Minutes of 124th IEC Meeting held on 19th June, 2023

(Registration No.: ECR/262/Inst/UP/2013/RR-19)

Minutes of 124th "Institutional Ethics Committee" Meeting held on 19th June, 2023 from 3.00 P.M. ***virtual.***

The following Members were present in the Meeting:-

1.	Dr. Alok Dhawan	-Chairman
2.	Dr. G.G. Agarwal	-Member
3.	Dr. Akash Agarwal	-Member
4.	Mrs. Vasundhara Kumari	-Member
5.	Mr. Ujjawal Krishna	-Member
6.	Mrs. Akansha Dubey	-Member
7.	Dr. A.A. Mahdi	-Member
8.	Dr. Anupam Mishra	-Member
9.	Dr. Rajendra Nath	-Member
10.	Dr. Nisha Mani Pandey	-Member
11.	Dr. Shally Awasthi	-Member-Secretary, IEC

The following members were not Present in the Meeting:-

1.	Dr. Shubha Phadke	- She has given his written comment
2.	Dr. Anita Rani	- She has given his written comment
3.	Dr. K.K. Yadav	-He has given his written comment
4.	Dr. D.N. Upadhyaya	- He has given his written comment

IA	Action Taken
1-	Clarification of research proposal entitled "***Environmental exposure to toxins and their role in inducing hypothyroidism and infertility in women: A case control study***" sponsored by DHR-HRD, New Delhi submitted by Dr. Saima Amjad under the guidance Prof. A.A Mahdi, Head, Department of Biochemistry, King George's Medical University, U.P., Lucknow vide letter no.nil dated 10th May, 2023.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Previous EC Decision: Approved with partial modification to Change the topic to **"toxicants"** ***The above comment forwarded to the P.I., Reply given by P.I. was reviewed by the Primary reviewer.*** Modified title: ***"Environmental exposure to toxicants and their role in inducing hypothyroidism and infertility in women: A case control study"*** ***Recommendation of Primary reviewer:*** **Decision:** Provisionally approved **EC Decision:** Approved ***Ref. code: 113th ECM II B-YS/P1***
2-	Clarification of research proposal entitled ***"Premature greying of hair in children and adolescents-a case control study analysis of nutritional and biochemical parameters"*** submitted by Dr. Parul Verma, Associate Professor, Department of Dermatology Venerology & Leprosy, King George's Medical University, U.P., Lucknow vide letter no. 98/23 dated 23rd May, 2023. ***Recommendation of Primary reviewer:*** • Patient information sheet to be attached as per SOP • Sample size calculation need to be elaborated step by step • The prospective outcome variables should be briefly mentioned and categorized as continuous and categorical before detailing the analytical method. • Does counting of hairs via hand lens constitute an accepted method (mention reference) or an indigenous way adopted by the investigator? • Since the ICF has to be signed by the parents only, the language has to be modified somewhat. ***The above comment forwarded to the P.I. but reply awaited for.*** Kindly submit the Patient Information Sheet as per SOP 2019. **EC Decision:** Reminder forwarded to PI. ***Ref. code: 117th ECM IIA/P20***
3-	Clarification of research proposal entitled ***"Prospective study on Spectrum of Inhalation burn injury at a tertiary care center and role of prognostic factors and severity predictors in its management"*** submitted by Dr. Sandhya Pandey, Assistant Professor, Department of Plastic & Reconstructive Surgery, King George's Medical University, U.P., Lucknow vide letter no. 546/23 dated 6th May, 2023.

Previous EC Comments	PI response
Which inflammatory marker will be assessed and where they will be assessed by which	Hematological inflammatory markers will be assessed like ESR, reactive protein and Procalcitonin. They will be assessed in

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	method	biochemistry or pathology lab, KGMU by routine blood investigation. (Added in methodology section and shaded yellow)
	Although there are multiple Co-PIs none is from an investigating department.	Since these blood investigations are being done on routine basis for all admitted patients, we are just analyzing them in relation to inhalational burn, hence investigating department was not approached.
	Where the biological parameters like carboxy hemoglobin, and cyanide level will be assessed	Carboxyhemoglobin and levels will be assessed by Arterial blood gas (ABG) analysis in trauma or Gandhi ward. (Added in methodology section and shaded yellow)

The above Comment forwarded to PI was reviewed by Primary reviewer:-
Recommendation of Primary reviewer:
Provisionally Approved
EC Decision: Approved

Ref. code: 117th ECM IIA/P33

4- Clarification of research proposal entitled ***"Use of HBOT for Limb salvageability and limiting the amputation level in electric burn injuries"*** submitted by Dr. Sandhya Pandey, Assistant Professor, Department of Plastic & Reconstructive Surgery, King George's Medical University, U.P., Lucknow vide letter no. 552/23 dated 8th May, 2023.

Previous EC Comment:

- Sample size and study duration not clear.

