1st May, 2019. **EC Decision:** Refer to **"Stem Cell Committee"** ***Ref. code: 97th ECM II A/P11*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***
12.	Research proposal entitled "***Cascade screening of type2 diabetes mellitus and establishing genetic prevalence of the disorder in Lucknow (U.P)***"sponsored by U.P NHM submitted by Dr. Wahid Ali, Associate Professor, Department of Pathology of this University via letter no. nil dated 28th May, 2019. **EC Decision:** Approved ***Ref. code: 97th ECM II A/P12*** ***(Primary Reviewer: Dr. A.A. Sonkar)***
13.	Research proposal entitled "***To assess the prevalence of vitamin D deficiency in School going children of Uttar Pradesh and to find its association with nutritional status, physical activity and cardiometabolic markers***" sponsored by DST (WOS-B) submitted by Prof. Shalini Gupta, Department of Oral Pathology Faculty of Dental Science of this University via letter no. nil dated 11th June, 2019. **EC Comment:**

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• How will you complete this large study of 2880 children without any specialist co-guides for nutritional status, physical activity and cardiometabolic markers? It seems to be a non- dental project. • Approval from government agency to visit the Basic Shiksha Parishad schools is necessary. Kindly attach relevant documents for this. **EC Decision:** Resubmit ***Ref. code: 97th ECM II A/P13*** ***(Primary Reviewer: Dr. Balendra Pratap Singh)***
14.	Research proposal entitled "***CBCT based anthropometric measurements and cluster analysis of temporomandibular joints in North Indian population***" submitted by Dr. Vikram Khanna, Associate Professor, Department of Oral Medicine & Radiology Faculty of Dental Science of this University via letter no. 417/OM&R/19 dated 11th June, 2019. **EC Comment:** • Consent from Waiver can not be granted **EC Decision:** Approval after justification ***Ref. code: 97th ECM II A/P14*** ***(Primary Reviewer: Dr. Rajendra Nath)***
15.	Research proposal entitled "***Study of dental procedures as a risk factor for Hepatitis C virus transmission in our community***" submitted by Dr.Vikram Khanna, Associate Professor, Department of Oral Medicine & Radiology, Faculty of Dental Science of this University via letter no. 416/OM&R/19 dated 11th June, 2019. **EC Comment:** • Methodology did not cover the objectives to be achieved. Kindly explain in detail. • How do you evaluate dental procedure as risk factors for transmission of hepatitis C? • Kindly mention the NABL certified lab to test hepatitis C in your proposal. **EC Decision:** Resubmit ***Ref. code: 97th ECM II A/P15*** ***(Primary Reviewer: Dr. Balendra Pratap Singh)***
16.	Research proposal entitled "***Association of methylenetetrahydrofolate reductase (MTHFR) C677T polymorphism in isolated hypospadias in eastern Uttar Pradesh population***" submitted by Dr. Archika Gupta, Associate Professor, Department of

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	Pediatric Surgery of this University via letter no. 212/19/Pedsy dated 7th June, 2019. **EC Decision:** Approved ***Ref. code: 97th ECM II A/P16*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
17.	Research proposal entitled "***Effect of educational program on nurses' knowledge and skills about oral care in respiratory intensive care & critical care unit***" submitted by Dr. Ved Prakash, Associate Professor, Head, Department of Pulmonary & Critical Care Medicine of this University via letter no. nil dated 14th June, 2019. **EC Comment:** • Since the study will be performed on the Nurses posted on the respiratory ICU, the patient information document is not required. A participant information document (PID) is required that is meant to inform the participating nurses before obtaining their consent. Kindly fill the PID appropriately and submit. **EC Decision:** Approval after justification ***Ref. code: 97th ECM II A/P17*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
18.	Research proposal entitled "***A study on association of exposure to particulate matter and susceptibility to cardiovascular diseases in North Indian population***" sponsored by CSIR-IITR, Lucknow submitted by Prof. S.K. Dwivedi, Department of Cardiology of this University via letter no. 461/Cardio/Res/19 dated 13th June, 2019 **EC Decision:** Approved ***Ref. code: 97th ECM II A/P18*** ***(Primary Reviewer: Dr. Amita Jain)***
19.	Research proposal entitled "***Oral care in respiratory intensive care unit & critical care unit to prevent the consequence of venitilator associated pneumonia and infection related deaths and to assess the status of nosocomial infection: A randomized, double blind, placebo controlled study***" submitted by Dr. Ved Prakash, Associate Professor, Department of Pulmonary & Critical Care Medicine of this University via letter no. nil dated 14th June, 2019. **EC Comment:** • How will the patients be randomized? • Is denying oral care to patients on ventilator, who comprise the Control group ethical? • Data collection sheet not provided • Consort guidelines not provided

29.	Research proposal entitled ***"Prospective injury surveillance of trauma admissions in largest North Indian teaching Hospital-A cross- sectional descriptive study"*** submitted by Prof. Haider Abbas, Head, Department of Emergency Medicine Trauma Centre of this University via letter no. nil dated 16th June, 2019. **EC Comment:** a. Standardized injury surveillance form is not attached. b. If the PI chose to follow the patients till they are discharged from the trauma center, then the study design will be prospective cohort study and not a cross-sectional study. c. Inclusion criteria say that patients with injury within 24-48 hours of presenting in emergency dept. will be included. The phrase does not make sense. It can either be 24 hours or 48 hours. d. Will the PI include all the consecutive patients that will fulfill the inclusion criteria? If yes, this needs to be clearly stated in the inclusion criteria. **EC Decision:** Resubmit ***Ref. code: 97th ECM II A/P29*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
30.	Research proposal entitled ***"Role of different triggers in precipitation of first ST segment elevation myocardial infarction: A case-crossover study"*** submitted by Prof. S.K. Dwivedi, Department of Cardiology of this University via letter no. 468/Cardio/Res/19 dated 17th June, 2019. **EC Comment:** • Cross-over study design should be described in detail under methodology section. **EC Decision:** Approval after justification ***Ref. code: 97th ECM II A/P30*** ***(Primary Reviewer: Dr. Balendra Pratap Singh)***

3.	Research proposal entitled***"Multimodality imaging in mesenteric lymphadenopathy - in patients UPT 18 years of age"*** submitted by Dr. Naba Kumar Barman, JR-II, Department of Radiodiangosis of this University via letter no. nil dated 16th April, 2019. **EC Comment:** • The aims of the study do not match with the topic of the study. The incidence of mesenteric lymphadenopathy cannot be determined unless it is a population-based study. • When all consecutive patients with mesenteric lymphadenopathy on 64-slice CT are planned to be included, then the purpose of doing a multi-modality imaging in these patients is not justified. One can perform a study to compare the sensitivity/specificity of a particular diagnostic modality to determine the mesenteric lymphadenopathy but then, the project has to be re-written with specific aims and objectives to achieve so. • Sample size estimation needs to be done after finalizing the aims and methods of the study. **EC Decision:** Approval after justification ***Ref. code: 97th ECM II B-Thesis/P3*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	JR-I, Department of Obstetrics & Gynaecology of this University via letter no. nil dated 9th April, 2019. **EC Comment:** • Adolescent gynaecological problems is an heterogeneous group comprising of too many variables – menstrual irregularity, pain, leucorrhoea, PID, Ovarian masses, urinary problems, injury, sexual assault and adolescent pregnancy. So now sample size becomes vital. Please consult a statistician and decide the sample size otherwise your results will become statistically insignificant. • Please spend some time to decide your inclusion and exclusion criteria. Right now you have included all adolescent girls who or whose parents have given consent. • We need a data collection sheet which should have the demographic details, history and examination findings, investigations, interventions, treatment details and outcome • With so many variables you may end up with a very large sample size that may be just too big for your limited duration of study. **EC Decision:** Approval after justification ***Ref. code: 97th ECM II B-Thesis/P26*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***

31.	Research proposal entitled ***"Comparative study between ultrasound guided erector spinae plane block and para vertebral block in thoracic surgeries"*** submitted by Dr. Akanksha Jain, JR-I, Department of Anaesthesiology of this University via letter no. nil dated 10th April, 2019. **EC Comment:** • The study needs to be written as per CONSORT guidelines. Please provide a CONSORT checklist duly filled along with the revised thesis performa. • The topic of the study should reflect the methods like – randomized controlled blinded/open-label etc. • The name of the drug should also be mentioned in the title of the study. • Which one of the two arms will be a control arm if it is a controlled study? • Which randomization method will be used? • How will the allocation concealment be achieved? • Patient information document (PID) is very important document and it needs to be filled again. Are there any complications of either of the anesthesia methods? These have to be discussed with the patient in the PID. Risks from the study have also to be discussed. Compensation has to be planned. • Patient datasheet not attached. **EC Decision:** Approval after justification

Sonkar did not take part in the discussion.*** ***Ref. code: 97th ECM II B-Thesis/P93*** ***(Primary Reviewer: Dr. Rajeev Garg)***
94.	Research proposal entitled ***"A study of functional impairment after latissimus dorsi myocutaneous flap in breast cancer patients"*** submitted by Dr. Shariq Ahmad, JR-II, Department of General Surgery of this University via letter no. nil dated 24th May, 2019. **EC Comment:** • The study aims to assess the functional impairment after L.D flap breast reconstruction using the DASH questionnaire of American Association of Orthopaedic Surgeons and Q.O.L questionnaire and a few additional questions from focus group study. • Sample size is 80. Statistically calculated • I believe these patients have already been operated and you will be calling them for follow up. So how far do you intend to go in follow up as the initial functional impairment may improve with time? • Adding the QOL questionnaire is a smart move as disease recurrence may change to total outlook of the patient towards reconstruction.

	dated 11th June, 2019. **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P115*** ***(Primary Reviewer Dr. Rajeev Garg)***
116.	Research proposal entitled ***"A study of 14 hours ambulatory blood pressure monitoring among nursing staff working at a tertiary care Hospital in North India"*** submitted by Dr. Deepak Kumar Verma, JR-II, Department of Medicine of this University via letter no. nil dated 10th June, 2019. **EC Comment:** • Title to be revised. It is Northern India and not North India. North Korea and South Korea, North Sudan and South Sudan are independent countries and hence their name is thus. Northern India is a part of India • The researchers aim to study the Blood Pressure levels and 24 hours variability and any dipping pattern among nursing staff, and compare results in nurses working in Emergency, ICUs and in non-emergency wards • It is a cross sectional study of 100 cases, statistically calculated • The methodology is well defined • Ambulatory BP will be measured by an ABPM machine of Chinese make which will record BP every 30 minutes for 1 day while the nurses are doing their normal activities. Thus they will be classified as normotensives / hypertensives, dippers / non-dippers / reverse dippers. • Data collection sheet is missing. 1.	Research proposal entitled ***"A comparative study on hyponatremia in CMS versus non-CNS tuberculosis patients: A correlation with activation of rennin-angiotensin system and stress biomarkers"*** sponsored by ICMR, New Delhi submitted by Ms. Abhilasha Tripathi under the guidance of Prof. Surya Kant, Head, Department of Respiratory Medicine of this University via letter no. nil dated 23rd April, 2019. **EC Comment:** a. The diagnosis of hyponatremia will be considered by two subsequent reports of serum sodium level of <135 meq/l done 24 hours apart. Will a symptomatic patient with hyponatremia not be treated after the first report of serum sodium level of <135 meq/l? If yes, then the serum level is expected to normalize after 24 hours. b. Where will the tests (ANP, BNP, ADH receptor and cytokines) be done? Who will perform the tests? Have you included the concerned lab experts in the study as co-PI? c. The amount of blood sample that is required for the purpose of the study has to be informed to the patient in the patient information document. How many times the blood sample will be taken? Who will pay the cost of tests? Every such information has to be detailed in the patient information document. d. Patient's data sheet (performa) is not attached. **EC Decision:** Approval after justification ***Ref. code: 97th ECM II B-Ph.D/P5*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***

1-	Research proposal entitled ***"Role of gut microbiome in chronic neuroinflammation followed by young and aged traumatic brain injury"*** sponsored by ICMR New Delhi submitted by Dr. Devlina Ghosh under the guidance Dr. Somil Jaiswal, Associate Professor, Department of Neurosurgery this University via letter no. nil dated 23rd May, 2019. **EC Comment:** • The topic of the study is not clear. Kindly rephrase the topic. • The aim of the study does not matches with the research hypothesis. The aim of the study is to "develop the molecular markers in young and aged TBI patient". What these molecular markers are meant for? Are these molecular markers already proven for neuroinflammation? If yes, then what is the purpose of the study? If no, then the study should be aimed to determine the role of some of the chosen molecular markers in the chronic neuroinflammation post-TBI. The second aim should be determine the dynamic changes in the gut microbiota and how it changes the peripheral microphage activation. Aim of the study does not talk about any dietery intervention but the research hypothesis does, which further brings confusion. • The first blood sample will be taken at < 1 hour. Is it < 1 hour post-head trauma or <1 hour after admission. Is it possible to get TBI patients at < 1 hour after the TBI? • Who will perform the micro RNA, cytokines, MMPs, MBP, NSE, S100 and M1, M2 activation phenotypes? Is that nodal person a part of this study? Who will pay for the tests? Please provide the name of the center where these tests are to be done and also provide a list of all the equipment that are available at the center where these tests are to be done. • Kindly describe in details the methods of performing all these tests • How will the changes in the gut microbiome be detected. What do you expect to happen to gut microbiome over time? How will you relate the gut microbiome changes to ongoing neuroinflammation? • Macrophage activation will be done ex-vivo by exposing them to probiotics. Who will pay for the probiotics? • Why are you choosing both young and old patients with TBI? Nowhere in your methods have you discussed the implications of choosing patients with two distinct age groups. • Please provide a flow-chart of the methods. • The study is not written properly. It has too many variables to study. Ethics committee suggests you to kindly make a more simplified study design with

Chairperson, IEC
King George's Medical University

(Registration No.:ECR/262/Inst/UP/2013/RR-16)

Minutes of the **"Institutional Ethics Committee"** Meeting to be held on **6th September, 2019 from 2.00 p.m. 4.30 p.m.** in the **'Board Room',** Office of the Vice Chancellor, Administrative Block of this University.

The following members were present in the Meeting

1- Prof.S.P. S Gaur	-Chairman
2- Justice Hin'ble Vishnu Sahai	- Member
3- Dr. Surajit Bhattacharya	-Member
4- Dr. Vimal Kumar Paliwal	-Member
5- Dr. Manju Agrawal	-Member
6- Mr. Ram Niwas Jain	-Member
7- Prof. Amita Jain	-Member
8- Prof. Rajendra Nath	-Member
9- Prof. Anoop Kumar Verma	-Member
10- Prof. Rajeev Garg	-Member
11- Prof. R. K. Garg	-Member-Secretary, Ex-officio

The following Members were not present:

1- Prof. A.A. Sonkar	-Member (send his written comment)
2- Prof. Balendra Pratap Singh	- Member(send his written comment)
3- Dr. Preeti Agarwal	-Member (On maternity leave)

Minutes of 98th ECM held on 6th September, 2019

(Registration No.:ECR/262/Inst/UP/2013/RR-16)

I. (A) Action taken

IA	Action Taken on decisions of previous Ethics Committee Meeting
	Part -a- 96th ECM was held on 10th May, 2019
a1	Clarification of research proposal entitled ***"Study of severity of airflow limitation in treated post- TB COPD subjects in India"*** submitted by Prof. Suryakant, Department of Respiratory Medicine of this University via letter no. nil dated 29th January, 2019. **EC Comment on 10th May, 2019:** • Sample size is written as 1000. Is it achievable in the study duration of 6 months? How the sample size calculated? • Methods are not provided. A detailed elaboration of methods needs to be provided. In patient information document, the authors claimed that they will use a questionnaire prepared by RRNI (?). What is RRNI? What is the role of RRNI in this study? No questionnaire is provided for review of ethics committee. • Patient information document in English and Hindi are grossly deficient. The headings like risk from the study, complication, compensation cannot be written as Nil. Things have to be described in some detail. How will the confidentiality be maintained? What are the rights of the patient? What if patients refuse to take part in the study? What are the alternatives? All these headings have to be described as it is an important part of informed consent. **EC Decision on 10th May, 2019:**Approval after justification ***The above comment forwarded to P.I., reply has given by P.I. which was forwarded to the reviewer, response has received from reviewer & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P3*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
a2	Clarification of research proposal entitled ***"To study the adequacy of secondary prevention therapy at discharge in patients with an acute coronary syndrome at a tertiary care centre in North India"*** submitted by Dr. Akshyaya Pradhan, Associate Professor, Department of Cardiology this University via letter no. nil dated 5th January, 2019. **EC Comment on 10th May, 2019:**

Chairperson, IEC
King George's Medical University
U.P., Lucknow

		• Title to be revised. It is Northern India and not North India. North Korea and South Korea, North Sudan and South Sudan are independent countries and hence their name is thus. Northern India is a part of India • The objective is to study the adequacy of prevention therapy at discharge in patients with Acute Coronary Syndrome. The lacunae, reasons for not giving the desired drug will be evaluated and the recurrent disease pattern will be studied. • A working proforma is attached. • Sample size is not provided • Inclusion and exclusion criteria are satisfactory **EC Decision on 10th May, 2019:**Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was forwarde to the reviewer, response received from the reviewer & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P12*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
a3	Clarification of research proposal entitled ***"Adherence to guideline directed medical therapy for secondary prevention in ACS patients at a tertiary care center in India"*** submitted by Dr. Pravesh Vishwakarma, Associate Professor, Department of Cardiology this University via letter no. nil dated 5th January, 2019.	**EC Comment on 10th May, 2019:** 1. Methods are deficient. What is the criteria for defining adherence to treatment? Till what time after the discharge from the hospital will the patients be eligible for the inclusion into the study? When will you consider a patient compliant to treatment? The patient's Performa does not contain any of this information. Did the author not think of factors responsible for non-adherence to treatment? If yes, these factors should be enumerated in the patient's Performa to ask from each patient in order not to miss any. 2. What is the sample size? Also provide the basis of calculation of sample size. **EC Decision on 10th May, 2019:** Approval after justification ***The above comment sent to the P.I., response received from P.I., which was forwarded to the reviewer response received from the reviewer with following Comment:*** • ***Kindly submit revised proposal.*** **ActionTaken:** The above comment forwarded to the P.I.

Chairperson, IEC
King George's Medical University

	EC Decision: Pending ***Ref. code: 96th ECM II A/P13*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
a4	Clarification of research proposal entitled ***"MALDI-Tof based cancer screening panel in a population – based large solid tumor patient's foe predicting prognosis and deciding therapeutics"*** sponsored by ICMR, New Delhi submitted by Dr. Neetu Singh, Associate Professor, Department of Molecular Biology Unit Center for Advance Research of this University by via letter no. CFAR/2019/271 dated 22nd February, 2019. **EC Comment on 10th May, 2019:** • Kindly mention age in Inclusion criteria • Objectives are not spelled out • Consent forms needs to be revised. • It appears copy and paste, many things are enteringled. • Methodology need to be logical and detailed. **EC Decision on 10th May, 2019:** ***The above comment forwarded to P.I. response has given by P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P20*** ***(Primary Reviewer:Dr. Anoop Kumar Verma)***
a5	Clarification of research proposal entitled ***"Development and efficacy of intervention programme of 'Cognitive-Metacognitive behaviou therapy' for the management of obsessive compulsive disorder in Indian context"*** submitted by Dr. Shweta Singh, Associate Professor, Department of Psychiatry of this University by via letter no. nil dated 4th April, 2019. **EC Comment on 10th May, 2019:** • Kindly provide sample size. • Questionnaire based study • No budget disclosed **EC Decision on 10th May, 2019:**Approval after justification ***The above comment send to P.I. reply has given by P.I. which was forwarded to the reviewer, response has received from reviewer & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II A/P43***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	(Primary Reviewer: Dr. Amita Jain)
a6	Clarification of research proposal entitled ***"The aim of this study was to investigate central aortic pressure and peripheral vascular hemodynamic variables of arterial stiffness (AS) and their relationship to pulmonary function tests in obstructive (COPD) and Asthma) and restrictive lung disease"*** submitted by Prof. Surya Kant, Department of Respiratory Medicine of this University via letter no. nil dated nil. **EC Comment on 10th May, 2019:** • Kindly review the title. It seems to be cut and paste. **EC Decision on 10th May, 2019:** Approval subject to clarification ***The above comment send to P.I. reply has given by P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **Current title:** ***"To study the central aortic Blood Pressure and arterial stiffness in obstructive lung diseases"*** **ActionTaken :** Provisionally approved **EC Decision:** Approved ***Ref.code: 96th ECM II A/P49*** ***(Primary Reviewer: Dr. Balendra Pratap Singh)***
a7	Clarification of research proposal entitled ***"To study the dynamic effects of changes in left ventricular end diastolic pressure on instantaneous wave free ratio vs fractional flow reserve"*** submitted by Dr. Prachi Sharma, SR-II, Department of Cardiology of this University via letter no. 3074/Cardio/19 dated 14th March, 2019. **EC Comment on 10th May, 2019:** • When will first patient be enrolled? **EC Decision on 10th May, 2019:** Approval after juistification ***The above comment send to P.I., reply has given by P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P5*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
a8	Clarification of research proposal entitled ***"A study of operative procedure for proximal hypospadias: single stage versus staged repair"*** submitted by Dr. Survesh Kumar Gupta, SR-I, Department of Pediatric Surgery of this University via letter no. nil dated 27th March, 2019. **EC Comment on 10th May, 2019:** • How/which will procedure for surgery be used? • The sample size calculation is wrong.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

		• How will you assess inferior/superior methods? • No CRF is attached, No protocol • It should be in form of CONSORT guidelines **EC Decision on 10th May, 2019:** Approval afer justification ***The above comment send to P.I., reply has given by P.I. which was forwarded to the reviewer, response has received from reviewer & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P13*** ***(Primary Reviewer: Dr. Amita Jain)***
a9	Clarification of research proposal entitled ***"Analysis of CSF diversion in management of pediatric TBM hydrocephalus: A prospective and retrospective study"*** submitted by Dr. Anoop Kumar Jaiswal, SR-II, Department of Neurosurgery of this University via letter no. nil dated nil. **EC Comment on 10th May, 2019:** • This is a retrospective study and not a prospective study. So, kindly change the title to retrospective study. • The AIM no. 3 is self sufficient and will also cover the AIM 1 and 2. So, to compare the outcome of patients undergoing ETV versus shunt will include the demographic and clinical profile of these patients and also the complications of shunt and ETV. • Rest all other points written in the "aims and objectives" should be written in the "methods" section. • The PI had written that the study duration will be from July 2011 to November 2019. Retrospective study duration cannot exceed the date of application for ethical approval. The PI also writes that the duration of prospective study will be from December 2016 to November 2019. A prospective study cannot enroll any patient before the date of ethical approval. Therefore, it is advisable to keep this study retrospective and keep the duration from any date till April 2019 and not beyond. • Study design says that once the patient's parameters are collected, the patients will be randomized to either of the procedures. This is not possible for a retrospective study. So, the PI needs to rewrite the methods. • The follow-up is written in future tense. Follow-up details of the patients in a retrospective study has to be gathered from the patient's registry if that was maintained by the concerned department. • If the PI plans a prospective study, then it can only be a randomized open-label study to compare the outcome in TBM patients undergoing ETV versus

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	shunt for the treatment of hydrocephalus. • Patient information document has to be re written in detail regarding the study procedure, type of study, benefits from the study, complications and compensation after the PI decide which type of study they plan to do. • Patient's performa is required to be submitted with the study proposal. **EC Decision on 10th May, 2019:** Re-submit ***The above comment send to P.I., reply has given by P.I.which was forwarded to the reviewer, response has received from reviewer with following comment:*** • ***Kindly provide revised proposal.*** ***The above comment forwarded to P.I, reply has given by P.I. which was reviewd by the Chairman, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Dr.Amita Jain & Dr. R.K. Garg did not tke part in the discussion.*** ***Ref. code: 96th ECM II B-Thesis/P20*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
a10	Clarification of research proposal entitled ***"Efficacy of tocotrienol and turmeric (Curcuma Longa) in osteoarthritis: A clinical study at a tertiary care centre in KGMU, Lucknow"*** submitted by Dr. Arun Kumar Bharti, JR-I, Department of Pharmacology & Therapeutics of this University via letter no. nil dated nil. **EC Comment on 10th May, 2019:** • Kindly provide the approval of the mentioned drug authority for use in patients • Provide CONSORT guidelines & how will they be followed? **EC Decision on 10th May, 2019:** Approval after justification ***The above comment send to P.I., reply has given by P.I.which was reviwed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P26*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
a11	Clarification of research proposal entitled ***"An observational study predicting the drug resistance of Pulmonary Tuberculosis by microRNA320a and its comparison with CBNAAT at a tertiary care centre"*** submitted by Dr. Arpan Ganguly, JR-I Department of Pharmacology & Therapeutics of this University via letter no. nil dated 4th April, 2019. **EC Comment on 10th May, 2019:**

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• Kindly remove **"KGMU, Lucknow UP"** from title • Where will CBNAAT will be performe, Not mentioned • It is not a cross sectional open labeled not randomized clinical trial the study designe needs to corrected • Title mention Drug reestaver tablet However, the inclusion criteria is not accordingly **EC Decision on 10th May, 2019:** Revised & Re-submit ***The above comment send to P.I., reply has given by P.I.which was reviwed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P35*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
a12	Clarification of research proposal entitled ***"Comparative efficacy of andrographis paniculata and metformin to metformin monotherapy in glycemic control in newly diagnosed, treatment naive type 2 diabetes patients"*** submitted by Dr. Anand Kumar Maurya, JR-I, Department of Pharmacology and Therapeutics of this University via letter no. nil dated 4th April, 2019. **EC Comment on 10th May, 2019:** • Source of herbal drug not mentioned • Plant safety and efficacy and approval of regulation needs to be submitted **EC Decision on 10th May, 2019:** Approval after justification ***The above comment send to P.I., reply has given by P.I.which was forwarded to the reviewer & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P44*** ***(Primary Reviewer: Dr. Rajendra Nath)***
a13	Clarification of research proposal entitled ***"Evaluation of effect of mandibular advancement device on inflammatory marker (TNF-α) in patients with obstructive sleep apnoea: A controlled before and after study"*** submitted by Dr. Neeti Solanki, JR-I, Department of Prosthodontics, Crown & Bridge, Faculty of Dental Sciences of this University via letter no. 16/19 dated 6th April, 2019. **EC Comment on 10th May, 2019:** • Pro inflammatory cytokines like TNF alpha, IL1 beta, IL6 are upregulated in Obstructive Sleep Apnoea (OSA) and their levels come down with continued positive airway pressure (CPAP). In

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	patients who do not tolerate CPAP Mandibular Advancement Devices (MAD) can help. • This study aims to study the effect of MADs TNF alpha levels in patients with OSA. • Sample size is 20 – statistically calculated • Participant selection and Inclusion and exclusion criteria are satisfactory • OSA will be diagnosed by Epsworth Sleepiness Scale, Berlin questionnaire and Updated STOP Bang questionnaire • However, how will the mandibular advancement be done is not clearly defined and a data collection sheet / proforma has not been included. **EC Decision on 10th May, 2019:** Approval after justification ***Dr. Balendra did not take part in the discussion.*** ***The above comment send to P.I., reply has given by P.I.which was forwarded to the reviewer & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P52*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
a14	Clarification of research proposal entitled ***"Misoprostol only Vs. mifepristone plus misoprostol in induction of labour following intrauterine fetal death: an open label randomized controlled trial"*** submitted by Dr. Vejainty Chauhan, JR-I, Department of Obstetrics & Gynaecology of this University via letter no. nil dated 5th April, 2019. **EC Comment on 10th May, 2019:** • Mifepristone is a synthetic steroid with anti progesterone activity and Misoprostol is a PGE1 analogue, a prostaglandin preparation that can be used orally, sublingually, vaginally or rectally. With Mifepristone lower dose of PG is required to induce delivery. • 200 mg of Mifepristone orally plus 50 micrograms of Misoprostol six hourly transvaginally will be used in one group and Misoprostol alone will be used in the other • Sample size is 200 – statistically calculated • Study protocol and outcome measures are defined. • Data collection sheet is not attached. This should have the demographic details, history, examination, details of intervention and what all was observed and when.

Chairperson, IEC
King George's Medical University

		• If it is a R.C.T, how were the patients randomized and where are the consort guidelines? **EC Decision on 10th May, 2019:** Approval after justification ***The above comment send to P.I., reply has given by P.I.which was forwarded to the reviewer & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P61*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
a15	Clarification of research proposal entitled ***"Correlation of urinary iodine concentration and tear film breakup time with clinical, epidemiological, biochemical, radiological and pathological parameters in patients with goiter"*** submitted by Mr. Sagar Rai, MBBS 2017 Batch under the guidance Dr. Pooja Ramakant, Associate Professor, Department of Endocrine Surgery of this University via letter no. nil dated 28th February, 2019. **EC Comment on 10th May, 2019:** • All the patients enrolled are hospital patients who will undergo thypodictory at endocrine SR department. It is not a cross sectional study • The title is extensive needs to be revised • The methodology must be more elaborate and para '4' of working performa must be attached **EC Decision on 10th May, 2019:** Revise & Re-submit ***The above comment send to P.I., reply has given by P.I.which was reviwed by Dr. R.K. Garg, Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 96th ECM IIB MBBS/P5*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
a16	Clarification of research proposal entitled ***"Prevalence of radiation caries in head and neck patients undergoing radiotherapy"*** sponsored by Research Cell K.G.M.U U.P. Lucknow submitted by Mr. Vaibhav Amit, BDS III Year through his Mentor Dr. Rhythm, Associate Professor, Department of Conservative Dentistry and Endodontics, Faculty of Dental Sciences of this University via letter no. nil dated 15th January, 2019. **EC Comment on 10th May, 2019:** • Please add the term cancer in the title of the project. • It will be in interest of the student to do a sample size calculation done as

Chairperson IEC
King George's Medical University
U.P., Lucknow

	that will help at the time of submission of the study to journals for publication **EC Decision on 10th May, 2019:** Approval after justification ***The above comment send to P.I., reply has given by P.I. which was forwarded to reviewer response has received from reviewer with following comment:*** • **Kindly provide revised proposal.** ***The aboe comment forwarded to P.I. but response has not given by P.I.*** **ActionTaken :** None **EC Decision:** Pending ***Ref. code: 96th ECM IIB IMR-S/P1*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
	Part b- 97th ECM was held on 12th July, 2019
b1	Clarification of research proposal entitled "***Effect of educational program on nurses' knowledge and skills about oral care in respiratory intensive care & critical care unit***" submitted by Dr. Ved Prakash, Associate Professor, Head, Department of Pulmonary & Critical Care Medicine of this University via letter no. nil dated 14th June, 2019. **EC Comment on 12th July, 2019:** • Since the study will be performed on the Nurses posted on the respiratory ICU, the patient information document is not required. A participant information document (PID) is required that is meant to inform the participating nurses before obtaining their consent. Kindly fill the PID appropriately and submit. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment send to P.I., reply has given by P.I.which was forwarded to the reviewer response has given by reviewer with following comment:*** • **Kindly provide revised proposal** ***The above comment forwarded to P.I. reponse received from P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II A/P17*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
b2	Clarification of research proposal entitled "***Oral care in respiratory intensive care unit & critical care unit to prevent the consequence of venitilator associated pneumonia and infection related deaths and to assess the status of nosocomial infection: A randomized, double blind, placebo controlled study***" submitted by Dr. Ved Prakash, Associate Professor, Head, Department of Pulmonary & Critical Care

Chairperson, IEC
King George's Medical University
U.P., Lucknow

		Medicine of this University via letter no. nil dated 14th June, 2019. **EC Comment n 12th July, 2019:** • How will the patients be randomized? • Is denying oral care to patients on ventilator, who comprise the Control group ethical? • Data collection sheet not provided • Consort guidelines not provided **EC Decision n 12th July, 2019:** Approval after justification ***The above comment forwarded to P.I. reponse received from P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 97th ECM II A/P19*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
	b3	Clarification of research proposal entitled "***To study causes and clinical outcome of new onset renal failure in post- partum period: A prospective observational study***" sponsored by ICMR submitted by Dr. Medhavi Gautam, Assistant Professor, Department of Medicine of this University via letter no. nil dated 12th June, 2019. **EC Comment:** • Where investigators want to study this courses and clinical outcomes new onset renal failure in post partum period and also want to study the clinical criteria to predict the out come. For this only observational study, will not be sufficient, a control arm is also needed which will strengthen this study, so it requests change in study design rest is ok. **EC Decision:** Approval after justification ***The above comment forwarded to P.I. reponse received from P.I. which was forwarded to the reviewer.*** **EC Decision:** Approved ***Ref. code: 97th ECM II A/P28*** ***(Primary Reviewer: Dr. Rajeev Garg)***
	b4	Clarification of research proposal entitled "***Role of different triggers in precipitation of first ST segment elevation myocardial infarction: A case-crossover study***" submitted by Prof. S.K. Dwivedi, Department of Cardiology of this University via letter no. 468/Cardio/Res/19 dated 17th June, 2019. **EC Comment on 12th July, 2019:** • Cross-over study design should be described in detail under methodology section.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	EC Decision on 12th July, 2019: Approval after justification ***The above comment forwarded to P.I. reponse received from P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II A/P30*** ***(Primary Reviewer: Dr. Balendra Pratap Singh)***
b5	Clarification of research proposal entitled***"Multimodality imaging in mesenteric lymphadenopathy - in patients UPT 18 years of age"*** submitted by Dr. Naba Kumar Barman, JR-II, Department of Radiodiangosis of this University via letter no. nil dated 16th April, 2019. **EC Comment on 12th July, 2019:** • The aims of the study do not match with the topic of the study. The incidence of mesenteric lymphadenopathy cannot be determined unless it is a population-based study. • When all consecutive patients with mesenteric lymphadenopathy on 64-slice CT are planned to be included, then the purpose of doing a multi-modality imaging in these patients is not justified. One can perform a study to compare the sensitivity/specificity of a particular diagnostic modality to determine the mesenteric lymphadenopathy but then, the project has to be re-written with specific aims and objectives to achieve so. • Sample size estimation needs to be done after finalizing the aims and methods of the study. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment send to P.I., reply has given by P.I. which was forwarded to the reviewer but the reviewer has not given the reply.*** **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P3*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
b6	Clarification of research proposal entitled ***"Biochemical modulator of endothelial cell function with special interest to nitric oxide (NO) and HDL associated pon-1, srb-1 level : a prospective case control study in coronary artery disease"*** submitted by Dr. Manish Kumar, JR-I, Department of Pathology of this University via letter no. nil dated 8th April, 2019. **EC Comment on 12th July, 2019:** • For this thesis there are too many objectives. The aim is not clearly defined. • Thesis case control study does not difine cases & controles clearly. • Why control is included are not justified?

Chairperson, IEC

		Department of Physiology of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • No issues as far as methodology/Study design/Sample size is concerned, but it is not clear from where they will recruit patients. They have no collaborators in the Clinical department. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment sent to P.I., reply has given by P.I. which was forwarded to the reviewer, reply has given by reviewer & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P18*** ***(Primary Reviewer: Dr. Rajeev Garg)***
b14		Research proposal entitled ***"Prospective interventional study of neoadjuvent temozolomide inpatients of inoperable supratentorial malignant gliomas"*** submitted by Dr. Suresh Kumar Jaiswal, SR-I, Department of Neurosurgery of this University via letter no. nil dated 10th March, 2019. **EC Comment on 12th July, 2019:** • The objective is to analyze the improvement in patients of supra-tentorial glioma in terms of resectability, morbidity and mortality after neo-adjuvant chemotherapy with temozolomide • Sample size not provided • Data recording sheet not provided. We do not know what will be observed and when • How much drug will be given? When will it be given? What effects will be observed, when and how? • What side effects of this drug will be observed? • You will be comparing your results with which group of patients? Will you have a control group of patients who will not be receiving neo adjuvant chemotherapy? **EC Decision on 12th July, 2019:** Re-submit ***The above comment send to P.I., reply has given by P.I. which was forwarded to the reviewer reply has given by reviewer with following comment:-*** **Comment:** • Sample size does not depend on patient availability alone. You have to sit with a statistician and discuss your study plan. He/she will ask you what is a doable number of patients and then curtail the number of variables you can chase in this study. This is a good exercise in planning research and this should be done.

Chairperson, IEC
King George's Medical University

		• Since the comparison will be with patients receiving RT alone include them in your study. Now take the number of both the set of patients - your ones and the RT ones to the statistician and ask him to help you to plan your study. • You have the scope of planning a good study as there will surely be enough patients, but if you end up chasing too many variables your results may not be statistically significant. **ActionTaken:** The above comment sent to the P.I. **EC Decision:** Pending ***Ref. code: 97th ECM II B-Thesis/P19*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
	b15	Clarification of research proposal entitled ***"A prospective study of four quadrant ostoplastic decompressive craniotomy vs conventional decompressive craniectomynfor traumatic brain injury"*** submitted by Dr. Yashpal Jaware, SR-I, Department of Neurosurgery of this University via letter no. nil dated 12th April, 2019. **EC Comment on 12th July, 2019:** • Title should mention "RCT". • How randomization will be done • CONSORT guidelines should be followed. **EC Decision on 12th July, 2019:** Approval after justification The above comment sent to P.I., reply has given by P.I. which was forwarded to the reviewer. **ActionTaken:** • Since it is an RCT, it will be deffered to have a look at revised proposal. • Please submit revised proposal with consent checklist **EC Decision:** Pending ***Ref. code: 97th ECM II B-Thesis/P21*** ***(Primary Reviewer: Dr. Amita Jain)***

	EC Decision on 12th July, 2019: Approval after justification ***The above comment sent to the P.I. reply has given by P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97thECM II B-Thesis/P28*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***
b17	Clarification of research proposal entitled ***"Comparative study between ultrasound guided erector spinae plane block and para vertebral block in thoracic surgeries"*** submitted by Dr. Akanksha Jain, JR-I, Department of Anaesthesiology of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • The study needs to be written as per CONSORT guidelines. • The topic of the study should reflect the methods like – randomized controlled blinded/open-label etc. • The name of the drug should also be mentioned in the title of the study. • Which one of the two arms will be a control arm if it is a controlled study? • Which randomization method will be used? • How will the allocation concealment be achieved? • Patient information document (PID) is very important document and it needs to be filled again. Are there any complications of either of the anesthesia methods? These have to be discussed with the patient in the PID. Risks from the study have also to be discussed. Compensation has to be planned. • Patient datasheet not attached. • Please provide a CONSORT checklist duly filled along with the revised thesis performa. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment sent to the P.I. reply has given by P.I. which was forwarded to the reviewer response was provided by the reviewer with following comment:*** • The topic of the study may be written as "Randomised open label study to compare the post-operative analgesic effect of ultrasound guided erector spinae plane block and paravertebral block with -----% bupivacaine in thoracic surgeries". • PID needs to be filled properly. Please enumerate all the known drug-related and puncture related adverse effects of the above procedures. Please understand that the PID is for the safeguard of the investigator and therefore, it should be filled in details. Writing NONE and NOT APPLICABLE to the question of "risk from the study" is not acceptable. • Please discuss the "benefits from the study" in some detail. The study will determine whether one method is better than the other or both of them are same. Therefore, the possible benefit will be the attainment of the new knowledge regarding the procedures. Patient under the study may not be the beneficiary.

b43	Clarification of research proposal entitled ***"A study of emergency obstetric referred-in cases at tertiary care Hospital of Lucknow"*** submitted by Dr. Arunima Saini, JR-II, Department of Community Medicine and Public Health of this University via letter no. nil dated 13th June, 2019. **EC Comment on 12th July, 2019:** • It is a cross-sectional, hospital based, observational study of 15 independent variables and 4 dependent variables which include both medical reasons and health care logistic reasons. • Sample size is not mentioned but the hint is that it will depend on the maximum number of cases collected in 20 data collecting days • Please consult a statistician and decide on a doable sample size. Right now you are chasing almost 600 cases in 20 days or 30 cases in a day. Filling a 6 page Performa and getting a signed consent will take 30 minutes at least. So you are planning to work for 15 hours every day for 20 days! I feel your plan needs a rethink.