The above Comment forwarded to PI was reviewed by Primary reviewer:-
Recommendation of Primary reviewer:
Provisionally Approved
EC Decision: Approved

Ref. code: 117th ECM IIA/P34

5- Clarification of research proposal entitled ***"To establish the molecular axis of inflammatory cytokines, circadian genes and their association with notch-1 signaling pathway in the pathogenesis of chronic myeloid leukemia"*** submitted by Ms. Nimra Habib under the guidance Dr. Ranjana Singh, Additional Professor, Department of Biochemistry, King George's Medical University, U.P., Lucknow vide letter no. Bio/2023/169 dated 18th May, 2023.

Previous EC Comments	PI response
Budget not mentioned	Rs. 30,55,500 rupees
No Co-PIs from collaborating (Deptt. of Clinical Hematology) has been included -please justify or include the Co-PI from respective department.	Dr S.P Verma from Clinical Haematology Department.
Inclusion criteria -Age and sex specificity – not mentioned.	Inclusion criteria: Patient both male and female within 18 to 70 years with chronic phase CML will be included in the study and a written consent form will be taken from all the patients.
If control patients will be taken then what will be the Inclusion and exclusion criteria. (In SOP form the PI mentioned that from total 60 pts -30 will be of CML cases and 30 as control)	For healthy Control (30 samples) □ Exclusion criteria: Volunteers with any type of malignancy and disorders will be excluded from the study. □ Inclusion criteria: Healthy volunteers who are willing to give consent from both the sexes within 18 to 70 years of age group will be considered in the study.
Study design not mentioned in Protocol.	STUDY DESIGN: 4 ml blood collection in EDTA vials from Patients of CML and control. Kept in -20°C until further processing of Molecular analysis. Estimation of biochemical parameters and inflammatory cytokines. Cell culture and cell transfection technique. Expression analysis of genes by qRT-PCR. Protein by Western Blot Analysis. Statistical Analysis.
Methodology part not explained well (how grouping will be done) –PI should attach the Flow chart of methodology.	Mentioned in summary and flowchart attached.
Approval letter of Fellowship and information about budget -may be attached.	Attached in the documents.

The above Comment forwarded to PI was reviewed by Primary reviewer:-

6- Clarification of research proposal entitled ***"Etiology of anemia among critically ill obstetric patients admitted to intensive care unit of a tertiary care center"*** submitted by Dr. Armin Ahmed, Associate Professor, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/2023/1434 dated 10th April, 2023.

Previous EC Comment	Previous EC Decision
Hindi translation of the title needs improvement to make it understandable easily.	Hindi title changed in PID and consent forms.
The PID should be for guardian as well as some patients being very seriously ill may not be able to give the consent.	Guardian information sheet added in Hindi and English both.

The reply from PI to the above Comments was forwarded to Primary reviewer:-

Recommendation of Primary reviewer: Provisionally approved

EC Decision: Approved

Ref. code: 118thECM IIA/P23

7- Clarification of research proposal entitled ***"FOxTROT 2 India: pilot randomised trial evaluating neoadjuvant chemotherapy in older and/or frail patients with locally advanced but operable colon cancer"*** submitted by Dr. Shiv Rajan, Associate Professor, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/685/23 dated 11th April, 2023.

Previous EC Comment	Previous EC Decision
Multicentric drug trial.	Yes, it is a Multicentric trial from India.
IEC approval of other centers should be provided. At least the main coordinating centre.	IEC approvals have been attached from AIIMS Rishikesh and CMC Ludhiana.
The drug trial is on old and frail patients but under subject selection–the Vulnerable subject is ticked as 'NO'. They will be enrolling old and frail patients.	Updated revised proforma has been attached.
See pages 28 and 29 for frailty score. It also includes cognitive domain of course the inclusion criteria mentions. Patient able and willing to provide written informed consent for the study'.	Yes, this is correct that the score has been explained on page no. 28 and 29, and this includes cut off for inclusion for cognitive domain based on EORTC-QLQ-C3O questionnaire.
Please take opinion from some expert	The Department of Surgical Oncology,

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	about the drugs in trial.	KGMU is providing chemotherapy for cancer patients including colon cancer for last 25 years. We have all the expertise to administer the chemotherapy drugs to the patients for this study.
	The safety and efficacy of NAC in the fit colon cancer population has been established in the FoXTROT 1 study. However, benefits have not been proven in frail or older patients, not significantly represented in that trial. Two important findings suggest that this group should be studied. Firstly, major postoperative complications were reduced in patients who had received NAC, and secondly that subgroup analysis shows evidence of a comparable benefit in older and frail patients. We hypothesise that this population may gain most from a NAC approach. These benefits may be enhanced in the Indian subcontinent, where more patients present with locally advanced disease.	Yes this is the background and rationale for this study which is rightly pointed out by the EC reviewer.
	Patient information brochure is comprehensive but too big. Need to be reduced, otherwise no-one will read.	Yes, we agree that patient information brochure is comprehensive. Every effort has been made to explain each and every aspect of the study to the patient for their complete understanding and trial transparency. This will ensure that patients get detailed information without missing out anything.
	Optional video/audio may be needed.	The chemotherapy treatment used in this trial is well established for this cancer and is being used world-wide. As per the NDCT 2019 guidelines, Audio-video is required for the New Chemical Entity. Therefore this is not applicable for this study.
	Kindly provide Patient information sheet.	Attached

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	The reply from PI to the above Comments was forwarded to Primary reviewer:- *Recommendation of Primary reviewer:* • Point 6 on page 17, Hindi consent mentions about CMC Ludhiana and not KGMU [Copy paste effect]. Same issue in English consent. • They should check carefully to confirm if the consent is tailored for KGMU. • Who will pay for the chemotherapy, surgery and complications, if they are there? • What about the issue of compensation? • These two issues and use of previously used drugs in different protocol - Expert in drug trial need to be consulted. • The IEC of CMC, Ludhiana [list of documents is mentioned in the approval letter but it is not attached] and AIIMS, Rishikesh have approved the trial. • The font of consent should be 14 and the line spacing should be more [1.5 at least]. **EC Decision:** Revise & Re-submit. Give changes done in a tabular form. ***Ref. code: 119th ECM IIA/P10***
8-	Clarification of research proposal entitled "***An Indo-German approach to identify universal and specific molecular targets in breast cancer prevention: impact of environmental disruptors, diet and lifestyle on sex hormone levels and cellular consequences thereof in human breast tissues***" sponsored by ICMR-DFG submitted by Prof Vijay Kumar, Head, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/12/23 dated 12th April, 2023. *Previous EC Comment:-* • Kindly rectify the Hindi version of ICF. It should be same as in English. *The reply from PI to the above Comments was forwarded to Primary reviewer:-* *Recommendation of Primary reviewer:* Provisionally approved **EC Decision:** Approved ***Ref. code: 120th ECM II A/P22***
9-	Clarification of research proposal entitled "***A multicenter cross-sectional study to evaluate the clinical, immunological, and radiological profile of allergic bronchopulmonary aspergillosis (ABPA registry)***" submitted by Prof. Surya Kant, Head, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 457/23 dated 20th April, 2023. *Previous EC Comment:-* • ICF in some different format other than SOP of EC KGMU, kindly provide the name of investigator is clearly mentioned, therein, Morever the opinion of Chairman Ethics Committee & the Member-Secretry is necessary to override the existing protocol. *The reply from PI to the above Comments was forwarded to Primary reviewer:-* *Recommendation of Primary reviewer:* Provisionally approved **EC Decision:** Approved ***Ref. code: 120th ECM II A/P28***

10- Clarification of research proposal entitled "***Efficacy of grid-based dental rubrics as an effective assessment tool when compared to traditional assessment methods for undergraduate students managing a class II carious defect***" submitted by Dr. Rhythm, Prof. Junior Grade, Department of Conservative Dentistry & Endodontics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 80/Coms&Endo/23 dated 18th May, 2023.

Previous EC Comment	Previous EC Decision
The title of study does not match with objectives.	1. The title of the study has been modified. 2. Primary and secondary objectives are modified. Marked in red on page 1&2.
Study design	1. The study design has been modified. Marked in red on page 4 & 5
Outcomes measures	1. Modified marked in red on page 5

The reply from PI to the above Comments was forwarded to Primary reviewer:-
Recommendation of Primary reviewer:

- Printing is very light and parts of the manuscript are not readable. Please re-submit clear copy.

EC Decision: Re-submit

Ref. code: 120th ECM II A/P31

11- Clarification of research proposal entitled "***Role of DNA methylation and autophagy regulator genes in prognosis of non-muscle invasive bladder cancer***" sponsored by CST-UP submitted by Mr. Anil Kumar, Ph.D Scholar under the guidance Prof. Vishwajeet Singh, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 374/URO/ dated 2nd May, 2023.

Previous EC Comment	Previous EC Decision
Comment 1: Title and objectives don't match:	**Reply:** We appreciate the reviewer's perspective and view. We have revised the title of study and the objectives. The revised title is "Role of DNA methylation and autophagy regulator genes in progression of non-muscle invasive bladder cancer,". The term "progression" has replaced the term "prognosis" as it was in earlier submission. The updated title implies how promoter methylation,