9.	Research proposal entitled "***Developing pshchological resilience applying strategies of psycho-spiritual maturation amongst care givers of older adults consulting tertiary care hospital-a preliminary study***" sponsored by Research Cell KGMU Lucknow submitted by Dr. Nisha M Pandey, Assistant Professor, Department of G.M.H. of this University via letter no. 158/DGMH dated 26th March, 2019. **EC Comment:** • The objective is to explore the indices of spirituality, confidence in life and confidence in self amongst caregivers of mentally ill elderly and to study the impact of 'know yourself curriculum' in developing psychological resilience amongst them.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• The study is in 7 sections. In section 1 in a taped interview the caregiver will be asked about problems they face in rendering care, his/her behavioral anomalies will be mapped and behavioral change setting goals will be set. In section 2 participant's psycho-spiritual development will be explored. Section 3, 4 and 5 will be for contemplation self enquiry through meditation. Session 6 will engage the participants to develop inclusive person-centered community and session 7 will be about outcome assessment by 3 standardized scales SCL-90-R, INSPIRIT-R and IPPA, which have been attached. • 7 sessions will be spread in 30 days • The researchers do not tell us how at the end of the study the audio tapes will be disposed / destroyed. There may be sensitive information in them which the participants may not like to share with anyone else. • Sample size is not provided. **EC Decision:** Approval after justification ***Ref. code: 98th ECM II B IMR-F/P9*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
10.	Research proposal entitled "***To search novel mocroRNAs in serum as a noninvasive biomarker in prostate cancer***" sponsored by Research Cell KGMU Lucknow submitted by Dr. Shweta Kumari, Assistant Professor, Department of Biochemistry of this University via letter no. nil dated nil. **EC Decision:** Approved ***Ref. code: 98th ECM II B IMR-F/P10*** ***(Primary Reviewer: Dr. Rajeev Garg)***
11.	Research proposal entitled "***Prevalence of vitamin D deficiency in HIV disease and its correlation with disease severity: An observational study***" submitted by Dr. Sudhir Kumar Verma, Assistant Professor, Department of Medicine of this University via letter no. 1167/Med/19 dated 14th June, 2019. **EC Comment:** • Please modify the 1st. objective. To study the prevalence of Vitamin D in HIV disease means nothing • Hypothesis is Vitamin D deficiency is common in HIV patients and its levels correlate with the severity of the disease • 8 ml blood will be drawn once for CBC, LFT, RFT, CD4 counts, Serum Calcium – total and ionic, phosphate, 25(OH) Vitamin D, Parathormone • Vitamin D 10-20 ng/ml will be considered as insufficiency and <10 ng/ml will be taken as deficiency • Sample size 60. Was it statistically derived? • Inclusion and exclusion criteria are satisfactory

I. (A) Action taken

I	Action Taken on decisions of previous Ethics Committee Meeting
	Part (a) 96th ECM
1	Clarification of research proposal entitled ***"Comparison of acceptability and efficacy of thermocoagulation and cryotherapy in via positive cervical lesions"*** submitted by Dr. Parul Sharma, JR-I, Department of Obstetrics & Gynaecology of this University. **EC Comment on 10th May, 2019:** • Issue is there are two group and involves intervention which will be done after randomization so it requires clinical trial registry as per CONSORT guidelines. **EC Decision on 10th May, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was forwarded to the Primary reviewer & approved.*** **Action Taken :** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P64*** ***(Primary Reviewer: Dr. Rajeev Garg)***
	Part (a) 97th ECM
b1	Clarification of research proposal entitled ***"A prospective study of four quadrant ostoplastic decompressive craniotomy vs conventional decompressive craniectomy for traumatic brain injury"*** submitted by Dr. Yashpal Jaware, SR-I, Department of Neurosurgery of this University via letter no. nil dated 12th April, 2019. **EC Comment on 12th July, 2019:** • Title should mention "RCT". • How randomization will be done • CONSORT guidelines should be followed. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to the Principal-Investigator response has received from P.I. which was forwarded to the Primary reviewer reply has***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	given by reviewer with following comment:- **EC Comment:** • No correction made. • Needed second Review in next meeting. ***Response received from P.I. which was reviewed by the Member-Secretary, IEC & approved.*** **Action Taken :** Provisionally approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P21*** ***(Primary Reviewer: Dr. Amita Jain)***
b2	Clarification of research proposal entitled ***"Study to evaluate the need of surgical interventions amongst adolescent gynaecological problems"*** submitted by Dr. Vijeta Kumari, JR-I, Department of Obstetrics & Gynaecology of this University via letter no. nil dated 9th April, 2019. **EC Comment on 12th July, 2019:** • Adolescent gynaecological problems is an heterogeneous group comprising of too many variables – menstrual irregularity, pain, leucorrhoea, PID, Ovarian masses, urinary problems, injury, sexual assault and adolescent pregnancy. So now sample size becomes vital. Please consult a statistician and decide the sample size otherwise your results will become statistically insignificant. • Please spend some time to decide your inclusion and exclusion criteria. Right now you have included all adolescent girls who or whose parents have given consent. • We need a data collection sheet which should have the demographic details, history and examination findings, investigations, interventions, treatment details and outcome • With so many variables you may end up with a very large sample size that may be just too big for your limited duration of study. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to Principal-Investigator, response has given by P.I. which was forwarded to the Primary reviewer, reply has given by reviewer & approved.*** **Action Taken :** Provisionally approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P26*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

b3	Clarification of research proposal entitled ***"Comparative study between ultrasound guided erector spinae plane block and para vertebral block in thoracic surgeries"*** submitted by Dr. Akanksha Jain, JR-I, Department of Anaesthesiology of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • The study needs to be written as per CONSORT guidelines. • The topic of the study should reflect the methods like – randomized controlled blinded/open-label etc. • The name of the drug should also be mentioned in the title of the study. • Which one of the two arms will be a control arm if it is a controlled study? • Which randomization method will be used? • How will the allocation concealment be achieved? • Patient information document (PID) is very important document and it needs to be filled again. Are there any complications of either of the anesthesia methods? These have to be discussed with the patient in the PID. Risks from the study have also to be discussed. Compensation has to be planned. • Patient datasheet not attached. • Please provide a CONSORT checklist duly filled along with the revised thesis performa. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to Principal-Investigator, response has given by P.I. which was forwarded to the Primary reviewer, reply has given by reviewer with following comment:*** • The CONSORT guideline performa should not show the page and line number where respective change has been made. • Please discuss Randomization method. • How will the allocation be concealed & analysis. • The complications of the Drugs have to be discussed in the PID **Action Taken:** The above comment forwarded to the P.I. via this office letter no. 1416/Ethics/19 dated 24th September, 2019. ***Reply has not given by P.I. by 17th October, 2019.*** **EC Decision:** Pending ***Ref. code: 97th ECM II B-Thesis/P31*** ***(Primary Reviewer : Dr. Vimal Kumar Paliwal)***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

b4	Clarification of research proposal entitled ***"Comparison between LMA proseal and I-gel airway in anaesthetized patients on spontaneous ventilation during daycare procedures"*** submitted by Dr. Neha Singh, JR-I, Department of Anaesthesiology of this University via letter no. nil dated 13th April, 2019. **EC Comment on 12th July, 2019:** • Kindly submit Conflict of interest form. It should be done in form of RCT. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed the Member-Secretary, IEC & approved.*** **Action Taken:** Provisionally Approved with condition to kindly submit the CTRI registration. **EC Decision:** Pending because CTRI registration has not submitted by you ***Ref. code: 97th ECM II B-Thesis/P32*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
b5	Clarification of research proposal entitled ***"Immunohistochemical expression of PD-L1 in malignant soft tissue tumor"*** submitted by Dr. Ashutosh Mishra, JR-I, Department of Pathology of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • The objective is to evaluate the immunohistochemical expression of PD-L1, proliferation index K1-67 and its correlation with clinic-pathological findings of malignant soft tissue tumors • Sample size is 50. Has it been statistically derived? • Active patients as well as paraffin blocks of soft tissue sarcoma from records will form the study group. • Methodology has been elaborately described. • How will the consent be obtained from patients whose paraffin blocks will be used in this study? They may not even be alive. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed the Member-Secretary, IEC & approved.*** **Action Taken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P37*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
b6	Clarification of research proposal entitled ***"Role of TLR-3 polymorphism as predisposing factor to infections in patients of acute leukemia on treatment"***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	submitted by Dr. Akanksha Sharma, JR-I, Department of Pathology of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • Kindly submit **CONSORT** guidelines as it has control arm. • Kindly submit CTRI registration. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was forwarded to the Primary reviewer, response has given by the reviewer & approved.*** **Action Taken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P38*** ***(Primary Reviewer: Dr. Rajeev Garg)***
b7	Clarification of research proposal entitled ***"Clinical and radiological comparison of long- term and short- term outcomes of posterior canal wall reconstruction technique by using composite multifractured osteoperiosteal flap (C.M.O.F) versus conventional canal wall down mastoidectomy"*** submitted by Dr. Monica Patnaik, JRI, Department of Otorhinolaryngology and Head- Neck Surgery of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • The PI wishes to compare the outcome of two surgical methods to treat patients with CSOM. How will the patients be chosen for either of the procedures? Will this be an open-label or blinded study? Which allocation concealment method will be used? The thesis performa needs to be written as per the CONSORT guidelines. • Including patients retrospectively will dilute the impact of the study. It is advisable to restrict this to a prospective study. • The complications from the either of the surgical procedures, the risks involved have to be discussed with the patient in the patient information documents. • The issue of compensation has to be discussed. Who will pay for compensation in case of litigation? Who will bear the cost of treatment if a patient develops complication of either of the surgical procedure? • How much is the additional cost of obtaining/using CMOF for reconstruction of posterior canal wall? Who will bear the cost of the procedure? • Patient data sheet is not provided.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• Please submit a CONSORT checklist dully filled along with the revised thesis performa. **EC Decision on 12th July, 2019:** Re-submit ***The above comment send to P.I., reply has given by P.I. but the reviewer has given comment again.*** **Comment:** • Is theirs a retrospective or a prospective study? • CONSORT statement is not required if it is a retrospective study. • A prospective study comparing two surgical procedures will required the project to be re-written as per CONSORT guidelines. **Action Taken:** The above comment was forwarded to the P.I. via this office letter no.1408/Ethics/19 dated 24th September, 2019. ***Reply has not given by P.I. till 17th October, 2019.*** **EC Decision:** Pending ***Ref. code: 97th ECM II B-Thesis/P4*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
b8	Clarification of research proposal entitled ***"Comparative effectiveness of different concentrations of dextrose prolotherapy in osteoarthritis knee- A prospective study"*** submitted by Dr. Snigdha Mishra, JR-I, Department of PMR of this University via letter no. nil dated 22nd April, 2019. **EC Comment on 12th July, 2019:** • Hindi & English Inform Consent form is not similar **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed the Member-Secretary, IEC & approved.*** **Action Taken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P47*** ***(Primary Reviewer: Dr. Rajendra Nath)***
b9	Research proposal entitled ***"Expression of p53, cyclin d1 and ki-67 markers in premalignant and malignant lesions of oral cavity and oropharynx"*** submitted by Dr. Eshani Dutta, JR-I, Department of Otorhinolaryngology and Head- Neck of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • Please specify the study type. • Objective is not clear.

Chairperson, IEC

Part IIB

Ph.D. Scholars

K.G's Medical University U.P., Lucknow

IIB	Ph. D. Scholar
1-	Research proposal entitled ***"AAS analysis of different base metal alloys and detection of S. mutans and S. sobrinus from dental plaques adhered on dental crown by RT-PCR"*** sponsored by ICMR, New Delhi submitted by Ms. Shikha Gupta under the guidance of Prof. Jitendra Rao, Department of Prosthodontics, Faculty of Dental Sciences of this University via letter no. nil dated 21st August, 2019. **EC Comment:** • Annexure-7, Part III needs to be revised. • Objective of study do not match with the title. • Background information and date are not sufficient. • Methodology should be revised and elaborated in details. • Hindi version of Informed Consent Form is not explicit and should be revised. **EC Decision:** Approval after justification ***Ref. code: 99th ECM II B-Ph.D/P1*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***
2.	Research proposal entitled ***"Dose optimization of flaxseed powder and oil in subjects with metabolic syndrome"*** sponsored by CSIR-JRF submitted by Mr. Rahul Kumar Yadav under the guidance of Prof. Narsingh Verma, Department of Physiology of this University via letter no. nil dated 13th August, 2019. **EC Comment:** • Does not involve invasive procedures, though project requires oral administration of Flax seed powder and oil in combination. Flax seed powder being a more of an unprocessed preparation while oil being a concentrated preparation, it is likely that both will have different degree of responses with respect to both efficacy and adverse effect. In case of benefits and/or adverse effect, it will be confounding factor in determining as to which agent is the causative, therefore additional groups being administered either flaxseed powder or oil per se will be desirable • Side effects/adverse effects of flax seed powder/oil have not been presented in the proposal. This is necessary to identify the patient reacting adversely to the treatment which in turn is not very unlikely as the project requires prolonged administration i.e up to 5 months. • PI should provide prior evidence of these agents not being toxic following continuous administration up-to 5 months. • Who will bear the cost? • Kindly provide published authentic documents indicating safety of Flax seed

VI-	Other Matter
1	In the last Meeting was held on 6th September, 2019, Committee was ask from Prof. Shaleen Chandra, Head, Department of Oral Pathology & Microbiology of this University that ***"Committee is of view that no single person can do so many projects simultaneously"*** reply has received from Prof. Chandra via his letter no. 629/Oral/Path/19 dated 25th September, 2019. **EC Decision:** Decision not taken by the Committee
2	Request to change the topic of the research proposal entitled ***"Prospective interventional study of neoadjuvent temozolomide inpatients of inoperable supratentorial malignant gliomas"*** submitted by Dr. Suresh Kumar Jaiswal, SR-I, Department of Neurosurgery of this University via letter no. nil dated nil. ***The above proposal was put-up in the last Meeting held on 6th September, 2019 with various comment were made by the Dr. Surajit Bhattacharya his Primary Reviewer:-*** **Comment:** • Sample size does not depend on patient availability alone. You have to sit with a statistician and discuss your study plan. He/she will ask you what is a doable number of patients and then curtail the number of variables you can chase in this study. This is a good exercise in planning research and this should be done. • Since the comparison will be with patients receiving RT alone include them in your study. Now take the number of both the set of patients - your ones and the RT ones to the statistician and ask him to help you to plan your study. • You have the scope of planning a good study as there will surely be enough patients, but if you end up chasing too many variables your results may not be statistically significant. ***Reply was not given by the P.I. but due to some technical issue topic has been changed by the Principal-Investigator:-*** ***Current title:- "Traumatic cervical spine injury: A prospective study"***

I(A)	Action Taken on decisions of previous Ethics Committee Meeting
	Part (a) 88th ECM was held on 12th July, 2019

Chairperson, IEC
King George's Medical University
U.P., Lucknow

a1-	Clarification of the Annual Progress Report of research protocol no. KCP-330-009 entitled ***"A phase 2b open-label study of selinexor (KPT-330) in Patients with relapsed/ refractory diffuse large B-cell lymphoma (DLBCL)"*** sponsored by M/s Karyopharm Therapeutics Ltd submitted by Dr. Shailendra Prasad Verma, Principal Investigator & Assistant Professor, Department of Clinical Hematology of this University via letter no. 668/CH/19 Dated 9th November, 2019. **EC Decision on 12th July, 2019:** Kindly provide updated report ***The above Decision reviewed by the Member-Secretary, IEC & approved.*** **Action Taken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 88th ECM IIC/ P1*** ***(Primary Reviewer: Dr. Rajendra Nath)***
	Part (b) 93rd ECM was held on 2nd November, 2018
b1.	Research proposal entitled ***"Nanostring nCounter based screening for molecular typing and target-based therapeutics of TNBC in the Indian population"*** sponsored by C.S.I.R., New Delhi submitted by Dr. Neetu Singh, Associate Professor, Department of Molecular Biology Unit, Center for Advance Research of this University by via letter no. nil dated nil. **EC Comment on 2nd November, 2018:** • Applicant is moving on to next step of validation as if she knows the answer to research question? • Primary objective is not defined. • Was Nano string, Ncounter used in previously studies? • If yes then review of literature is not appended? **EC Decision on 2nd November, 2018:** Provisionally approved ***The above comments were sent to PI. The P.I. has given his reply which was forwarded to the Primary reviewer, response received from Primary reviewer who agreed with her reply.*** **Action taken:** Noted, already Provisionally approved **EC Decision:** Approved ***Ref. code: 93rdECM II A/P5*** ***(Primary Reviewer: Dr. A.A. Sonkar)***
	Part (c) 95th ECM was held on 22nd February, 2019
c1	Clarification of research proposal entitled ***"Prosthetic satisfaction and body image among lower limb amputee of north Indian population"*** submitted by Dr. Sudhir Mishra, Assistant Professor, Department of Physical Medicine & Rehabilitation of

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	this University by via letter no. 2404/19 dated 22nd October, 2019. **EC Comment on 22nd February, 2019:** • Title to be revised. It is Northern India and not North India. North Korea and South Korea, North Sudan and South Sudan are independent countries and hence their name is thus. Northern India is a part of India • The review of literature has no reference from this millennium. In the last two decades lower limb prosthesis have undergone quantum improvement and so a better and more recent literature review is needed • Objective is clear. Inclusion and exclusion criteria are acceptable • Why are patients using their prosthesis intermittently excluded? The prosthesis obviously did not improve their quality of life otherwise they would have used it regularly • It is a cross-sectional study • Sample size is derived statistically • Data collection sheet is very elaborate and thorough – clinic-demographic data, Revised Trinity Amputation and Prosthesis Experience Scale and Amputee Body Image Scale are in it. **EC Decision on 22nd February, 2019:** Approved after justification ***The above comments were sent to PI. The P.I. has given his reply which was forwarded to the Primary reviewer, response received from Primary reviewer with following comment:-*** • ***Reply was not clear.*** **Action taken:** The above comment again forwarded to the Principal-Investigator. ***Reply pending by P.I.*** **EC Decision:** Pending ***Ref. code: 95th ECM II A/P2*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
c2	Clarification of research proposal entitled ***"Study of access site complications in patients undergoing transradial coronary intervention in a north Indian population"*** submitted by Dr. Gyana Ranjan Nayak, SR-II, Department of Cardiology of this University via letter no. nil dated nil. **EC Comment on 22nd February, 2019:** **Study duration:** • October, 18th September, 19

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• When will first patient be enrolled in your study? • Discrepancy in sample size calculation (Which showed sample size of 1500) and quoted sample size (500). • In Objectives it is given that management will be evaluated which is not provided in Methodology. **EC Decision on 22nd February, 2019:** Revise & Re-submit ***The above comment forwarded to P.I. response has given by P.I. which was reviewed by the Member-Secretary, IEC & approved*** **Action Taken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 95th ECM II B-Thesis/P51*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
c3	Clarification of research proposal entitled ***"Comparison of 'traditional' versus 'artificial intelligence based' coronary artery disease risk prediction scores in young patients with acute coronary syndrome"*** submitted by Dr. Shaweta Vohra, SRII, Department of Cardiology of this University via letter no. nil dated nil. **EC Comment on 22nd February, 2019:** **Study duration:** • 1st Jan, 19- 31st December, 19` • When will be first patient enrolled in your study? • How will they segregate patient in groups? • Methods of Habited not provided, **EC Decision on 22nd February, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed by the Member-Secretary, IEC & approved*** **Action Taken:** Provisionally Approved **EC Comment:** • Methods of Habited not provided **EC Decision:** Kindly clarify the above point ***Ref. code: 95th ECM II B-Thesis/P55***

Chairperson, IEC

	(Primary Reviewer: Dr. Preeti Agarwal)
c4	Clarification of research proposal entitled ***"Adherence to guideline directed medical therapy for secondary prevention in ACS patients at a tertiary care center in India"*** submitted by Dr. Pravesh Vishwakarma, Associate Professor, Department of Cardiology this University via letter no. nil dated October, 2019. **EC Comment on 22nd February, 2019:** 1. Methods are deficient. What are the criteria for defining adherence to treatment? Till what time after the discharge from the hospital will the patients be eligible for the inclusion into the study? When will you consider a patient compliant to treatment? The patient's Performa does not contain any of this information. Did the author not think of factors responsible for non-adherence to treatment? If yes, these factors should be enumerated in the patient's Performa to ask from each patient in order not to miss any. 2. What is the sample size? Also provide the basis of calculation of sample size. **EC Decision on 22nd February, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed by the Primary reviewer, reply has given from the reviewer with following comment:*** • Kindly provide the revised proposal. **Action Taken:** The above comment again forwarded to the P.I. but response is pending till 24th January, 2020. **EC Comment:** • Approval after kindly submit the CTRI registration **EC Decision:** Kindly submit CTRI registration ***Ref. code: 96th ECM II A/P13*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
c5	Clarification of research Protocol no. SCY-078-305 version 1.0 entitled ***"Open-Label to evaluate-the efficacy, safety, tolerability and pharmacokinetics of SCY-078 in patients with candidiasis, including candidemia, caused by candida auris"*** sponsored by M/S SCYNEXIS, INC Hudson street, Suite submitted by Dr. Sulekha Saxena, Assistant Professor, Department of Critical Care Medicine of this University via letter no. nil dated 11th January, 2019. **EC Comment on 22nd February, 2019:** • Insurance must be renewed. **EC Decision on 22nd February, 2019:** Approval after justification

e12	Clarification of research proposal entitled ***"A study of 24 hours ambulatory blood pressure monitoring among nursing staff working at a tertiary care Hospital in Northern India"*** submitted by Dr. Deepak Kumar Verma, JR-II, Department of Medicine of this University via letter no. nil dated nil. **EC Comment on 12th July, 2019:** • Title to be revised. It is Northern India and not North India. North Korea and South Korea, North Sudan and South Sudan are independent countries and hence their name is thus. Northern India is a part of India • The researchers aim to study the Blood Pressure levels and 24 hours variability and any dipping pattern among nursing staff, and compare results in nurses working in Emergency, ICUs and in non-emergency wards • It is a cross sectional study of 100 cases, statistically calculated

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• The methodology is well defined • Ambulatory BP will be measured by an ABPM machine of Chinese make which will record BP every 30 minutes for 1 day while the nurses are doing their normal activities. Thus they will be classified as normotensives / hypertensives, dippers / non-dippers / reverse dippers. • Data collection sheet is missing. It should have the demographic details, the work place details and all the observational findings. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed the Primary reviewer & approved*** **Action Taken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P116*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
e13	Clarification of research proposal entitled ***"Comparative evaluation of placement of zygomatic implant through extrasinus approach vs. intrasinus approach"*** submitted by Dr. Deepika Kumari Jain, JR-I, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences of this University via letter no. nil dated 17th June, 2019. **EC Comment on 12th July, 2019:** • Signatures are missing. • Who will bear the cost of implant? Patients cannot be asked to bear it. • Kindly clear if any **'Conflict of interest is present'**. **EC Decision on 12th July, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed the Member-Secretary, IEC & approved.*** **Action Taken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P148*** ***(Primary Reviewer: Dr. Balendra Pratap Singh)***

f13	Clarification of research proposal entitled ***"A descriptive study to assess the knowledge and attitude of patients undergoing hemodialysis regarding their dietary management at KGMU, Lucknow with the view to develop an information booklet"*** submitted by Ms. Premsheela Rai/Ms.Priyanka Chaudhary/Ms.Priyanka Verma/Ms.Praveena Singh Deepankar/Ms.Preeti Jaiswar/Mr.Pankaj Jha/Mr. Prabhat Singh under the guidance of Mr.s Roohi Elizabeth Peter KGMU College of Nursing of this University via letter no.nil dated 16th April, 2019. **EC Comment on 6th September, 2019:** • Kindly submit the Methodology. • How to assess the knowledge and attitude of patients. **EC Decision on 6th September, 2019:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was reviewed by the Primary reviewer & approved.*** **Action Taken:** None **EC Decision:** Approved ***Ref. code: 98th ECM IIDa/P6*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***
f14	Clarification of research proposal entitled ***"Clinical and radiological comparison of long- term and short- term outcomes of posterior canal wall reconstruction technique by using composite multifractured osteoperiosteal flap (C.M.O.F) versus conventional canal wall down mastoidectomy"*** submitted by Dr. Monica Patnaik, JRI, Department of Otorhinolaryngology and Head- Neck Surgery of this University via letter no. nil dated 10th April, 2019. **EC Comment on 12th July, 2019:** • The PI wishes to compare the outcome of two surgical methods to treat patients with CSOM. How will the patients be chosen for either of the procedures? Will this be an open-label or blinded study? Which allocation concealment method will be used? The thesis performa needs to be written as per the CONSORT guidelines. Please submit a CONSORT checklist dully filled along with the revised thesis performa. • Including patients retrospectively will dilute the impact of the study. It is advisable to restrict this to a prospective study. • The complications from the either of the surgical procedures, the risks involved have to be discussed with the patient in the patient information documents.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• The issue of compensation has to be discussed. Who will pay for compensation in case of litigation? Who will bear the cost of treatment if a patient develops complication of either of the surgical procedure? • How much is the additional cost of obtaining/using CMOF for reconstruction of posterior canal wall? Who will bear the cost of the procedure? • Patient data sheet is not provided. **EC Decision:** Re-submit ***The above comment forwarded to P.I. response has given by P.I. which was forwarded to Primary Reviewer but response has not given by the reviewer so the Member-Secretary has reviewed the above comment & approved.*** **Action Taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P42*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
f15	Research proposal entitled ***"Retrospective and prospective outcome of duplex-ultrasound guided percutaneous ethanol sclerotherapy of endometrioma"*** submitted by Dr. Nitish Singh, JR-II, Department of Radiodiagnosis of this University via letter no. nil dated nil. **EC Comment:** • Signature missing of Principal-Investigator in Hindi & English Inform consent Form. • Both ICF are not similar, it should be according to SOP. • The term retrospective may be removed from the topic of the study as the methods section and flow-chart provided does not reflect upon any criteria for retrospective chart review. It is also advisable for the PI to keep the study prospective as any intervention study should be. • The outcome measures are not clearly mentioned. • Is duplex-ultrasound guided percutaneous sclerotherapy of endometrioma not a standard of care? If yes, then the outcome of such procedures would be known already. If no, then the justification of not choosing the standard of care has to be given. • Will all consecutive patients be treated with the above said method? If yes, then the patient information document should clearly discuss all possible methods of treatment of ovarian endometrioma including the standard of care treatment and why the PI wishes to offer sclerotherpay to the patient. • Will there be any control arm?

Chairperson, IEC
King George's Medical University

	• The complications of the procedure and risk in participating in the study have to be discussed in detail in the patient information document. • Who will bear the cost of the procedure? • Please discuss the compensation in detail in the PID. **EC Decision:** Approval after justification ***The above comment forwarded to P.I. response has given by P.I. which was forwarded to Primary Reviewer but response has not given by the reviewer so the Member-Secretary has reviewed the above comment & approved.*** **Action Taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P66*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***

chemotherapy?

EC Decision on 12th July, 2019: Re-submit

The above comment send to P.I., reply has given by P.I. which was forwarded to the Previous reviewer r reply has given by reviewer with following comment:-

Comment:

- Sample size does not depend on patient availability alone. You have to sit with a statistician and discuss your study plan. He/she will ask you what a doable number of patients is and then curtail the number of variables you can chase in this study. This is a good exercise in planning research and this should be done.
- Since the comparison will be with patients receiving RT alone include them in your study. Now take the number of both the set of patients - your ones and the RT ones to the statistician and ask him to help you to plan your study.
- You have the scope of planning a good study as there will surely be enough patients, but if you end up chasing too many variables your results may not be statistically significant.

Action Taken: The above comment sent to the P.I.

Reply has not provided by the Principal-Investigator.

EC Decision: Pending

Now, Dr. Jaiswal has changed his title in the research proposal entitled "Traumatic cervical spine injury: A prospective study".

IA	Action Taken on decisions of previous Ethics Committee Meeting
	Part (a) 97th ECM was held on 12th July, 2019
a1-	Clarification of research proposal entitled ***"Retrospective and prospective outcome of duplex- ultrasound guided percutaneous ethanol sclerotherapy of endometrioma"*** submitted by Dr. Nitish Singh, JR-II, Department of Radiodiagnosis of this University via letter no. nil dated 24th April, 2019. **EC Comment on 12th July, 2019:** • Signature missing of Principal-Investigator in Hindi & English Inform consent Form. • Both ICF are not similar, it should be according to SOP. • The term retrospective may be removed from the topic of the study as the methods section and flow-chart provided does not reflect upon any criteria for retrospective chart review. It is also advisable for the PI to keep the study prospective as any intervention study should be. • The outcome measures are not clearly mentioned. • Is duplex-ultrasound guided percutaneous sclerotherapy of endometrioma not a standard of care? If yes, then the outcome of such procedures would be known already. If no, then the justification of not choosing the standard of care has to be given. • Will all consecutive patients be treated with the above said method? If yes, then the patient information document should clearly discuss all possible methods of treatment of ovarian endometrioma including the standard of care treatment and why the PI

U.P., Lucknow

	wishes to offer sclerotherpay to the patient. • Will there be any control arm? • The complications of the procedure and risk in participating in the study have to be discussed in detail in the patient information document. • Who will bear the cost of the procedure? • Please discuss the compensation in detail in the PID. **EC Decision on 12th July, 2019:** Approval after justification ***The aboe comment forwarded to the P.I. which was reviewed by Dr. R.K. Garg, Member-Secretary, IEC & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P66*** ***(Primary Reviewer: Dr.Vimal Kumar Paliwal)***
a2	Clarification of research proposal entitled ***"Comparison of endotracheal tube with supraglottic airway device during laparoscopic surgery and its effects on level of inflammatory biomarker"*** submitted by Dr. Prince Kumar, JR-I, Department of Anaesthesiology of this University via letter no. nil dated 14th May, 2019. **EC Comment on 12th July, 2019:** • The study aims to compare the use of supra-glottic airway device and endotracheal tube in terms of ease of insertion, peri-operative complications, peak airway pressure, haemodynamic parameters (HR, SBP, DBP, MAP) and changes in levels of inflammatory blocker IL-6 • This is a RCT so please provide consort guidelines • Sample size is 60. Was this derived after consulting a statistician? • Please explain your exclusion criteria. Why are obese patients excluded? Why are difficult intubation excluded? They should be included and termed as failures otherwise your study group becomes biased. If the patient has been deemed fit for laparoscopy then why are you excluding him/her from your study just because they are difficult cases? **EC Decision on 12th July, 2019:** Approval after justification ***The aboe comment forwarded to the P.I. which was reviewed by Dr. R.K. Garg, Member-Secretary, IEC & approved.***

	EC Decision on 12th July, 2019: Approval after justification ***The aboe comment forwarded to the P.I. which was forwarded to Primary Reviewer, response received from reviewer with following comment:-*** • ***I think the researchers have not understood our point about sample size. It does not matter whether the samplesize is small or big, if their results are not statistically significant then they will find it difficult to publish their data in good journals. They have to take their study plan to a statistician and hr/she will be able to tell them show many variables they can chase with their available sample size in order to get statistically significant results.*** **ActionTaken:** The above comment again forwarded to the P.I. response pending by P.I. **EC Decision:** Defer in next meeting ***Ref. code: 97th ECM II B-Thesis/P104*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
a7	Clarification of research proposal entitled ***"Comparision of 18-F NaF bone scan fusion image and high resolution CT to predict recurrence of temporamandibular joint ankylosis"*** sponsored by ICMR, New Delhi submitted by Dr. Tasveer Fatima under the guidance of Prof. Shadab Mohammad, Head, Department of Oral and Maxillofacial Surgery, Faculty of Dental Sciences this University via letter no. OMSD/371/19 dated 22nd May, 2019. **EC Comment on 12th July, 2019:** • This proposal is for 3 years period with aim for Ph.D. thesis • Sample size calculation is needed. • Methodology is sketchy is not clear • Case record form is not attached **EC Decision on 12th July, 2019:** Re-write & Re-submit ***The aboe comment forwarded to the P.I. which was forwarded to Primary Reviewer, response received from reviewer & approved.*** **ActionTaken:** Provisionally Approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Ph.D./P2*** ***(Primary Reviewer: Dr. Amita Jain)***

	2-The down-side of snowball sampling is that it tends to accumulate bias because one study subject recruits the future study subject. Therefore, a subsequent interviewee may be a friend of the previous interviewee and may have the same opinion. This is important in today's times when people praise or criticize Govt. policies not on the merit of policies but only out of their affiliations to political parties or religion or caste etc. 3-To get away with both the issues, in my view, the PI should define which departments and "who" in those departments will be interviewed. "Who" means at least the "cadre of the interviewee" may be revealed in SOP to the Ethics Committee. A well structured interview questions will also help in reducing the bias of the interviewer and the interviewee. The questionnaire may be provided to the Ethics committee. **Action taken:** The above comment forwarded to P.I. reply pending. **Ethics Committee Decision:** Approved ***Ref.Code: 101st ECM IB/P11***
12-	Research proposal entitled ***"A Phase II, Open label,randomized controlled trial to assess the safety and efficacy of convalescent plasma to limit COVID-19 associated complications in moderate disease"*** submitted by Dr. D. Himanshu, Associate Professor, Deptt. of Medicine of this University sponsored by ICMR, New Delhi. **Action Taken:** The above proposal forwarded to all EC Members **Dr. S.P.S. Gaur, Chairman, IEC has send his reply with following comments:** **Comment:** The consent to be included in the trial should be accorded by the participating patient and only in case of his inability to do so should a family member been titled to give consent for the patient's inclusion in the trial. There is ambiguity in this matter in the ICF document, the issue needs to be clarified before final approval to the research proposal. **Also, Dr. Rajendra Nath has given his reply with following comments:**

U.P., Lucknow

	• In chronic angina Trimetazidine increases work capacity and delays appearance of symptoms and ECG changes during exercise. This study aims to evaluate whether this drug, administered as an adjunct to conventional optimal medical treatment in patients of stable angina led to improvement of LV mechanics • LV mechanics includes LVEF, LV global longitudinal strain and radial strain. This will be compared 1, 3 and 6 months after Trimetazidine therapy. • Inclusion and exclusion criteria are satisfactory • Sample size 40 – statistically derived • A study design flow chart and a data collection sheet has been provided • But what are they going to compare their results with? There is no control group which is getting only conventional medical therapy and no Trimetazidine. • Study of design is inappropriate. • RCT would be an appropriate design • Kindly provide as new format **EC Decision 25th January, 2020:** Resubmit ***The above comment forwarded to the Principal-Investigator, reply has given by PI which was forwarded to the reviewer, reply has given by reviewer & approved.*** **Action Taken:** Provisionally approved **EC Decision:** Approved ***Ref.Code: 100th ECM II B-Thesis/P4*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
7-	Clarification of research proposal entitled ***"A clinic-immunological study of Guillain-barre syndrome with special reference to Host TNF- a, CD 14 and CD 1E genetic polymorphism"*** submitted by Dr. Rajarshi Chakraborty, SR-I, Department of Neurology of this University via letter no. nil dated 19th November, 2019. **EC Comment 25th January, 2020:** • Consent form is blank **EC Decision 25th January, 2020:** Approval after justification ***Prof. Amita Jain & R. K. Garg did not take part in the discussion.*** **EC Decision:** Approved ***Ref. code: 100th ECM II B-Thesis/P9***

Item no. IIA

New Proposals

K.G's Medical University U.P., Lucknow

Note: The meeting which was to be held on 6/3/2020 is due to lock down on several dates.

II-A	New Proposal
1.	Research proposal entitled ***"Identifying behavioral and psychological symptom clusters of dementia: A multi centric exploratory study"*** sponsored by IPS Secretariat (Indian Psychiatric Society) submitted by Prof. Shrikant Srivastava, Head, Department of Geriatric Mental Health of this University via letter no. 591/DGMH dated 6th December, 2019. **EC Decision:** Approved ***Ref. code: 101st ECM IIA/P1*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
2.	Research proposal entitled ***"Cerebrospinal fluid based therapeutic target identification for JE virus vaccine development"*** sponsored by ICMR New delhi submitted by Dr. D. Himanshu, Additional Professor, Department of Medicine of this University via letter no. MIC/20/39 dated 5th February, 2020. **EC Comment:** • Procedure details are not provided • How the diagnosis of JE will be made? I do not see any are from dxtic lab in the investigator's list • 27.2% prevalence of JE, which is used for sample size calculation, is 10 yrs old date. New rate is ,10% • Consent forms not as per new format. **EC Decision:** Revise & Resubmit ***Ref. code: 101st ECM IIA/P2*** ***(Primary Reviewer: Dr. Amita Jain)***
3.	Research proposal entitled ***"Treatment adherence and spacer compliance in patients with asthma and COPD"*** submitted by Prof. Suryakant, Head, Department of Respiratory Medicine of this University via letter no. nil dated 26th December, 2019. **EC Comment:** • Budget requirement has not been discussed • Questionnaire and case report form not submitted **EC Decision:** Approval after justification ***Ref. code: 101st ECM IIA/P3*** ***(Primary Reviewer: Dr. RajendraNath)***
5.	Research proposal entitled ***"Analogue of prothrombin time: identification and assay development of novel non-invasive and surrogate indicator of blood***

R.K.Garg
Member Secretary IEC

	coagulopathy" sponsored by ICMR New Delhi submitted by Prof. Rishi Sethi, Department of Cardiology of this University via letter no. CFAR/2020/03 dated 6th January, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM IIA/P5*** ***(Primary Reviewer: Dr. Rajeev Garg)***
6.	Research proposal entitled ***"Prostate cancer: probing of comprehensive (cellular and systemic) metabolomics- based biomarker as a surrogate of the histopathology- based gleason score grading"*** sponsored by ICMR New Delhi submitted by Dr. Manoj Kumar, Associate Professor, Department of Urology of this University via letter no. nil dated 6thJanuary, 2020. **EC Comment:** • This study is to explore for surrogate biomarkers for the histo-pathological Gleason's Score of CA Prostate. • Three cohorts will be studied – healthy cohort, B.H.P and CA. Prostate • Study material comprises of clinical information, serum samples and histological specimens from BHP, CA Prostate and adjacent normal tissue • They will study the qualitative and quantitative differences of metabolomics of serum samples and cellular samples in these 3 cohorts. • An attempt will be made to generate comprehensive biomarkers from serum and cellular metabolomics and compare the same with Gleason's score • Sample size is missing • Methodology – what exactly will be done is missing. We know the material but what is the method? • Data collection sheet is missing • No background data or previous published literature provided • Is it ICMR funded? No evidence provided. **EC Decision:** Approval after justification ***Ref. code: 101st ECM IIA/P6*** ***(Primary Reviewer: Dr. Surajit Bhattachrya)***
7.	Research proposal entitled ***"Diagnostic and epidemiological study of brucellosis in northern India and to construct a clinical prediction rule"*** sponsored by ICMR New Delhi submitted by Prof. Raj Kumar Kalyan, Department of Microbiology of this University via letter no. nil dated 7th January, 2020. **EC Comment:** • Objectives are not clear **EC Decision:** Approval after justification

	EC Decision: Re-submit ***Ref. code: 101st ECM IIA/P12*** ***(Primary Reviewer: Dr. Amita Jain)***
13.	Research proposal entitled ***"The morphometric analysis of mandibular condyle and coronoid process in different malocclusion in 3D CBCT"*** submitted by Dr. Akhilanand Chaurasia, Assistant Professor, Department of Oral Medicine and Radiology of this University via letter no. nil dated 16th January, 2020. **EC Comment:** • The study aims to evaluate the volume of mandibular condyle and coronoid process and correlate it with age, sec and skeletal deformities using 3D CBCT • Guidelines for patient information sheet is attached without making any attempt to construct a study specific patient information sheet • Sample size 152, statistically calculated. • Data collection sheet is missing. What exactly will be observed – what dimensions, what volumes? • Will the patient also be physically examined? A big and tall man will have a bigger condyle as compared to a small and short woman! In Coronoid process significant appositional bone growth secondary to abnormal stresses mediated by the tendon of the temporalis muscle does occur so the patients have to be examined and a data collection **EC Decision:** Re-submit ***Ref. code: 101st ECM IIA/P13*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
14.	Research proposal entitled ***"Role of pharmacogenetics in the treatment of type 2 diabetes in Indian population"*** submitted by Prof. Kauser Usman, Department of Medicine of this University via letter no. 172/MED/2020 dated 21st January, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM IIA/P14*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***

39.	Research proposal entitled ***"Soy, Horsetail, and fig nutraceuticals as an alternative for estrogen replacement therapy in post-menopausal osteoporosis"*** sponsored by ICMR New Delhi submitted by Prof. R.N. Srivastava, Department of Orthopaedic Surgery of this University via letter no. 12/P/OS/2020 dated 13th January, 2020. **EC Comment:** • This is ICMR, sponsored trial involving nutraeuticals of natural origin. If it comes in perview of ICMR then Clinical trial registry number needed. **EC Decision:** Approval after justification ***Ref. code: 101st ECM IIA/P39*** ***(Primary Reviewer: Dr.Rajeev Garg)***
40.	Research proposal entitled ***"Endoscopic colpopexy for grade 3 and 4 urerine proposae and vaginal vault prolapse"*** submitted by Prof. Abhijit Chandra, Head, Department of Surgical Gastroenterology of this University via letter no. SG 85 dated 10th January, 2020. **EC Comment:** • In this study an endoscopic technique is being offered to patients of Grade 3 and 4 Uterine and vaginal vault prolapse which promises decrease hospital stay and faster relief without an abdominal incision. • Per vaginally the anterior vaginal wall will be tacked to the anterior abdominal wall by a sub-mucosal approach along the anterior vaginal wall. The sub-mucosal tunnel will be closed by metal clips endoscopically. • So this is not a R.C.T and nothing to do with rectal prolapsed as the research proposal title suggests • Sample size is 10, with no statistical backing. So is it a pilot study? • What will be observed? A data collection sheet is required. • When the anterior wall of the vagina is tacked to the anterior abdominal wall, without having a camera in the abdominal cavity, as there are no abdominal incisions, how can we ensure the safety of the bowels and the urinary bladder? **EC Decision:** Approval after justification ***Ref. code: 101st ECM IIA/P40*** ***(Primary Reviewer: Dr.Surajit Bhattacharya)***
42.	Research proposal entitled ***"Assess the barriers for implementing nursing theory-based practices in the clinical among nursing students"*** submitted by Dr. Suchana Roy Bhomik, Assistant Professor, KGMU College of Nursing of this University via letter no. 117/PF dated 7th February, 2020. **EC Comment:**

19: Taste and smell" submitted by Dr. Shrikant Shrivastava, Additional Officer, Department of G.M.H. of this University via letter no. nil dated nil.

The above proposal forwarded to Dr. Vimal Kumar Paliwal & Dr. Preeti Agarwal, reply has given by Dr. Agarwal with following comment:-

- Title of the project mentions Taste and smell; however in the objectives the investigators are only investigating the taste
- 2. Group I, Point B : Error: The investigators are not even aware that it is the Nasal and Throat swab which is used for COVID 19 testing not the blood sample.
- 3. Please enlist the names of tertiary care hospitals you intend to include in the study. Either an participation letter should be attached or someone involved in patient care at those centers must be included in the study.
- 4. Selection criteria point 3: no chronic illness' Type II DM and Hypertension are also chronic illnesses, generalized terms must be avoided from the section criteria. it needs to robust and well defined.
- 5. The sample size calculation is based on authors previous study on depression which does not stand for present scenario. Study sample size calculation must be provided clearly.
- 6. Study endpoint is not defined and will they monitor the return of the sense of taste when the patient is declared cured of SARS-Cov2 infection.
- Kindly send the point wise reply at the earliest so that may be taken further action.
- The study involves the examination of taste sensation of COVID 19 affected individuals and normal controls. The tests will be self administered by the patients. Audio-visual consent will be taken. The tests will be monitored by research team by tele consultation to prevent exposure to COVID to research team

Reply has given by P.I. which was reviewed by the Member-Secretary, IEC & Approved.

Action taken: Provisionally approved

EC Decision: Approved

Minutes of 101st "Institutional Ethics Committee" Meeting held on 23rd May, 2020

Minutes Item no. IIA
New proposals

K.G's Medical University U.P., Lucknow

IIA	New Proposals
9-	Research proposal entitled ***"Evaluation of degradation pattern of different RNA types and gene expression (messenger RNA: HIFlaGAPDH, B-ACTIN, micro RNA: MIR 143, MIR125, ribosomal RNA) in human dental pulp tissue under varied temperature & storage time interval: development of an efficient post mortem interval (PMI) estimation method"*** sponsored by ICMR New Delhi submitted by Prof. Shalni Gupta, Department of Oral Pathology and Microbiology of this University via letter no. nil dated 11th January, 2020. **EC Comment:** • Statistical analysis for selecting sample size is needed. Same may be implemented during project tenure. **EC Decision:-** Approval after justification ***Ref. code: 101st ECM IIA/P9*** ***(Primary Reviewer: Dr. Smriti Bhadauria)***
16	Research proposal entitled ***"Phytofabricated metallic nanoparticles and their clinical relevance in treatment of oral premalignant lesions"*** sponsored by Indian Council of Medical Research New Delhi submitted by Prof. Rakesh Kumar Yadav, Department of Conservative Dentistry and Endodontics of this University via letter no. 830/2020 dated 24" January, 2020. **EC Comment:** Assessment: • Back ground information on toxicity profile of relevant nanoparticles needs better elaboration. • Comments: • Statistical analysis for selecting sample size is needed. Same may be implemented during project tenure. **EC Decision:-** Approval after justification ***Ref. code: 101st ECM IIA/P16*** ***(Primary Reviewer: Dr. Smriti Bhadauria)***
25.	Research proposal entitled ***"Consumer's perspective on referral services for medical co-morbidities in tertiary care setting of North India"*** submitted by Dr. S.K. Kar, Associate Professor, Department of Psychiatry of this University via letter no. 2022/2020 dated 4th February, 2020. **EC Comment:** • Project is well crafted, however statistical analysis justifying sample size is not provided. Please include this during the execution of project.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	EC Decision: Approval after justification ***Ref. code: 101st ECM IIA/P25*** ***(Primary Reviewer: Dr. Smriti Bhadauria)***
34.	Research proposal entitled ***"Comparison of tetrachromic VOF stain with routine H&E staining techniques for characterizing stromal soft and hard tissue components"*** submitted by Prof. Shaleen Chandra, Head, Department of Oral Pathology Faculty of Dental Sciences of this University via letter no. 839/OP/2020 dated 6th February, 2020. **EC Comment:** • Project aims to compare the efficiency of two specific techniques in terms of their ability to adequately characterize tissue components. It has significant application. **EC Decision:** Approval after justification ***Ref. code: 101st ECM IIA/P34*** ***(Primary Reviewer: Dr. Smriti Bhadauri)***
41.	Research proposal entitled ***"Per anal endoscopic Rectopexy versus laparoscopic ventral mesh rectopexy for complete rectal prolaps: A randomized control trial"*** submitted by Prof. Abhijit Chandra, Head, Department of Surgical Gastroenterology of this University via letter no. SG 84 dated 10th January, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM IIA/P41*** ***(Primary Reviewer: Dr.Anoop Kumar Verma)***

Minutes of 101st "Institutional Ethics Committee" Meeting held on 23rd May, 2020

Minutes Item no. IIB
Thesis proposals

K.G's Medical University U.P., Lucknow

IIB	New Thesis-Resident
1.	Research proposal entitled ***"Effect of beta-3 agonist (Mirabegron) and alpha blocker (Tamsulosin) on treatment of ureteral stent related symptoms: A randomized controlled trial"*** submitted by Dr. Pavan Kumar S.K, SRII, Department of Urology of this University via letter no. nil dated 20th December, 2019. **EC Comment:** 50 subjects in three arms – placebo, mirabegron and tamsulosin. Randomization by chart. Body pain score and urinary symptom score will be compared. There are several issues: • Who will bear the cost of the medications and investigations? • DCGI approval of the drugs have to be submitted. • Who will bear the cost of insurance/compensation? The required information has to be submitted to ethics committee. • The study is written in past tense with inclusion of patients from Nov 2019. The part need to be re-written. Inclusion of patients can commence only after obtaining ethical clearance. **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P1*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
2.	Research proposal entitled ***"Effect of priming on adjunctive repetitive trans cranial magnetic stimulation in the treatment of late life depression, and associated quantitative EEG changes: A prospective randomized sham controlled study"*** submitted by Dr. Vidya K.L, SR, Department of Geriatric Mental Health of this University via letter no. 601/DGMH dated 10th December, 2019. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P2*** ***(Primary Reviewer: Dr. Rajendra Nath)***
3.	Research proposal entitled ***"Voiding dysfunction after vesicovaginal fistula repair: prevalence, predictive factors and comparative analysis of functional outcomes between laparoscopic, open transabdominal and transvaginal repair"*** submitted by Dr. Mayank Jain, SRII, Department of Urology of this University via letter no. nil dated 20th December, 2019. **EC Comment:** • Sample size not calculated • How many cases will be subject to each arm of surgical intervention? • Consent form is as per old version

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	EC Decision: Approval after justification ***Ref. code: 101st ECM II B-Thesis/P3*** ***(Primary Reviewer: Dr. Amita Jain)***
4.	Research proposal entitled ***"Menstrual hygiene practices among females of reproductive age in rural Lucknow"*** submitted by Dr. Arunima Saini, JRII, Department of Community Medicine & Public Health of this University via letter no. nil dated 20th December, 2019. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P4*** ***(Primary Reviewer: Dr. Rajeev Garg)***
5.	Research proposal entitled ***"A combined retrospective- prospective cohort study for efficacy of internal urethrotomy followed by CIC with and without clobetasol ointment in the management of stricture urethra"*** submitted by Dr. Mukesh Kumar, JRII, Department of Urology of this University via letter no. nil dated 21st December, 2019. **EC Comment:** • Patients who have undergone internal urethrotomy will be followed up to compare the effect of CIC with or without Clobetasol ointment by uroflometry, RGU or MCU • Data collection sheet has been provided • Sample size is missing. We need this for statistical significance of the results • Follow up schedule and outcome criteria defined • Catheterization schedule standardized **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P5*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
6.	Research proposal entitled ***"A prospective observational study of outcomes of various treatment modalities for chyluria and their correlation with urinary triglyceride levels"*** submitted by Dr. Akash Bansal, SRII, Department of Urology of this University via letter no. nil dated 24th December, 2019. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P6*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***
7.	Research proposal entitled ***"Nocturia in men aged above 50 years with LUTS/BPH: prevalence, its predictive factors and association with nocturnal polyuria and comparative analysis of outcome after tamsulosin or silodosin therapy by doing an open label randomized controlled study"*** submitted by Dr. Gyanendra Singh, SRII, Department of Urology of this University via letter no. nil dated 23rd December, 2019.

Chairperson, IEC
King George's Medical University

	EC Comment: • Sample size calculation not done **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P7*** ***(Primary Reviewer: Dr. A.A. Sonkar)***
8.	Research proposal entitled ***"Metastatic renal cell carcinoma: retrospective and prospective experience of a tertiary care center"*** submitted by Dr. Sanjeev Kumar, SRII, Department of Urology of this University via letter no. nil dated 23rd December, 2019. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P8*** ***(Primary Reviewer: Dr. Smriti Bhadauria)***
9.	Research proposal entitled ***"Demographic, psychiatric and molecular profileof extensively drug resistant tuberculosis patients (A Pilot Study)"*** submitted by Dr. Yash Jagdhari, JRI, Department of Respiratory Medicine of this University via letter no. nil dated 26th December, 2019. **EC Comment:** • As Psychiatric evaluation is being also evaluated in the study someone from the Department of Psychiatry is needed. **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P9*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
10.	Research proposal entitled ***"A study of mental Health comorbidities in patients with hypertension"*** submitted by Dr. Pooja Misal, SRI, Department of Geriatric Mental Health of this University via letter no. 2927/MED/19 dated 31st December, 2019. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P10*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
11.	Research proposal entitled ***"USG guided dextrose prolotherapy versus platelet-rich plasma injections for the treatment of plantar fasciitis: A randomized controlled trial"*** submitted by Dr. Neelam Kumari, JRI, Department of Physical Medicine & Rehabilitation of this University via letter no. nil dated 3rd January, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P11*** ***(Primary Reviewer: Dr. Rajendra Nath)***
12.	Research proposal entitled ***"Intracranial meningiomas: retrospective review of 10 Years"*** submitted by Dr. Aditya Varshney, SRI, Department of Neurosurgery of this

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	University via letter no. nil dated 4th January, 2020. **EC Comment:** • This is a follow-up study of cases who were died as Meningiomas in last 10 years (Not a retrospective study) 1. There is not clause for cases who are not traceable or who died 2. How many cases are actually registered in the department? 3. How consent will be taken because patient may not be physically present. 4. Consent form is on old format. **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P12*** ***(Primary Reviewer: Dr. Amita Jain)***
13.	Research proposal entitled ***"Perceptions and practices regarding clinical ethics by postgraduate Medical Students"*** submitted by Dr. Anila Varghese, JRI, Department of Community Medicine & Public Health of this University via letter no. nil dated 20th December, 2019. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P13*** ***(Primary Reviewer: Dr. Rajeev Garg)***
14.	Research proposal entitled ***"A study of various phenotypes in patients of bronchial asthma attending a tertiary care centre in Northern India"*** submitted by Dr. Naveen Kumar, JRI, Department of Respiratory Medicine of this University via letter no. nil dated 9th January, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P14*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
15.	Research proposal entitled ***"The comparative effects of injecting intra-articular platelet-rich plasma and hypertonic dextrose prolotherapy in osteoarthritis knee- A randomized control trial"*** submitted by Dr. Neeraj Singh, JRI, Department of Physical Medicine & Rehabilitation of this University via letter no. nil dated 9th January, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P15*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***
16.	Research proposal entitled ***"Evaluation of risk of fall in knee osteoarthritis: A cross-sectional study"*** submitted by Dr. Juhika Kaur Nagi, JRI, Department of Physical Medicine & Rehabilitation of this University via letter no. 2665/20 dated 7th January, 2020. **EC Comment:** • Why half of sample size calculated?

Chairperson, IEC
King George's Medical University

	• Topic should be rewritten? • Eg. BSS and TUG in evaluation of risk of fall. **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P16*** ***(Primary Reviewer: Dr. A.A. Sonkar)***
17.	Research proposal entitled ***"Effects of BOTULINUM toxin injection with casting in children of spastic cerebral palsy: A randomized controlled trial"*** submitted by Dr. Shivansh Vishwakarma, JRI, Department of Physical Medicine & Rehabilitation of this University via letter no. 2679/20 dated 15th January, 2020. **EC Comment:** • Prekect is well written and problems are defined nicely however, owing to BOTULINUM TOXIN being bio-hazard, its use must have prior approval from Institutional BioSafety Committee. • There is no such certificate in the proposal. • Second opinion from Bio-safety Incharge will be appreciable • Recommended under the conditions that Use, Disposal and Handling of Botulinum toxin are in accordance with Institutional Biosafety Guidelines. **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P17*** ***(Primary Reviewer: Dr. Smriti Bhadauria)***
18.	Research proposal entitled ***"A study on the assessment of cardiovascular risk and CIMT in systemic sclerosis and correlation of CIMT with disease activity"*** submitted by Dr. Prasanna Kumar, SRI, Department of Rheumatology of this University via letter no. Rh/82/20 dated 16th January, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P18*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
19.	Research proposal entitled ***"Major salivary gland ultrasound and elastography as a predictor of disease activity in patients of primary sjogren's syndrome"*** submitted by Dr. Chandwar Kunal Ashutosh, SR, Department of Rheumatology of this University via letter no. Rh/80/20 dated 16th January, 2020. **EC Comment:** 30 patients of Sjogren syndrome will be subjected to ultrasound and elastography of submandibular and parotid glands. • Inclusion of patients in the study should start after obtaining the ethical

Research proposal entitled ***"Stroke in children with tuberculous meningitis: A prospective observational study"*** submitted by Dr. Niti Prakash, JRI, Department of Paediatrics of this University via letter no.282/Ped/2020 dated 7th February, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P50*** ***(Primary Reviewer: Dr. Rajeev Garg)***
51.	Research proposal entitled ***"Efficacy and NSAID sparing effect of conventional synthetic disease modifying anti-rheumatic drugs (DMARD) in patients of spondyloarthritis"*** submitted by Dr. Juhi Dixit, SRI, Department of Rheumatology of this University via letter no. Rh/81/2020 dated 16th January, 2020. **EC Comment:** • The study aims to evaluate the efficacy and NSAID sparing effect of conventional DMARDs in patients of spondiloarthritis • Sample size is 100. How was it derived? • Data collection sheet with History, Clinical Examination, Ankylosing Spondilitis Disease Activity Score (ASDAS), Bath Ankylosing Spondilitis Disease activity Index (BASDAI), Bath Ankylosing Spondilitis Functional Index (BASFI), Maastricht Ankylosing Spondilitis Enthesitis Index (MASES) and laboratory investigations attached • Which DMARD will be used and in what dosage? (Sulphasalazine / MTX) • What will be the follow up schedule? • How will we look for adverse effects and how will we manage them? • Discontinuation and withdrawal criteria should be spelt out. • Methodology not clear. We need a study plan from start to finish.

	salivary gland neoplasms and it's CYTO-histological correlation for it's risk stratification" submitted by Dr. Pooja Dwivedi, JRI, Department of Pathology of this University via letter no. 173/2020 dated 8th February, 2020. **EC Decision:** Approved ***Ref. code: 101st ECM II B-Thesis/P64*** ***(Primary Reviewer: Dr. Smriti Bhadoria)***
65.	Research proposal entitled ***"Evaluation of CCL28 and CCR10 expression in oral squamous cell carcinoma"*** submitted by Dr. Manjit Kour Mehta, JRI, Department of Oral Pathology & Microbiology Faculty of Dental Sciences of this University via letter no. 849/OP/2020 dated 10th February, 2020. **EC Comment:** • Sample size justification needed. **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P65*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
66.	Research proposal entitled ***"Efficacy of injectable platelet rich fibrin (I-PRF) with or without arthrocentesis in TMJ osteoarthritis patients"*** submitted by Dr. V.E. Shanthosh Kanna, JRII, Department of Oral & Maxillofacial Surgery Faculty of Dental Sciences of this University via letter no. OMS/126/2020 dated 8th February, 2020. **EC Comment:** The study will include 32 patients in each of two arms. Patients in one arm will be subjected to injection of PRF in TMJ and patients in other arm will be subjected to arthrocentesis followed by PRF injection. Various parameters related to control of pain and osteoarthiritis using cone beam computed tomography (CBCT) will be compared between two arms. There are some issues: • Will it be a randomized study? Which randomization methods will be used? • What is the standard of care in TMJ osteoarthritis? • Who will bear the cost of the treatment? • Who will bear the cost of the compensation/insurance? • The possible side-effects of the procedure/treatment have to be discussed in the patient information document. **EC Decision:** Approval after justification ***Ref. code: 101st ECM II B-Thesis/P66***

	Part-b-101st ECM was held on 15th June, 2020
b1	Clarification of research proposal entitled ***"Predictors of stent malapposition and restenosis in post primary PCI patients- an OCT based study"*** submitted by Dr. Swati Sharma, SR-II, Department of Cardiology of this University via letter no. nil dated 16th August, 2019. **EC Comment on 15th June, 2020:** • Please provide the details of the procedure of OCT, Will the patient be required to get admitted for this procedure? How long will be the hospital stay? • What are the known complications of doing OCT? Please discuss the complications in the patient's documentation Performa. **EC Decision on 15th June, 2020:** Approval after justification ***The above proposal approved by the Member-Secretary, IEC.*** **Further Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 99thECM IIB-Thesis/P1*** ***(Primary Reviewer: Dr. Rajeev Garg)***
	101st ECM was held on 16th May, 2020
b2	Clarification of research proposal entitled ***"Prostate cancer: probing of comprehensive (cellular and systemic) metabolomics- based biomarker as a surrogate of the histopathology- based gleason score grading"*** sponsored by ICMR New Delhi submitted by Dr. Manoj Kumar, Associate Professor, Department of Urology of this University via letter no. nil dated 22nd May, 2020. **EC Comment on 16th May, 2020:** • This study is to explore for surrogate biomarkers for the histo-pathological Gleason's Score of CA Prostate. • Three cohorts will be studied – healthy cohort, B.H.P and CA. Prostate • Study material comprises of clinical information, serum samples and histological specimens from BHP, CA Prostate and adjacent normal tissue • They will study the qualitative and quantitative differences of metabolomics of serum samples and cellular samples in these 3 cohorts. • An attempt will be made to generate comprehensive biomarkers from serum and cellular metabolomics and compare the same with Gleason's score • Sample size is missing • Methodology – what exactly will be done is missing. We know the material but what is the method? • Data collection sheet is missing • No background data or previous published literature provided • Is it ICMR funded? No evidence provided. **EC Decision on 16th May, 2020:** Approval after justification ***The above comment forwarded to P.I. response has given by the P.I. which was forwarded to Primary reviewer, reply has given by the revieer & approved.*** **Further Action taken:** Provisionally approved

EC Decision: Approval subject to fulfillment & Administrative Formalities

Ref. code: IVECM IB-COVID-19/P8

Expedited review of research protocol version no. 3.4 dated 18th May, 2020 entitled ***"A Randomized, open label, parallel efficacy, active control, multicentre esploratory drug trial to evaluate efficacy and safety of an Ayurvedic Formulation (AYUSH-64) a adjunct treatment to standard of care for the management of mild to moderate COVID-19 patients"*** submitted by Dr. D. Himanshu, Additional Professor, Department of Medicine of this University via letter no. nil dated 8th June, 2020.

The above proposal forwarded to Dr. Surajit Bhattacharya & Dr. Preeti Agarwal.

Reply received from both reviewers with their approval.

Dr. Bhattacharya has given his reply with following comments:-

AYUSH 64, a poly herbal preparation has been tested as safe and non-toxic in the dose of 500 mg/kg of body weight for 12 weeks.

It is found to be effective in fevers of unknown etiology, filarial lymphangitis and derangement of liver function besides its anti-malarial activity.

This herbal combination is being tried in COVID19 cases because of prior encouraging results in influenza patients.

Patients of COVID19 will be randomly alloted in 2 groups: Group 1 will receive AAYUSH64 with Standard of Care and Group 2 will get Standard of Care only. Sample size 40 - 20 in each group. Was this calculated after consulting a statistician?

Inclusion and exclusion criteria are clear but from the exclusion criteria the researchers are giving the impression that they are not very convinced about the effect of this drug in presence of any respiratory distress. But respiratory distress is one of the complications of this viral disease! So are the researchers not accepting defeat befor testing the drug? Why are respiratory distress patients being excluded?

Similarly Chronic, Severe, Unstable, Uncontrolled co-existent medical illness such as Diabetes, Hypertension, Cardiac disorders, liver, kidney disorders and lung disorders are being excluded because the researchers feel that

U.P., Lucknow

	the drug may put these patients at increased risk during the study. But how do they know this? They have not yet tested the drug. They can always withdraw the drug if it worsens the situation, but not testing it and excluding these patients is baffling. For which sub-set of COVID19 patients is this drug being proposed then? Outcome measures are clearly defined Withdrawl criteria No. 1 'The patient can withdraw from the study at any point of time without assigning any reason.' What does this mean? Withdrawl has to be due to some reason! Dosage of test drug 1000mg BD for 12 weeks Duration of study 6 months A detailed statement of expenses provided In the section 'Expected outcome' point 2 and 3 require clarifications: 2. AYUSH 64 in conjunction with standard treatment care will help in better clearance of viral load. How do the researchers propose to infer this? 3. The drug will enhance the immune system and promote early recovery of patient from COVID – 19 infection, How do they propose to infer this? We need a data collection sheet to know what parameters are being observed and when. The Timeline and Events schedule needs to be expanded into a proper data collection sheet.I cannot find any mention of insurance covering this trial. ***The above comment was forwarded to the P.I., reply has given by P.I. which was reviewed by the Primary Reviewer & he has approved.*** **EC Decision:** Approval after with fulfillment & administrative all formalities ***Ref. Code: IV ECM IB-COVID-19/P9***

Minutes of 102nd ECM held on 18th August, 2020

(Registration No.:ECR/262/Inst/UP/2013/RR-19)

Meeting started with welcoming of our new Vice Chancellor Lieutenant General Dr. Vipin Puri. All members who were present were introduced to our new Vice Chancellor.

I-A	Action Taken
	Part-a 96th EC Meeting was held on 10th May, 2019
a1.	Clarification of research proposal entitled ***"Comparative evaluation to see the effect of normal saline-O2 and ozone therapy on hard and soft tissue in dental implant surgery"*** submitted by Dr. Abhay Kumar Dixit, JR-I, Department of Prosthodontics, Crown & Bridge, Faculty of Dental Sciences of this University via letter no. 24/19 dated 6th April, 2019. **EC Comment on 10th May, 2019:** • How will the authors intend to choose patients for normal saline, O2 and ozone treatment? • Is ozone treatment standard of care? If yes, will not offering ozone treatment to a subgroup of patients will amount to depriving patients from the standard care? • The PI has not provided the details of ozone treatment in the methods section. • Who will provide the cost of ozone treatment? • The methods section needs to detail the complications of the ozone treatment. The possible complications of the either of the study treatment should also be detailed in the patient information document. • Patient's performa has to be submitted along with the revised proposal. **EC Decision 10th May, 2019:** Approval after justification ***The above comment forwarded to P.I., response received from P.I. which was forwarded to the Primary reviewer, he approved.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96th ECM II B-Thesis/P51*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
	Part-b- 97th EC Meeting was held on 12th July, 2019
b1	Research proposal entitled ***"Clinical and radiographic evaluation of efficacy of MTA, biodentine, & silver diamine fluoride as indirect pulp capping materials in primary***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	molars" submitted by Dr. Durga R, JR-I, Department of Paediatric and Preventive Dentistry, Faculty of Dental Sciences of this University via letter no. nil dated 15th June, 2019. **EC Comment on 12th July, 2019:** • It an RCT design, methodology is incomplete and the PI has to register the trial with the trial registry. **EC Decision on 12th July, 2019:** Revise & Re-submit ***The above comment forwarded to P.I., response received from P.I. which was reviewed by the Member-Secretary, IEC & he approved.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 97thECM II B-Thesis/P125*** ***(Primary Reviewer: Dr. A.A. Sonkar)***
b2	Clarification of research proposal entitled ***"Metagenomic analysis of salivary and plaque microbiota in diabetic and non-diabetic individuals"*** submitted by Dr. Jyotsana Agarwal, JR-II, Department of Conservative Dentistry & Endodontics, Faculty of Dental Sciences of this University via letter no. nil dated 17th June, 2019. **EC Comment on 12th July, 2019:** • Diabetes is associated with higher incidence of root caries and their plaque has a different and aggressive bacterial flora. Bacteria from caries and plaque spill into the saliva. • This is a cross-sectional study in adults between 30 to 60 years of age • Sample size is 30 – 15 diabetic and 15 non-diabetic. Was this figure statistically derived? • Samples will be obtained in fasting condition in the morning but no data collection sheet is provided and so we do not know what will be observed. • We need a data collection sheet which should have the demographic details, the diabetic status, their oral hygiene, their tobacco / paan / betel nut habit as these people have not been excluded in your study. • Signature of f Dr. A.B. Pant was missing. **EC Decision on 12th July, 2019:** Approval after justification

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	The above comment forwarded to P.I., response has given by P.I. which was reviewed by the Primary reviewer &he has given the following comment: **Comment:** • ***The data collection sheet still does not include what will be done with the saliva sample?*** • ***What all will be observed in each case abd documented for subsequent analysis?*** ***The above comment again forwarded to the P.I. & she has not given her reply till 25th January, 2020.*** **EC Decision on 25th January, 2020:** Pending ***The above decision forwarded to the P.I. via letter no.44/Ethics/2020 dated 11th February, 2020 then the P.I. has given her reply which was reviewed by the Member-Secretary, IEC & he approved it.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 97th ECM II B-Thesis/P150*** ***(Primary Reviewer: Dr. Surajit Bhattachrya)***
c	**Part-c- 99th EC Meeting was held on 18th October, 2019**
c1	Clarification of research proposal entitled ***"A radiological study on patients of osteoarthritis to establish relationship of kellgren-Lawrence grading score with knee range of motion and average pain score"*** sponsored by Research Cell K.G.M.U Lucknow submitted by Mr. Prince Rai, MBBS 2018 through his Mentor Dr. Archana Rani, Department of Anatomy of this University via letter no. nil dated 26th August, 2019. **EC Comment on 18th October, 2019:** • As the study is based on radiographs of patients. Principal-Investigator should involve the treating doctor/any rheumatologist in the study. **EC Decision on 18th October, 2019:** Approval after justification ***The above comment forwarded to the P.I. response has given by P.I. which was reviewed by the Member-Secretary, IEC & he approved it.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 99th ECM IIB IMR-S/P8*** ***(Primary Reviewer: Dr. Anoop Kumar Varma)***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

d	**Part-d- 100th EC Meeting was held on 25th January, 2020**
d-1	Clarification of research proposal entitled ***"Evaluation of clinical and anti-inflammatory effect of tea tree oil used as an adjunctive treatment of chronic periodontitis"*** submitted by Dr. Shubham Sharma, JR-I, Department of Periodontology, Faculty of Dental Sciences of this University via letter no. nil dated 14th September, 2019. **EC Comment on 25th January, 2020:** • Source ad brand/make of tea tree oil may be specified. Furthermore, adverse effect/allergies following oral exposure need to be elaborated in the review section & accordingly measures are to be suggested in case of an episode. **EC Decision on 25th January, 2020:** Approval after justification **EC Decision:** Approved ***Ref. code: 100thECM II B-Thesis/P6*** ***(Primary Reviewer: Dr. Smriti Bhadauria)***
e	**Part-e EC Meeting was held on 16th May, 2020**
e1	Clarification of research proposal entitled ***"Volumetric analysis of mastoid air cells in different malocclusions in 3D CBCT"*** submitted by Dr. Akhilanand Chaurasia, Assistant Professor, Department of Oral Medicine and Radiology, Faculty of Dental Sciences of this University via letter no. nil dated 16th January, 2020. **EC Comment on 16th May, 2020:** • Consent form is not as per new format • Study plan is not clear • Sample size calculation is also not clear (not at all) inclusion & exclusion criteria are copied & pasted, as such favour some where (in past tense) • Budget & financial support is not mentioned • Cannot be approved in current form **EC Decision on 16th May, 2020:** Re-submit ***The above comment forwarded to the P.I. response has been given by P.I. which was reviewed by the Primary reviewer & she approved it.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 101stECM IIA/P12***

Chairperson, IEC

U.P., Lucknow

	(Primary Reviewer: Dr. Amita Jain)
e2	Clarification of research proposal entitled **"*The morphometric analysis of mandibular condyle and coronoid process in different malocclusion in 3D CBCT*"** submitted by Dr. Akhilanand Chaurasia, Assistant Professor, Department of Oral Medicine and Radiology of this University via letter no. nil dated 16th January, 2020. **EC Comment on 16th May, 2020:** • The study aims to evaluate the volume of mandibular condyle and coronoid process and correlate it with age, sec and skeletal deformities using 3D CBCT • Guidelines for patient information sheet is attached without making any attempt to construct a study specific patient information sheet • Sample size 152, statistically calculated. • Data collection sheet is missing. What exactly will be observed – what dimensions, what volumes? • Will the patient also be physically examined? A big and tall man will have a bigger condyle as compared to a small and short woman! In Coronoid process significant appositional bone growth secondary to abnormal stresses mediated by the tendon of the temporalis muscle does occur so the patients have to be examined and a data collection **EC Decision on 16th May, 2020:** Re-submit ***The above comment forwarded to the P.I. response has been given by P.I. which was reviewed by the Primary reviewer & he approved it.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 101st ECM IIA/P13*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
e3.	Clarification of research proposal entitled **"*To elucidate the role of WWOX (WW domain-containing oxidoreductase) gene in osteosarcoma: A prospective case control study*"** sponsored by ICMR, New Delhi submitted by Prof. R.N. Srivastava, Department of Orthopaedic Surgery of this University via letter no. 14/P/OS/2020 dated 14th January, 2020. **EC Comment on 16th May, 2020:**

	EC Comment on 15th June, 2020: • The study aims to assess the completeness of treatment cards on different parameters of NABH standards and to suggest recommendations if any • Sample size not provided. From monthly admission records of previous years please come up with a sample size doable in 4 weeks and consult with statistician to see if your results will be statistically significant • Observational checklist – what all will be observed, is provided • Technique of case record sampling ensures maintaining confidentiality of individual patients. But why do they need UHID of the patient? Just like the Name they can see whether the UHID is correctly mentioned in the treatment card or not. Why are they noting it? • Consent waiver is sought as the research involves analysis of data about units **EC Decision on 15th June, 2020:** Approval after justification ***The above comments were forwarded to the PI. The reply was reviewed by reviewed by primary reviwer he approved it.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 101stECMIIBCS/P14*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
g4.	Clarification of research proposal entitled ***"A study of clientele satisfaction of dietary services in selected areas of a tertiary care Government Hospital"*** submitted by Dr. Anubha Agrawal, JRII, Through her Mentor Dr. Nitin Dutt Bhardwaj, Assistant Professor, Head, Department of Hospital Administration of this University via letter no. HA/2020/065 dated 7th February, 2020. **EC Comment on 15th June, 2020:** • The researchers wish to study the patient satisfaction with various aspects of dietary services and suggest recommendations if any • Sample size 384. Statistically calculated • Patients in RALC IPD who have received at least 2 meals will be included • The questionnaire / data collection sheet is missing. It is important to know what is being asked and what are the patient's response options? It should be bilingual

9-	Expedited review of research proposal entitled ***"A randomized controlled trial to assess the safety and efficacy of convalescent plasma to limit COVID-19 associated complications in critically ill patients"*** submitted by Prof. Tulika Chandra, Head, Department of Transfusion Medicine of this University via letter no. 107(A)/2020 dated 3rd June, 2020 & 158/2020 dated 8th July, 2020. **Comments by Dr Surajit** 1-It is a RCT. How will the randomization be done? Consort guidelines? If the randomization is not blind and if clinicians pick and choose cases depending on co-morbidities then are we adhering to the principles of RCT? 2. The hypothesis is that convalescent plasma will improve outcome of critically ill patients. So if a patient is in study group and he deteriorates and the family requests for convalescent plasma therapy then [a] will he be denied Convalescent Plasma treatment? [b] will he be offered the treatment and taken out of the study? [c] will he be considered as a failure of the standard of care? 2. Sample size 226 each in study and control groups. 3. While standard of care will be offered to all patients the study group will receive 2 doses of 200 ml of Convalescent Plasma. 4. Inclusion and exclusion criteria are clear 5. Primary and secondary outcomes have been clearly defined. 6. An outline of the data collection sheet has been provided 7. A bilingual consent form has been provided ***The responses were reviewed by Dr. Surajit & Dr. Vimal Paliwal. Both the reviewers have approved it.*** **Action taken:** Provisionally approved **EC Comment:** • Kindly provide CONSORT guidelines **EC Decision:** Approval after modification ***Ref. code: Vth ECMIB-COVID-19/P9***

14-	Expedited review of research proposal entitled ***"Clinical evaluation of Chyawanprash for the prevention of COVID-19 among health care personnel-An open label, prospective randomized controlled study"*** submitted by Dr. Satyendra Kumar Sonkar, Professor Jr. Grade, Department of Medicine of this University via letter no.nil dated 8th June, 2020. ***Comments by Dr Surajit*** The two Ayurvedic products being studied are Chawanprash and a poly herbal combination Their immunopotentiating abilitues will be the objective of this study. 2. The subjects on whom these will be tested are high risk quarantined subjects following COVID-19 exposure but not sero-positivity. 3. Three treatment groups of 60 patients each and 2 control group of 40 patients each form the material of this study. Both treatment and control will have one set of normal subjects and one set of subjects with known co-morbidities which make them immuno-compromised. The immono compromised treatment groups are 2, one treated with Chawanprash and one with poly-herbal extract. 4. Study duration 84 days. 5. Clinical and immunological parameters to be investigated on day 0, 21 and 84 are defined. 6. The constituents of the poly-herbal combination have been defined. 7. Chawanprash is produced by different companies and have different constituents. Which Chawanprash will be used and what are its constituents. 8. Who is the Ayurveda expert in this study? The CRAS Unit Ayurveda Consultant should have a name and he/she should sign the research proposal. 9. A budget of Rs. 10,00,000 is proposed but no expense is shown towards the premium of an insurance to cover this study. Will this study, being done on patients with co-morbidities, not be covered by insurance? Who will pay for the compensation if anything goes wrong and the patient/relatives blame the Ayurvedic produce for the worsening of the clinical condition. A diabetic can go into renal failure by a nephrotoxic drug or have arrhythmia or hepato-toxicity. I feel the presence of an Ayurveda expert and and insurance to cover any mishap is mandatory to safeguard the interest of the Institution conducting the study. ***The reply was reviewed by Dr. Surajit & he approved it.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: V^th ECMIB-COVID-19/P14***

	2. This is a Phase III clinical trial and the primary objective is to evaluate whether administration of M.w reduces the incidence of COVID-19 infections among those who are in close contact with COVID-19 patients. 3. Sample size 4,000. Initial enrollment of 400 cases 4. Randomization in 2 groups – Investigational group who will receive suspension of heat killed (autoclaved) M.w and Control group who will receive a placebo 5. Two sets of individuals will be chosen for both these groups – (a) healthcare workers providing direct care to COVID-19 cases and (b) persons living in the same household as COVID-19 patients. 6. The study will require 6 visits to the hospital in 8 weeks 7. Initially 400 subjects will be evaluated in 8 weeks. Then revision of the study design may be done, if required and then further subjects will be recruited after DSMB/MC review 8. The investigator's brochure of M.w is provided and it has details of chemical and pharmaceautical properties, non-clinical in-Vivo and in-Vitro studies and effects on human as an immunomodulator. M.w is Mycobacterium. Indicus Pranii, a member of Mycobacterium Evium complex. 9. Permission of D.G.C.I. is attached 10. Bilingual consent form is attached 11. Case Report form is attached 12. The trial is registered with C.T.R.I 13. Insurance in the form of professional indemnity of INR 1Cr. And of Clinical Trial INR 2Cr. Is provided by The Oriental Insurance Company and is expiring on 30.08.2020. The trial will not be completed by then. ***The above proposal was reviewed by Dr. Surajit & Dr. Rajendra. Both the reviewers have approved it.*** ***Advice: Approved subject to Insurance cover of the entire trial period.*** **EC Decision:** Provisionally approved ***Ref. code: Vth ECMIB-COVID-19/P19***

	Comments by Dr Surajit 1. This is a CSIT approved Phase III clinical trial for a new anti-viral agent Umifenovir 2. It is a randomized, double blind, placebo-controlled trial which aims to assess the efficacy, safety and tolerability of Umifenovir in COVID-19 patients 3. Sample size is 132, 66 in each arm – study and control; statistically derived. 4. Randomization is by SNOSE 5. Study group will receive Umifenovir 800mg BD for 14 days + SOC and Control group will receive Placebo + SOC 6. Duration of study is 28 days and timing of assessment of various parameters are explained 7. The investigator's brochure of the test drug is provided with non-clinical studies and clinical experiences 8. Permission of D.G.C.I. is attached 9. Bilingual consent form is attached 10. Case Report form is attached 11. The trial is registered with C.T.R.I 12. CSIR has given undertaking to insure against any serious side effects as per New Clinical Trial Rules, 2019. ***The above proposal was reviewed by Dr. Surajit & Dr. Rajendra. II-B	Master's in Hospital Administration(MHA)
1.	Research proposal entitled ***"A study of milk bank in a tertiary care Government Hospital at Lucknow"*** submitted by Dr. Anshuman Shukla, through his Mentor Dr. Nitin Dutt Bhardwaj, Department of Hospital Administration of this University via letter no. HA/2020/107 dated 8th February, 2020. ***The following documents were reviewed in the EC Meeting:-*** • Check list • Undertaking by the P.I. • Brief Description of proposal/Summary (500 words) • Waiver form **EC Comment:** • The research proposal has nicely laid the foundation of the study and if planning, designing, making policies, finalizing procedures and arranging equipments is all that has to be done then no ethical clearance is required. • It is the human resource that needs ethical clearance. Who is the actual milk doner? How are they being screened? We need consent from the donor mother as well as the mother of the neonate receiving the donation. How do we ensure that the donor mother's child is not harmed? **EC Decision:** Approval after justification ***Ref. code: 102nd ECM IIB MHA/P1*** ***(Primary Reviewer: Dr. Surajit Bhattacharya)***
2. 	SAE term: Death **Causality:** Sudden Cardiac Arrest **Event:** Heart failure (Breathlessness) with severe leg pain **Gender:** F **DOB:** 05-07-199456 yrs ole **Weight:** 50 KG **Height:** 172 CM **Start Date:** 20th February, 2018 **Subject History:** ***Site placed a call to subject# 010-0035 for 30th month follow-up visit and then the site become aware of this event that subject passed away on 16th February, 2020 at around 4 a.m. Patient developed breathlessness (DOE-NYHA IV) i.e. Heart Failure associated with leg pain (Severe) for these complains, patient was admitted in Trauma Centre (KGMU. Lucknow, UP) and succumbed to death due to sudden cardiac arrest in the hospital. Documents could not be available because all documents. No autopsy was done.*** **ADR-sub-Committee decision:** **Since a perusal of papers shows that there was no nexus between warfarin (the study drug administered to the subject) and her death, which was on account of heart failure, no autopsy on the corpse of the deceased was done and no documents were available, as they were destroyed by attendants of the subject after her cremation, no case for compensation arises.**
c	**<u>Death</u>** **Subject ID no. 010-0045**

Chairperson, IEC
King George's Medical University
U.P., Lucknow

Subject Initial: U-Y

SAE term: Death

Causality: None

Event: Non cardio vascular Death (Suicide)

Gender: M

Age: 24 years old

Weight: 40 KG

Height: 155 CM

Start Date: 25th September, 2018

Subject History:

Site placed many calls to subject# 010-0045 for 30th month follow-up visit. Then we had sent letter at his place for Follow up. After receiving the letter subject's LAR called us and revealed that subject was committed suicide at home on date 24th February, 2020 at 8:45 PM. They informed the Police, FIR was launched. Autopsy was done. LAR provided a copy of the police application and death certificate only but they denied providing and autopsy report.