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		altered gene expression (FGFR3 and TP53) as well as the level of autophagy regulator genes explain/reveal the progression of NMIBC. As a result of completing objectives 1 and 2, we will be able to establish a link between the aforementioned genes and the clinical profile (objective 3) of research subjects. The objectives are rephrased as follows: **Objective 1.** To identify methylation pattern at promoter site of FGFR3 and TP53, and their expression in non muscle invasive bladder cancer. **Objective 2.** To assess gene expression of autophagy regulators (mTOR, ULK1, Beclin1, and LC3) in non muscle invasive bladder cancer **Objective 3.** To correlate clinical profiles of non muscle invasive bladder cancer patients with DNA methylation & expression of autophagy regulator genes.
	Comment 2: Why will pre-existing tissue samples be used?	In the research procedure, we erratically check the box Yes instead of No ('Yes'> 'No'). As a result, we are avoiding using previously collected samples in the present study.
	Comment 3: From where will pre-existing blood samples be collected?	We inadvertently tick the box Yes instead of No ('Yes'> 'No') in the research protocol. This has been rectified, we do not intend to collect samples for future research/bio-banking. The fresh samples collected only for this study will be used.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Comment 4: Where is the consent for bio banking?	We inadvertently tick the box Yes instead of No ('Yes'> 'No') in the research protocol. This has been rectified, we do not intend to collect samples for future research/bio-banking. The fresh samples collected only for this study will be used.
Comment 5: What is the direct benefit to patients?	The study emphasises to establish the role of DNA methylation and altered genes in the progression of the NMIBC. The validation of identified pathways with significant outcome in this particular subset of patients definitely will directly help in managing and taking further decisions.
Comment 6: Outcome measures not mentioned.	1. Methylation status at the promoter site of FGFR3 and TP53 by using methylation specific Real Time PCR. 2. Mean fold expression change in the mRNA levels of FGFR3, TP53, mTOR, ULK1, Beclin1, and LC3. 3. Clinicopathological attributes such as tumor size, histopathological grading, TNM staging, lymph node involvement etc.
Comment 7: Statistical methodology not mentioned.	Statistical analysis was performed using SPSS v. 24.0 (SPSS, Inc., Chicago, IL, USA). Data will be entered in the excel sheet and exported to SPSS. Normal distribution of data will be assessed by Shaprio-Wilk test. Depending the distribution of the data parametric or non-parametric tests will be applied. To compare the mean difference in the

Chairman, IEC

		methylation and gene expression levels between low grade to high grade tumors Student's t-test or Mann–Whitney U test will be used. Spearman's correlation tests will be performed to correlate gene expression levels with the clinicohistopathological variables of patients.
	Comment 8: 51 samples will not be enough to either prognosticate or profile bladder cancer.	**Reply:** We are thankful for the suggestion and updated the sample size with detailed calculation as below: **Study Size:** Based on the correlation between molecular markers methylation and expression levels with clinical profile (disease progression). The expected correlation coefficient is 0.30 for methylation and autophagy markers in non-muscle invasion bladder cancer. **The sample size** $N= [(Z\alpha + Z\beta)/C]^2 + 3$ Considering, Threshold probability for rejecting the null hypothesis i.e. Type I error rate(two-tailed) $\alpha= 0.05$. Probability of failing to reject the null hypothesis under the alternative hypothesis i.e. Type II error rate (β)= 0.10 The expected correlation coefficient (r)= 0.3

(Shally Awasthi)

(Alok Dhawan)
Chairman, IEC

		The standard normal deviate for $\alpha = Z_\alpha = 1.9600$ The standard normal deviate for $\beta = Z_\beta = 0.84$ $C = 0.5 * \ln[(1+r)/(1-r)] = 0.3095$ **Total sample size = 85** Group-1= non-muscle invasion bladder cancer(n=85) Group-2= control group (n=85) **Reference** 1. Hulley SB, Cummings SR, Browner WS, Grady D, Newman TB. Designing clinical research: an epidemiologic approach. 4th ed. Philadelphia, PA: Lippincott Williams &Wilkins; 2013. Appendix 6C, page 79.

The reply from PI to the above Comments was forwarded to PR:-

Recommendation of Primary reviewer:

- Is this a PhD thesis?
- The project does not make great sense still. The title has been altered, but the problems remain the same.
- Title objectives and study plan don't match.
- The study design is not mentioned.
- Review of literature/background/references has not been mentioned.
- There is no mention of how sample size was calculated? Will there be a control group. If yes, what will be that?
- What is progression? How is it defined?
- What is the time cut off to label as non progressive?
- What clinical measures will be correlated, and how?
- First page of IEC form, consents, PIS, missing.
- Very poorly written proposal, especially from a PhD student.

EC Decision: Revise & Re-submit. Give changes done in a tabular form.

12- Clarification of research proposal entitled "***To elucidate MAP kinase activation role in the hypertensive placenta***" sponsored by Department of Health Research, Ministry of Health & Family Welfare, Government of India, New Delhi submitted by Prof. Shyam Pyari Jaiswar, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/312/23 dated 6th May, 2023.

Previous EC Comment	Previous EC Decision
Discrepancy in the title of project	The title of the project has been corrected all the places as '**To elucidate atypical kinases activation in the placental dysfunction'.**
Patient information sheet: Kindly explain to the patient: why she has been selected, instead of saying that she fulfils inclusion criteria	The patient information sheet has been corrected according to the EC comments and has been attached for further reference.
ICF: Kindly explain the study procedure that her placental tissue will be utilized for study and will be kept in deep freezer.	Study procedure has been explained in the consent form according to the EC comments as 'The biopsies, etc. of the placental tissues after the scheduled delivery of the patient/ participant will be utilized for the study and will be kept in deep freezer for the downstream analysis. The blood sampling (3-5ml) will be done after 20th week of the confirmed pregnancy in the preeclampsia or normal pregnancy cases.' and the file has been attached for further reference.