ADR-sub-Committee decision:

Since a perusal of papers shows that there was no nexus between Piraroxaban (the study drug administered to the subject) and his death and the LAR informed that the subject committed suicide at home, no case for compensation arises.

Ltd and the indemnity is INR 10,000,000 for every claim. **Opinion of Dr. Vimal:**

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• Thymosin alpha-1 is a kind of polypeptide harmone produced by thymic epithelial cells that can effectively increase T cell number, support T cell differentiation, maturation and reduce cell apoptosis. • It is to be administered as subcutaneous injection thrice daily for 7 days in study group. • The background of the study appears sound and appropriate for the setting of COVID-19 related moderate to severe SARS. It is indicated in the treatment of Hepatitis B. • The required DGCI approval for the study is obtained. • The insurance policy is valid up to August 2021. • Sample size is calculated to be 120 **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: VIECM IB-COVID-19/P7***

U.P., Lucknow

	• Only information which will be available at the end of study is no. of persons developing necrosis 25 cases undergone process. **EC Decision:** Revise ***Ref. code: 103rd ECM IIA/P19*** ***(Primary Reviewer: Dr. Amita Jain)***
20.	Research proposal entitled "***Effect of yogic practices and pumpkin seed supplementation as adjuvants in "Type 2 diabetes mellitus***" sponsored by Biotechnobgy submitted by Prof. Neena Srivastava, Department of Physiology of this University via letter no. 1954/PHY/2020 dated 17th August, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Undertaking by the P.I. • Hindi & English ICF **EC Comment:** • Kindly provide the detailed proposal alongwith scientific basic of use of Pumpkin seeds. **EC Decision:** Approval subject to justification ***Ref. code: 103rd ECM IIA/P20*** ***(Primary Reviewer: Dr. Rajiv Garg)***
21.	Research proposal entitled "***Hot spot mapping and analysis of primary surgeon related factors in post cholecystectomy bile duct injury***" submitted by Prof. Abhijit Chandra, Department of Surgical Gastroenterology of this University via letter no. 406/2020 dated 18th August, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Undertaking by the P.I. • Hindi & English ICF • BDI mapping performa **EC Comment:**

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• It is a retrograde study, so question of consent will arise, so P.I. needs to clarify about consent issue. **EC Decision:** Approval subject to justification ***Ref. code: 103rd ECM IIA/P21*** ***(Primary Reviewer: Dr. Anoop Kumar Verma)***
22.	Research proposal entitled "***Placement of vascularised fibrofatty tissue in empty scrotum as provisional testicular implant after high orchidectomy for testicular tumor***" submitted by Prof. S.N Kureel, Head, Department of Pediatric Surgery of this University via letter no.492/Ped Sy/2020 dated 18th August, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Hindi & English ICF **EC Comment:** • No review of Litrature **EC Decision:** Re-submit ***Ref. code: 103rd ECM IIA/P22*** ***(Primary Reviewer: Dr. A.A.Sonkar)***
23.	Research proposal entitled "***Deciphering FLT3-ITD elicited signaling pathways in AML cell growth and block in differentiation: hunt for therapeutic targets and inhibitors for mutant FLT3 proteins***" submitted by Prof. M.L.B. Bhatt, Ex-Hon'ble Vice Chancellor & Department of Radiotherapy of this University via letter no. 475/RT/2020 dated 1st September, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Hindi & English ICF • CV of Dr. Arun K Trivedi, Principal-Scientist, CSIR-CDRI, Lucknow **EC Decision:** Approved ***Ref. code: 103rd ECM IIA/P23***

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	(Primary Reviewer: Dr. Smriti Bhadauria)
24.	Research proposal entitled "***A randomized study of consolidation chemoradiation versus observation after first line chemotherapy in locally advanced carcinoma gallbladder***" submitted by Prof. Kirti Srivastava, Department of Radiotherapy of this University via letter no. 427/RT/2020 dated 13th August, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Undertaking by the P.I. • Hindi & English ICF • CV of Prof. Sushma Agrawal, SGPGIMS, Lucknow **EC Decision:** Approved ***Ref. code: 103rdECM IIA/P24*** ***(Primary Reviewer: Dr. Preeti Agarwal)***
25.	Research proposal entitled "***Perioperative outcome of head and neck cancer surgery in COVID pandemic***" submitted by Dr. Naseem Akhtar, Department of Surgical Oncology of this University via letter no. nil dated 9th September, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Undertaking by the P.I. • Hindi & English ICF **EC Comment:** • **PI plans to do a prospective study to evaluate the outcome of head and neck cancer surgery during the covid times. There are several issues with the study methods:** • The study duration is not defined. How the PI is going to define "COVID times" prospectively. • The sample size is not calculated. Please calculate the sample size. • The study will be of no meaning if the PI does not compare the outcome of

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	head and neck cancer surgery from pre or post-COVID times. Since the **"POST-COVID times"** are difficult to define, the PI can only compare the outcome of their patients from "PRE-COVID" outcome data. Does the PI have pre-covid outcome data of his head and neck cancer surgery patients? • Inclusion criteria are not properly defined. Will the PI include susceptible population? **EC Comment:** Kindly resubmit with revised methodology ***Ref. code: 103rd ECM IIA/P25*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***
26.	Research proposal entitled ***"Analysis of COL9A1 gene polymorphism in paediatric population with Club foot: A case-parent dyad study"*** sponsored by UP.CST, Lucknow submitted by Prof. Ajai Singh, Head, Department of Paediatric Orthopaedics of this University via letter no. 538/Paed.Orth/2020 dated 14th September, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Proposal • Undertaking by the P.I. • Hindi & English ICF • Patient Data Sheet **EC Decision:** Approved ***Ref. code: 103rd ECM IIA/P26*** ***(Primary Reviewer: Dr. Rajendra Nath)***
27.	Research proposal entitled ***"An international, cluster randomized-sequence study of a 'safe-anastomosis' quality improvement intervention to reduce anastomotic leak following right colectomy and ileocaecal resection"*** sponsored by Birgit Whitman Research Governance submitted by Dr. Shiv Rajan, Assistant Professor, Department of Surgical Oncology of this University via letter no. nil dated 18th September, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list

Chairperson, IEC
King George's Medical

	• Protocol synopsis version0.21, 18th September, 2019 • EAGLE Case report form version0.21, 18th September, 2019 • Undertaking by the P.I. • Hindi & English ICF **EC Decision:** Approved ***Ref. code: 103rd ECM IIA/P27*** ***(Primary Reviewer: Dr. Amita Jain)***
28.	Research proposal entitled ***"Impact of audio-visual 3D animation in understanding the spread of infection in maxillofacial region"*** submitted by Prof. Divya Mehrotra, Department of Oral and Maxillofacial Surgery Faculty of Dental Sciences of this University via letter no. OMSD/RP/218/2020 dated 9th September, 2020. ***The following documents were reviewed in the EC Meeting:*** • Check list • Summary • Proposal • Undertaking by the P.I. • Hindi & English ICF • CV of Dr. Pankhuri Mehrotra, BDS student, Babu Banarsi Das College of Dental Sciences, Lucknow, India. **EC Comment:** • It is a very good proposal where the investigations wish to develop 3-D animation video for BDA IV year student which can be used on digital platform. • There is no mention of the monetary benefit if it occurs by de elopement of this tool (edutainment), what would be the share of Institute. This needs to be addressed. • Rest is ok • What will be source of funding • Will this education tool be patented? **EC Decision:** Approval subject to Modification ***Ref. code: 103rd ECM IIA/P28*** ***(Primary Reviewer: Dr. Rajiv Garg)***

	EC Comment: • The PI wishes to study the incidence of trigemino cardiac reflex in patients undergoing surgical treatment of TM joint ankylosis under GA. Background of the study is well described. Inclusion/exclusion criteria are well laid down. Sample size is calculated. • **The phrase " a study" from the title may be removed** • **Ethical clearance may be granted Spectrum of lung cancer diagnostic** • PI wishes to study the various factors responsible for delay in the diagnosis of lung cancer. There are several issues: • Please define the type of study – prospective or retrospective. • Define the study duration appropriately as per the study type. • Re-write the methodology of the study as per the study type. The PI is written as if they want to do this study retrospectively from May 2019 to April 2020. Then, in methods, the PI writes that "all undiagnosed/suspected lung cancer patients will be subjected to relevant investigations for the diagnostic work up." A study cannot be retrospective as well as prospective. **EC Decision:** Re-submit ***Ref. code: 103rd ECM II B-Thesis/P22*** ***(Primary Reviewer: Dr. Vimal Kumar Paliwal)***

Ltd., submitted by Dr. Gaurav Chaudhary, Assistant Professor, Department of Cardiology of this University via letter no. 94/Cardio/Res/18 dated 16th November, 2018, 111/Cardio/Res/18 dated 3rd December, 2018 & 114/Cardio/Res/18 dated 12th December, 2018.

Subject no: 0607

Subject Initial: A-K-S

Enrollment date: 16th May, 2018

SAE Description:

Subject visited our hospital Emergency on 14th November, 2018, His ECG and Trop T was done. Subject is diagnosed with NSTEMI.

The above Patient had an unscheduled visit to hospital on 14th November, 2018 complaining of chest pain which later diagnosed as NDTEMI with the reports from laboratory showing high Troponin values. Patient was hospitalized in the Emergency room on 14th November, 2018. PI started Ecosprin & other medication for the treatment. PI also suggested PCI but due to patient's disagreement he was discharged on the 14th November, 2018. As per PI's desecration study drug was stopped and other Anti-hypertensive treatment started patient does not have any other associated disease. Follow up is planned in the next week.

On 15th November, 2018 Subject came to us and informed about the event. Then PI evaluated and advise for Ango and + PCI but subject refuse for intervention. So medicine was advised and subject was sent back to home.

Patient enrolled under Triplaxam study. Subject visited to his local hospital with the complaint of dry cough similar 16th November, 2018 there he was evaluated and referred to us.

Call was made to subject on 20th November, 2018 and he informed us. He is feeling better and continuing same drug and not willing for any procedure.

An objection letter received from CDSCO, Mr. Navneet Pratap Singjh, Assistant Drugs Controller (I) has objected that due analysis report of the SAE (Injury) **'Hospitalization due to NSTEMI, Kindly provide the opinion as to whether the SAE (Injury) is related/non related to the Investigational product/Clinical trial of the said SAE (Injury) to this office at earliest for further necessary action.**

Chairperson, IEC

Minutes of 105th ECM held on 19th Februrary, 2021

(Registration No.:ECR/262/Inst/UP/2013/RR-19)

Minutes of the Institutional Ethics Committee Meeting held on **19th February, 2021 from 2.00 PM 4.30 PM** in the **'Board Room'** Office of the Vice Chancellor, Administrative Block of this University.

Minutes of the Institutional Ethics Committee Meeting was held on **19th February, 2020 from 2.30 p.m.** in the **'Board Room'** Office of the Vice Chancellor, Administrative Block of this University.

The Following Members were present in the EC Meeting:

1. Prof. S.P.S. Gaur -Chairman
2. Hon'ble Justice Vishnu Sahai -Member
3. Dr. Manju Agarwal -Member
4. Mr. Yogesh Mishra -Member
5. Dr. Surajit Bhattacharya -Member
6. Dr. Vimal Kumar Paliwal -Member
7. Dr. Smriti Bhadauria -Member
8. Dr. Anoop Kumar Verma -Member
9. Dr. Rajendra Nath -Member
10. Dr. Rajiv Garg -Member
11. Dr. Preeti Agarwal -Member
12. Dr. Shally Awasthi -Member-Secretary, ex-officio

13. The following Members were not present in the EC Meeting:-

14. 1-Dr. Amita Jain -Send her Comment
15. 2-Dr. A.A. Sonkar -He has not given his comment

IA	Action Taken
1	Clarification of research proposal entitled ***"A pilot study of compulsions and obsessions after sixty years (COSY)"*** submitted by Dr. Shrikant Srivastava, Head and Associate Professor, Department of G.M.H. this University via letter no. nil dated 4th April, 2019. ***P.I. has given his reponce which was reviewed by the Member-Secretary.*** **Action Taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 96thECM II A/ P39*** ***(Primary Reviewer: Dr. Rajendra Nath)***
2	Clarification of research proposal entitled ***"A study of handwriting sample in geriatric population with cognitive impairment"*** submitted by Dr. H.V. Suresh, SR-I, Department of G.M.H. of this University via letter no. 875/DGMH dated 8th February, 2021. ***P.I. has given his reponce which was reviewed by the Member-Secretary.***

II-A	New Proposal
1.	Research proposal entitled ***"A survey on awareness of breast cancer and detection of blood and urine based biomarkers among the patients and their family members at King Georges' Medical University, Lucknow"*** sponsored by CSIR-CDRI submitted by Dr. Pooja Ramakant, Additional Professor, Department of Endocrine Surgery of this University via letter no. SURG/10/2021 dated 7th January, 2021. ***The following doucuments were reviewed in the Meeting:-*** • Report of Scientifec review • Check List • Breif summary • Undertaking by the P.I. • CV of Dr. Dibyendu Banarjee, Senior Scientist, CSIR-CDRI, Lucknow, India • Dr. Monika Sachdev, Prinicipal Scientist, CSIR-CDRI, Lucknow, India • Dr. Ravi Sankar Ampapathi, Sr. Prinicpal Scientist, CSIR-CDRI, Lucknow, India • Dr. Khushboo Sinha, CSIR, Senior Research Fellow, CSIR-CDRI, Lucknow, India • Dr. Akansha Vyas, Senior Research Fellow, CSIR-CDRI, Lucknow, India • Executive Summary • Informed Consent form Hindi & English • References **EC Comment:** • The aim of this study is to determine the knowledge and awareness of CA Breast in Indian society by a questionnaire based study. • The study also wants to find out some blood or urine based biomarkers for diagnosing and prognosticating the outcome of Breast cancer. • Regarding the 1st aim the researchers have not provided the quintessential questionnaire. 4. Regarding the 2and aim all we know is 5 to 10ml of blood and 10 to 5p ml of urine will be taken as sample but what will be tested in them we do not know as that has not been mentioned. • Sample size is 200. How was this calculated? We need a statistical review.

Chairperson, IEC
King George's Medical University
U.P., Lucknow

	• 100 patients will be of CA Breast and 100 normal. Now who are these normal females? Are they relatives of the patients, then her immediate blood relatives cannot be considered as normal as they are too genetically prone to Breast cancer. Are they from the population attending OPD and not related to the patients? We need clarity in this. • A blanket ethical clearance is being saught for patient photography and videography. This is not possible. I would request the investigators to kindly read the following article and construct a proper consent form for Clinical photography and videography. **EC Decision:** Approval after justification ***Ref. code: 105th ECM IIA/P1*** ***(Primary Reviewer : Dr. Surajit Bhattacharya)***
2.	Research proposal entitled "***Assessment of quality of life outcomes with prophylactic placement of permanent synthetic mesh at the time of enterostomy closure-a prospective observational study***" submitted by Dr. Ajay Kumar Pal, Associate Professor, Department of Surgery General of this University via letter no. 133/2021 dated 21st January, 2021. ***The following documents were reviewed in the Meeting:-*** • Report of Scientifec review • Check List • Breif summary • Undertaking by the P.I. • Study proforma • Questionnair Hindi & English • Executive Summary • Informed Consent form Hindi & English • References **EC Comment:** • Inclusion/ Exclusion criteria are not clear. While patients with follow up of atleast 3 month are to be included, the exclusion criteria states that patients with less than 6 months of follow up will be excluded. The inclusion criteria are in contradiction with exclusion criteria. **EC Decision:** Approval after justification ***Ref. code: 105th ECM IIA/P2***

II-A	New Proposal
1.	Research proposal entitled ***"Epidemiology of pancreatitis and major gastrointestinal disorders: A nationwide multi-center study across India"*** submitted by Dr. Sumit Rungta, Associate Professor & Head, Department of Medical Gastroenterology of this University via letter no.1092/MedGastro/21 dated 4th January, 2021. **EC Comment:** • What is the source of the funding? • Which is the Co-ordinating Centre? • Who are in the Investigators from other Institutions? • What are the roles of Co-investigators from KGMU? Specify for each. **EC Comment:** Approval subject to modification ***Ref. code: 107th ECM IIA/P1***
2.	Research proposal entitled ***"Assessment of tumor budding in Oral cavity squamous cell carcinoma undergoing primary resection and its correlation with clinical outcome parameters"*** submitted by Dr. Shalini Bhalla, Associate Professor, Department of Pathology of this University via letter no.1655/2021 dated 4th February, 2021. **EC Decision:** Defer for the next Meeting ***Ref. code: 107th ECM IIA/P2***
3.	Research proposal entitled ***"Primary extra nodal non HODGKIN's lymphoma: An observational study at a tertiary care teaching centre in North India"*** submitted by Dr. Shivanjali Raghuvanshi, Associate Professor, Department of Pathology of this University via letter no.1661/2021 dated 5th February, 2021. **EC Comment:** 1.Are retired faculty allowed to be investigators? 2. Section 4: The Dawson Criteria is used only for gastrointestinal extranodal NHLs. However, nowhere in the title, methodology, etc is it mentioned that the investigators are trying to look only for this specific subgroup of extranodal NHLs. Need to have clarity of subsites, if any. 3. Section 4: The Dawson Criteria needs information, which is not generally available in the Pathology Department records. Would like to have clarity on this. 4. Section 4: For IHC in patients whose panel is incomplete, please mention source of funding. 5. Section 4: Statistical analysis: Explicitly state the statistical tests planned to be used. SPSS is a tool to compute, it doesn't decide the test.

	6. Section 7(iv) Use of pre-existing samples is marked 'NO'. Please clarify this. 7. Section 10(iii) Explain how the patient will directly benefit? 8. Checklist: Copy of protocol is not attached, contrary to what has been stated. 9. Has this study already been done as a PG Thesis? 10. Aims and objectives have to be defined, they have been mixed into one. 11. This study is unlikely to provide with prevalence of this disease, can only point towards incidence (that too with many conditions attached). 12. Study Design: Retrospective/ Audit should be enough. These are supposed to be observational. 13. Significance and Rationale: Please provide reference to the statement that the prevalence of this disease is increasing in India, else, remove this. **EC Decision:** Approval subject to modification ***Ref. code: 107th ECM IIA/P3***
4.	Research proposal entitled ***"Academic clinical trial of safety, pharmacokinetics and early measurement of drug activity of CENTINHALE dry powder inhalation"*** sponsored by CSIR-Central Drug Research Institute submitted by Prof. Rajiv Garg, Department of Respiratory Medicine of this University via letter no.1339/RESP/2021 dated 10th February, 2021. **EC Decision:** Defer for the next Meeeting ***Ref. code: 107th ECM IIA/P4***
5.	Research proposal entitled ***"To study the histopathological features in renal biopsy (post-mortem) of critically ill COVID-19 positive patients with renal dysfunction"*** submitted by Dr. Medhavi Gautam, Assistant Professor, Department of Medicine of this University via letter no.343/MED/21dated 15th February, 2021. **EC Comment:** • Patients with renal illness may have preexisting histopathological changes. Mention clearly how would you differentiate changes due to COVID 19 from those already present as there is no control to compare. • Elaborate the parameters to be observed by LM, IHC and EM. **EC Decision:** Approval subject to modification ***Ref. code: 107th ECM IIA/P5***

6.	Research proposal entitled **"*Retrospective analysis of a methanol intoxication outbreak in Lucknow district and nearby areas in 2019*"** submitted by Dr. Medhavi Gautam, Assistant Professor, Department of Medicine of this University via letter no.344/MED/21dated 15th February, 2021. **Methodology:** • All criteria not mentioned in text as per the case report form • Case report form to include full forms of the abbreviation, hence revise accordingly **Background information and data:** • Should also include the background literature relevant to proposed objectives **Inclusion criteria:** • If only those cases with positive family history of methanol intake are to be included, then incorporating signs of intoxication and that too based on suspicion seems confusing in this section. Hence revise. **Sufficient number of participants:** • Not specified • Additional Co-PI from TVU and Critical care medicine may be considered since the cases are to be recruited from these dept. as well • Justify inclusion of to Co-Investigators **EC Decision:** Re-submit ***Ref. code: 107th ECM IIA/P6***
7.	Research proposal entitled **"*Photobiostimulation (Low Level laser Therapy) as a non-invasive therapeutic adjunct for non-surgical management of periapical bone defects during COVID-19 pandemic*"** sponsored by UPCST Lucknow submitted by Dr. Rhythm, Department of Conservative Dentistry & Endodontics of this University via letter no.428/2020dated 29th December, 2020.

(Registration No.:ECR/262/Inst/UP/2013/RR-19

IA	Action Taken- 107th ECM held on 16th April, 2021-For faculties
a1	Clarification of research proposal entitled ***"Epidemiology of pancreatitis and major gastrointestinal disorders: A nationwide multi-center study across India"*** submitted by Dr. Sumit Rungta, Associate Professor & Head, Department of Medical Gastroenterology, KGMU via letter no.1092/MedGastro/21 dated 4th January, 2021. **Previous EC Comment:** • What is the source of the funding? • Which is the Co-ordinating Centre? • Who are in the Investigators from other Institutions? • What are the roles of Co-investigators from KGMU? Specify for each. **Previous EC Decision:** Approval subject to modification **Final EC Decision:** Approved ***Ref. code: 107th ECM IIA/P1***
a2-	Clarification of research proposal entitled ***"To study the histopathological features in renal biopsy (post-mortem) of critically ill COVID-19 positive patients with renal dysfunction"*** submitted by Dr. Medhavi Gautam, Assistant Professor, Department of Medicine, KGMU via letter no.1054/MED/21 dated 10th May, 2021. **Previous EC Comment on 16th April, 2021:** • What is the source of the funding? • Which is the Co-ordinating Centre? • Who are in the Investigators from other Institutions? • What are the roles of Co-investigators from KGMU? Specify for each. **Previous EC Decision on 16th April, 2021:** Approval subject to modification ***The above comment forwarded to Primary Reviewer.*** **Final EC Decision:** Approved

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Ref. code: 107th ECM IIA/P5
a3-	Clarification of research proposal entitled ***"International snapshot study on the outcomes of Pancreatic Surgery pancreasGroup.org"*** submitted by Dr. Naseem Akhtar, Additional Professor, Department of Surgical Oncology, KGMU via letter no. SONC/262/21 dated 17th March, 2021. **Previous EC Comment:** • Collaborators: University College London Hospitals, Massachusetts General Hospital. • Eligibility of Surgeon – Any Surgeon worldwide performing pancreatic surgery is eligible to participate in PancreasGroup.org • Study duration-12 months (Jan-Dec 2021) • Working proforma of PancreasGroup.org attached. • Summary of proposal needed. **Previous EC Decision:** Approval subject to modification ***The above comment forwarded to Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Final EC Decision:** Approval ratified ***Ref. code: 107th ECM IIA/P12***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

II-A	New Proposal
1.	Research proposal entitled ***"A study on development of gamma (γ) H2AX expression based screening assay of oral sub mucous fibrosis and oral squamous cell carcinoma"*** sponsored by ICMR submitted by Dr. Kapila Kumar, Research Associate, Department of Oral & Maxillofacial Surgery, KGMU via letter no.DHR/MRU/2010 dated 5th April, 2021. **EC Comment:** • Justify the role of each Co-Investigator • How can research associate and Scientists be Co-Investigators? Who were send as investigators to ICMR? **EC Decision:** Approval after justification ***Ref. code: 108th ECM IIA/P1***
2.	Research proposal entitled ***"Biosurveillance for spillover of henipaviruses and filoviruses in rural communities in India"*** sponsored by Eco Health Alliance, United States submitted by Prof. Amita Jain, Head, Department of Microbiology via letter no.65/21 dated 8th April, 2021. **EC Comment:** • Funded by an International NGO & perhaps the USUHS • Is here G.O.I. approval for Eco Health Alliance, USA to work in the country?. • Is there an agreement between KGMU and NGO? • After submission to H.M.S.C of I.C.M.R. please submit the documents to Ethics Committee • Vulnerable subjects have been checked **NO**, despite including vulnerable subjects-children, illiterate adults • Objective 1: How will this be achieved, not elaborated in text • What is the operational definition of "site"?

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• What are the other factors that will be used to select sites? • What is the geographical area that will be included? Whole of UP, part of state? • How will village/clusters be chosen if bat species being looked for are found in more than 4 clusters? • What type of randomization will be done within clusters to ensure 25% representation of children as well as equal participation of both sexes. • What will be done if someone refuses consent? • How has the sample size of 800 calculated? • Is consent for archived samples present? • Who will administer the questionnaire- Self or some project worker, and in what language? • If questionnaire will be administered in Hindi (highly likely), need a TRANSLATED and VALIDATED questionnaire in Hindi language. • While the title refers to rural communities, why take hospital based AES and VHF patients? • Does institution have the required permits/ certification to accept foreign grants-FCRA, etc? • What is the purpose of the NGO and USUHS for funding this study and how will it benefit them? **EC Decision:** Approval after justification ***Ref. code: 108th ECM IIA/P2***
3.	Research proposal entitled "***The incidence of noninvasive follicular neoplasm with papillary like nuclear features: A meta- analysis assessing worldwide impact of the reclassification***" submitted by Dr. Chanchal Rana, Associate Professor, Department of Pathology, KGMU via letter no. 2051/21 dated 1st April, 2021. **EC Comment:** • As this is a Meta-analysis of the published literature, the application for waver from IEC can be approved. The researcher is not going to include the data

(Shally Awasthi)
Member-Secretary, IEC

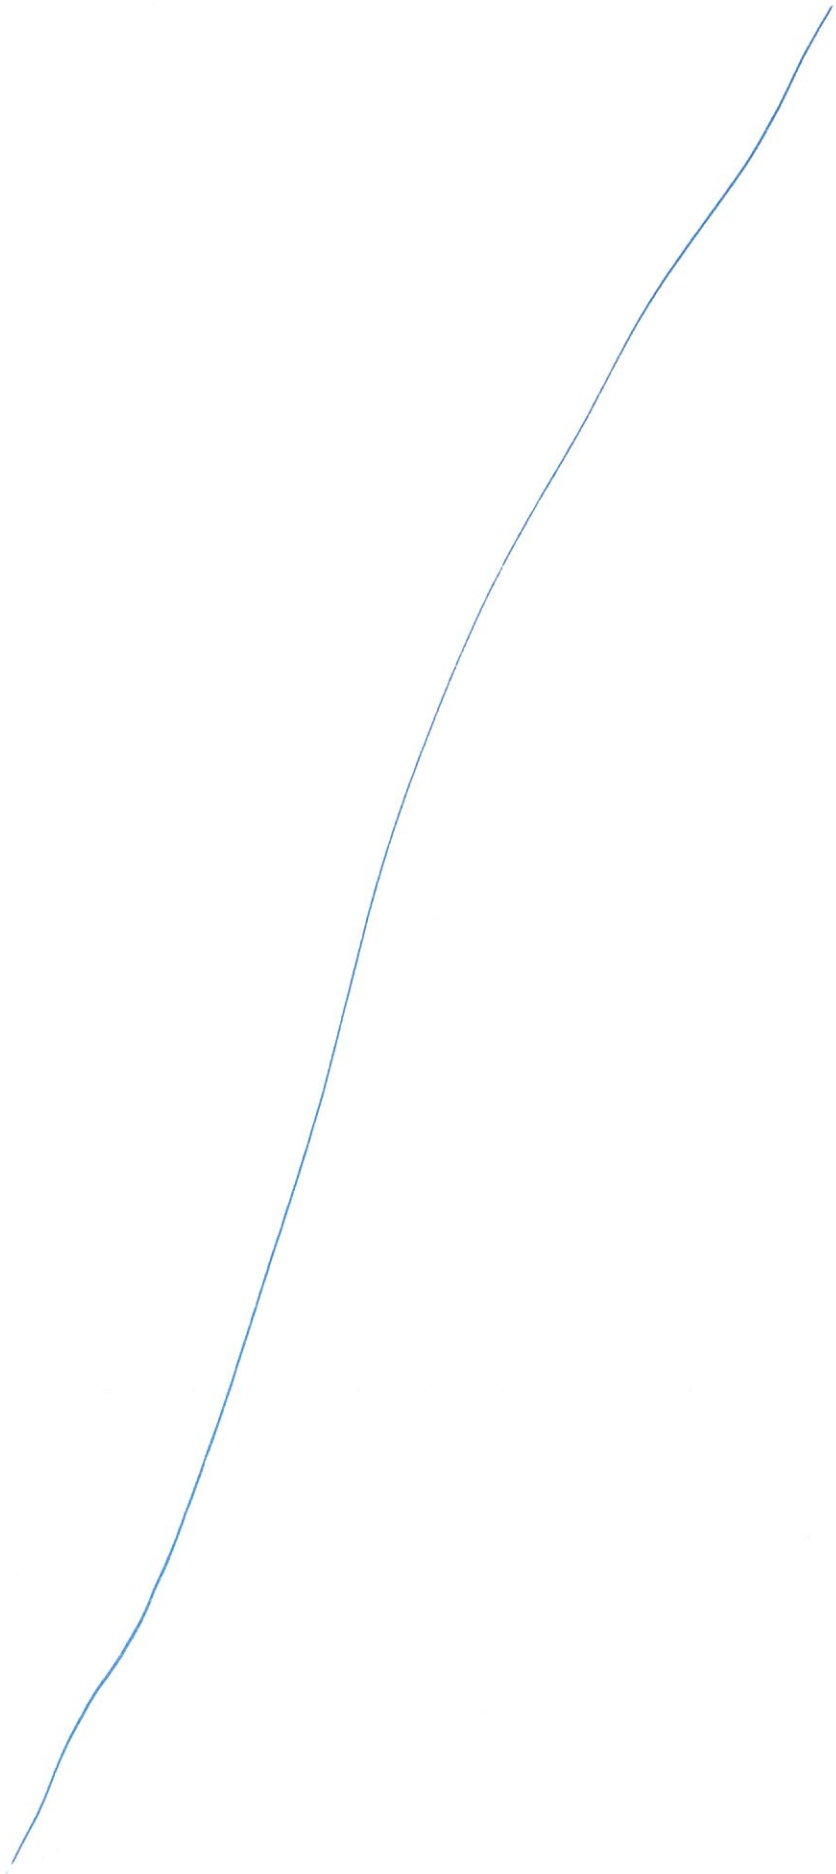
(Alok Dhawan)
Chairman, IEC

	from their lab or clinical group. • Since Meta-analysis is a specialized area, Co-PI who is knowledgeable in the field must be included if PI has no training. Else the PI may undergo training before undertaking this project. **EC Decision:** Waiver granted subject to the above. ***Ref. code: 108th ECM IIA/P3***
4.	Research proposal entitled **"*The impact of Neoadjuvant chemotherapy on ExtraNodal Extension (NeoENE) in head and neck squamous cell cancers-A prospective, interventional study*"** submitted by Dr. Mranalini Verma, Assistant Professor, Department of Radiotherapy, KGMU via letter no. 324/RT/21 dated 6th April, 2021. **EC Comment:** • This is a pilot study with 50 patients to be recruited. Details of chemotherapy are to be provided in material methods section. Rather altogether this section is sketchy. Moreover, in the informed consent form it is mentioned that there is neither any risk from the study nor there are any expected complications following treatment. Will it be so? Please clarify. **EC Decision:** Re-submit ***Ref. code: 108th ECM IIA/P4***
5.	Research proposal entitled **"*An international snapshot study on the outcomes of pancreatic surgery*"** submitted by Prof. Abhinav Arun Sonkar, Head, Department of General Surgery, KGMU via letter no. 705/21 dated 6th April, 2021. **EC Comment:** • This proposal was submitted by Dr. Naseem Akhtar, Additional Professor, and Department of Surgical Oncology on 17th March, 2021 and has been approved by Ethics Committee. Kindly identify in which objective/s you will be participating. **EC Decision:** Same project cannot be approved twice ***Ref. code: 108th ECM IIA/P5***

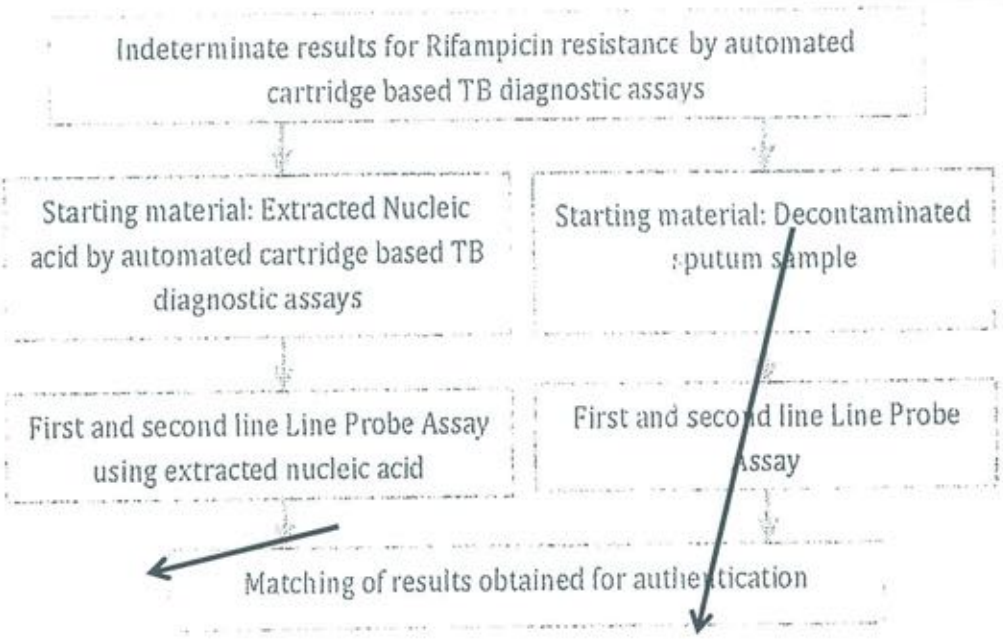
(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

6.	Research proposal entitled ***"IPC capacity building orientation training for COVID-19 preparedness and IPC for healthcare facilities"*** sponsored by BMGF submitted by Prof. Vimala Venkatesh, Department of Microbiology, KGMU via letter no. 55/21 dated 8th April, 2021. **EC Comment:** • This is a training activity, there is no interaction with patient, Human subjects review waiver attached. **EC Decision:** Approval for waiver ***Ref. code: 108th ECM IIA/P6***
7.	Research proposal entitled ***"Detection and comparison of anti-SARS-COV-2 IgG antibodies and T cell immune response among COVID-19 infected and vaccinated, health care workers (HCWs)"*** submitted by Dr. Geeta Yadav, Associate Professor, Department of Pathology, KGMU via letter no. 2117/21 dated 26th April, 2021. **EC Comment:** • Clarification regarding sample size is requested. • Clarify the role of Co-P.Is. • Mention this is a pilot study. **EC Decision:** Approval subject to modification ***Ref. code: 108th ECM IIA/P7***
8.	Research proposal entitled ***"Assessment of psycho-ogical morbidity in parents of children with club foot"*** submitted by Dr. Vikas Verma, Associate Professor, Department of Paediatric Orthopaedics, KGMU via letter no. 2117/21 dated 26th April, 2021. **EC Decision:** Approved ***Ref. code: 108th ECM IIA/P8***



(Shally Awasthi)
Member-Secretary, IEC



(Alok Dhawan)
Chairman, IEC

11.	Research proposal entitled ***"Interpretation of indeterminate results of automated cartridge based TB diagnostic assays by line probe assay utilizing the already extracted nucleic acid"*** submitted by Dr. Parul Jain, Assistant Professor, Department of Microbiology, KGMU via letter no. 116/2021 dated 13th April, 2021. **EC Comment:** 1. Some fields of form are not filled out: Section 5 (vi), (vii) 2. Aim and objective 1 are same: need to correct it. 3. What is the current standard of testing and treatment for samples that are indeterminate for resistance to rifampicin? 4. Will your objective 1 change or modify treatment? a. If yes: you will need patient consent b. If no: what is the utility of this study 5. What NAAT will be used? From our little understanding, DNA cannot be extracted from cartridge based automated TB assays, only a report is generated. Please shed some light on this.

(Shally Awasthi)
Member-Secretary, IEC

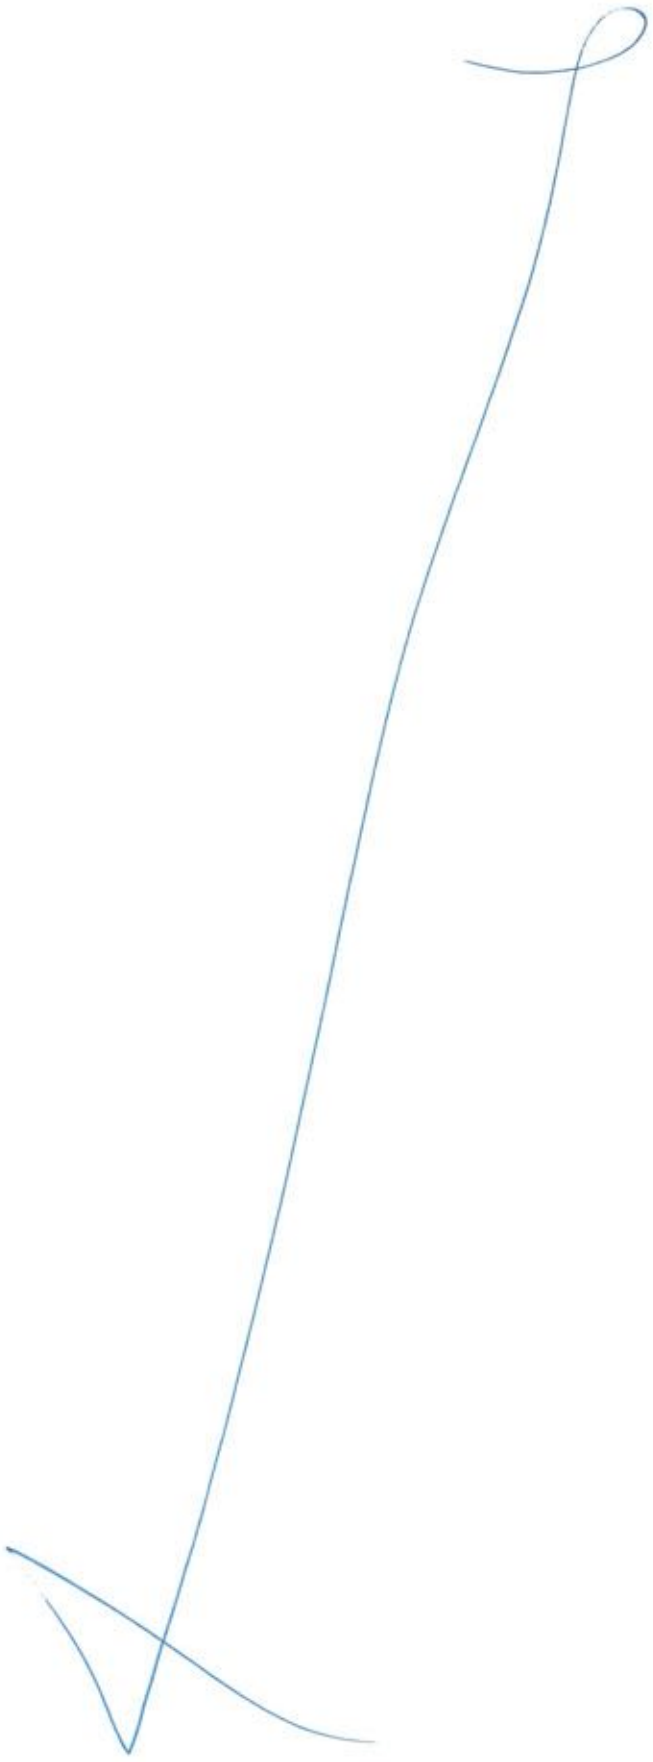
(Alok Dhawan)
Chairman, IEC

6. Matching results: How? What if discordant?
7. Where does this decontaminated sputum come from? Is it stored? Will storing lead to any changes in the quality of specimen for purpose of results?
8. What are the end points?
9. Is the LPA a one-time purchase or does it need reagents/ consumables. If the latter, needs a source of funding.
10. Sample size calculation is based not only on the prevalence of the condition, but also end points.
11. For objective 2, needs a separate sample size calculation.
12. Similarly, need to define endpoints for objective 2.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	13. What statistical tests will be used- Instant Prism software will not itself choose the test to be used, investigator has to decide. **EC Decision:** Approval subject to modification ***Ref. code: 108th ECM IIA/P11***



(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

II- B	IMR-Faculty
1.	Research proposal entitled ***"Feasibility study of voluntary breath hold technique in reducing heart toxicity in left breast cancer Radiotherapy in our setup: low-cost substitute for high capital investment (Advanced) technology"*** sponsored by Research Cell KGMU Lucknow submitted by Dr. Mranalini Verma, Assistant Professor, Department of Radiotherapy, KGMU via letter no. 325/RT/21 dated 6th April, 2021. **EC Comment:** • Sample size is 30, however, the rationale is not mentioned. If it is a pilot study then it may be mentioned. • Inclusion and exclusion criteria of subjects not clearly mentioned. **EC Decision:** Approval subject to modification ***Ref. code: 108th ECM II B-IMR-F/P1***

Chairman, IEC

12.	Research proposal entitled ***"Correlation of ultrasonographic findings with endoscopic findings in infertile women"*** submitted by Dr. Kirti Yadav, JRI, Department of Obstetrics & Gynaecology, KGMU via letter no. OG/716/21 dated 7th April, 2021. **PGTSC Decision:** Approved ***Ref. code: II-PGTSC-IIA /P12***
13.	Research proposal entitled ***"To study the correlation of MTR (A919G) and MTHFR (C677T) gene with endometriosis in women of reproductive age group"*** submitted by Dr. Suman, JRI, Department of Obstetrics & Gynaecology KGMU via letter no. OG/592/21 dated 22nd February, 2021. **PGTSC Comment:** • Introduction is a poor cut-paste job. Argument for the need of the study needs to be made. • Need for a control group to be clearly stated. • Is it a case-control study or an observational study? Is any intervention being done? These need to be looked into and amended. • In Privacy/Confidentiality section of Thesis Proforma the researcher has ticked both 'Direct Identifiers' as well as 'Completely Anonymized'. This needs correction **PGTSC Decision:** Approval subject to modification ***Ref. code: 108th II-PGTSC-IIA /P13***
14.	Research proposal entitled ***"Correlation of fibroblast growth FACTOR-23 levels for acute kidney injury in critically ill obstetrics cases and its association with fetomaternal outcome"*** submitted by Dr. Shruti, JRI, Department of Obstetrics & Gynaecology, KGMU via letter no. OG/606/21 dated 24th March, 2021. **PGTSC Comment:** • Privacy and Confidentiality section in Proforma – Direct Identifiers and Completely Anonymized have both been ticked.

Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Checkboxes in 'Consent' area of Proforma are not checked. • Checkboxes in Sections 9, 10, 11, and 12 of the Proforma are not checked. 5. In the 'Background and Rationale' the argument for this study has not been made. According to the literature provided by the researcher, FGF-23 is already an established marker for AKI. What then is the rationale of proving and already proven fact? **PGTSC Decision:** Approval subject to modification ***Ref. code: II-PGTSC-IIA /P14***
15.	Research proposal entitled ***"Myocardial functions in predicting the outcome of severe community acquired pneumonia in paediatric population: A prospective observational study"*** submitted by Dr. Adhyati Sachdev, JRI, Department of Paediatrics-, KGMU via letter no. 891/Ped/21 dated 13th April, 2021. **PGTSC Decision:** Approved ***Ref. code: II-PGTSC-IIA /P15***
16.	Research proposal entitled ***"Clinical study of sleep disturbance and sleep hygiene in children and adolescents with attention deficit hyperactivity disorder"*** submitted by Dr. Ankita Devrani, JRI, Department of Psychiatry, KGMU via letter no. 473/Psy/21 dated 9th March, 2021. **PGTSC Decision:** Approved ***Ref. code: II-PGTSC-IIA /P16***
17.	Research proposal entitled ***"Hemophagocytic lymphohistiocytosis in sepsis: A prospective observational study"*** submitted by Dr. Ruovinuo Sachu, JRI, Department of Pathology, KGMU via letter no. 1917/21 dated 18th March, 2021. **PGTSC Decision:** Approved ***Ref. code: II-PGTSC-IIA /P17***
18.	Research proposal entitled ***"To study serum leptin and serum insulin hormone levels as predictors of obstetrical outcome in women with history of recurrent pregnancy***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	losses (RPL)" submitted by Dr. Anuradha Deol, JRI, Department of Obstetrics & Gynaecology, KGMU via letter no. GO/682/21 dated 3rd April, 2021. **PGTSC Decision:** Approved ***Ref. code: II-PGTSC-IIA /P18***
19.	Research proposal entitled ***"An audit of cesarean section using modified ROBSON's criteria"*** submitted by Dr. Anjali Kapoor, JRI, Department of Obstetrics & Gynaecology, KGMU via letter no. GO/543/21 dated 19th March, 2021. **PGTSC Comment:** • Sample size not calculated (only formula is given) **PGTSC Decision:** Approval subject to modification ***Ref. code: II-PGTSC-IIA /P19***
20.	Research proposal entitled ***"Curcumin as an adjunct in treatment of thyroid associated ophthalmopathy: A pilot study"*** submitted by Dr. Swati Goyal, JRI, Department of Ophthalmology, KGMU via letter no. 69/OPH/21 dated 22nd April, 2021. **PGTSC Comment:** • No Ayurvedic (AYUSH) Consultant as Co-investigator included • No literature showing correlation of Curcumin and treatment of TAO given • The source of curcumin not mentioned • Which placebo is used - not given • How the groups 1 and 2 will be divided then how Group 2 into mild, moderate and severe is not mentioned, so detailed methodology should be submitted. **PGTSC Comment:** Re-write & Decision ***Ref. code: II-PGTSC-IIA /P20***
21.	Research proposal entitled ***"A hospital based observational study on HIV-TB coinfection"*** submitted by Dr. Akansha Soni, JRI, Department of Microbiology, KGMU via letter no. 183/21 dated 27th April, 2021. **PGTSC Comment:** • Objectives not defined • Methodology section incomplete

IA	Action Taken
1.	Clarification of research proposal entitled ***"Assessment of quality of life outcomes with prophylactic placement of permanent synthetic mesh at the time of enterostomy closure- a prospective observational study"*** submitted byDr. Ajay Kumar Pal, Associate Professor, Department of Surgery General, King George's Medical University U.P., Lucknow vide letter no. 133/2021 dated 21st January, 2021. **Previous EC Comment:** • Inclusion/ Exclusion criteria are not clear. While patients with follow up of at least 3 month are to be included, the exclusion criteria states that patients with less than 6 months of follow up will be excluded. The inclusion criteria are in contradiction with exclusion criteria. **Previous EC Decision:** Approval after justification ***The above comment forwarded to the P.I., Reply given by P.I. was forwarded to the Primary reviewer.*** **Primary Reviewer recommendation:** **Comment:** • A prospective observational study using a questionnaire for assessing the QOL after a surgical procedure. **Decision:** Approved **EC Decision:** Approval ratified ***Ref. code: 105th ECM IIA/P2***
2.	Clarification of research proposal entitled ***"Role of cost effective POP boot traction in post polio residual paralysis (PPRP): A case series"*** submitted by Dr. Sudhir R. Mishra, Associate Professor, Department of PMR, King George's Medical University U.P., Lucknow vide letter no. DPMR-3524 dated 28th January, 2021. **Previous EC Comment:** • Kindly clarify inclusion & Exclusion Criteria **Previous EC Decision:** Approval after justification ***The above comment forwarded to the P.I., Reply given by P.I. was forwarded to the Primary reviewer.*** **Primary Reviewer recommendation:** **Comment:** Retrospective review of patient data- **Decision:** Approved **EC Decision:** Approval ratified ***Ref. code: 105th ECM IIA/P4***

(Shally Awasthi)
Member Secretary-IEC

(Alok Dhawan)
Chairman-IEC

3.	Clarification of research proposal entitled "***Detection and comparison of anti-SARS-COV2IgG antibodies and T cell immune response among COVID-19 infected and vaccinated,health care workers (HCWs)***"submitted by Dr. Geeta Yadav, Associate Professor, Department of Pathology, King George's Medical University U.P., Lucknow vide letter no. nil dated 7th June, 2021. ***The above comment forwarded to the P.I., Reply given by P.I. was forwarded to the Primary reviewer.*** **Previous EC Comment:** • Clarification regarding sample size is requested. • Clarify the role of Co-P.I. • Mention this is a pilot study **Previous EC Decision:** Mention this is a pilot study. **Primary Reviewer recommendation:** **Comment:** • A prospective observational study using a questionnaire for assessing the QOL after a surgical procedure. **Decision:** Approved **EC Decision:** Approval ratified ***Ref. code: 108thECM IIA/P7***
4.	Clarification of research proposal entitled "***Retrospective analysis of a methanol intoxication outbreak in Lucknow district and nearby areas in 2019***" submitted by Dr. Medhavi Gautam, Assistant Professor, Department of Medicine, King George's Medical University U.P., Lucknow vide letter no.1269/MED/21dated 10thJune, 2021. **Previous Comment:** **<u>Methodology:</u>** • All criteria not mentioned in text as per the case report form • Case report form to include full forms of the abbreviation, hence revise accordingly **Background information and data:** • Should also include the background literature relevant to proposed objectives **Inclusion criteria:** • If only those cases with positive family history of methanol intake are to be included, then incorporating signs of intoxication and that too based on suspicion seems confusing in this section. Hence revise.

(Shally Awasthi)
Member Secretary-IEC

(Alok Dhawan)
Chairman-IEC

	Sufficient number of participants: • Not specified • Additional Co-PI from TVU and Critical care medicine may be considered since the cases are to be recruited from these dept. as well • Justify inclusion of to Co-Investigators **Previous EC Decision:** Re-submit ***The above comment forwarded to the Primary reviewer.*** ***Recommendation of the Primary reviewer:*** Pending **EC Decision:**Since Dr. Anupam Mishra family issued to be forwarded to Prof. A.A. Mahdi ***Ref. code: 107th ECM IIA/P6***
	Minutes of Meeting
6	A meeting held on 09.06.2021 to review the following proposal which was put-up in the Ethics Committee Meeting held on 22nd May, 2021.
7	Research proposal entitled ***"Academic clinical trial of safety, pharmacokinetics and early measurement of drug activity of CENTINHALE dry powder inhalation"*** sponsored by CSIR-Central Drug Research Institute submitted by Prof. Rajiv Garg, Department of Respiratory Medicine KGMU via letter no.1339/RESP/2021 dated 10th February, 2021. The Following were present in the Meeting: 1. Dr. Alok Dhawan, Chairperson, Ethics Committee 2. Dr. Rajiv Garg, P.I. of the proposal Senior Principal Scientist and Professor, Department of Pulmonary Medicine, KGMU 3. Dr. Amit Mishra, Senior Scientist, CDRI, Lucknow 4. Dr. Shally Awasthi, Member Secretary, Ethics Committee Prof. Alok Dhawan went point by point through the protocol with the investigators and highlighted areas which needed clarity and revision. He also asked the Principal Investigator to incorporate a work flow chart. It was agreed that the above proposal will be considered in the scheduled Ethics Committee meeting to be held on 26.06.2021.

(Shally Awasthi)
Member Secretary-IEC

(Alok Dhawan)
Chairman-IEC

	The revised protocol would be submitted by the Principal investigator on 16.06.2021.
IB	**Expedited review**
1. 	• Inclusion criteria: How will the fact that 'PT-INR >2 is of hepatic origin' will be ascertained? • Sec 5: Why include "institutionalized" subjects? • Sec 6: Why use direct identifiers? • Sec 7 is left blank, needs to be completed. • Sec10: If risk is not reasonable to anticipated benefit, why do the study? • Blank fields in benefit section need to be filled. **EC Decision:** Approval subject to modification ***Ref. code: 109th ECM IIA/P2***
3.	Research proposal entitled ***"Operative management of early gallbladder cancer (OMEGA)-an analysis of management and outcomes in gallbladder cancer surgery"***submitted byProf. Abhinav Arun Sonkar, Head, Department of General Surgery, King George's Medical University U.P., Lucknow vide letter no.1038/2021 dated 25thMay, 2021. **Primary reviewer recommendation:** • The proposed study seems to be interesting and important. • It consists of prospective as well as retrospective study design. • The outcome variables for both the designs should be identified separately. They have mentioned these to be in Appendix I, but this is missing. • It would be helpful if research hypotheses for both parts should be stated clearly in terms of the terms of variables and associated parameters. It would be required for sample size calculations also. • The Sample size is mentioned to be 2500. How this figure is achieved? • Unless proper hypotheses are defined, the appropriate statistical analysis can not be performed. • Several study centers shall be involved, so multi-centric considerations have to be taken into accountat every stage including statistical analysis. The analysis procedures shall be different for retrospective and prospective designs. • The statistical analysis section should be rewritten in view of above comments. • The patient information sheet is not attached. • Who will be funding the study? • Give a list of collaborators from Institute uptil date. • Kindly follow National guidelines for date sharing. **EC Decision:**Approval subject to modification ***Ref. code: 109th ECM IIA/P3***
4.	Research proposal entitled ***"Evaluation of relation between mercury concentration in saliva and blood with number and surface of class I amalgam restorations"***submitted byDr. Diksha Singh, Associate Professor, Department of Oral Pathology &Microbiology,

2.	Modification of Research protocolno. ATLAS-A/Bentitled ***"A phase 3 study to evaluate the efficacy and safety of fitusiran in patients with hemophilia A or B, without inhibitory antibodies to factor VIII or IX"*** sponsored by M/s Bajaj Allianz Generali Insurance Co Ltd. Ltd. submitted by Dr. S.P. Verma, Associate Professor, Department of Clinical Hematology, King George's Medical University U.P., Lucknowvide letter no.243/CH/21 dated 3rd June, 2021. **EC Comment:** The SAE of severe types have been reported. These include very high transaminases and 6 cases with thrombosis. One of them was fatal. The reason given for fatality is that probable misdiagnosis of intracranial bleed while the patient had sinus thrombosis. The total number of cases enrolled in various parts of the previous studies is not clear, but the incidence rate [page 97] is 5.91 and 1.49 [of vascular thrombosis events per 100 patients years for AT levels of <10% and 10 to 20% respectively). Comment on whether this risk is acceptable for patients with hemophilia without inhibitors? Currently the hemophilia patients in India do not have access to prophylaxis [mostly] but they have access to on demand therapy and serious bleeds are managed successfully for the cases who are not on prophylaxis. For the cases with inhibitors, the management of serious bleeds is not easy and they also do not have access to prophylaxis - Hence, they may be better group for trial. But this trial has excluded them. I on review of data from other countries where trial on cases without inhibitors is going on this it was stopped after fatal SAE. Kindly confirm. To compare with efficacy, the previous studies have shown average ABR [annual bleed rate] on drug as 3 to 5. (can it be considered very effective? [2] The amendment is basically to incorporate the findings that the ABR is related to AT levels and they decided to mitigate the risk of vascular thrombosis event while maintaining a favourable benefit risk balance to change the dose from 80 mg per month to 50 mg every 2 months. This appears logical. But the patient information brochures in Hindi and English mention the dose as 80mg per 28 days. This needs verification / clarification. Most importantly this document does not contain the protocol of the study to verify the dose planned and how many time AT levels will be measured and based on those if the drug levels will be modified. Kindly submit a detailed report of recruitment at our site and their outcomes. **EC Decision:** Pending review of clarifications

IA	Action Taken
1.	Clarification of research proposal entitled ***"Evaluation of magnetic nanoparticles as pulpotomy medicament in primary teeth: randomized control trial"*** submitted by Dr. KumariCharul, JRI, Department of Paediatric& Preventive Dentistry Faculty of Dental Sciences,King George's Medical University, U.P., Lucknow vide letter no. Pado/399/21 dated 25th May, 2021. **PGTSC Comment:** 1. The aim is to evaluate the effectiveness of magnetic nanoparticles (MNPs) as a pulpotomy medicament in primary molars and to compare its effectiveness to MTA 2. Inclusion and exclusion criteria are clearly defined 3. Two groups – study group will receive MNPs and control group will get MTA. Rest of the treatment will be the same 4. Sample size 24 in each group. Statistically derived 5. Randomization will be computer generated 6. Bilingual consent form is provided. 7. What will be observed and when? 8. A data collection sheet is missing 9. If it is a RCT then we need Consort guidelines **PGTSC Decision:** Approval after justification ***The above comment forwarded to the P.I., Reply has given by P.I. which was forwarded to the Primary reviewer.*** **PGTSC Decision:** Approved ***Ref. code: 102nd ECM II B-Thesis/P59***

Anaes/440/21 dated 3rd June, 2021. **PGTSC Comment:** • **<u>Suggest changing the title:</u>** Ultrasonographic evaluation of changes in optic nerve sheath diameter as a useful point of care tool to supplement invasive intracranial pressure

(Shally Awasthi)
Member Secretary-IEC

(Alok Dhawan)
Chairman-IEC

	measurement in pediatric patents with hydrocephalus undergoing neurosurgical intervention" • Subject selection, Privacy and Confidentiality and Consent Sections of Proforma incompletely filled. • No co-supervisor/Co-PI from Radiology Department is there. Who will do the ultrasound? Does the person doing the ultrasound? Does the person doing the ultrasound have PCPNDT registration? • According to the PI, ONSD is already an established method of detecting raised intracranial pressure. What is the rationale behind this study then?? What is the research question? Also, please mention role of each member of the team of researchers. **PGTSC Decision:** Approval subject to modification ***Ref. code: III PGTSC-IIA/P33***
34.	Research proposal entitled ***"Effect of non-surgical periodontal therapy on salivary and gingival crevicular fluid concentration of visfatin in periodontal health and disease"*** submitted by Dr. Hira Ismail, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknowvide letter no. 1582/P/21 dated 23rd February, 2021. **PGTSC Comment:** • According to the PI role of Visfatin as an inflammatory marker in periodontal disease is already established. What is the needkl for this study? • Proforma says the study I NOT a clinical trial. However, the PI says the study will be registered with clinical trial Registry of India. This is conflicting. • Role of everyone participating in the study needs to be defined. Is it a trial? Research question needs to be defined. **PGTSC Decision:** Approval subject to modification ***Ref. code: III PGTSC-IIA/P34***
35.	Research proposal entitled ***"To evaluate the effect of oral zinc supplementation on salivary MMP-8 levels in chronic periodontitis"*** submitted by Dr. Vishakha Gupta, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknowvide letter no. 1581/P/21 dated 23rd February, 2021. **PGTSC Decision:** Approved ***Ref. code: III PGTSC-IIA/P35***
36.	Research proposal entitled ***"To evaluate and assess association of ABO phenotype and rhesus factor with oral hygiene status and severity of periodontitis"*** submitted by Dr. Mohd. Aamir Khan, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknowvide letter no. 1585/P/21 dated 23rd February, 2021. **PGTSC Comment:** • According to the literature provided by the PI several such studies have already been done all over the world in the past. What is the rationale for another such

(Shally Awasthi)
Member Secretary-IEC

(Alok Dhawan)
Chairman-IEC

	study then? What is the research question? • Define 'Other blood parameters' mentioned in Aims of the study • Justify use of 'Other blood parameters'. • Research question needs to be formulated. • Role of all investigators needs to define. **PGTSC Decision:** Approval subject to modification ***Ref. code: III PGTSC-IIA/P36***
37.	Research proposal entitled ***"Evaluation of periodontal health status in patients with lung cancer in north Indian population: A case-control study"*** submitted by Dr. Pooja Singh, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknowvide letter no. 1583/P/21 dated 23rd February, 2021. **PGTSC Comment:** • Periodontontal health and HBD-2 have already been linked to cancers in previous studies. Please argue the need for another study on the same subject. • Besides the PI there are seven Co-PI. Please define the role of every Co-PI. **PGTSC Decision:** Approval subject to modification ***Ref. code: III PGTSC-IIA/P37***
38.	Research proposal entitled ***"Effect of antioxidant therapy in periodontal disease: A clinical study"*** submitted by Dr. Sakeena Tariq, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknowvide letter no. 1586/P/21 dated 23rd February, 2021. **PGTSC Comment:** • Role of antioxidants in reducing oxidative damage in periodontal disease has already been established. What new aspect do the investigators want to research? **PGTSC Decision:** Approval subject to modification ***Ref. code: III PGTSC-IIA/P38***
39.	Research proposal entitled ***"Impact of oil pulling on periodontitis in patients with and without type2 diabetes mellitus-A randomized controlled trial"*** submitted by Dr. Nehil Saran, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknowvide letter no. 1584/P/21 dated 23rd February, 2021. **PGTSC Comment:** • Objectives of studying the efficacy of an Ayurvedic procedure in a modern medicine University by a person not trained in Ayurveda amounts to malpractice. • PI not trained in Ayurvedic sciences, thus cannot act as PI. • The PI and all exact one Co-PIs are not trained in Ayurveda • KGMU is a University imparting training in Modern Medicine. Research in subject pertaining to Ayurveda involving patients will be malpractice. • Patient has to be informed that they are being treated by an Ayurvedic method by a person not trained in Ayurveda.

(Shally Awasthi)
Member Secretary-IEC

(Alok Dhawan)
Chairman-IEC

	• Research on an Ayurvedic medication/Ayurvedic treatment/procedure cannot be conducted by a person not trained in Ayurvedic sciences and in a non-Ayurvedic University. This amounts to Malpractice. Suggest rethinking of the research topic on a subject from Modern Medicine. • Mention the compensation of oil to be used. • How will the oil be Standardized? • Justify the role of Co-PIs. • Include a Doctor Ayush working in KGMU. **PGTSC Decision:** Approval subject to modification ***Ref. code: III PGTSC-IIA/P39***
40.	Research proposal entitled ***"Incidence, etiological profile and outcome of ventilator associated pneumonia (VAP) in pediatric intensive care unit (PICU)"*** submitted by Dr. Naresh Kumar, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknowvide letter no. 13322/Ped/21 dated 5th June, 2021. **PGTSC Comment:** • The study is prospective. Observational However, the PI has filled the Risk and benefit section in the proforma. In and non-interventional study there is no risk for the patient except form the disease. • The 'Background and review of Literature' mentions KGMU as a Central Government hospital, which it is not. This should be corrected. **PGTSC Decision:**Approved ***Ref. code: III PGTSC-IIA/P40***
II-B	**IMR-Resident**
1-	Research proposal entitled ***"Analysis of efficacy of elastography in comparison to dynamic renal nuclear scintigraphy in diagnosis of unilateral pelvi-ureteric junction obstruction"*** sponsored by Research Cell, KGMU UP, Lucknow submitted by Dr. Nirpex Tyagi, SRII, through his Mentor Prof. Anand Pandey, Associate Professor, Department of Pediatric Surgery, King George's Medical University, U.P., Lucknowvide letter no. 184/Ped Sy/21 dated 12thMay,2021. **PGTSC Comment:** • Age of PIs included to be given? • Complications of Radionuclide to be described **PGTSC Decision:** Approval subject to modification ***Ref. code: IIIPGTSC-II B IMR-R/P1***
2.	Research proposal entitled ***"Clinical and radiographic assessment of the efficacy of three different materials used as pulpotomy medicaments in primary teeth: A randomized control trial"*** sponsored by Research Cell, KGMU UP, Lucknow submitted by Dr. Gunna Madhuri, JRII, through his Mentor Prof. Afro Alam Ansari, Department of Paediatric and Preventive Dentistry, Faculty of Dental Sciences,King George's Medical University, U.P., Lucknowvide letter no. Pedo/382/21 dated 15thMay,2021.

(Shally Awasthi)
Member Secretary-IEC

(Alok Dhawan)
Chairman-IEC

	PGTSC Comment: • The Principal-Investigator mentions that there is risk to the patients, but there are no plans for reporting of adverse events or provision of compensation. This is probably a mistake in filling the proforma. Please have it checked and edited. **PGTSC Decision:** Approval subject to modification ***Ref. code: IIIPGTSC-II B IMR-R/P2***
3.	Research proposal entitled "***A randomized clinical trial on comparative evaluation of intranasal combinations of midazolam-ketamine, dexmedetomidine ketamine, midazolam-fentanyl and dexmedetomidine-fentanyl for procedural sedation and analgesiainpaediatric dental patients***" sponsored by Research Cell, KGMU UP, Lucknow submitted by Dr. Agarwal AbhilashaKishanlal, JRII, through her Mentor Prof. Rakesh Kumar Chak, Head, Department of Paediatric and Preventive Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknowvide letter no. Pedo/387/21 dated 15thMay,2021. **PGTSC Comment:** • The PI mentions that the risk is not reasonable compared to anticipated benefits. Please correct this is it is a mistake in the proforma. • Privacy & Confidentiality is not mentioned in the proforma. • The PI mentions that there is risk to the patient, but there are no plans for reporting of adverse events or provisions of compensation. This is probably a mistake in filling the proforma. Please have it checked and edited. **PGTSC Decision:** Approval subject to modification ***Ref. code: IIIPGTSC-II B IMR-R/P3***
	MBBS-Student
1	Research proposal entitled "***Clinical outcomes of deep brain stimulation (DBS) under Microelectrode recording***"submitted by Mr. Ahmad Ozair, MBBS Student under the guidance of Dr. Ankur Bajaj, Department of Neurosurgery, King George's Medical University, U.P., Lucknow vide letter no. NS/229 dated 14th June,2021. **PGTSC Comment:** • The study involves no human subjects • It is a Retrospective data analysis of records **PGTSC Decision:** Approval subject to modification ***Ref. code: IIIPGTSC-II B student/P1***

Next Meeting will be held on 1st Saturday, 7th August, 2021 from 10.30 A.M.

Institutional Ethics Committee Meeting,

OFFICE OF THE ETHICS COMMITTEE

Administrative Block

Minutes of 110th ECM held on 7th August, 2021

(Registration No.:ECR/262/Inst/UP/2013/RR-19)

IA	Action taken
1.	Clarification of research proposal entitled "***Metabolic and transcriptomic pattern as potential biomarkers for breast cancer patients***" submitted by Prof. Anand Kumar Mishra, Head, Department of Endocrine Surgery, King George's Medical University U.P., Lucknow vide letter no. ENDOSURG/2021/2/93 dated 17th March, 2021. **Previous EC Comment:** • Kindly provide Data collection sheet. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Member-Secretary, IEC & Provisionally approved.*** **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 104th ECM IIA/P23***
2.	Clarification of research proposal entitled "***Assessment of tumor budding in Oral cavity Squamous cell carcinoma undergoing primary resection and its correlation with clinical outcome parameters***" submitted by Dr. Shalini Bhalla, Associate Professor, Department of Pathology, King George's Medical University U.P., Lucknow vide letter no. 2877 dated 2nd July, 2021. **Previous EC Comment:** • Clarity is required on the following issues – • Is this a retrospective study? • Will patient consent be required for this? If Yes, how will it be obtained retrospectively? Does it require patient follow-up for outcome assessment? • What is the policy for funding from Chinese Company? Submit to HMSC, ICMR for approval ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 107th ECM IIA/P2***
3.	Clarification of research proposal entitled "***Phase I academic clinical trial of safety,***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	pharmacokinetics and early measurement of drug activity of CENTINHALE dry powder inhalation" submitted by Prof. Rajiv Garg, Department of Respiratory Medicine, King George's Medical University U.P., Lucknow vide letter no. 1909/21 dated 14th July, 2021. ***The above comment forwarded to the P.I., Reply given by P.I. was forwarded to Secondary reviewer, Prof. A.A.Mahdi.*** **EC Decision:** Approved ***Ref. code: 107th ECM IIA/P4***
4.	Clarification of research proposal entitled ***"Retrospective analysis of a methanol outbreak in Lucknow district nearby areas in 2019 (prospective)"*** submitted by Dr. Medhavi Gautam, Assistant Professor, Department of Medicine, King George's Medical University U.P., Lucknow vide letter no. 1269/MED/2021 dated 10th June, 2021. **Previous EC Comment:** • Kindly provide the Methodology ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 107th ECM IIA/P6***
5.	Clarification of research proposal entitled ***"Pilot study to testify the role of antibifrotic drugs (Pirfenidone and ninterdanib) as a probable therapy for patients of post COVID pulmonary fibrosis"*** submitted by Dr. Prof. Surya Kant, Head, Department of Respiratory Medicine, King George's Medical University U.P., Lucknow vide letter no. 1814/21 dated 19th June, 2021. **Previous EC Comment:** • Give a detailed Budget ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	EC Decision: Approved ***Ref. code: 107th ECM IIA/P8***
6.	Clarification of research proposal entitled "***Severity of COVID-19 disease in vaccinated and non-vaccinated patients: An experience from a tertiary care centre***" submitted by Dr. Ajay Kumar Patwa Professor Jr. Grade, Department of Medicine, King George's Medical University U.P., Lucknow vide letter no. 1436/MED/2021 dated 2nd July, 2021. **Previous EC Comment:** • Third objective: To determine mortality rate and discharge rate in vaccinated and non-vaccinated patients. • Study Design: This study should be planned as case-control (retrospective) study with case (Vaccinated) and control (Non-vaccinated). The case and control can be matched either 1:1 or 1:k, depending on the availability of patients in the two groups. • The sample size calculations are not shown. If different parameters are not available, it can be made a pilot study. • Data Analysis section should be more precise. What is the need of "Shapiro-Will" test or "Mann-Whitney test"? • Define vaccinated & unvaccinated strains • Write role of each investigator • Parentally inclusion of serial no. 6 ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved **EC Comment:** • Assent form-ICF (For Children above 8 years) still not attached separately **EC Decision:** Approval subject to modification ***Ref. code: 108th ECM IIA/P9***
7.	Clarification of research proposal entitled "***Biosurveillance for spillover of henipaviruses and filoviruses in rural communities in India***" sponsored by Eco Health Alliance, United States submitted by Prof. Amita Jain, Head, Department of

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Microbiology, King George's Medical University U.P., Lucknow vide letter no.427/2021 dated 22nd June, 2021.

Previous EC Comment:

- Funded by an International NGO & perhaps the USUHS
- Is here G.O.I. approval for Eco Health Alliance, USA to work in the country?.
- Is there an agreement between KGMU and NGO?
- After submission to H.M.S.C of I.C.M.R. please submit the documents to Ethics Committee
- Vulnerable subjects have been checked **NO**, despite including vulnerable subjects- children, illiterate adults
- Objective 1: How will this be achieved, not elaborated in text
- What is the operational definition of "site"?
- What are the other factors that will be used to select sites?
- What is the geographical area that will be included? Whole of UP, part of state?
- How will village/clusters be chosen if bat species being looked for are found in more than 4 clusters?
- What type of randomization will be done within clusters to ensure 25% representation of children as well as equal participation of both sexes.
- What will be done if someone refuses consent?
- How has the sample size of 800 calculated?
- Is consent for archived samples present?
- Who will administer the questionnaire- Self or some project worker, and in what language?
- If questionnaire will be administered in Hindi (highly likely), need a TRANSLATED and VALIDATED questionnaire in Hindi language.
- While the title refers to rural communities, why take hospital based AES and VHF patients?
- Does institution have the required permits/ certification to accept foreign grants- FCRA, etc?
- What is the purpose of the NGO and USUHS for funding this study

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	and how will it benefit them? ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** **Comment:** The investigators have, in the covering letter, acknowledged that the study which they have submitted previously was incomplete and have now attached a complete proposal. In view of modifications by the investigator, should be resubmitted as a fresh proposal. Also, I am not sure who will arrange for clarification for point no. 18 from the Finance Officer, KGMU- the ethics committee or the PI. Prof. Alok Dhawan, Chairman, IEC has responded by e-mail dated 14th July, 2021 with following comments: ***"Since the project involves two foreign organization (an NGO and Uniformed Services University of Health Sciences-USUHS) and this components is beyond the scope of the IEC, it is requested that and in principal approval may be taken from the VC, KGMU before approval from, IEC.*** The above comment forwarded to Hon'ble Vice Chancellor, KGMU UP, Lucknow, for approval. The following comments raise by the Hon'ble Vice Chancellor:- • Approved In Principal with following caveats:- • 1- Submit permission from State/Central Govt. authorities. • 2- Agreement with Both US and Indian authorities' permission. The above response forwarded to Prof. Alok Dhawan, Chairman, IEC vide this office letter no. 951/Ethics/2021 dated 3rd August, 2021 by E-mail. **EC Comment:** EC has requested expedited review of the scientific contents of the project by 11th August 2021. Member secretary has sent this for the same on 7th August 2021. ***Reply has given by Dr. Akash Agarwal on 10th August, 2021.*** **Comment:** • Scientific content of the proposal and its ethical implication approved in principal, condition to fulfillment of requirement of the Institution. ***Ref. code: 108th ECM IIA/P2***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

8.	Clarification of research proposal entitled ***"Feasibility study of voluntary breath hold technique in reducing heart toxicity in left breast cancer Radiotherapy in our setup: low-cost substitute for high capital investment (Advanced) technology"*** sponsored by Research Cell KGMU Lucknow submitted by Dr. Mranalini Verma, Assistant Professor, Department of Radiotherapy King George's Medical University U.P., Lucknow vide letter no. 583/RT/21 dated 28th July, 2021. **Previous EC Comment:** • Sample size is 30, however, the rationale is not mentioned. If it is a pilot study then it may be mentioned. • Inclusion and exclusion criteria of subjects not clearly mentioned. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Pending **EC Decision:** Approved ***Ref. code: 108th ECM II B-IMR-F/P1***
9.	Clarification of research proposal entitled **"*Impact of COVID-19 and lockdown in India on mortality*"** submitted by Dr. Shiuli, Assistant Professor, Department of Forensic Medicine & Toxicology, King George's Medical University U.P., Lucknow vide letter no.381/FMT/2021 dated 14th July, 2021. **Previous EC Comment:** • What is the role of Co-P.I. from Australia? • Give details of number of autopsies/day. • Will a meaningful inference be possible ***The above comment forwarded to the P.I., Reply given by P.I. was forwarded to the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **EC Decision:** Approved ***Ref. code: 109th ECM IIA/P1***
10.	Clarification of research proposal entitled **"*Experience of botulinum toxin type a in patients with movement disorders at tertiary care center India*"**submitted by Dr. Shweta Pandey, Associate Professor, Department of Neurology, King George's Medical University U.P., Lucknow vide letter no.215/Neuro/21 dated 23rd July, 2021.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Previous EC Comment: • How researchers calculated sample size is not mentioned. • They are using various scales to understand the level of improvement and in statistical analysis, they did mention about the statistical tests for scales or scores. How will they prevent biases? They did not mention. • Consent form-Patient information sheet is incorrect. • Clarify duration of follow-up ***The above comment forwarded to the P.I., Reply given by P.I. was forwarded to the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **EC Decision:** Approved ***Ref. code: 109th ECM IIA/P6***
11.	Clarification of research Protocol no.HCR/III/TENESTEMI/08/2020. Version: 1.0;Dated:05 Aug, 2020 entitled "***A prospective, multicenter, randomized, comparative, parallel group clinical study to compare the efficacy, pharmacokinetics, pharmacodynamics, immunogenicity and safety of intravenous injection of tenecteplase (Hetero Biopharma Limited) and reference medicinal product (RMP Tenecteplase, BoehringerIngelheim) in adults for the thrombolyic treatment of suspected myocardial infarction with persistent ST elevation***" sponsored by M/s Hetero Biopharma Ltd submitted by Dr. Akhil Sharma, Associate Professor, Department of Cardiology, King George's Medical University U.P., Lucknow vide letter no. 1694/Cardio/Res/2021 dated 22nd July, 2021. **Primary reviewer Recommendation:** • Budget- approx.-Rs 179550/ per complete pt visit (Breakup not given) • Test drug / Ref. drug will be given as single dose -50 mg IV with in 6 hrs of onset of symptoms – Hospitalization –for 48 hrs- follow up- up to 30th day (90 min, 24 hr, 48 hr , 7th , 14th and 30th day) – what does this comment mean?? • DCGI submission letter –attached – Permission letter – Awaited • Clinical Trial Registry document not given. **EC Decision:** Approval subject to modification & fulfillment of Administrative formalities.