Previous EC Comment	Previous EC Decision
According to PI, VNG machine is available in the ENT department and one Co PI will be from ENT department but the list is not expressing the same. Kindly add one CO PI from ENT department.	We regret the incorrect statement that got carried over from our previous collaboration with the ENT department. The infrastructure for the assessment of patients in the form of Video-Oculography (VOG) machine is now available in the department of Neurology and shall be utilized for the conduct of the study. We had, therefore, not included a Co-PI. We have corrected the statement on page 11 in this regard.
ICF: Study Procedure states Standard Guidelines. It has been assumed that patient is aware of Standard Guidelines. Kindly explain the whole procedure in simple words.	We regret the deficiency. The ICF has been modified (both English and Hindi) with a simple introduction and the detail of the procedure has been provided in the Patient Information Sheet (both English and Hindi).
Patient Information Sheet: is not attached.	We apologize for the inadvertent miss. Both English and Hindi sheets have been attached in the revised proposal.

Ref. code: 122nd ECMIIC/P6

20. Clarification of research proposal entitled "***Role of nasal douching technique in the management of allergic rhinitis***" sponsored by DHR submitted by Dr. Shruti Agnihotri through her Mentor Prof. Surya Kant, Head, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 576/ResMed/23 dated 5th June, 2023.

Recommendation of Primary reviewer:

- The objective indicates nasal douching only while methodology also includes Pranayam (yoga). Kindly clarify.
- The second objective estimates the effect of anti-allergic medication while case study form does not record any institution of medication. Kindly rectify
- Similarly the fourth objective estimates effect on quality of life but no such recording is shown in case study form.
- Kindly clarify first two points of inclusion criteria. It seems that patients of allergy rhinitis with or without asthma both will be included. Mention clear-cut the diagnostic criteria.
- Kindly show the steps of sample size calculation to make it more clear
- In data management and analysis kindly mention 'all the parameters' and "different types of intervention at different times".

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The technique of nasal douche used in the study may be briefly described in methodology section. • As per the section on "benefit and significance of study" will a 30 minute yoga practice be done in every patient- If yes, then include this in methodology before also. • What would be included in the standard medical treatment? kindly brief. ***The reply from PI to the above Comments was forwarded to Primary reviewer:-*** ***Recommendation of Primary reviewer:*** Provisionally approved **EC Decision:** Approved ***Ref. code: 123rdECMIIB-WS/P1***
21-	Clarification of research protocol no.RCLS-CIP-01 entitled "***A prospective open-level, single arm, interventional, multicentric, pilot study to evaluate the safety and effectiveness of OZYN-D, a novel intraosseous device for delivery of medications and fluids***" sponsored by M/s Rcupe Life Sciences Pvt. Ltd. submitted by Prof. Sandeep Tiwari, Department of Trauma Surgery, King George's Medical University, U.P., Lucknow, vide letter no. TS/3172023 dated 17th May, 2023. ***Previous EC Comments:-*** • In SOP-Checklist-point-3–Clinical Trials–(ii)-is this device approved and marketed in India–PI mentioned-NA–PI is required to clarify • Point -6- Confidential handling of data – not ticked YES • Insurance to be renewed (it is up to-21-04-2023) • DCGI acknowledgment and permission letter awaited (if required) • CTRI document to be send after registry ***The reply from PI to the above Comments was forwarded to Primary reviewer:-*** ***Recommendation of Primary reviewer:*** Provisionally approved ***The following documents were reviewed in Its Meeting:-***

Chairman, IEC

	intracerebral (Ganglio-capsular) bleed, volume approximately 28.94 ml. He was randomized to the control arm, transferred to Neurology stroke ward on the same day (11-04-2023) and received standard treatment. The next morning (12.04.2023) around 10:30 AM, the patient developed labored breathing and poor GCS. Blood pressure could not be controlled by increasing labetalo infusion. The patient was immediately intubated and placed on a mechanical ventilator. NCCT Head was repeated and hematoma expansion was noted. The patient's condition deteriorated further during his stay in the hospital. On 16th April, 2023 at 19:15 PM, the patient developed sudden arrest and despite all methods of CPR, he could not be revived. The patient was declared dead and LAR / relatives was/were informed. *Recommendation of Primary reviewer:-* • SAE (Intubation & mechanical ventilation during hospital stay) is likely due to disease outcome (Raised intracranial pressure with Left Gangliocapsular bleed secondary to systemic hypertension) and not due to intervention as patient was randomized in control arm on 11-04-2023. On 12-04-2023 around 10:30 AM, the patient developed labored breathing and poor GCS. His BP could not be controlled by giving increasing dose of Labetalol. The Patient was immediately intubated and placed on mechanical ventilator (SAE). The patient's condition deteriorated further and on 16 th April ,2023 at 19:15 PM he developed sudden cardio-respiratory arrest and despite all methods of CPR ,he could not be revived. • Causal relationship can not be established and no compensation is required as patient was enrolled in control arm (11-04-2023) and was properly treated in hospital and SAE happened due to his deteriorating condition on next day (12-04-2023) of enrollment. **ADR sub Committee Comment:** • As above **ADR sub Committee Decision:** Noted ***Ref.code:115th ECMIIA/P5***