EC Decision: Approved

Ref.code:90th ECM II C/P2

14. Clarification of the modification of Research protocol no. ATLAS-A/B entitled ***"A phase 3 study to evaluate the efficacy and safety of fitusiran in patients with hemophilia A or B, without inhibitory antibodies to factor VIII or IX"*** sponsored by M/s Bajaj Allianz Generali Insurance Co Ltd. Ltd. submitted by Dr. S.P. Verma, Associate Professor, Department of Clinical Hematology, King George's Medical University U.P., Lucknow vide letter no.410/CH/21 dated 26th July, 2021.

EC Comment:

The SAE of severe types have been reported. These include very high transaminases and 6 cases with thrombosis. One of them was fatal. The reason given for fatality is that probable misdiagnosis of intracranial bleed while the patient had sinus thrombosis. The total number of cases enrolled in various parts of the previous studies is not clear, but the incidence rate [page 97] is 5.91 and 1.49 [of vascular thrombosis events per 100 patients years for AT levels of <10% and 10 to 20% respectively).

Comment on whether this risk is acceptable for patients with hemophilia without inhibitors? Currently the hemophilia patients in India do not have access to prophylaxis [mostly] but they have access to on demand therapy and serious bleeds are managed successfully for the cases who are not on prophylaxis.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	For the cases with inhibitors, the management of serious bleeds is not easy and they also do not have access to prophylaxis - Hence, they may be better group for trial. But this trial has excluded them. As per the reviewer statement from on cases without inhibitors is going on, it was stopped after fatal SAE. Kindly confirm. To compare with efficacy, the previous studies have shown average ABR [annual bleed rate] on drug as 3 to 5. (can it be considered very effective? [2] The amendment is basically to incorporate the findings that the ABR is related to AT levels and they decided to mitigate the risk of vascular thrombosis event while maintaining a favourable benefit risk balance to change the dose from 80 mg per month to 50 mg every 2 months. This appears logical. But the patient information brochures in Hindi and English mention the dose as 80 mg per 28 days. This needs verification / clarification. Most importantly this document does not contain the protocol of the study to verify the dose planned and how many time AT levels will be measured and based on those if the drug levels will be modified. Kindly submit a detailed report of recruitment at our site and their outcomes. **EC Decision:** Pending review of clarifications ***The above comment forwarded to the P.I., Reply given by P.I. was forwarded to the Primary reviewer.*** **Recommendation of Primary reviewer:** **Comment:** • I did not understand the responses to queries 2 and 3. It says dosing had been stopped from October, 2020 to January, 2021. Does it mean that the drug is not being given to the patients enrolled previously? I did not get the point about the amendment. Some clarity is missing. May be, you should go through it and also talk to Dr. Verma who can clarify the exact status and the amendment.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

EC Comment:

- Is the study continuing?
- In what doses is the drug being given?
- Kindly provide updated information from KGMU site on

EC Decision: Approval after modification

	(Mentioned 100 pt. + 100 control in material method part). • Methodology details not given- study design not mentioned • English & Hindi Informed Consent Form are attached but Ascent form for children no attached. • Scientific review to be done in the Department. **EC Comment:** • As above **EC Decision:** Approval subject to modification ***Ref. code: 110th ECM IIA/P1***
11.	Research proposal entitled ***"Profile of orbital involvement in COVID associated mucormycosis: A tertiary health care center experience"*** submitted by Prof. Apjit Kaur Chhabra, Head, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no.295/OPH/21 dated 23rd June, 2021. **Recommendation of Primary reviewer:** • Profile of orbital involvement in covid associated mucormycosis: a tertiary health care centre experience' • The researchers intend to study the profile of orbital involvement in patients with covid associated mucor mycosis in KGMU. • Is it a Prospective study? Will they include cases admitted earlier also (retrospective)? Will the closed cases [died or cured] included. • As per the proposal the researchers will be enrolling only new cases. This should be confirmed. • The evaluation and management will be done as per the institute protocol and hence, there are no ethics related issues. • Is purpose same as objective of the study?

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• APPROVED with the confirmation about enrolment limited to only new cases. • Scientific review to be done in the Department. **EC Comment:** • As above **EC Decision:** Re-submit ***Ref. code: 110th ECM IIA/P11***
12.	Research proposal entitled "***Outcome of transcutaneous retrobulbar amphotericin B (TRAMB) in COVID-19 associated rhino-orbito-cerebral (ROCM) mucormycosis***" submitted by Prof. Apjit Kaur, Head, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no.296/OPH/21 dated 23rd June, 2021. **Recommendation of Primary reviewer:** • This project has a great overlap with the previous project by the same PI. • The PI need to clarify what is different from the previous project on the same area and the similar aspect of the disease in concern. **EC Comment:** • As above **EC Decision:** Re-submit ***Ref. code: 110th ECM IIA/P12***
13.	Research proposal entitled "***Serum ferritin as a biochemical marker of severity for orbital disease in COVID associated mucormycosis***" submitted by Prof. Apjit Kaur, Head, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no. 3416/OPH/21 dated 3rd July, 2021. **EC Comment:** • Residents can't be co-investigators. • Innumerable deficiencies in Ethics form: a few are pointed below:-

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	What is the meaning of "self" in budget: is patients paying of himself/herself Section 5: Incomplete Section 6: all have been ticked Section 7: Isn't blood a body fluid? • There is no methodology section **EC Decision:** Re-submit as fresh proposal ***Ref. code: 110th ECM IIA/P13***
14.	Research proposal entitled ***"COVID IgG spike antibodies detection by ELISA and quantitative chemiluminiscence: A comparative study"*** sponsored by POCT Service, Complete Medical Solution submitted by Prof. Tulika Chandra, Principal Investigator, Head, Department of Transfusion Medicine, King George's Medical University, U.P., Lucknow vide letter no.185/21 dated 3rd July, 2021. **EC Comment:** • Ethics form not filled completely • Budget not specified • Checklist not ticked • No statistical plan given • Sample size calculation no given **EC Decision:** Re-submit as fresh proposal ***Ref. code: 110th ECM IIA/P14***
15.	Research proposal entitled ***"Cutaneous manifestations of mucormycosis during the current severe acute respiratory syndrome coronavirus 2 (SARS-COV-2) pandemic: A retrospective study"*** submitted by Prof. Swastika Suvirya, Principal Investigator, Head, Department of Dermatology, Venereology and Leprosy, King George's Medical University, U.P., Lucknow vide letter no.119/SKIN/21 dated 3rd July, 2021.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	EC Comment: • This is a retrospective study based on mucormycosis in Covid patients. One of the primary objectives of the study is to identify and classification of cutaneous mucormycosis for early diagnosis and management. But it is not explained how a retrospective study can fulfill this objective. • Study settings are not well defined like subjects will be recruited from outdoor services or indoor services? • For inclusion criteria- It has mentioned in the proposal that the established diagnosis of the mucormycosis will be included in the study. But which method will be considered for establishing diagnosis eg. mucrobiologically proven mucormycosis or radiologically suspected or both is not clearly mentioned in the proposal. Moreover, the status of RT PCR is also not mentioned- whether it is during active infection or during post covid period. **EC Decision:** Approval subject to modification ***Ref. code: 110th ECM IIA/P15***
16.	Research proposal entitled ***"Study on polio and non-polio enterovirus infections in patients with primary immunodeficiency disorders (PIDs) at multiple medical institutes across India-PHASE II"*** sponsored by WHO & ICMR New Delhi submitted by Prof. Shally Awasthi, Head, Department of Dermatology, Pediatrics, King George's Medical University, U.P., Lucknow vide letter no. IECS/619/21 dated 8th July, 2021. **EC Decision:** Approved ***Dr. Shally Awasthi did not participate in discussion & decision making.*** ***Ref. code: 110th ECM IIA/P16***
17.	Research proposal entitled ***"Substance abuse and mental health issue among the LGBT community in India: A study of inter-relationship between mental health***

(Alok Dhawan)
Chairman, IEC

disorders and stress, coping, perceived social support, occupation and religiosity" sponsored by National Human Right's Commission, New Delhi submitted by Prof. Vivek Agarwal, Head, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 974/Psy/21 dated 8th July, 2021.

Recommendation of Primary reviewer:

Comment:

- This seems to be an interesting and very ambitious study as they are trying to cover whole country.
- In this particular study, study design and sampling methods are very important.
- There is no mention of type of study design used.
- Theoretical population (population for generalization), study population (accessible population) and sampling frame are to be properly defined.
- What are the variables and parameters?
- Which sampling method is to be used (Simple random sampling, stratified random sampling, cluster sampling etc.)?
- For stratified sampling, different non-overlapping groups are to be defined.
- There is mention of purposive sampling. This is nonprobabilty sampling. The nonprobability samples cannot depend upon the rationale of probability theory. There will be problem in using the statistical theory (e.g. finding confidence intervals, testing of hypotheses etc.).
- If it is a multi-centric study, all the prerequisite have to be followed.
- The sample size calculation is not clear. Since variables and parameters are not defined.
- Are the instruments used are gold-standard?

EC Comment:

- As above

EC Decision: Approval subject to modification

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Ref. code: 110th ECM IIA/P17
18.	Research proposal entitled "***Assess job satisfaction in nurses and its correlation with experience of working in the COVID-19 Hospital***" submitted by Dr. Suchana Roy Bhowmik, Assistant Professor, Department of KGMU College of Nursing, King George's Medical University, U.P., Lucknow vide letter no. 1189/X.51/21 dated 13th July, 2021. **Recommendation of Primary reviewer:** **Comment:** • There is mention of objectives, research question and hypotheses? It should be replaced by objectives and associated research hypotheses? There should be a main objective and the rest can be secondary objectives. • The sampling method is purposive. This is nonprobabilty sampling. • The nonprobability sample nay not depend upon the rationale of probability theory. There will be problem in using the statistical theory (e.g. finding confidence intervals, testing of hypotheses etc.). • There will be problem in generalization (external validity) also. A threat to external validity is an explanation of how you might be wrong in making a generalization. For instance, you conclude that the results of your study (which was done in a specific place, with certain types of people, and at a specific time) can be generalized to another context (for instance, another place, with slightly different people, at a slightly later time). • The sample size calculations and statistical analysis methods are not clear, since the variables and parameters used in the study are not exclusively defined. **EC Comment:** • As above **EC Decision:** Re-submit ***Ref. code: 110th ECM IIA/P18***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

19.	Research proposal entitled **"*Inter-observer variation in assessing depth of invasion, pattern of invasion and extranodal extension as histological parameters in oral squamous cell carcinoma(OSCC)*"** submitted by Dr. Sumaira Qayooom, Associate Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 2941/21 dated 14th July, 2021. **Recommendation of Primary reviewer:** **Comment:** • This is a retrospective study. The resected specimen has already been collected. • The variables and associated parameters have already been measured. • The study proposes to assess the new variables (Depth of invasion, pattern of invasion, etc.) on the specimen. How shall this be done reliably and precisely? This is a real challenge. • The assessment is to be done by 5 pathologists. There will be 10 possible Kappa coefficients. An statistical test has to be performed on equality of these 10 coefficients. If the hypothesis is rejected, how these coefficients will be interpreted? • The calculation of Kappa coefficients shall depend on the type of the data (categorical, ordinal or ratio). The sample size calculation and statistical analysis will depend on it. • There are some paradoxes associated with Kappa: (i) prevalence effect and (ii) bias effect. If these are present, then prevalence and bias adjusted kappa (PABAK) has to be calculated. **EC Comment:** • Involve a statistician as co-investigator • Remove SR as Co-investigator **EC Decision:** Approval subject to modification

20.	Research Protocol entitled "***Impact of COVID-19 on heart failure hospitalization and outcome in India-A Cardiological society of India study (CSI-HF in COVID-19 times study-"The COVID C-HF study)***" sponsored by Cardiological Society of India submitted Dr. Sharad Chandra, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no.1653/Cardio/Res/2021 dated 7th July, 2021. ***Recommendation of Primary reviewer:*** • Few entries on page 6 of annexure are incomplete • As per the annexure only oral consent will be obtained (instead of written consent): what is the role of attached informed consent document? Will it be electronically mailed to the participant for signature or will just act as a guide for clarification? • Study timelines dating before March 2021 may be revised **EC Comment:** As above **EC Decision:** Approval subject to modification *Ref. code: 110th ECMIIA/P20*
IIB	**New Ph.D Scholar**
1.	Research proposal entitled "***Study of T regulatory cells, soluble cytotoxic T lymphocyte associated antigen-4 and transforming growth factor-β1 in patients of chronic myeloid leukemia on dasatinib therapy***" sponsored by ICMR submitted by Dr. Akanksha Singh, Ph.D Scholar 2019, under the guidance Prof. Rashmi Kushwaha, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no.2808/21 dated 14th June, 2021. **Recommendation of Primary reviewer:**

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The investigator plans to study biomarkers at the start of treatment and after 3 months in patients with CML on dasatinib. • The consent does not mention how much amount of blood to be collected and how many times. • The patient information in the consent [English] is not appropriate. Benefit should mention the direct or indirect benefits to the patient and then to the medical science. • Hindi consent is a very poor quality translation, incorrect, complex and clumsy. It needs to be rewritten in simplified form by Hindi speaking person. Automatic translation by software is not appropriate. • It need to be confirmed that the decision of giving a particular drug is not dependent on the trial and is independent and before considering the patient for the study. **EC Comment:** As above **EC Decision:** Approval subject to modification ***Ref. code: 110th ECM II B-Ph.D/P1***
2.	Research proposal entitled ***"Effect of dietary modification and physical activity on blood glucose level of pregnant women with gestational diabetes mellitus: an interventional study"*** sponsored by ICMR submitted by Dr. Mallicka, Ph.D Scholar 2019, under the guidance Prof. Jamal Masood, Head, Department of Community Medicine, King George's Medical University, U.P., Lucknow vide letter no.237/CM/21 dated 17th June, 2021. **Recommendation of Primary reviewer:** • Sample size calculations – not important for Ethics committee • There will be two groups. Group II will get diet plan according to sample meal plan as given in guidelines prescribed by Government of India. Group I cannot be deprived of this management protocol which is approved by government operational guidelines. Also the counseling has to be provided to all women with

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	gestational diabetes as it is an important part of management. • As diet and physical activity are important parts of approved management such two groups with one group deprived of approved management cannot be done. • THE STUDY NOT APPROVE IN THIS FORM. • In addition there are many limitations in the scientific part of the study about documenting and verifying the compliance for the dietary and exercise advices, etc. **EC Comment:** • As above **EC Decision:** Revise & Re-submit ***Ref. code: 110th ECM II B-Ph.D/P2***
3.	Research proposal entitled ***"Postmortem examination of deceased using digital infrared photography"*** submitted by Mr. Anurag Dubey, Ph.D Scholar 2019, under the guidance Prof. Anoop Kumar Verma, Head, Department of Forensic Medicine & Toxicology, King George's Medical University, U.P., Lucknow vide letter no.378/FMT/21 dated 8th July, 2021. **EC Decision:** Approved ***Ref. code: 110th ECM II B-Ph.D/P3***
4.	Research proposal entitled ***"Metagenomics approach in forensic science for human identification among North Indians"*** submitted by Mr. Sangram Sandhu, Ph.D Scholar 2019, under the guidance Prof. Pooran Chand, Head, Department of Prosthodontics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no.182/21 dated 9th July, 2021. ***Recommendation of Primary reviewer:*** • It is a multicentric study. Subjects will be recruited at KGMU and DNA extraction and other laboratory work will be done at Birbal Sahni Institute but in the proposal it has been mentioned as a single centre study.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The role of the Ph.D. scholar is not defined in the proposal. His name is neither in PI nor Co-PI list. **EC Comment:** • As above • Mr. Sangram Sandhu's biodata and role in work has to be defined. • Ethical approval from B.S.I has to be taken. • How will the dental guides give scientific inputs for this work which is on metagenomics? **EC Decision:** Approval subject to modification ***Ref. code: 110th ECM II B-Ph.D/P4***
5.	Research proposal entitled "***Efficacy of dietary intervention of flax seeds (Linum usitatissimum) on signs and symptoms associated with perimenopausal syndrome***" submitted by Ms. Rashmi Shrivastava, Ph.D Scholar, under the guidance Prof. Sunita Tiwari, Head, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no.2491/PHY/21 dated 28th June, 2021. **EC Comment:** • What is the budget and who is the sponsor • Is it alright to test herbal remedies by Allopathic Physicians • Section 5: Subject participation, type of subjects needs correction • Section 8: Elements need to checked. If not ticked, mention reason CRF not included. • CRF not included Methodology: • There are no references. Has any such study ever been done? If not, how can you do a RCT as the first study? • It's a RCT: Mention all the elements of RCT • Inclusion criteria: Who have not used Vitamin from when to when? • Questionnaire: Where has the questionnaire been validated, in which language? • Sample size calculation: What is the effect size? **EC Decision:** Re-submit as fresh proposal ***Ref. code: 110th ECM II B-Ph.D/P5***

Recommendation of Primary reviewer:

Comment:

- Study proposes to evaluate role of 'Chyawanprash' and Ayurvedic formulation which is mentioned as a 'drug' at one place in the proforma, as a 'multi-herbal jam' at another place and as a 'Nutraceutical and Functional food' at another place.
- What is it? Food or drug?
- What is its exact composition in w/w or w/v?

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

- What are its active ingredients?
- Which active ingredient is being tested in this project?
- Is it a trial? What is being tried? The proforma mentions the study as a 'Trial' (interventional RCT)
- 'Background' of the study mentions that 'Chyawanprash strengthens the tracheabronchial tree and hence improves immunity and functioning of the respiratory system'. Such statements have no medical or bio-chemical basis or basis science study supporting the claim. There are other such claims made in the proforma which are untenable and not supported by modern medicine literature. All the references quoted are from journals which cannot be claimed to be mainstream medical journals.
- Can a modern medicine specialist undertake research as PI in a field outside his specialty?
- Departmental Scientific Review Committee has not approved the 'Background and Rationale', Hypothesis, Methodology etc.
- The PI is an expert of Modern Medicine, while the study evaluates the efficacy of an Ayurvedic formulation.
- All Co-PI have been assigned the same role in the proforma
- Direct identifiers are being used. No mention of confidential handling.
- Dr. Sanjay Kumar Singh is mentioned as PI in one place and as Co-PI in another place.
- Project has a Co- PI from Radiotherapy and another from Netra-rog (ophthalmic department). Please mention their roles corresponding to their specialties.

EC Comment:

- As above
- No insurance in the budget

EC Decision: Project not in purview of KGMU ethics committee

Recommendation of Primary reviewer:

Comment:

- Are the active ingredients of Tenecteplase and Tenectase same?
- The control arm also has the same drug (Tenectase). What is being tested, drug efficacy or dosage or new usage?
- The study is supposed to be randomized but in the Methodology the PI states that patients with up to 4.5 hrs of ischemia time will be selected for Tenecteplase group and patients with up to 3 hrs of ischemia time will be selected for both groups. This introduces bias. Please comment.
- Tenecteplase is and established antithrombolytic agent. What is the objective of this study then? Is this a trial to find new usage of the drug?
- Involvement of Vulnerable participants is not mentioned. Please mention in the IEC form.
- Numbers of subjects in IEC form are given as 50 and in the Methodology

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	submitted to Scientific review Committee of the Department it is given as 225. • The parallel arm has the same drug (Tenectase) the justification for which has been asked from the PI. • Study is funded by private, Indian pharmaceutical firm • Informed consent mentions that there is only ONE study group-the one receiving the test drug. This has to be modified. • Not given in consent form. Name and contact details of on-site PI/counselor must be mentioned is Consent form. • Indirect identifiers/Coded in privacy & Confidentiality • Does the study involve a change in use of drug from Acute Stroke? This has not been mentioned in the IEC form. • The CTRI form does not have mention of KGMU site. • Roles of PI and Co-investigators are overlapping. **EC Decision:** Approval subject to modifications/clarifications and fulfillment of administrative formalities ***Ref. code: 110th ECMIIC/P4***

Chairman, IEC

	tolerability of various doses of linezolid in combination with bedaquiline and pretomanid in adults with extensively drug-resistant (XDR),MDR with additional resistance to fluroquinolones or second line injectables, intolerant/non-responsive multidrug-resistant (MDR) pulmonary tuberculosis in India" submitted by Prof. Surya Kant, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no.1897/Res/2021 dated 9th July, 2021. **Recommendation of Primary reviewer:** • The PI informs that WHO has updated some definitions of extensively drug resistant TB and their outcomes and these have been incorporated in Indian guideline. Due to these the proposal needs amendment to incorporate the modified definitions and labels. • APPROVED AS IT SEEMS NECESSARY AND APPROPRIATE. • Someone involved in treating tuberculosis from Medicine or Pediatrics [Dr Shally herself] please go through the modifications. **EC Decision:** Approved ***Ref.code:109th ECMIB/P7***
3	Modification of research proposal entitled ***Digoxin in patients with rheumatic heart disease- a randomized placebo controlled trial"*** submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no.1626/Cardiology/Res/21 dated 18th June, 2021. **EC Comment:** • This project was already approved in 2020 and is now re-submitted with some additions/Clarifications of some procedural details regarding the systems for web-based randomization, data entry, study drug management, SAE reporting and overall trial management. In addition this version has already been approved by AIIMS IEC. • The rationale of this study is to measure in relatively younger RHD patients, the role (including mortality) of inexpensive digoxin that otherwise is known for its mortality in older patients non-valvular AF.

(Shally Awasthi)

Clarification of research proposal entitled ***"A study of the association between serum ferritin levels and microalbuminuria in patients of type 2 diabetes mellitus"*** submitted by Dr. Kinjalk Dubey, JR-I, Department of Internal, Medicine King George's Medical University, U.P., Lucknow vide letter no. 1478/MED/2021 dated 8th July, 2021. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code:III PGTSC-IIA/P29***
24.	Clarification of research proposal entitled ***"Effect of non-surgical periodontal therapy on salivary and gingival crevicular fluid concentration of visfatin in periodontal health and disease"*** submitted by Dr. Hira Ismail, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 1833/P/21 dated 16th July, 2021. **Previous PGTSC Comment:** • According to the PI role of Visfatin as an inflammatory marker in periodontal disease is already established. What is the need for this study? • Proforma says the study I NOT a clinical trial. However, the PI says the study will be registered with clinical trial Registry of India. This is conflicting.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Role of everyone participating in the study needs to be defined. Is it a trial? Research question needs to be defined. **Recommendation of Primary reviewer:** **Comment:** Following this the Primary was reviewer satisfied with the answer to point no. 1 (need for the study) However, points 2 and 3 have not been answered to satisfactorily. **Point no.** 2-The PG thesis is a clinical, interventional study and cannot be considered a 'Trial' which the Principal-Investigator is claiming. However, if the Principal-Investigator insists that this study is indeed a 'Trial',the project be put forward in front of a Full Committee for evaluation. CTRI registration, as claimed by the Principal-Investigator, is not MANDATORY for publication in medical journals. This is an erroneous assumption and false claim by the PI. **Point no.3**-The number of Co-supervisors is untenable. Number of co-supervisors has to be decreased. **PGTSC Comment:** As above **PGTSC Decision:** Approval subject to modification ***Ref. code: III PGTSC-IIA/P34***
25.	Clarification of research proposal entitled ***"To evaluate and assess association of ABO phenotype and rhesus factor with oral hygiene status and severity of periodontitis"*** submitted by Dr. Mohd. Aamir Khan, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 1837/P/21 dated 19th July, 2021. **Previous PGTSC Comment:** • According to the literature provided by the PI several such studies have already been done all over the world in the past. What is the rationale for another such study then? What is the research question? • Define 'Other blood parameters' mentioned in Aims of the study

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Justify use of 'Other blood parameters'. • Research question needs to be formulated. • Role of all investigators needs to define. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: III PGTSC-IIA/P36***

Anas/471/21 dated 15th June, 2021. **Primary reviewer recommendation:** **Comment:** • In the proforma 'Subject Selection' section it is not mentioned whether the subjects will be patients or volunteers. • Proforma says risk is not reasonable compared to benefits. Please correct this. • Not mentioned in proforma. • Conflicting numbers of subjects given – 60 at one place and 120 at another. Please correct.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Appropriate boxes not ticked in the proforma • Direct Identifiers, Indirect Identifiers and Anonymized are all ticked. Please correct this. **PGTSC Decision:** Approval subject to modification ***Ref. code: IV PGTSC-IIA/P33***
34.	Research proposal entitled ***"A randomized controlled study comparing videolaryngoscopy to conventional laryngoscopy for intubation in adult patients in intensive care unit"*** submitted by Dr. Ravi Shankar, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anas/459/21 dated 10th June, 2021. **PGTSC Comment:** • The answer to 'Risk is reasonable' has been give as 'No'. Please check if this is correct. If the risk is not reasonable the study cannot be approved. • Not specified in proforma • Boxes not checked. Please complete in ICF • Direct identifiers and Completely Anonymized are both ticked. Please correct in privacy & confidentiality. **PGTSC Decision:** Approval subject to modification ***Ref. code: IV PGTSC-IIA/P34***
35.	Research proposal entitled ***"A comparative morphometric study of lumbosacral spine in normal subjects and patients of spondylolisthesis: A clinic-anatomical perspective using 64-SLICE multidetectoe computed tomography"*** submitted by Dr. Sumbul, JRI, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 98/ANAT/21 dated 14th June, 2021. **PGTSC Comment:** • Is the Morphometry of the adult lumbo-sacral spine not known that this study is being undertaken? What new knowledge do the investigators propose to seek from the study? • How will volunteers for the control group be recruited? • Will the two groups be age and sex matched? The vertebral morphology will vary according to age/sex/racial characteristics and other confounding factors like growth disorders. • Sufficient work has already been done on this subject. Why another study? • Risk is not reasonable has been ticked. If this is true study cannot be approved. • Not specified. Please correct this in Voluntary, Non-coercive Recruitment of Participants. • The subject number will go up if the groups are age-sex matched.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Some conditions in the control group may act as confounding factors for eg. Osteopenia? • Informed consent doesn't have any mention of the risk of radiation that the volunteers will be exposed to. • Boxes not ticked. Please correct this in ICF • Direct identifiers, indirect identifiers, and Anonymized are all ticked. Please correct this in Privacy & Confidentiality. **PGTSC Decision:** Approval subject to modification ***Ref. code: IV PGTSC-IIA/P35***
36.	Research proposal entitled ***"Morphometric analysis of coracoids process, acromion process and glenoid fossa: A computed tomography study"*** submitted by Dr. Akriti Anand, JRI, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no.99/ANAT/21 dated 14th June, 2021. **PGTSC Comment:** • PI has answered 'No' to the point 'Is the risk reasonable?' • Number of subjects not mentioned in the Form filled by the PI. • Besides written consent, Oral explanation of the consent also must be done. Not ticked. Consent must also be taken after explaining additional radiation dose • No mention of extra radiation dose that the patient will be subjected to. • Direct identifiers, indirect identifiers, and Anonymized are all ticked. **PGTSC Decision:** Approval subject to modification ***Ref. code: IV PGTSC-IIA/P36***
37.	Research proposal entitled ***"Effect of surya-namaskar on anthropometric parameters and serotonin level in apparently healthy subjects"*** submitted by Dr. Ajaya Deep Singh, JRI, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no.2471/PHY/21 dated 16th June, 2021. **PGTSC Comment:** • Does the study also intend to show changes in anthropometric dimensions during the period of study? No such relevant literature has been cited. Why has one particular 'Asana' been chosen? Will it not be better to have a more generic title like 'Effect of exercise/Yoga on Anthropometry and serotonin levels'?

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The time period of measurement of serotonin levels is different in Aims and Objectives section from the Methodology section. • No data regarding affect of 'Surya Namaskar' on anthropometric changes has been cited. Will they say changes also occur with any other exercise, such as running, or aerobics? • Is risk reasonable has been answered with 'No'. • No mention has been made in the form. Please correct this in Involvement of Vulnerable Participants. • Volunteers have not been ticked in the form. • Contents not ticked in the form. Please correct this in ICF • How will they monitor adherence? **PGTSC Decision:** Approval subject to modification ***Ref. code: IV PGTSC-IIA/P37***
38.	Research proposal entitled ***"Retrospective and prospective outcomes of transarterial chemoembolization in gestational trophoblastic diseases"*** submitted by Dr. Durga Singh, JRI, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no. 1040/RD/21 dated 7th June, 2021. **PGTSC Comment:** • TACE is an already established treatment modality. Why another study? • Risk is not reasonable has been declared in the proforma. Please check this. • Involvement of Vulnerable Participant-Not mentioned in proforma. • Conflict in the number mentioned in the form (100) and in the proforma (32). Please check. • Risks have not been explained in the consent. TACE will have risks of failed embolization, bleeding, hematoma etc. These must be mentioned. • Check boxes in the proforma are not ticked. Please correct in ICF. • Direct identifiers and Completely Anonymized are both ticked. Please correct in Privacy & confidentiality. • Provisions for Medical / Psychosocial Support-Not mentioned • Provisions for Treatment of Study-related injuries-Not mentioned • Provision for Compensation-Not mentioned • The study has eight co-supervisors besides one supervisor. Please mention the role of

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	each supervisor in the project or curtail the number of names. **PGTSC Decision:** Approval subject to modification ***Ref. code: IV PGTSC-IIA/P38***
39.	Research proposal entitled ***"Utility of lung ultrasono.graphy in the evaluation of ≤34 weeks preterm neonates admitted in a neonatal intensive care unit with clinical suspicion of respiratory distress syndrome within 12 hours of birth"*** submitted by Dr. Shivendra Rai, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no.1096/Ped/21 dated 8th May, 2021. **PGTSC Comment:** • 'No' has been ticked in response to 'Reasonable risk' question in form. • Involvement of Vulnerable Participants-Not mentioned • Voluntary, Non-coercive Recruitment of Participants-Not mentioned • Voluntary, Non-coercive Recruitment of Participants-Not mentioned • Direct identifiers and completely anonymized are both ticked **PGTSC Decision:** Approval subject to modification ***Ref. code: IV PGTSC-IIA/P39***
40.	Research proposal entitled ***"Effect of dexmedetomidine on elevated blood pressure inside operation theatre: A randomized controlled trial"*** submitted by Dr. Rahul Kumar, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/469/21 dated 15th June, 2021. **PGTSC Comment:** • Is it a trial? How will blinding be done? What are two groups? What will be compared between the two groups? • The title labels the study as a 'Trial', but no permission has been sought from DCGI/CTRI. • Dexmedetomidine has already been studied, and its effects proven. Why this study? • Reasonable risk question is answered as 'No' • Both the arms of the study are getting the drug under study? Is the role of drug being assessed or is its dose being studied? • Consent section in the form mentions 'Healthy Volunteers'. Please check • Direct identifiers and completely anonymized are both ticked. Please check

Institutional Ethics Committee Meeting,

OFFICE OF THE ETHICS COMMITTEE

Administrative Block

Minutes of 111th ECM held on 18th September, 2021

(Registration No.:ECR/262/Inst/UP/2013/RR-19)

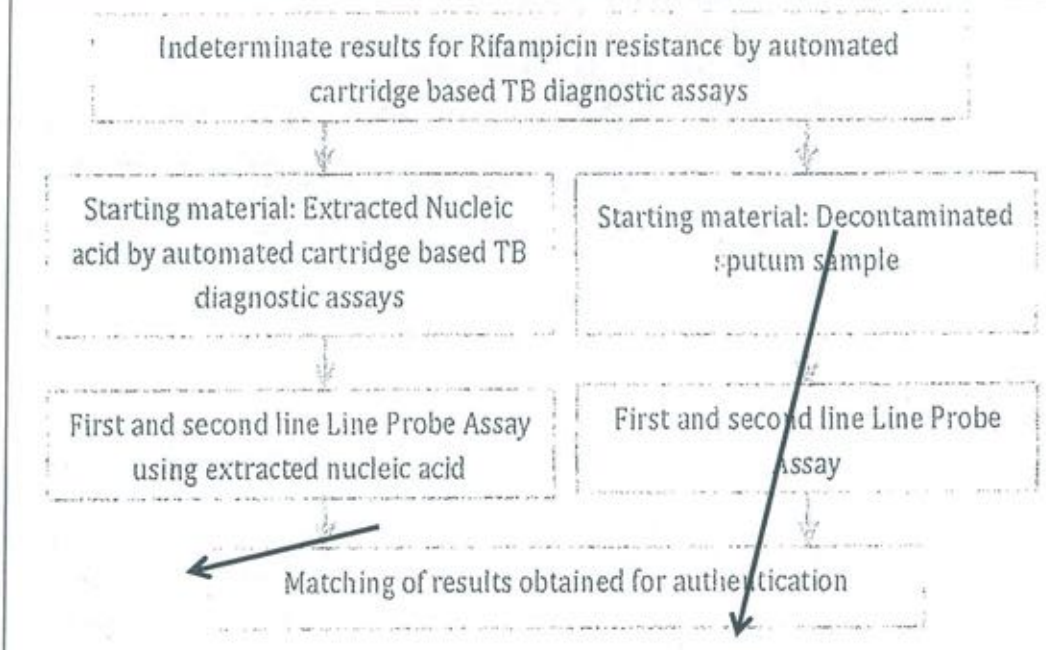
Minutes of 111th Institutional Ethics Committee Meeting ***virtually*** held on **18th September, 2021** from 10.30 AM.

The following members were present in its Meeting:

1.	Prof. Alok Dhawan	-Chairman
2.	Prof. G.G. Agarwal	-Member
3.	Prof. Shubha R Phadke	-Member
4.	Mrs. Akansha Dubey	-Member
5.	Mr. Ujjawal Krishna	-Member
6.	Dr. Akash Agarwal	-Member
7.	Dr. K.K. Yadav	-Member
8.	Prof. A.A. Mahdi	-Member
9.	Prof. Rajednra Nath	-Member
10.	Prof. Anupam Mishra	-Member
11.	Prof. Anita Rani Singh	-Member
12.	Dr. D.N. Upadhyaya	-Member
13.	Prof. Shally Awasthi	-Member-Secretary, IEC

The following Member could not attend the Meeting:

1. Mrs. Vasundhara Kumar- the Network was not available at her site.



(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

IA	Action taken
1-	Clarification of research proposal entitled "***Interpretation of indeterminate results of automated cartridge based TB diagnostic assays by line probe assay utilizing the already extracted nucleic acid***" submitted by Dr. Parul Jain, Assistant Professor, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 551/2021 dated 22nd July, 2021. **Previous EC Comment:** • Some fields of form are not filled out: Section 5 (vi), (vii) • Aim and objective 1 are same: need to correct it. • What is the current standard of testing and treatment for samples that are indeterminate for resistance to Rifampicin? • Will your objective 1 change or modify treatment? a. If yes: you will need patient consent b. If no: what is the utility of this study • What NAAT will be used? From our little understanding, DNA cannot be extracted from cartridge based automated TB assays, only a report is generated. Please shed some light on this.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

- Matching results: How? What if discordant?
- Where does this decontaminated sputum come from? Is it stored? Will storing lead to any changes in the quality of specimen for purpose of results?
- What are the end points?
- Is the LPA a one-time purchase or does it need reagents/ consumables. If the latter, needs a source of funding.
- Sample size calculation is based not only on the prevalence of the condition, but also end points.
- For objective 2, needs a separate sample size calculation.
- Similarly, need to define endpoints for objective 2.
- What statistical tests will be used- Instant Prism software will not itself choose the test to be used, investigator has to decide.

The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Recommendation of Primary reviewer: • 1-Before embarking on Objective a-It will be prudent to do a study of objective b-If DNA quality is found to be good, then objective 1 should be evaluated. 2-How will discordance between the two techniques be measured? Is there any objective scale or subjective assessment will be done? 3- Sample size calculation for Objective 1 and statistics don't seem to be correct. What one needs to measure are the sensitivity and specificity of the new test with respect to the standard. • Needs consultation from statistician to get a proper sample size and analysis. Cannot be accepted in current form. **EC Comment:** • Response from Principal-Investigator is not received, therefore decision is pending. ***Ref. code: 108th ECM IIA/P11***
2-	Clarification of the research proposal entitled ***"To evaluate the role of RBP 4 as pediatric acute liver failure prognostic biomarker"*** sponsored by CSIR submitted by Dr. Sanjeev Kumar Verma, Associate Professor, Department of Pediatrics, King George's Medical University U.P., Lucknow vide letter no.1951/Ped/2021 dated 6th August, 2021. **Previous EC Comment:** • The aim is to study the biomarker as a prognostic tool. However, nowhere in the proposal, any reference to the prognosis of ALF has been made. • Why include a control group in this study? • No statistical plan has been given. • Flowchart is incomplete • Inclusion criteria: How will the fact that 'PT-INR >2 is of hepatic origin' will be ascertained? • Sec 5: Why include "institutionalized" subjects? • Sec 6: Why use direct identifiers? • Sec 7 is left blank, needs to be completed. • Sec 10: If risk is not reasonable to anticipated benefit, why do the study?

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Blank fields in benefit section need to be filled. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer by 13th September, 2021:** 1. Statistical plan is not elaborated: **"appropriate parametric and non-parametric test will be done"** is not a statistical plan. 2. Despite pointing out earlier, researchers have not explained the reason why a control group is being used. 3. The Primary objective is not reflecting the title of the study. 4. Secondary objective is not reflecting in the title of the study. **EC Comment:** • Response from Principal-Investigator is not received, therefore decision is pending. ***Ref. code: 109th ECM IIA/P2***
3-	Clarification of research proposal entitled **"*Operative management of early gallbladder cancer (OMEGA)-an analysis of management and outcomes in gallbladder cancer surgery*"** submitted by Prof. Abhinav Arun Sonkar, Head, Department of General Surgery, King George's Medical University U.P., Lucknow vide letter no.1556/21 dated 25th August, 2021. **Previous EC Comment:** • The proposed study seems to be interesting and important. • It consists of prospective as well as retrospective study design. • The outcome variables for both the designs should be identified separately. They have mentioned these to be in Appendix I, but this is missing. • It would be helpful if research hypotheses for both parts should be stated clearly in terms of the terms of variables and associated parameters. It would be required for sample size calculations also. • The Sample size is mentioned to be 2500. How this figure is achieved? • Unless proper hypotheses are defined, the appropriate statistical analysis can not be performed. • Several study centers shall be involved, so multi-centric considerations have to be taken into accountant every stage including statistical analysis. The analysis procedures shall be different for retrospective and prospective designs.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The statistical analysis section should be rewritten in view of above comments. • The patient information sheet is not attached. • Who will be funding the study? • Give a list of collaborators from Institute uptil date. • Kindly follow National guidelines for date sharing. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 109th ECM IIA/P3***
4-	Clarification of research proposal entitled ***"Feasibility of truenat assay in detecting mycobacterium tuberculosis in stool, gastric aspirate and extrapulmonary samples"*** sponsored by ICMR, New Delhi submitted by Dr. Parul Jain, Assistant Professor, Department of Microbiology, King George's Medical University U.P., Lucknow vide letter no.896/21 dated 18th September, 2021. **Previous EC Comment:** • Budget- Rs 31,45,800 (Breakup –not mentioned)-From ICMR-New Delhi • Patient information sheet-submitted only English version (Hindi version missing) • Study design mentioned as Experimental? what type of experimental-details not mentioned • ICF- ICF-English attached but Guardian and Assent form missing-ICF-Hindi-Incomplete. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** • Assent form-ICF (for children above 8 years) still not attached separately. **Action taken:** As above **EC Decision:** Approved ***Ref. code: 109th ECM IIA/P5***
5-	Clarification of research proposal entitled ***"Covid associated Mucormycosis in India, a case control investigation at the Department of Microbiology, KGMU, Lucknow"***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

submitted by Prof. Prashant Gupta, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter dated 10th September, 2021.