I-	ADR of research proposal entitled ***"Digoxin in patients with rheumatic heart disease-a randomized placebo controlled trial*** submitted by Dr. Prof. Rishi Sethi, Department of Cardiology, K.G's Medical University, U.P., Lucknow vide letter no. 12/Cardio/Res/2023 dated 20th April, 2023 & preliminary email dated 3rd April, 2023 at 1:00 PM. **Patient ID & age and gender:** 033/37 Y/Female **Patient Diagnosis:** RHD/Sev-MS/MVA 1.5 cm. **Patient enrollment date:** 21-07-2022 **Patient enrollment arm**-Digoxin **Patient follow up under study**-6th Month ,12th Month , 18th Month, 24th Month, 30th Month, 36th Month. **Follow up visit completed**-Enrolment & Baseline Follow-up **Planning on visit-** 6th M **SAE detected on date:** 03-04-2023 **Follow up visit remaining:** 6th Month, 12th Month, 18th Month, 24th Month, 30th Month, 36th Month. **24 hours, notified to EC, Sponsor**-3rd April, 2023 **14 days analysis report submitted to EC**-18th April, 2023 **Subject History:** A letter was received in the Office of the Ethics Committee on 20th April, 2023 by PI. It was revealed by the PI that the subject's LAR informed him that the subject was having complaint of breathlessness for which she was hospitalized on 23rd March, 2023 and **passed away** on the same day. It might be considered as a case of new onset or worsening of HF as informed by the subject's LAR via telephonic conservation. Despite multiple reminders, the subject's LAR was unable to provide any documents supporting the hospitalization or **death** of the patient. ***Recommendation of Primary reviewer:-*** • Enrolment date 21st July, 2022, SAE date 23rd March, 2023. Principal Investigator reported to IEC 3rd April, 2023. • Patient was not in follow-up. Skipped the 6-month follow-up also, SAE occurred on 23rd March, 2023, but was detected on 3rd April, 2023. Why was the patient not on follow-up?

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• No mention is made of which hospital was the patient admitted to for her complaints on 23rd March, 2023. Was it KGMU? • Was an autopsy done? No mention is made of these details. These clarifications may be asked for from the Principal-Investigator. • In the SAE narrative start day and time of the drugs is given as 23rd March, 2023 (Is it a misprint?) **ADR sub Committee Comment:** • As above **ADR sub Committee Decision:** Noted ***Ref. code: 102nd ECM IIA/P24***
24-	Minutes of the **"ADR Sub Committee"** Meeting of the **"Institutional Ethics Committee"** held on 19th April, 2023 from 12.30 PM. ***virtual.*** ***The following Members were present in the Meeting:*** 1.Dr. Alok Dhawan -Chairman 2.Mrs. Akansha Dubey -Member 3.Mrs. Vasundhara Kumari -Member 4.Mr. Ujjawal Krishna -Member 5.Dr. Rajendra Nath -Member 6.Dr. D.N. 1-	ADR of research proposal entitled ***"Indian trial of Tranexamic acid in Spontaneous intracerebral haemorrhage (INTRINSIC TRIAL)*** submitted by Dr. Praveen Kumar Sharma, Additional Professor, Department of Neurology, K.G's Medical University, U.P., Lucknow vide letter no. 36/Neuro/23 dated 25th January, 2023 & ***preliminary email dated 24th January, 2023 at 1:41 PM.*** **Patient ID & age and gender:** S-45-3-634/65 years/Male **Subject initial:** MIA **Patient Diagnosis:** Right cortical bleed **Patient enrollment date:** 02-01-2023 **Patient enrollment Arm:** Control arm **Patient follow up under study**-Expired on 23-01-2023 during hospital stay. **Follow up visit completed**-Expired **SAE detected on date:** 24-01-2023 **Follow up visit remaining:** Expired **24 hours, notified to EC, Sponsor**-Yes **14 days analysis report submitted to EC**-NA **Subject History:-** A letter was received in the Office of the Ethics Committee on 20th January, 2023. Subject MIA 65 years/Male was admitted on 2nd January, 2023 in the Emergency Medical ward with c/o left hemiparesis and altered sensorium with GCS score of 14 and diagnosed to have right