The above proposal forwarded to Primary reviewers, for review

Previous EC Comment:

- The study is recruiting 4 times control subjects as compared to cases. Since there is a decline of covid positive cases it may be difficult to get required number of controls. Therefore, a modification in the criterion for control subjects can be considered

Previous EC Decision: Approved

The above comment forwarded to the P.I., Reply given by P.I. vide letter dated 10th September, 2021:

Response of the PI:

- Controls would be recruited retrospectively from the Department of Medicine.

EC Decision: Approved

Ref.Code 110th ECM IB/P1

Clarification of research proposal entitled ***"Assessment of the 4 month moxifloxacin containing daily regimen in the treatment of microbiologically confirmed new pulmonary tuberculosis patients"*** submitted by Prof. Rajiv Garg, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 2045/21 dated 24th August, 2021.

Previous EC Comment:

- In cover letter, the P.I. has ticked it is multinational, kindly correct it.

Previous EC Decision: Approved

The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.

Recommendation of Primary reviewer: Approved

EC Decision: Approved

Ref.Code 110th ECM IB/P4

Clarification of research proposal entitled ***"Correlation of last rectal effluent color and quality of bowel preparation: A prospective, cross-sectional, observational study"*** submitted by Dr. Ajay Kumar Patwa, Additional Professor, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no.1775/MED/2021 dated

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	1st September, 2021. **Previous EC Comment:** • It is prospective, cross-sectional, observational study. Controls are not described and exclusion criteria also not mentioned for subjects. In data collection it is mentioned that contact details of subjects were recorded, it seems as if the study has already been conducted. It needs to be corrected. **Recommendation of Primary reviewer:** Pending **EC Comment:** Recruitment to be done after date of approval. **EC Decision:** Approved ***Ref. code: 110th ECM IIA/P4***
8.	Clarification of research proposal entitled "***A study to assess the compulsive buying behavior and its association with emotional distress, depression and impulsiveness among general population***" submitted by Mrs. Sudha Mishra, Assistant Professor, Department of KGMU College of Nursing, King George's Medical University, U.P., Lucknow vide letter no.1446/X-51/2021 dated 25th August, 2021. **Previous EC Comment:** • Role of PI and Co-PIs are the same. Please edit. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved **EC Decision:** Approval ratified ***Ref. code: 110th ECM IIA/P7***
9.	Clarification of research proposal entitled "***A cross-sectional study of Mental Health of Women in North India***" sponsored by National Commission for Women; Government of India. submitted by Prof. Vivek Agarwal, Head, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no.1239/Psy/2021 dated 28th August, 2021.

(Shully Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Previous EC Comment:

- Scientific review Committee has only three members.
- There are five (5) Co-PI Role of PI are the same as in the proforma. Please justify.

The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.

Recommendation of Primary reviewer:

- The Research proposal still has five Co-PIs, Two from the Department of Community Medicine and three from the Department of Psychiatry. Their roles as mentioned in the attached document are also overlapping. It is strongly suggested to decrease the number of Co-PIs or mention their UNIQUE roles in the study. **Need modification**

Action taken: As above

EC Decision: Response from P.I. is not received, therefore decision is pending.

Ref. code: 110th ECM IIA/P8

10. Clarification of research proposal entitled **"*Cutaneous manifestations of mucormycosis during the current severe acute respiratory syndrome coronavirus 2 (SARS-COV-2) pandemic: A retrospective study*"** submitted by Prof. Swastika Suvirya, Principal Investigator, Head, Department of Dermatology, Venereology and Leprosy, King George's Medical University, U.P., Lucknow vide letter no.167/SKIN/2021 dated 26th August, 2021.

Previous EC Comment:

- This is a retrospective study based on mucormycosis in Covid patients. One of the primary objectives of the study is to identify and classification of cutaneous mucormycosis for early diagnosis and management. But it is not explained how a retrospective study can fulfill this objective.
- Study settings are not well defined like subjects will be recruited from outdoor services or indoor services?
- For inclusion criteria- It has mentioned in the proposal that the established diagnosis of the mucormycosis will be included in the study. But which method will be considered for establishing diagnosis eg. mucrobiologically proven

(Shully Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	mucormycosis or radiologically suspected or both is not clearly mentioned in the proposal. Moreover, the status of RT PCR is also not mentioned- whether it is during active infection or during post covid period. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved **EC Decision:** Approval ratified ***Ref. code: 110th ECM IIA/P15***
11.	Clarification of research Protocol no.PreQuest-01 entitled ***"Prospective, multi-centric, single arm post marketing surveillance of PRISTINE, everolimus eluting cobalt chromium coronary stent system to assess its continued safety and efficacy"*** sponsored by Relisys Medicine Devices Ltd. submitted by Prof. Pravesh Vishwakarma, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 1778/Cardio/Res/2021 dated 1st September 2021. **Previous EC Comment:** • Sample size not given in protocol separately and not calculated • Synopsis summary not given As above ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **Action taken:** Provisionally approved **EC Decision:** Defer for the next Meeting because quorum is incomplete. ***Ref. code: 110th ECMIIC/P1***
12.	Clarification of the modification of Research protocol no. ATLAS-A/B entitled ***"A phase 3 study to evaluate the efficacy and safety of fitusiran in patients with hemophilia A or B, without inhibitory antibodies to factor VIII or IX"*** sponsored by M/s Bajaj Allianz Generali Insurance Co Ltd. Ltd. submitted by Dr. S.P. Verma, Associate Professor, Department of Clinical Hematology, King George's Medical University U.P., Lucknow vide letter no.693/CH/21 dated 25th August, 2021.

(Shully Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Previous EC Comment:

- Is the study continuing?
- In what doses is the drug being given?
- Kindly provide updated information from KGMU site

The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.

Recommendation of Primary reviewer: As I understand the study is complete and closes on 31st August, 2021. That's ok.

Action taken: Provisionally approved

EC Decision: Defer for the next Meeting because quorum is incomplete.

Ref.code:90th ECMIIC/P2

13. Clarification of modification of research proposal entitled ***"Digoxin in patients with rheumatic heart disease- a randomized placebo controlled trial"*** submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no.1774/Cardi/Res/21 dated 1st September, 2021.

Previous EC Comment:

- This project was already approved in 2020 and is now re-submitted with some additions/Clarifications of some procedural details regarding the systems for web-based randomization, data entry, study drug management, SAE reporting and overall trial management. In addition this version has already been approved by AIIMS IEC.
- The rationale of this study is to measure in relatively younger RHD patients, the role (including mortality) of inexpensive digoxin that otherwise is known for its mortality in older patients non-valvular AF.
- The % of SAE for interim analysis to stop trial has been decided as 50% primary outcomes i.e. 180 deaths.
- Since compensation will be included for a mishap, such point should be mentioned in informed consent document as well

The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.

Recommendation of Primary reviewer: Approved

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Action taken: Provisionally approved **EC Decision:** Approval ratified ***Ref.code:102nd ECMIIA/P24***
IIA	**New Proposal**
1.	Research proposal entitled ***"Impact of institutional refresher course on clinical skills for nurses on knowledge among staff nurses working in Government sector"*** submitted by Mrs. Rashmi P John, Principal Investigator, Assistant Professor, Department of KGMU College of Nursing, King George's Medical University, U.P., Lucknow vide letter no.1215/X.51/2021 dated 16th July, 2021. **EC Comment:** • As the title says the objective of the proposal says appears to assess the impact of institutional refresher course on clinical skills for nurses on knowledge among staff nurses working in Government sector. However, at the end of background it is written, ' the researcher planned to assess and endeavors to provide a platform for the nurses of GM & AH to refresh and upgrade their knowledge and skills with the aim to improve patient care'. This is entirely different than the one mentioned in the title. • There is no information about the 'Institutional refresher course'. As the covid is here for last more than one and half year many courses might have already been done. • The information sheet for the participants mentions 'patients' while the participants are not patients. • The information provided for answers like 'Why I have been chosen' etc. is very poorly written. • Such types of recourse and post course evaluations are good to study the impact of the training courses and improve the course. But the post course evaluation need to have good questions which will really evaluate the change. The some questions in the evaluation are too preliminary and include body temp of the human beings, respiratory rate, O2 flow rate for nasal canula. These are the basic things any nursing staff [or even nursing student] need to know. Unless the questionnaire is designed to assess higher level of clinical skills / knowledge and need to be based on the course content; there will not be assessment of the impact of the refresher course. • Though the title says government hospitals, the study is to include KGMU

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	nursing staff only. • Due to the lacunae in the questionnaire and study design, the information pamphlet, the proposal is not recommended. • The Hindi translation of the title is also clumsy. • Type of Study-give study design • There is a conflict of interest is there as PI is Principal of Nursing staff • There should be participant information sheet/nor patient information sheet. • Clarify Why the participant has to be chosen. • Hindi translation in appropriate. • There is a dissociate between title and objective. • Post test questionnaire has to be validated for content & construct. **EC Decision:** Modify and re-submit (Tracking changes in word format) ***Ref. code: 111th ECM IIA/P1***
2.	Research proposal entitled ***"Maternal near miss review (MNM-R) and corrective measures at selected tertiary level Hospitals in India"*** sponsored by ICMR, New Delhi submitted by Prof. Uma Singh, Head, Department of Obstetrics & Gynaecology, King George's Medical University, U.P., Lucknow vide letter no.197/HRRC/2021 dated 15th July, 2021. **EC Decision:** Approved ***Dr. Shally Awasthi did not take part in the discussion & making decision.*** ***Ref. code: 111th ECM IIA/P2***
3.	Research proposal entitled ***"Risk for disease severity of COVID-19 infection among pregnant women and their neonates during and beyond neonatal period: A prospective cohort study"*** sponsored by ICMR submitted by Prof. Uma Singh, Head, Department of Obstetrics & Gynaecology, King George's Medical University, U.P., Lucknow vide letter no.198/HRRC/2021 dated 15th July, 2021. **EC Decision:** Approved ***Dr. Shally Awasthi did not take part in the discussion & making decision.*** ***Ref. code: 111th ECM IIA/P3***
4.	Research proposal entitled ***"Impact of COVID 19 pandemic on paediatric musculoskeletal trauma patients admitted in a tertiary care centre"*** submitted by Dr. Vikas Verma, Associate Professor, Department of Paediatric Orthopaedic, King George's Medical University, U.P., Lucknow vide letter no.993/Paed.Ortho/2021 dated 17th July, 2021.

(Alok Dhawan)
Chairman, IEC

	an implant which will be considered as standard or gold standard for comparison. **EC Decision:** Modify and re-submit (Tracking changes in word format) ***Ref. code: 111th ECM IIA/P9***
10.	Research proposal entitled "***Magnetic resonance imaging in rhino-orbital-cerebral mucormycosis- an imaging experience from tertiary care center in North India***" submitted by Dr. Amit Kumar Verma, Assistant Professor, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no.1235/RD/2021 dated 11th August, 2021. **EC Comment:** • Consent form is not up to mark, Hindi & English are not similar. • This is a retrospective study-needs clarification as how does ICD fit into this picture. On one hand investigators indicate that ICD 'was obtained' while on the other hand they state that "the patients will be informed about the risks of the contrast agent": Please clarify. • On one hand the investigators intend to follow the patients clinically but no account of clinical data collection is mentioned. How will it be possible to follow up the patients in a retrospective study-will retrospective clinical data be also collected? Please clarify. • It would be further nice if the review of literature focuses more upon the known MRI findings in ROCM and the data collection to mention more about anticipated MRI features along with their assessment. **EC Decision:** Modify and re-submit (Tracking changes in word format) ***Ref. code: 111th ECM IIA/P10***
11.	Research proposal entitled "***Baseline data generation of time period from admission to discharge, of the admitted patients of oral and maxillofacial surgery as one of the quality indicators for quality control purposes: An observational study***" submitted by Dr. Arunesh Kumar Tiwari, Associate Professor, Department of Oral and Maxillofacial Surgery, King George's Medical University, U.P., Lucknow vide letter no.392/OMFS/2021 dated 8th July, 2021. **EC Comment:** • The methodology states that a set-proforma will be given to the patient to fill in the details further supplemented by the doctor on duty in case if any confusion. • a) Kindly enclose that set-proforma

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• If the patient is supposed fill in the proforma primarily then-Many aspects such as retrieval of reports, familiarity of referencing system may not be possible for a less educated patient to understand and hence it may produce a bias. So the data collection is to be done primarily by the doctor supplemented by the patient's inputs and not visa versa under such circumstances. This needs clarification. **EC Decision:** Modify and re-submit (Tracking changes in word format) ***Ref. code: 111th ECM IIA/P11***
12.	Research proposal entitled ***"Assessment of impact of different factors as a risk for mucormycosis pathogenesis in COVID times: A case series analysis"*** submitted by Dr. Shefali Gautam, Associate Professor, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no.Anaes/683/2021 dated 5th August, 2021. **Primary reviewer recommendation:** • Incomplete Performa. • Methodology details not provided • Sample size calculations not given • It is not clear if the study will be performed on patients or just medical records/data will be retrieved and analyzed. **EC Comment:** As above **EC Decision:** Modify and re-submit (Tracking changes in word format) ***Ref. code: 111th ECM IIA/P12***
13.	Research proposal entitled ***"The incidence of plate removal in maxillofacial trauma patients: A retrospective study"*** submitted by Dr. Arunesh Kumar Tiwari, Associate Professor, Department of Oral and Maxillofacial Surgery, King George's Medical University, U.P., Lucknow vide letter no.394/OMF/2021 dated 8th July, 2021. **Primary reviewer recommendation:** • Is this a project or a paper? • Materials & Methods/Results/Discussion/Conclusions are given. • No details provided about the study. • Materials and methods section is sketchy. **EC Comment:** As above **EC Decision:** Modify and re-submit (Tracking changes in word format)

Chairman, IEC

	dated 18th June, 2021. **Recommendation of Primary reviewer:** • 1 Supervisor and 2 co-supervisors from the same department. Please define their roles or decrease their number. • IEC forms lack in the following sections – a. Privacy and Confidentiality b. Use of biologic material not mentioned c. Consent details not ticked d. Risk is mentioned as not reasonable e. Adverse events are ticked. • Contact person details not present in Informed Consent **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification ***Ref. code: V PGTSC-IIA/P29***
30.	Research proposal entitled ***"Clinicopathological study of non haematological paediatric tumors"*** submitted by Dr. Rohit Singh, JRI, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no.2819/21 dated 17th June, 2021. **Recommendation of Primary reviewer:** • 1 supervisor and 4 co-supervisors are from the same department. Please reduce the number or mention each one's unique contribution. • Following sections in IEC form are incorrect/unfilled/erroneous – a. Privacy and confidentiality b. Use of biological material c. details of Consent d. Risks and Benefits. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification ***Ref. code: V PGTSC-IIA/P30***
31.	Research proposal entitled ***"A fluoroscopic comparison between video laryngoscope***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	and macintosh laryngoscope for assessment of cervical spine mobility during tracheal intubation in patients with cervical spine injury" submitted by Dr. Muthunagarathinam. M, JR-I, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/489/21 dated 18th June, 2021. **Recommendation of Primary reviewer:** • 1 Supervisor and 3 co-supervisors from the same department. Please decrease the number or mention their unique roles. • Sponsor information incorrect • Vulnerable/Special groups not ticked in IEC form. • Privacy/Confidentiality section filled incorrectly. • Use of biological material not filled. • Details of Consent not filled in IEC form. • Risk is mentioned as not reasonable. • Benefits of Video laryngoscopy are already known. Why this study? • Conventional laryngoscopy in patients with cervical spine injury increases the risk of further trauma. Having Video laryngoscopy which is less risky and still doing laryngoscopy with a technique which is risky, will be UNETHICAL. Suggest this study be conducted in patients who may not be at risk of spinal trauma. • Informed consent doesn't mention details of complications due to spine movement and due to fluoroscopy usage. **PGTSC Comment:** • As above **PGTSC Decision:** Not approved ***Ref. code: V PGTSC-IIA/P31***
32.	Research proposal entitled ***"Outcome of patients with blunt trauma chest and possible risk factors affecting mortality in critical care unit"*** submitted by Dr. Neetu Pal, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/500/21 dated 21st June, 2021. **Recommendation of Primary reviewer:** • 1 supervisor and 2 co-supervisors are from the same department. Please define their unique roles or decrease their number.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Sponsor information incorrectly filled. • Please modify and resubmit. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification ***Ref. code: V PGTSC-IIA/P32***
33.	Research proposal entitled ***"Accuracy of wilson's score and intubation prediction score for prediction of difficult intubation: gender-wise comparative, observational study"*** submitted by Dr. Vinay Bhadouria, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/499/21 dated 21st June, 2021. **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approved ***Ref. code: V PGTSC-IIA/P33***
34.	Research proposal entitled ***"To compare the effect of immediately loaded and delayed loaded implant on bone loss and inflammatory biomarkers"*** submitted by Dr. Akanksha Gautam, JRI, Department of Prosthodontics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no.103/21 dated 2nd July, 2021. **Recommendation of Primary reviewer:** • DRC has only 4 members. • 3 Co-PIs are from the same department. They have overlapping roles. Please decrease the number of co-PIs. • PI has filled the 'Clinical Trials' section of the IEC forms. If this is not a Trial this mistake may be corrected. **PGTSC Comment:** • As above **PGTSC Decision:** Revise & Re-submit (Tracking changes in word format) ***Ref. code: V PGTSC-IIA/P34***
35.	Research proposal entitled ***"Assessment of salivary and serum interleukin 1β levels in precancerous and healthy individuals using enzyme linked immunosorbent assay: an observational study"*** submitted by Dr. Thamarai Salvan. T, JRI, Department of Oral Medicine and Radiology, Faculty of Dental Sciences, King George's Medical

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	University, U.P., Lucknow vide letter no.550/OMS/21 dated 21st December, 2020. **Recommendation of Primary reviewer:** • 1 Supervisor and 4 supervisors from same department is superfluous. Please decrease the number or define their unique roles. • It is unclear from the IEC form who will bear the financial burned of the ELISA test? If the patient is being asked to bear this burden, is it a test which would be done routinely in all patients or is it being done only for the purposes of this project? In case the latter is true, the financial burden must lie with the investigator and not the patient. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification ***Ref. code: V PGTSC-IIA/P35***
36.	Research proposal entitled ***"Effect of epidural dexmedetomidine and fentanyl infusion for postoperative analgesia in patients undergoingupper abdominal surgeries: A randomized double blind study"*** submitted by Dr. Jaideep. P, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. 550/OMS/21 dated 21st June, 2021. **Recommendation of Primary reviewer:** • 1 supervisor and 3 co-supervisors. Please decrease the number of co-PIs or define their unique roles in the study, there are several overlapping roles. • Inclusion criteria is age 18-65 years but IEC form mentions Vulnerable population of Children as part of the study. Please clarify and correct. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification ***Ref. code: V PGTSC-IIA/P36***
37.	Research proposal entitled ***"Study of relationship between olfactory dysfunction and cognitive impairment in elderly patients with diabetes mellitus: A cross-sectional study"*** submitted by Dr. Porimita Chutia, JRI, Department of Geriatric Mental Health, King George's Medical University, U.P., Lucknow vide letter no.1055/DGMH/21 dated 2nd July, 2021. **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approved

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Ref. code: V PGTSC-IIA/P37
38.	Research proposal entitled ***"A randomized trial to compare decompressive hemicraniectomy versus adjuvant basal cisternostomy in traumatic brain injury cases in a tertiary care center in India"*** submitted by Dr. Sarita Kumari, SRI, Department of Neurosurgery, King George's Medical University, U.P., Lucknow vide letter no.332/21 dated 2nd July, 2021. **Recommendation of Primary reviewer:** • Please substitute the work 'Trial' with 'Study' in your topic. • There are 7 co-PIs from the same department. This is unacceptable. Please decrease the number of co-PIs and define their individual, UNIQUE roles. Their present roles are overlapping. • The study includes seriously ill patients which are a type of Vulnerable subjects. Please make appropriate changes in the IEC form. • If basal cisternostomy has been shown to have a beneficial effect on decompressing the ICP, not offering TBI patients this option to save their lives will be UNETHICAL. Thus, the PI is condemning the patients without basal cisternostomy to a poorer result than those who have had it. This is against human rights to be offered a treatment which is known to have inferior results. **PGTSC Comment:** • As above **PGTSC Decision:** Not approved
	Ref. code: V PGTSC-IIA/P38
39. 	U.P., Lucknow vide letter no. 594/OMFS/2021 dated 8th October, 2021. **Previous EC Comment:** • 1-Section 5: This project is an in-vitro study: what is the need for subjects? • 2. Section 5: Many vulnerable subjects have been ticked: why? • Section 6: Privacy statement: not checked • Section 7: Organs and body fluids are being used: wrongly checked. • Section 8: All studies involving patient recruitment need a patient information sheet. • Section 8: Who administers the consent? • Section 10: Give details of interim data analysis points. • Biopsy is an invasive procedure: can have complications, can't be risk free. • Consent form and patient information sheet should be separate. • Why will oral cancer cell lines be used? The study is of OSMF, not cancer. • Objectives: Procurement of buccal mucosa cannot be an objective, at least for this study. • Please provide the Ayurvedic Text which tells about areca nut causing OSF. • Please provide itemized budget. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Pending ***Ref. code: 107th ECM II B-Ph.D/P1***
2.	Clarification of research proposal entitled "***Biosurveillance for spillover of henipaviruses and filoviruses in rural communities in India***" sponsored by Eco Health Alliance, United States submitted by Prof. Amita Jain, Head, Department of Microbiology, King George's Medical University U.P., Lucknow vide letter nos.427/2021 dated 22nd June, 2021, 792/2021 dated 1st September, 2021 and 854/2021 dated 11th September, 2021. **Action taken:** Provisionally approved **EC Comment:** Provisionally approved (ICMR – HMSC approval awaited) ***Ref. code: 108th ECM IIA/P2***
3.	Clarification of research proposal entitled "***To evaluate the role of RBP 4 as pediatric acute liver failure prognostic biomarker***" sponsored by CSIR submitted by Dr. Sanjeev Kumar Verma, Associate Professor, Department of Pediatrics, King George's Medical University U.P., Lucknow vide letter no.2146/Ped/2021 dated 11th October, 2021. **Previous EC Comment:** • The aim is to study the biomarker as a prognostic tool. However, nowhere in the proposal, any reference to the prognosis of ALF has been made. • Why include a control group in this study?

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• No statistical plan has been given. • Flowchart is incomplete • Inclusion criteria: How will the fact that 'PT-INR >2 is of hepatic origin' will be ascertained? • Sec 5: Why include "institutionalized" subjects? • Sec 6: Why use direct identifiers? • Sec 7 is left blank, needs to be completed. • Sec10: If risk is not reasonable to anticipated benefit, why do the study? • Blank fields in benefit section need to be filled. ***Recommendation of Primary reviewer:*** Pending ***Ref. code: 109th ECM IIA/P2***
4-	Clarification of research proposal entitled "***An ambispective study of hemophagocytic lymphohistiocytosis in COVID-19***" submitted by Dr. Geeta Yadav, Associate Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no.3192/21 dated 15th September, 2021. **Previous EC Comment:** • Consent waiver for retrospective patients has been mentioned but no consent waiver form is attached for consideration. • Few points in annexure are incomplete: need completion • Informed consent document should be more patient friendly such as in sections of purpose. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **EC Decision:** Approved ***Ref. code: 110th ECM IIA/P1***
5. Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Primary reviewer. ***Recommendation of Primary reviewer:*** Provisionally approved **EC Decision:** Approved ***Ref. code: 110th ECM IIA/P8***
6.	Clarification of research proposal entitled "***Profile of orbital involvement in COVID associated mucormycosis: A tertiary health care center experience***" submitted by Prof. Apjit Kaur Chhabra, Head, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no.669/OPH/21 dated 13th September, 2021. **Previous EC Comment:** • Profile of orbital involvement in covid associated mucormycosis: a tertiary health care centre experience' • The researchers intend to study the profile of orbital involvement in patients with covid associated mucor mycosis in KGMU. • Is it a Prospective study? Will they include cases admitted earlier also (retrospective)? Will the closed cases [died or cured] include? • As per the proposal the researchers will be enrolling only new cases. This should be confirmed. • The evaluation and management will be done as per the institute protocol and hence, there are no ethics related issues. • Is purpose same as objective of the study? • APPROVED with the confirmation about enrolment limited to only new cases. • Scientific review to be done in the Department. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 110th ECM IIA/P11***
7.	Clarification of research proposal entitled "***Outcome of transcutaneous retrobulbar amphotericin B (TRAMB) in COVID-19 associated rhino-orbito-cerebral (ROCM) mucormycosis***" submitted by Prof. Apjit Kaur, Head, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no.677/OPH/21 dated 13th September, 2021. **Previous EC Decision:** • This project has a great overlap with the previous project by the same PI.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The PI need to clarify what is different from the previous project on the same area and the similar aspect of the disease in concern. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** With following comments:- • The response that the project is an important subset of the other study does not justify separate existence of this study. • Also the following answer in the reply is intriguing and makes one wonder about the necessity of the study. Both the sentences are contradictory to each other. • What the reply say, 'The current study has taken into consideration the application and outcome of the specific modality of treatment [TRAMB] which has proven effective in the scientific literature'. ***The above comment forwarded to the P.I., Reply has not given by P.I.*** **EC Decision:** Approved ***Ref. code: 110th ECM IIA/P12***
8.	Clarification of research proposal entitled "***Serum ferritin as a biochemical marker of severity for orbital disease in COVID associated mucormycosis***" submitted by Prof. Apjit Kaur, Head, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no. 710/OPH/21 dated 22nd September, 2021. **Previous EC Comment:** • Residents can't be co-investigators. • Innumerable deficiencies in Ethics form: a few are pointed below:- What is the meaning of "self" in budget: is patients paying of himself/herself Section 5: Incomplete Section 6: all have been ticked Section 7: Isn't blood a body fluid? • There is no methodology section ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Pending ***Ref. code: 110th ECM IIA/P13***
9.	Clarification of research proposal entitled "***Substance abuse and mental health issue among the LGBT community in India: A study of inter-relationship between mental health disorders and stress, coping, perceived social support, occupation and religiosity***" sponsored by National Human Right's Commission, New Delhi submitted by Prof. Vivek Agarwal, Head, Department of Psychiatry, King George's Medical

	University, U.P., Lucknow vide letter no. 1374/Psy/21 dated 20th September, 2021. **Previous EC Decision:** • This seems to be an interesting and very ambitious study as they are trying to cover whole country. • In this particular study, study design and sampling methods are very important. • There is no mention of type of study design used. • Theoretical population (population for generalization), study population (accessible population) and sampling frame are to be properly defined. • What are the variables and parameters? • Which sampling method is to be used (Simple random sampling, stratified random sampling, cluster sampling etc.)? • For stratified sampling, different non-overlapping groups are to be defined. • There is mention of purposive sampling. This is nonprobabilty sampling. The nonprobability samples cannot depend upon the rationale of probability theory. There will be problem in using the statistical theory (e.g. finding confidence intervals, testing of hypotheses etc.). • If it is a multi-centric study, all the prerequisite have to be followed. • The sample size calculation is not clear. Since variables and parameters are not defined. • Are the instruments used are gold-standard? ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **EC Decision:** Approved ***Ref. code: 110th ECM IIA/P17***
10.	Clarification of research proposal entitled "***Assess job satisfaction in nurses and its correlation with experience of working in the COVID-19 Hospital***" submitted by Dr. Suchana Roy Bhowmik, Assistant Professor, Department of KGMU College of Nursing, King George's Medical University, U.P., Lucknow vide letter no. 1691/Y.PF/21 dated 21st September, 2021. **Previous EC Decision:** • There is mention of objectives, research question and hypotheses? It should be replaced by objectives and associated research hypotheses? There should be a main objective and the rest can be secondary objectives. • The sampling method is purposive. This is nonprobability sampling. • The nonprobability sample nay not depend upon the rationale of probability

(Shally Awasthi)

(Alok Dhawan)
Chairman, IEC

	theory. There will be problem in using the statistical theory (e.g. finding confidence intervals, testing of hypotheses etc.). • There will be problem in generalization (external validity) also. A threat to external validity is an explanation of how you might be wrong in making a generalization. For instance, you conclude that the results of your study (which was done in a specific place, with certain types of people, and at a specific time) can be generalized to another context (for instance, another place, with slightly different people, at a slightly later time). • The sample size calculations and statistical analysis methods are not clear, since the variables and parameters used in the study are not exclusively defined. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Provisionally approved **EC Decision:** Approved ***Ref. code: 110th ECM IIA/P18***
11.	Clarification of research Protocol entitled "***Impact of COVID-19 on heart failure hospitalization and outcome in India-A Cardiological society of India study (CSI-HF in COVID-19 times study-"The COVID C-HF study)***" sponsored by Cardiological Society of India submitted Dr. Sharad Chandra, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no.1786/Cardio/Res/2021 dated 9th September, 2021. **Previous EC Comment:** • Few entries on page 6 of annexure are incomplete • As per the annexure only oral consent will be obtained (instead of written consent): what is the role of attached informed consent document? Will it be electronically mailed to the participant for signature or will just act as a guide for clarification? • Study timelines dating before March 2021 may be revised ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved ***Ref. code: 110th ECMIIA/P20***
12.	Clarification of research proposal entitled "***Effect of dietary modification and physical activity on blood glucose level of pregnant women with gestational diabetes mellitus: an interventional study***" sponsored by ICMR submitted by Dr. Mallicka, Ph.D Scholar 2019 under the guidance Prof. Jamal Masood, Head, Department of Community Medicine, King George's Medical University, U.P., Lucknow vide letter no.706/CM/21

	dated 5th October, 2021. **Previous EC Decision:** • Sample size calculations – not important for Ethics committee • There will be two groups. Group II will get diet plan according to sample meal plan as given in guidelines prescribed by Government of India. Group I cannot be deprived of this management protocol which is approved by government operational guidelines. Also the counseling has to be provided to all women with gestational diabetes as it is an important part of management. • As diet and physical activity are important parts of approved management such two groups with one group deprived of approved management cannot be done. • THE STUDY NOT APPROVE IN THIS FORM. • In addition there are many limitations in the scientific part of the study about documenting and verifying the compliance for the dietary and exercise advices, etc. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **EC Decision:** Approved ***Ref. code: 110th ECM II B-Ph.D/P2***
13.	Clarification of research proposal entitled "***Metagenomics approach in forensic science for human identification among North Indians***" submitted by Mr. Sangram Sandhu, Ph.D Scholar 2019 under the guidance Prof. Pooran Chand, Head, Department of Prosthodontics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no.387/21 dated 18th September, 2021. **Previous EC Comment:** • It is a multicentric study. Subjects will be recruited at KGMU and DNA extraction and other laboratory work will be done at Birbal Sahni Institute but in the proposal it has been mentioned as a single centre study. • The role of the Ph.D. scholar is not defined in the proposal. His name is neither in PI nor Co-PI list. • Mr. Sangram Sandhu's biodata and role in work has to be defined. • Ethical approval from B.S.I has to be taken. • How will the dental guides give scientific inputs for this work which is on metagenomics? ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **EC Decision:** Approved ***Ref. code: 110th ECM II B-Ph.D/P4***
14.	Clarification of research proposal entitled "***Efficacy of dietary intervention of flax seeds (Linum usitatissimum) on signs and symptoms associated with perimenopausal***

(Shally Awasthi)
Member-Secretary, IEC

Chairman, IEC

	syndrome*"** submitted by Ms. Rashmi Shrivastava, Ph.D Scholar, under the guidance Prof. Sunita Tiwari, Head, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no.2655/PHY/21 dated 7th October, 2021. **Previous EC Comment:** • What is the budget and who is the sponsor • Is it alright to test herbal remedies by Allopathic Physicians • Section 5: Subject participation, type of subjects needs correction • Section 8: Elements need to check. If not ticked, mention reason CRF not included. • CRF not included **Methodology:** • There are no references. Has any such study ever been done? If not, how can you do a RCT as the first study? • It's a RCT: Mention all the elements of RCT • Inclusion criteria: Who have not used Vitamin from when to when? • Questionnaire: Where has the questionnaire been validated, in which language? • Sample size calculation: What is the effect size? ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer. **Recommendation of Primary reviewer:** Pending ***Ref. code: 110th ECM II B-Ph.D/P5***
15.	Clarification of research proposal entitled **"*Estimation of hearing deficits following critical illness in patients discharged from intensive care unit*"** submitted by Dr. Sai Saran, Assistant Professor, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no.389/2021 dated 12th October, 2021. **Previous EC Comment:** • There is a serious risk of overestimation of hearing deficits in this study as small deficits may not be reported/observed/record in people outside hospital who have not had an audiometry on a pervious occasion. How do the investigators plan to take care of this? • Statistical analysis: Univariate and multivariable analysis should be included to identify risk factors. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Pending ***Ref. code: 111th ECM IIA/P6***
16.	Clarification of research proposal entitled **"*Detection of biofilm forming microbes having effect on gastrointestinal tract (GIT) infections and their control using plant extract*"** submitted by Prof. Prashant Gupta, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no.1070/21 dated 4th October, 2021.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Previous EC Comment: • Kindly provide CTRI registration, New Medical devices, Insurance. • In the proposal the methods for sample collections are mentioned as stool, rectal swab and gastric biopsy of the patients suffering from diarrhea suggestive of gastrointestinal infections. Included population contains children and elderly too. Will gastric biopsy be done solely for the study or there will be some clinical indication for gastric biopsy and samples will be taken simultaneously? ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **EC Decision:** Approved ***Ref. code: 111th ECM IIA/P8***
17.	Clarification of research proposal entitled "***Baseline data generation of time period from admission to discharge, of the admitted patients of oral and maxillofacial surgery as one of the quality indicators for quality control purposes: An observational study***" submitted by Dr. Arunesh Kumar Tiwari, Associate Professor, Department of Oral and Maxillofacial Surgery, King George's Medical University, U.P., Lucknow vide letter no.591/OMFS/21 dated 7th October, 2021. **Previous EC Comment:** • The methodology states that a set-proforma will be given to the patient to fill in the details further supplemented by the doctor on duty in case if any confusion. • a) Kindly enclose that set-proforma • If the patient is supposed fill in the proforma primarily then-Many aspects such as retrieval of reports, familiarity of referencing system may not be possible for a less educated patient to understand and hence it may produce a bias. So the data collection is to be done primarily by the doctor supplemented by the patient's inputs and not visa versa under such circumstances. This needs clarification. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **Action taken:** Provisionally approved **EC Decision:** Approved ***Ref. code: 111th ECM IIA/P11***
18.	Clarification of proposal entitled "***Assessment of impact of different factors as a risk for mucormycosis pathogenesis in COVID times: A case series analysis***" submitted by Dr. Shefali Gautam, Associate Professor, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no.Anaes/854/21 dated 9th October, 2021. **Previous EC Comment:**

(Shally Awasthi)

I-	ADR of research protocol no. INVICTUS: entitled ***"Investigation of rheumatic AF Treatment using vitamin K antagonists, rivaroxaban or aspirin studies"*** M/s Gilead Sciences Inc submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 1692/Cardio/Res/2021 dated 19th July, 2021, 1791/Cardio/Res dated 16th September, 2021, 1792/Cardio/Res/2021 dated 16th September, 2021.
a	**Death** **Subject ID no. 010-0003** **Subject Initial:** S-T **Gender:** F **Age:** 41 years **Patient enrolled date:** 12th July, 2017 **Patient follow up under study:** 1st Month, 6th Month, 12th Month and every 6th Month till 5 year **Weight:** 58 KG **Height:** 155 CM **Subject History:** On 19th July, 2021 the P.I. informed to the Ethics Committee that 2nd scheduled follow-up call was made on 12th July, 2021 around 12:30 P.M. Subject's (Patient) LAR revealed that she passed away on 24th February, 2021 around 3:00 P.M. in the hospital emergency KGMU. She did her morning activity and then felt syncope, breathlessness and chest pain for which she was taken to the hospital but could not admitted and expired in the hospital premises, hence no documents are available. No autopsy was done. **Primary reviewer recommendation:** SAE (Death) seems to be due to disease outcome (RHD with severe MS/severe MR with mild AR) as patient was enrolled in INVECTUS Registry treatment arm (given intervention in the form of rivaroxaban) and completed all scheduled visits except last three visits from July 2021. As told by LAR to PI that Pts felt syncope, breathlessness and chest pain and taken to local hospital where she died in hospital premises on 24th

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

b	February, 2021 prior to admission. **ADR sub Committee Decision:** • Causal relationship cannot be established as death occurred at hospital premises, prior to admission, therefore no documents are available and no autopsy was done. **Subject ID no. 010-0032** **Subject Initial:** V-L **Gender:** F **Age:** 55 years **Patient enrolled date:** 25th January, 2018 **Patient follow up under study:** 1st Month, 6th Month, 12th Month and every 6th Month till 5 year **Weight:** 50 KG **Height:** 160 CM **Subject History:** According to the P.I. many times tried to contact the patient but her phone was not reachable. On 16th Aug, 2021 the call was received by her LAR, who revealed that patient passed away on 13th April, 2021 around 4.00 PM at home. She developed breathlessness, fever and chest pain for that a local practitioner called at home and confirmed about death. She was not hospitalized anywhere, hence no documents are available. No autopsy was done. **Primary reviewer recommendation:** SAE (Death) seems to be due to disease outcome (RHD, severe MS /AS with CVR) and not due to intervention as patient was enrolled almost 3 ½ years back in invasive (VKA) arm. Patient developed breathlessness, fever and chest pain and for which local practitioner was called at home who declared her dead on 13-04-2021. Causal relationship cannot be established as she was declared dead by local practitioner at her home and was not hospitalized anywhere therefore no hospital records/ documents are available and no autopsy was done. (Documents shows that patient had completed up to 36th month visits (i.e. at 1st month,

(Alok Dhawan)
Chairman, IEC

	practitioner and he referred subject to KGMU. On the way to the hospital, he expired and could not be hospitalized anywhere, hence no documents are available. No autopsy was done. ***Recommendation of Primary reviewer:*** SAE (Death) seems to be due to disease outcome (Rheumatic Heart Disease, severe MR/Mod. MS, PAH and AF) and not due to intervention as patient was enrolled more than 2 years back in invasive (VKA-Warfarin) arm. Patient developed breathlessness, fever and chest pain and for which he was taken to some local practitioner and he referred the subject to KGMU. On the way to the hospital he expired and could not be hospitalized anywhere and died. Causal relationship cannot be established as he died on the way to the hospital and could not be hospitalized anywhere, therefore no hospital records / documents are available and no autopsy was done. (Documents shows that patient had completed up to 18th month visits i.e. at 1st month, 6th m , 12th m , 18th m and planning for 24th m visit after randomization.) **ADR sub Committee Decision:** Causal relationship cannot be established as he died on the way to the hospital. He was not hospitalized anywhere therefore no hospital records/ documents are available and no autopsy was done. ***Ref. code: 83rd ECM IIC/P6***
II	**Other Matter**
1-	ADR of research protocol no. INVICTUS: entitled ***"Investigation of rheumatic AF Treatment using vitamin K antagonists, rivaroxaban or aspirin studies"*** M/s Gilead Sciences Inc submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow With reference to the above trial it was noticed by ADR Sub Committee that 32 deaths have occurred out of 102 subjects recruited at KGMU. A concern was raised by the IEC members on the numbers of deaths reported in this trial. It was recommended that an opinion of a competent Cardiologist in RML/SGPIMS be taken by the Ethics Committee -Member Secretary.

(Alok Dhawan)
Chairman, IEC

	editions of AJCC staging system in oral cancer patients*"** submitted by Dr. Sudhir Singh, Professor Jr. Grade, Department of Radiotherapy, King George's Medical University, U.P., Lucknow vide letter no.560/RT/21 dated 23rd July, 2021 & 8th September, 2021. **Recommendation of both Primary reviewers:** • It is stated that 2 staging system proposed by AJCC will be compared on the data available in the records of the department of oral cancer patients. But the aims and objectives and title itself is not able to clearly state the purpose of study. • The study is involving data related to Humans. It has to be stated in the proforma that no patient will be contacted for any question stated in the proforma and that no patient will be contacted for any end point acertainment. Because it has not been stated anywhere even in inclusion criteria that patient record for which end point information is in record only those will be study participants. • No justification for sample size is given. • Proforma is not able to explain violation of human rights. • Proforma not justified for waiver • The ethical committee review may be waived for this study as the study is a retrospective study involving data collected for another purpose. **EC Decision:** Approved for waiver of informed consent with the above caveats ***Ref. code: 112th ECM IB/P1
II-A	**New Proposal**
1.	Research proposal entitled ***"Pan India epidemiological, virological and genomic surveillance for Human influenza and COVID-19 through DHR-ICMR VRDL network"*** sponsored by DHR-ICMR submitted by Dr. Suruchi Shukla, Assistant Professor, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no.708/2021 dated 18th August, 2021. **EC Comment:** • Risk and benefits: • There **is** physical risk/discomfort • It is more than minimal risk • There is **no** benefit to the subject • What is the definition of "self collected specimens" • What is the definition of "sentinel sites" • Sample size: Will diagnosed SARS CoV-2 patients be enrolled also (this is with reference to statement: in addition to ILI definition……) • Broadened case definition: Tuberculosis can present with more than 2 criteria. Body ache, headache, feverishness are common symptoms of patients of various

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	diseases: Malaria, Dengue, etc. Needs to be modified. • Children (2m-5yrs): is this the definition of ILI/SARI- please clarify • Oseltamivir: • Is it required to do a susceptibility test for osetamivir in patients with Influenza A before prescribing to patients? • Statistical plan and sample size justification is not given. • Patient information document: • 6. Will the sample be taken from only one of the sites or both. Consent form says 'or' but research protocol mentions 'and'. • Which report will be sent to the physician, when and for what purpose. How will it affect treatment protocol? • 17. Which test results will be communicated? • Hindi version of the patient information sheet doesn't have a description of what will be done. • Many fields are missing, which are present in the English version. **EC Decision:** Modify and re-submit (Tracking changes in word format). Also submit a point wise response to the comments of EC in a tabular form. ***Ref. code: 112th ECM IIA/P1***
2.	Research proposal entitled "***To evaluate effects of antenatal maternal antibiotics exposure on neonatal outcomes-A prospective observational study***" sponsored by Nurturing Children's Development Program Scholarship submitted by Dr. Arpita Bhriguvanshi, Associate Professor, Department of Pediatrics, King George's Medical University, U.P., Lucknow vide letter no. 2010/Ped/2021 dated 16th August, 2021. ***Recommendation of Primary reviewer:*** Approved **EC Decision:** Approved ***Ref. code: 112th ECM IIA/P2***
3.	Research proposal entitled "***Calcium & Vitamin-D deficiency in children: Design & Validation of questionnaire to assess knowledge, attitude & practices of parents***" submitted by Dr. Suresh Chand, Assistant Professor, Department of Paediatric Oethopadics, King George's Medical University, U.P., Lucknow vide letter no.1106/Ped Ortho/2021 dated 9th September, 2021. ***Recommendation of Primary reviewer:-*** • 1 PI and 4 Co-PIs from the same department are unacceptable for a research proposal which involves only questionnaire administration to 30 volunteers. • Please decrease the same for approval. **EC Comment:** As above **EC Decision:** Modify and re-submit (Tracking changes in word format). Also submit a point wise response to the comments of EC in a tabular form. ***Ref. code: 112th ECM IIA/P3***

Recommendation of Primary reviewer:

- Item [5 vi] – Vulnerable subjects - NOT MENTIONED
- Item [5vii] – Special groups – Mentioned yes. Which special groups - clarify.
- Item [10 i] – Is the risk reasonable compared to the anticipated benefit? Answer is NO. Clarify.
- Item [3 iv] – Is it an investigational new drug? Answer is YES. Which is the new drug?
- Page 7 – What is FDC? [Fixed drug combination] – NOT GIVEN IN ABBREVATIONS
- Nowhere in the protocol the dose is used. Only the formulation of the FDC is given.
- PATIENT INFORMATION DOCUMENT
- In general the information document is big and cluttered. I need to be made more simple.
- Use of the word 'Intracameral' should be avoided. Information should be simple.
- What does phase IV trial means should be clarified. The previous data should be

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	given in simple form. What is the other option has not been given. What is the use of this drug in the surgery has not been given. • The information regarding research, study design and study procedure can be combined in two –three paragraphs. Results of previous studies done should be given. It should be clarified that the drug is marketed and it is a postmarketing survey as I understand by phase IV trial. • Some other expert need to see the part related to financial compensation. • Hindi translation should be simplified and easy speaking hindi need to be used. • With these modifications the trial can be approved. • CTRA registration is pending; **EC Decision:** Modify and re-submit (Tracking changes in word format), Also tabular format. Also submit a point wise response to the comments of EC in a tabular form. ***Ref. code: 112th ECMIIC/P1***

I-A	**Action taken**
1-	Clarification of the research proposal entitled ***"Childhood trauma experiences, mentalized affectivity, empathy and experiential avoidance in adults with dissociative disorders"*** submitted by Dr. Gunjan Joshi, II year under the guidance of Dr. Shweta Singh, Additional Professor, Department of Psychiatry, King George's Medical University U.P., Lucknow vide letter no.1319/Psy dated 10th September, 2021. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Previous PGTSC Comment:** • Remove patient identifiers from case record form **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: 107th ECM IIB M.Phil/P7***
2-	Clarification of the research proposal entitled ***"To study the correlation of MTR (A919G) and MTHFR (C677T) gene with endometriosis in women of reproductive age group"*** submitted by Dr. Suman, JRI, Department of Obstetrics & Gynaecology King George's Medical University U.P., Lucknow vide letter no. OG/1330/2021 dated 12th August, 2021. **Previous PGTSC Comment:** • Introduction is a poor cut-paste job. Argument for the need of the study needs to be made. • Need for a control group needs to be argued. • Is it a case-control study or an observational study? Is any intervention being done? These need to be looked into and amended. • In Privacy/Confidentiality section of Thesis Proforma the researcher has ticked both 'Direct Identifiers' as well as 'Completely Anonymized'. This needs correction

(Shally Awasthi)

It is a comparative study involving two groups. Accordingly, study design should be defined. There are no sample size calculations. Statistical Analysis section is very general and is not in line with the objective of the study. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: III PGTSC-IIA/P7***
4-	Clarification of the research proposal entitled ***"Clinical predictors of neuroimaging findings in patients with subacute sclerosing panencephalitis- ZA prospective evaluation"*** submitted by Dr. Keerthiraj D.B, SRI, Department of Neurology, King George's Medical University, U.P., Lucknow vide letter no. 250/NEURO/21 dated 7th September, 2021. **Previous PGTSC Comment:** • Kindly provide justification for not calculating or providing sample size. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: III PGTSC-IIA/P16***
5.	Clarification of the research proposal entitled ***"Evaluation of changes in ultrasonographic optic nerve sheath diameter as a useful point of care tool to supplement invasive intracranial pressure measurement in Paediatric patients with hydrocephalus undergoing neurosurgical intervention"*** submitted by Dr. Malika Dhawal, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/440/21 dated 20th September, 2021. **Previous PGTSC Comment:** • **Suggest changing the title:**

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Ultrasonographic evaluation of changes in optic nerve sheath diameter as a useful point of care tool to supplement invasive intracranial pressure measurement in pediatric patents with hydrocephalus undergoing neurosurgical intervention" • Subject selection, Privacy and Confidentiality and Consent Sections of Proforma incompletely filled. • No co-supervisor/Co-PI from Radiology Department is there. Who will do the ultrasound? Does the person doing the ultrasound? Does the person doing the ultrasound have PCPNDT registration? • According to the PI, ONSD is already an established method of detecting raised intracranial pressure. What is the rationale behind this study then?? What is the research question? Also, please mention role of each member of the team of researchers. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: III PGTSC-IIA/P33***
6.	Clarification of the research proposal entitled ***"Clinical and radiographic assessment of the efficacy of three different materials used as pulpotomy medicaments in primary teeth: A randomized control trial"*** sponsored by Research Cell, KGMU UP, Lucknow submitted by Dr. Gunna Madhuri, JRII, through his Mentor Prof. Afro Alam Ansari, Department of Paediatric and Preventive Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. Pedo/689/21 dated 18th September, 2021. **Previous PGTSC Comment:** • The Principal-Investigator mentions that there is risk to the patients, but there are no plans for reporting of adverse events or provision of compensation. This is probably a mistake in filling the proforma. Please have it checked and edited. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: IIIPGTSC-II B IMR-R/P2***
7-	Clarification of the research proposal entitled ***"Proliferative and anti-apoptotic indices of ameloblastoma and odontogenic keratocyst"*** submitted by Dr. Eram Khan, JRI, Department of Oral Pathology and Microbiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 193/OP/21 dated 3rd September, 2021. **Previous PGTSC Comment:**

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The study design sample size calculation, methodology etc. need to be specified ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: IV PGTSC-IIA/P5***
8-	Clarification of the research proposal entitled ***"Expression pattern of muc1 and muc4 in (OPMD) oral premalignant disorders and oral squamous cell carcinoma (OSCC) and normal oral mucosa in an attempt to analyze its role played in oral carcinogenesis"*** submitted by Dr. Sharon John, JRI, Department of Oral Pathology and Microbiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 192/OP/21 dated 3rd September, 2021. **Primary reviewer recommendation:** • Study design, sample size calculation are not mentioned, the aims & objectives do not match with Material and methods. In material & method, the three groups are selected. Co-guide from Microbiology is needed. • Work distribution of Dr. Suaib Luqman, Principal-Scientist (CSIR-CIMAP) not mentioned. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** **Recommendation of Primary reviewer:** Approved **PGTSC Decision:** Approval ratified ***Ref. code: V PGTSC-IIA/P46***
18.	Clarification of research proposal entitled ***"Assessment of salivary and serum interleukin 1β levels in precancerous and healthy individuals using enzyme linked immunosorbent assay: an observational study"*** submitted by Dr. Thamarai Salvan. T, JRI, Department of Oral Medicine and Radiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no.544/OMS/21 dated 1st October, 2021. **Previous PGTSC Comment:** • 1 Supervisor and 4 supervisors from same department is superfluous. Please decrease the number or define their unique roles. • It is unclear from the IEC form who will bear the financial burned of the ELISA test? If the patient is being asked to bear this burden, is it a test which would be done routinely in all patients or is it being done only for the purposes of this project? In case the latter is true, the financial burden must lie with the investigator and not the patient.

(Alok Dhawan)
Chairman, IEC

	Recommendation of primary reviewer: The fundamentals of performing RCT are not completely Specified: (a) Clinical Trial Registry (b) Research hypothesis is not properly defined. Here four groups are being compared. (c)The hypothesis should be defined in terms of the parameters of these four groups. (d)The randomization procedure is to be explicitly written for sampling into four groups. (e)The sample size will depend on the proper hypothesis. At present, it is inappropriate. (f)Statistical Analysis section should be rewritten according to the proper research hypotheses being tested. **PGTSC Decision:** Modify and re-submit (Tracking changes in word format). Also submit a point wise response to the comments of EC in a tabular form. ***Ref. code: VI PGTSC-IIA/P6***
7.	Research proposal entitled ***"In vivo comparison of remineralization potential of three varnishes on with spot lesion-randomized clinical trial"*** submitted by Dr. Dipika Yadav, JRI, Department of Paediatric & Preventive Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no.526/21 dated 6th July, 2021. **Recommendation of primary reviewer:** The fundamentals of performing RCT are not completely Specified: (a) Clinical Trial Registry (b) Research hypothesis is not properly defined. Here three groups are being compared. (c)The hypothesis should be defined in terms of the parameters of these three groups. (d)The randomization procedure is to be explicitly written for sampling into three groups. (e)The sample size will depend on the proper hypothesis. At present, it is inappropriate. (f)Statistical Analysis section should be rewritten according to the proper research hypotheses being tested. ANOVA as well as multiple comparison tests will be required. **PGTSC Decision:** Modify and re-submit (Tracking changes in word format). Also submit a point wise response to the comments of EC in a tabular form. ***Ref. code: VI PGTSC-IIA/P7***

Institutional Ethics Committee Meeting,

OFFICE OF THE ETHICS COMMITTEE

Administrative Block

Minutes of 113th ECM held on 4th December, 2021

(Registration No.: ECR/262/Inst/UP/2013/RR-19)

Minutes of the Institutional Ethics Committee Meeting *virtually* held on **4th December, 2021 from 10.30 AM.**

The following Members were present in the Meeting:-

1. Prof. Alok Dhawan -Chairman
2. Prof. G.G. Agarwal -Member
3. Prof. Shubha R Phadke -Member
4. Mrs. Vasundhara Kumar -Member
5. Mrs. Akansha Dubey -Member
6. Mr. Ujjawal Krishna -Member
7. Dr. Akash Agarwal -Member
8. Dr. K.K. Yadav -Member
9. Prof. A.A. Mahdi -Member
10. Prof. Rajendra Nath -Member
11. Prof. Anupam Mishra -Member
12. Prof. Shally Awasthi -Member-Secretary, IEC

The following Member could not attend the Meeting:

1. Prof. Anita Rani Singh - Sent her written comment
2. Dr. D.N. Upadhyaya - Sent his written comment

I-A	Action taken
1.	Clarification of research proposal entitled "***Molecular and metabolic profiling of obstructive sleep apnea in North Indian population***" submitted by Mr. Mohit, Ph.D Scholar 2018 under the guidance Prof. Pooran Chand, Head, Department of Prosthodontics, Faculty of Dental Sciences, K.G's Medical University, U.P., Lucknow letter no. 725/2021 dated 22nd October, 2021. ***The following comment forwarded to the P.I., Reply given by P.I. in tabular format was reviewed by the Primary reviewer.***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Sl.no.	EC Comment	EC Decision		
1-	Justify role of each guide		**Name and affiliation**	**Role justification**
		Guide	Prof. Pooran Chand, Head, Deptt. of Ptosthodontics, KGMU UP, Lucknow	Guidance, planning and execution. OPD clinical parameters. Sample collection & processing. Data analysis and interpretation. Review of progress of Ph.D. work.
		Co-Guide	Prof. Raghuwal Dayal Singh, Deptt. of Ptosthodontics, KGMU UP, Lucknow	Sample collection, Data analysis and interpretation. Review of progress of Ph.D. work.
		Co-Guide	Prof. Sumit Kumar Jurel, Deptt. of Ptosthodontics, KGMU UP, Lucknow	Sample collection, Data analysis and interpretation. Review of progress of Ph.D work.
		Co-Guide	Dr. Ashutosh Shrivastava, Associate Professor, Deptt. of CFAR, KGMU UP, Lucknow	As is a basic scientist and will help in the molecular biology experiments and metabolomics studies. Review of progress of PhD. work.
2	How will north Indian population be defined?	Any patients regardless of geographical location who shows up in the OPD-KGMU will be considered. This study no longer restricted to north Indian population, we have revised Ph.D. topic that now read as ***"Metabolomics and gene expression analysis to understand the severity of obstructive sleep apnea"***. Amendment letter signed by all the doctoral committee members is		

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

			attached for your kind consideration.
	3	**Methodology** Needs to be elaborated with flow chart.	Flow chart attached
	4	**What are those "following criteria"** for subject collection?	The following criteria for subject collection are below: Patients visiting OPD of Prosthodintics and Crown & bridge and refer patients from other departments i.e., Respiratory, Pulmonary and ENT will be screened for OSA following questionnaire and Plysomnography. The patient will comprise of those who attend Dental O.P.D. An informed consent will be taken from the patients. The study is scheduled to begin only after obtaining Ethical Committee clearance. **Inclusion Criteria:** • Clinically confirmed and diagnosed OSA patients. • Willing to participate in the study. • Subjects who will be available on the day of examination. **Exclusion Criteria:** • Unwilling or unable to perform testing procedure. • Past or current smoking history • Medical condition (Uncontrolled and serious patients including cardiovascular disease, chronic pulmonary disease, diabetes, endocrinologic disease, chronic renal failure and psychiatric disease) • Systemic inflammatory conditions (system lupus erythematosus, rtheumatoid arthritis, sarcoidosis, Crohn's disease and ulcerative colitis)

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		• Enrolled in other trials in the study period. • Other sleep disorders.
5	Need refinement and all criteria to be consolidated at one place.	**Inclusion Criteria:** • Clinically confirmed and diagnosed OSA patients. • Willing to participate in the study • Subjects who will be available on the day of examination.
6	**Control arm** Mention the source of controls?	Healthy volunteers with free of OSA based history and other medical conditions will be included.
7	What will be the consent procedure for controls and specially for obtaining the blood sample?	Taking part in this study is voluntary. All the samples from healthy volunteers will be collected after obtaining informed consent form as same as the case.
8	**ICF:** Study procedure section of informed consent document should be more understandable to the patients BUT study procedure section of informed consent document should be elaborated.	We appreciate the reviewer's comments. We have now elaborated the study procedure. To identify the molecular based biomarker in plasma samples of obstructive sleep apnea with the held of gas chromatography/mass spectromemetry and Real time-PCR technique.
9-	Include and Investigator form Respiratory from Respiratory Medicine.	Dr. R.A.S. Kushwaha, Professor, Department of Respiratory Medicine, KGMU is already in doctoral committee as an internal expert. (DC letter attached) and he is actively involved in subject's recruitments and selection.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	10-	Give budget & Source of funding.	The expected budget for the proposed study is around 2-3 lakhs. Mr. Mohit (Ph.D.Scholar) is recipient of a Senior Research Fellowship with contingency grant from the Indian Council of Medical Research, Government of India (Fellowship ID: 2020-3690)

Recommendation of primary reviewer: Provisionally Approved

EC Comment:

- Sample to be collected after the date of approval of protocol of EC

EC Decision: Approved

Ref. code: 107th ECM II B-Ph.D/P2

2. Clarification of research proposal entitled "***Pediatric thyroid nodules: A multi-institutional study from India***" submitted by Dr. Chanchal Rana, Associate Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 3315/2021 dated 18th October, 2021.

The following comment forwarded to the P.I., Reply given by P.I. in tabular format was reviewed by the Primary reviewer.

Previous EC Comment	Response
It is a retrospective cohort study, for patients undergoing fine needle aspiration cytological assessment. Incomplete Perform, sample size not mentioned.	This study is a retrospective descriptive/audit study, where the data will be collected from the departmental archives of the three institutes (KGMU, SGPGI and AIIMS) which will be analyzed under pediatric and adult category followed by statistical comparison between the two. No other procedure/staining/IHC etc will be performed. It is purely a descriptive study related to data collection followed by statistical analysis. The final sample size will depend upon the data collected, but we expect it to be around 4000-5000 cases of thyroid.

Recommendation of primary reviewer: Provisionally Approved

EC Decision: Approved

(Alok Dhawan)
Chairman, IEC

In the proposal, study design is given as parallel or split mouth design, case studies for initial testing of new technology followed by RCT with proper randomization, allocation concealment and follow up. There is no mention about an implant which will be considered as standard or gold standard for comparison.	We will use Straumann (bone level, SLA modified) Implant as standard implant for comparison.

Primary reviewer recommendation: Provisionally Approved
EC Decision: Approved

6- Clarification of research proposal entitled "***Magnetic resonance imaging in rhino-orbital-cerebral mucormycosis- an imaging experience from tertiary care center in North India***" submitted by Dr. Amit Kumar Verma, Assistant Professor, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no.40/RD/2021 dated 12th November, 2021.

The above comment forwarded to the P.I., Reply given by P.I. in tabular format was reviewed by the Primary reviewer.

Previous EC Comment	Response
Consent form is not up to mark, Hindi & English are not similar.	Consent forms have been updated in both Hindi and English.
This is a retrospective study-needs clarification as how does ICD fit into this picture. On one hand investigators indicate that ICD 'was obtained' while on the other hand they state that "the patients will be informed about the risks	This study is based on contrast enhanced MRI (CE-MRI) of the PNS, Orbits and Brain. Though this gadolinium based contrast agents helps in better detection f the disease/pathology, there may be some related risks as well. Therefore, as per SOP, all the patients who require a gadolinium based IV contrast are informed about the potential risks related to these agents and they must sign a mandatory informed consent before the study. This is irrespective of whether

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	of the contrast agent": Please clarify.	a patient is enrolled in a study or not. Contrast studies cannot be done for the patients who refused to sign the consent. That is why we have mentioned that all the patients were informed about the contrast related risk and an informed consent document was obtained before the study.
	On one hand the investigators intend to follow the patients clinically but no account of clinical data collection is mentioned. How will it be possible to follow up the patients in a retrospective study-will retrospective clinical data be also collected? Please clarify.	Primary aim of this research is to study the imaging spectrum and disease spread of the rhino-orbital-cerebra mucormycosis (ROCM) using contrast enhanced MRI, therefore the study is primary imaging based. However, a retrospective follow-up based on clinical data will be done for the duration of patients stay in the hospital, i.e. from presentation to discharge. Clinical data related to presenting symptoms, relevant risk factors and comorbidities and surgical procedures outcome will be collected for correlation with the imaging findings.
	It would be further nice if the review of literature focuses more upon the known MRI findings in ROCM and the data collection to mention more about anticipated MRI features along with their assessment.	In respect to the IEC response, review of literature has been updated.
	Primary reviewer recommendation: Provisionally Approved **EC Decision:** Approved ***Ref. code: 111th ECM IIA/P10***	
7-	Clarification of research proposal entitled "***Genetic screening of susceptible loci for type 2 diabetes and gestational diabetes in the North Indian population identified in "Genome-wide association" study***" sponsored by Council of Science & Technology U.P submitted by Ms. Zoya Shakir, Ph.D Scholar 2019 under the guidance Dr. Wahid Ali, Additional Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no.3331/21 dated 20th October, 2021, K.G's Medical University, U.P., Lucknow. ***The above comment forwarded to the P.I., Reply given by P.I. in tabular format was reviewed by the Primary reviewer.***

Previous EC Comment	Response
Risks have been mentioned as unreasonable in the IEC form.	Risk has been mentioned as unreasonable in the IEC form.
Pregnant women are vulnerable subjects. This has not been mentioned in the IEC form.	Yes, pregnant women as vulnerable subjects who is required be mentioned in the IEC form. It is not marked as due to typographical error. I will collect blood samples from pregnant women too for gestational diabetes screening and so it has to be mentioned under a vulnerable category.
Where will the subjects for the control arm are recruited from? If they will be recruited from students/staff, this will have to be mentioned under special groups.	Subject for the control arm will not be recruited from the students/staff. For T2DM screening, controls will be recruited from same OPD of medicine as from where its cases will be taken. Patients will be excluded as control who don't have diabetes and any other major illness like HIV, cancer. For GDM screening, controls will be recruited from same OPD of obstetrics and Gynecology as from where its cases will be taken. Pregnant ladies will be excluded as control that doesn't develop Gestational diabetes during their all three trimesters.

9. Clarification of research proposal entitled "***Circulating miRNAs as predictive biomarkers of coronary heart disease development in type 2 diabetes mellitus patients***" sponsored by MHFW, New Delhi submitted by Mr. Mohd Wamique under the guidance of Dr. D.Himanshu, Additional Professor, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no.2092MED/21 dated 21st October, 2021.

The following comment forwarded to the P.I., Reply given by P.I. in tabular format was reviewed by the Primary reviewer.

Previous EC Comment	Response
Risk is marked as not reasonable in the IEC form	As per the above comment from IEC, risks to subjects are reasonable in relation to anticipated benefits to subjects/community/country. It is marker as not reasonable due to typographical error.
Study is recruiting subject with CAD from Cardiology OPD, yet no Co-PI has been added from Cardiology. It would be prudent to have a Co-PI from Cardiology for the study.	As per the suggestion of IEC we have added Co-PIs Dr. Sharad Chandra from Deptt. of Cardiology, KGMU, Dr. Roopali Khanna from Deptt. of Cardiology, SGPGI for sample collection of heart disease subjects and Dr. Wahid Ali from Deptt. of Pathology, KGMU for clinical tests and diagnosis of disease using laboratory testing of blood.

Recommendation of Primary reviewer: Provisionally Approved
EC Decision: Approved

Chairman, IEC

	1 PI and 4 Co-PIs from the same department are unacceptable for a research proposal which involves only questionnaire administration to 30 volunteers.	I have decreased the Co-PIs.
	Please decrease the same for approval.	As per suggestion of EC, Co-PIs decreased from department.

Recommendation of Primary reviewer: Provisionally Approved
EC Decision: Approved

11. Minutes of **"ADR Sub Committee"** of **"Institutional Ethics Committee"** Meeting *virtually* held on 4th December, 2021 from 10.00 AM. **(DCGI)**

The following Members were present in it's Meeting:-

1. Dr. Alok Dhawan — Chairman
2. Dr. Rajendra Nath — Member
3. Mrs. Akansha Dubey — Member
4. Mrs. Vasundhara Kumari — Member
5. Mr. Ujjawal Krishna — Member
6. Dr. Shally Awasthi — Member-Secretary, IEC

DCGI

I- ADR of research protocol no. INVICTUS: entitled ***"Investigation of rheumatic AF Treatment using vitamin K antagonists, rivaroxaban or aspirin studies"*** M/s Gilead Sciences Inc submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 1869 /Cardio/Res/2021 dated 16th October, 2021.

Death
Subject ID no. 010-0036
Subject Initial: J

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Gender: M **Age:** 26 years **Patient enrolled date:** 31st January, 2018 **Patient follow up under study:** 1st Month, 6th Month, 12th Month and every 6th Month till 5 year **Weight:** 55 KG **Height:** 173 CM **Subject History:** PI's Narrative: Tried many times to contact with the patient but his phone was not reachable. So a letter had been sent at his place but it come back, not received and remarked that recipient passed away. Hence PI did not have any information about the cause of death, date and time of death and the course of event. ***Recommendation of Primary reviewer:*** SAE (Death) is most likely due to disease outcome (RHD/ Sev. MS/ MR, AF with FVR NYHA II) and not due to intervention (Rivaroxaban) as patient was taking VKA from almost 3 year 10 months and completed 36th Month visit without any complaint. Causal relationship can not be established as the letter sent back did not mentioned any history of hospitalization and autopsy, even the exact date of death is not known. ***ADR Sub Committee Decision:*** PI to send a copy of the letter which has not been delivered and returned with a remark that "recipient is dead". **EC Decision:** Noted ***Ref. code: 83rd ECM IIC/P6***
II	ADR of research protocol no. INVICTUS: entitled ***"Investigation of rheumatic AF Treatment using vitamin K antagonists, rivaroxaban or aspirin studies"*** M/s Gilead Sciences Inc submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 1867 /Cardio/Res/2021 dated 16th October, 2021. **<u>Death</u>** **Subject ID no. 010-0070** **Subject Initial:** K-R **Gender:** M **Age:** 38 years **Patient enrolled date:** 25th September, 2018

Chairman, IEC

	Patient follow up under study: 1st Month, 6th Month, 12th Month and every 6th Month till 5 year **Weight:** 46 KG **Height:** 162 CM **Subject History:** PI's Narrative: Tried several times to contact with the patient but his phone was not reachable. So a letter had been sent at his place but it come back, not received and remarked that recipient passed away. Hence PI did not have any information about the cause of death, date and time of death and the course of event. ***Recommendation of Primary reviewer:*** • PI has been unable to contact Subject on his family hence details of SAE are unknown. • Subject completed his 30th Month follow-up and missed the 36th month Follow-up. • Formal report submission to IEC date is 16th August, 2021 on agenda page and 18th October, 2021 on SAE Summary report. ***ADR Sub Committee Decision:*** PI to send a copy of the letter which has not been delivered and returned with a remark that "recipient is dead". **EC Decision:** Noted ***Ref. code: 83rd ECM IIC/P6***
III	Research Protocol no. 0063-17 entitled "***A global, multicenter, three arms, open- label randomized study to evaluate the efficacy and safety of nanosomal docetaxel lipid suspension compared to taxotere® (Docetaxel Injection Concentrate) in triple- negative breast cancer patients with locally advanced or metastatic breast cancer after failure to prior chemotherapy***" sponsored by M/s Lamda Therapeutic Research Pvt. Ltd. submitted by Dr. Sameer Gupta, Department of Surgical Oncology, K.G's Medical University, U.P., Lucknow vide letter no. SONC/027/2021 dated 15th November, 2021. **Death** **Subject ID no. 154-0063-17-09 (N-M)** **Subject Initial:** N-M **Gender:** F **Age:** 51 years **Patient follow up under study:** **Weight:** 153 KG **Height:** 43 CM **Subject History:** On 15th November, 2021 it was informed by the PI that Patient ID no. 154-0063-17-09 (N-M) was dosed on 22nd October, 2021. On 8th day i.e. 30th October, 2021 he was followed

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	up and blood investigations were also done, which were within normal limit. On 6th November, a normal follow-up call was made, which was not received. Again on 10th & 11th November follow-up calls were made. On 12th November again a follow-up call was made which was received by his care giver (Son of patient) and he informed that patient died on 4th November, 2021 around 4:30 AM. Cause of death could not be ascertained. ***Recommendation of Primary reviewer:*** SAE (death) of the patient seems to be due to disease outcome (triple negative breast cancer with metastasis, which generally does not respond to any conventional treatment) causing sudden cardiac arrest and not due to intervention (Nanosomal Docetaxel Lipid Suspension) as patient after receiving the drug was followed on day 8 visit done on 30th Oct., 2021, in which all the blood investigations done as per protocol, were found to be within normal limits and the patient had no complaints. Patient died suddenly at home during sleep on 04th November, 2021 (13 days after intervention) Causal relationship can not be established as death occurred suddenly at home during sleep and no hospitalization and autopsy could be done. ***ADR Sub Committee Decision:*** PI to send a copy of the letter which has not been delivered and returned with a remark that "recipient is dead". **EC Decision:** Noted ***Ref. code: 95th ECM IIC/P4***
II-A	**New Proposal**
1.	Research proposal entitled ***"Effect of COVID-19 pandemic on menstrual health of reproductive age group women"*** submitted by Prof. Nisha Singh, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no.OG/1766/2021 dated 4th October, 2021. **Recommendation of Primary reviewer:** Approved **EC Decision:** Approved ***Ref. code:113th ECM IIA/P1***
2.	Research proposal entitled ***"Integrative molecular profiling of prostate cancer: identification of molecular signature for risk stratification and advanced-stage disease management"*** submitted by Prof. Apul Goel, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no.357/Uro/2021 dated 6th September, 2021. **Recommendation of Primary reviewer:** • It is not clear whether the tumor samples will be taken from the part of biopsy or surgical sample collected as a part of diagnostic or therapeutic procedure or will it need separate surgical intervention? Clarify.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The language of the consent form can be made simple and easy to understand. (It is difficult to understand). **EC Comment:** • Kindly clarify that no separate surgical procedure will be done for collection of specimen. • Make consent form in simple language **EC Decision:** Approval subject to modification, with a table of changes done. ***Ref. code:113th ECM IIA/P2***
3.	Research proposal entitled "***Study of post operative complications and their risk factors in women undergoing caesarean section in a tertiary care setup-A retrospective study***" submitted by Prof. Nisha Singh, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no.OG/1750/2021 dated 30th September, 2021. **Recommendation of Primary reviewer:** • Retrospective data collection. Waiver of consent requested. • Sample size is 86, seems too small. Please justify **EC Comment:** • Clarify if there are controls also. • What is the basis of sample size **EC Decision:** Approval subject to modification ***Ref. code:113th ECM IIA/P3***
4. 			2018
	5.	Patient Informed Consent Form - Hindi language along with translation certificate	Version 1.0 Dated 11/Sep/2021
	6.	Patient Informed Consent Form – Hindi to English (Back Translation) along with back translation certificate.	Version 1.0 Dated 14/Sep/2021
	7.	Patient Diary- English	Version 2.0 dated 03/Sep/2021
	8.	Patient Diary _ Hindi language along with translation certificate	Version 2.0 Dated 11/Sep/2021
	9.	Patient Diary _ Back translated Hindi to English language along with translation certificate	Version 2.0 Dated 14/Sep/2021
	10.	DCGI Approval	Dated 07/Oct/2019
	11.	Recommendation of SEC (Cardio & renal): FDC/MA/19/000025 Pantoprazole Sodium + Aspirin20mg/20mg + (81mg/150mg)Capsules	Dated: 07-09-2021 and 08-09-21
	12.	Declaration regarding Study Insurance	Dated 17/Sep/2021
	13.	Declaration regarding CTRI Registration	Dated 17/Sep/2021
	14.	Declaration regarding Clinical Trial Agreement	Dated 17/Sep/2021
	15.	Declaration regarding CRF	Dated 17/Sep/2021
	16.	Protocol Signature Page (Version 1.0, 03/Dec/2018)	Dated :22/Sep/2021
	17.	Signed Investigator's undertaking	Dated :22/Sep/2021
	18.	Signed CV & MRC of Principal Investigator	Dated :02/Jun/2021

Recommendation of Primary reviewer:

- Only CTA document is attached but without any name or signatures
- CTRI number is pending
- No Hindi version of informed consent is attached while English version of consent form neither mentions the name of investigator not his contact number. These need revision.
- Furthermore it is to be noted that the issue date of DCGI approval is 7th Oct 2019 and since its validity is usually 2 years the PI needs to ensure if it still stands valid (since the duration is not mentioned in the approval letter).

I-A	Action Taken
1	Clarification of research proposal entitled ***"Impact of oil pulling on periodontitis in patients with and without type2 diabetes mellitus-A randomized controlled trial"*** submitted by Dr. Nehil Saran, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 2018//P/21 dated 12th October, 2021. **Previous PGTSC Comment:** • Objectives of studying the efficacy of an Ayurvedic procedure in a modern medicine University by a person not trained in Ayurveda amounts to malpractice. • PI not trained in Ayurvedic sciences, thus cannot act as PI. • The PI and all exact one Co-PIs are not trained in Ayurveda • KGMU is a University imparting training in Modern Medicine. Research in subject pertaining to Ayurveda involving patients will be malpractice. • Patient has to be informed that they are being treated by an Ayurvedic method by a person not trained in Ayurveda. • Research on an Ayurvedic medication/Ayurvedic treatment/procedure cannot be conducted by a person not trained in Ayurvedic sciences and in a non-Ayurvedic University. This amounts to Malpractice. Suggest rethinking of the research topic on a subject from Modern Medicine. • Mention the compensation of oil to be used. • How will the oil be standardized? • Justify the role of Co-PIs. • Include a Doctor Ayush working in KGMU. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** **Approved** **PGTSC Decision:** Approved ***Ref. code: III PGTSC-IIA/P39***
2	Clarification of research proposal entitled ***"A randomized controlled trial to compare ligation of intersphincteric fistula (LIFT) v/s LIFT plus in complex anal fistula"*** submitted by Dr. Shristi Rathore, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1856/21 dated 7th October, 2021. **Previous PGTSC Comment:** • The fundamentals of performing RCT are not specified: Clinical Trial Registry, method of randomization, blinding, follow-up, outcome event, efficacy or effectiveness trial, statistical and methodology. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** **PGTSC Decision:** Approved

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Ref. code: IV PGTSC-IIA/P4
3	Clarification of research proposal entitled ***"To study soluble transferrin receptor level and serum visfatin level in beta thalassemia and iron Deficiency Anemia"*** submitted by Dr. Himadri Shukla, JRI, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter n. 2754/21 dated 7th June, 2021. **Previous PGTSC Comment:** • Define selection criteria for control subjects. • The study title does not address inclusion of patients of Iron deficiency anemia, but objectives of the study state comparison of various parameters between the two. The study topic is not appropriately addressing the objectives so either reconsider the study or modify. • Kindly provide in ICF clear, understandable description of study procedure in simple language instead of writing study design. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** **Comment:** After perusal of the documents and in consideration of the comments of the primary reviewer, the proposal is approved with the title as mentioned here. **PGTSC Decision:** Approved
	Ref. code: IV PGTSC-IIA/P12
4	Clarification of research proposal entitled ***"Histopathological study of liver diseases in unclaimed and claimed dead bodies: A case-control study"*** submitted by Dr. Krishna Nishad, JRI, Department of Forensic Medicine & Toxicology, King George's Medical University, U.P., Lucknow vide letter no. 446/FMT/21 dated 12th October, 2021. **Previous PGTSC Comment:** Consent forms need to be corrected as a legally acceptable representative will be giving the consent and it is mentioned in point no. 2 that "my participation", similarly in the Investigator's statement "subject" is the dead body so it may be deleted. ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** ***Recommendation of Primary reviewer:*** Approved **PGTSC Decision:** Approved
	Ref. code: IV PGTSC-IIA/P30
5	Clarification of research proposal entitled ***"A comparative study of outcome between COVID-19 positive and negative traumatic brain injury patient"*** submitted by Dr. Tripurari Pandey, JRI, Department of Neurosurgery, King George's Medical University, U.P., Lucknow vide letter no. NS/958/21 dated 12th October, 2021. **Primary reviewer recommendation:** • Outcome (Event) should be explicitly defined in terms of the propoer study

3.	Research proposal entitled ***"Prevalence and predictors of persistent pulmonary hypertension of neonates in hospitalised hypoxemic new born infants: A prospective hospital based study"*** submitted by Dr. Barnika Nath, JRI, Department of Pediatrics, King George's Medical University, U.P., Lucknow vide letter no.2094/Ped/21 dated 26th August, 2021. ***Recommendation of Primary reviewer:*** • This is an observational study primarily for finding prevalence of persistent pulmonary hypertension of neonates. • It should not be used for predicting the risk factors. • One use of a cross-sectional study is to determine the association between an outcome variable and some **explanatory variables**, for example to estimate the prevalence of a disease, perhaps as a function of some explanatory variables. An association between outcomes and explanatory variables may suggest causality, although a causal link usually cannot be established from a single cross-sectional survey because such studies give no information on the temporal ordering of possibly causal events. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit, tabulating changes done at the time of revision. ***Ref. code: VII-PGTSC-IIA/P3***