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	intracerebral (cortical) bleed, volume approximately 14.17 ml. Since he was fulfilling inclusion criteria so he was recruited after written informed consent from family and randomized to control arm. He was kept in emergency medical ward ICU had received treatment with parenteral antihypertensive to lower blood pressure (Amlong, Arkamin). He was sent to Neurology stroke ward on 3rd January, 2023 and received treatment with calcium channel blocker for blood pressure management. He gradually improved and discharged on 6th day (07-01-2023). As per family member he remained fine at home. On 23rd January, 2023 the patient presented with a complaint of breathlessness of 2 hrs. The patient was assessed promptly on arrival. Bedside ultrasound revealed b/l pleural effusion. NCCT head was repeated and did not show any new ischemic/hemorrhagic stroke. Vitals on admission-HR-86/min, SpO2-90% on room air. E4V5M6 on GCS, Blood pressure was 110/70 mmHg. Chest Xray revealed B/L perihilar nonhomogenous opacities. On auscullation course crepitations were present all over the lungfields. Patient was provided oxygen support and broad-spectrum antibiotics after about 14 hours of admission the patient experienced sudden cardiac arrest in ward of emergency medicine. No return of spontaneous circulation seen after advanced cardiac life support was provided to the patient. The patient was declared dead at 16:29 hours on 23rd January, 2023. ***Recommendation of Primary reviewer:*** • SAE (Death) is likely due to disease outcome (Rt. Cortical bleed) and not due to intervention as patient was randomized in control arm on 02-01-2023. He gradually improved and discharged on 07-01-2023. Pt again admitted due to breathlessness, USG of lungs was done showed B/L pleural effusion. SAE occurred on 23-01-2022, almost 10 days after randomization. As Pt was randomized in control arm therefore SAE is most likely due to disease outcome. • Causal relationship can not be established and no compensation is required as patient was properly treated in hospital and SAE occurred after 10 days due to disease progression and sudden cardiac arrest. **ADR sub Committee Decision:** Noted ***Ref.code:115th ECMIIA/P5***
II-	ADR of research proposal entitled ***"Indian trial of Tranexamic acid in Spontaneous intracerebral haemorrhage (INTRINSIC TRIAL)*** submitted by Dr. Praveen Kumar Sharma, Additional Professor, Department of Neurology, K.G's Medical University, U.P., Lucknow vide letter no. 37/Neuro/23 dated 28th January, 2023. **Patient ID & age and gender:** S-45-3-759/40 years/Male **Subject initial:** A-O-K **Patient Diagnosis:** Left Basal ganglia bleed **Patient enrollment date:** 22-01-2023 **Patient enrollment Arm:** Control arm **Patient follow up under study**-Expired on 25-01-2023 **Follow up visit completed**-Expired **Planning on visit-** Expired **SAE detected on date:** 25 -01-2023 **Follow up visit remaining:** Expired

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	24 hours, notified to EC, Sponsor-Yes **14 days analysis report submitted to EC**-NA **Subject History:** A letter was received in the Office of the Ethics Committee on 28th January, 2023. Subject AOK 40 years/Male was admitted on 22nd January, 2023 the patient was admitted in the Emergency medical ward with c/o weakness on right upper & lower limb with shivering. K/C/O acute pancreatitis (3 rears back) with GCS score of 15 and diagnosed to have left intracerebral (Basal ganglia) bleed, volume approximately 12.44 ml. Since he was fulfilling inclusion criteria so he was recruited after getting written informed consent from the family and randomized to the control arm. He was kept in the emergency medical ICU had received treatment with parenteral antihypertensive to lower blood pressure (Labetalol-infusion). He was sent to Neurology stroke ward on 23rd January, 203 and received treatment with Nieardipin. Arkamin, Telmistran, Amlong for blood pressure management. On 24th January, 2023 the patient GCS deteriorated to 1E2V2M5 & repeat NCCT was done which revealed an increase in the size of the bleed (vol.74.0) and midline shift. On 25 January 2023 at about 7 AM the GCS declined to E1V1M1. By 10 AM patient developed a labored breathing pattern & pulse was not recordable. CPR was started as per ACLS protocol. After 45 minutes, no return of spontaneous circulation was noted. Patient could not be revived and was declared dead at 10:40 AM. *Recommendation of Primary reviewer:* • SAE (Death) is likely due to disease outcome (Left Basal ganglia bleed)) and not due to intervention as patient was randomized in control arm on 22-10-2023 and SAE occurred on 25-01-2023 , 3 days after intervention which was due to sudden deterioration in GCS (Glasgow coma scale), NCCT (non contrast CT scan) reveled increased size of previous bleed (due to raised intracranial pressure with left putamen bleed with midline shift with mass effect) resulted in labored breathing, pt can not be revived by CPR. History shows that Pt was also chronic alcohol abuser and having systemic hypertension. • Causal relationship can not be established and no compensation is required as patient was properly treated in hospital after randomization in control arm and death occurred was most likely due to disease progression (reveled from increased size of previous bleed) **ADR sub Committee Decision:** Noted ***Ref.code:115th ECMIIA/P5***
III-	ADR of research proposal entitled ***"PRISTENE Registry "Prospective, multi/centric, singlearm post marketing surveillance of PRISTINE, everolimus cobaltchromium coronary stent system to assess its continued safety and efficacy"*** submitted by Dr. Praveen Kumar Sharma, Additional Professor, Department of Neurology, K.G's Medical

University, U.P., Lucknow vide letter no. 93/Neuro/23 dated 27th February, 2023 & 128/Neuro/23 Dated 27th March, 2023.

Patient ID & age and gender: S-45-3-376-45 Years and 1 Month 1 day/Male
Subject initial: VAK
Patient Diagnosis: Right hemiparesis

Patient enrollment date: 26-11-2022
Patient enrollment Arm: Control Arm
Patient follow-up under the study: Yes
Planning on visit- No
Follow up visit completed- Yes (17-02-2023)
SAE detected on date: 09/12/2022
Follow up visit remaining: No
24 hours, notified to EC, Sponsor-Yes
14 days analysis report submitted to EC-Yes
Subject History:-

A letter was received in the Office of the Ethics Committee on 1st March, 2023. Subject VAK 45 years 1 month 1 day/Male was discharged on 10th December, 2022 and his 90th day follow-up was done on 17th February, 2023. As per his proxy on 17th February, 2023 his mRS & GCS was 4 and 15 respectively with residual right hemiparesis and unable to walk and attend to own bodily needs without assistance. This patient was diagnosed hepatitis B positive on 09-12-2022 for which PI had reported to EC. On that day's follow-up he has been advised to continue medication at gastroenterology.

Recommendation of Primary reviewer:-

- SAE (Hospitalization and detection of Hepatitis B infection) is likely due to disease outcome (Left Gangliocapsular bleed) and accidental detection of Hepatitis B infection during hospital stay and not due to intervention as patient was randomized in control arm on 26-11-2022. He gradually improved and discharged on 10-12-2022. On his 90th day follow up done on 17-02-2023, he has residual hemiparesis and unable to walk. According to PI during his hospital stay he was diagnosed with Hepatitis B infection on 09-12-2022 and for which he has taken treatment from Gastroenterology Department, KGMU.

- Causal relationship can not be established and no compensation is required as patient was properly treated in hospital and SAE occurred after 13 days due to disease progression and accidental detection of Hepatitis B infection which is unrelated to intervention and for which Patient was advised to continue treatment from Department of Gastroenterology.

	endodontic procedure in necrotic immature young teeth-clinical and molecular perspectives" submitted by Dr. Pragya Pandey, Associate Professor, Department of Conservative Dentistry & Endodontics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 17/Coms&Endo/23 dated 12th April, 2023. *Recommendation of* ***Primary reviewer:*** • Techniques for biomarker estimation not provided. The paper which has been cited does not cover all the parameters to be investigated. **EC Comment:** As above **EC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P5***
6.	Research proposal entitled ***"Morphological and morphometric analysis of cadaveric lung in North Indian population"*** submitted by Dr. Arvind Kumar Pankaj, Additional Professor, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 56/ANAT/23 dated 28th April, 2023. *Recommendation of* ***Primary reviewer:*** • Title says North Indian Population. What is the target population? What is the sampling frame? • The objective should specify: How the morphological and morphometric analysis shall be used? • There is no sample size calculation. • Methodology is incomplete. • There is no statistical analysis section. • There is no informed consent form (Hindi and English). **EC Comment:** As above **EC Decision:** Revise and Re-submit. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P6***
7.	Research proposal entitled ***"Randomized control trial of direct pulp capping using laser"*** submitted by Prof. Rakesh Kumar Yadav, Department of Conservative Dentistry & Endodontics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 589/Coms&Endo/23 dated 2nd March, 2023. *Recommendation of* ***Primary reviewer:*** • If it is really, RCT, all the fundamentals are missing. • For example, (i) proper formulation of research hypotheses, (ii) study variables, (iii) primary and secondary outcome measures, (iv) method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.), (v) How double blinding is done, (vi) how the success of masking assessed. • There seems to be three groups for comparison.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The sample size calculation is arbitrary. It is for two group's comparison. It is due to absence of proper research hypothesis. • The statistical methods used to compare groups for primary outcomes, methods for additional analyses, such as subgroup analyses and adjusted analyses. • How the results will be presented: (i) Participants flow, (ii) baseline data, (iii) outcomes and estimation, (iv) adverse events, etc. **EC Comment:** As above **EC Decision:** Revise and Re-submit. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P7***
8.	Research proposal entitled "***Introducing the professionalism mini-evaluation exercise (P-MEX) in undergraduate medical training in India: A validity and feasibility study***" submitted by Dr. Sarika Gupta, Additional Professor, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 1080/Ped/23 dated 12th April, 2023. *Recommendation of **Primary reviewer:*** • There are certain guidelines for multicenter studies. These must be followed. It only says that the study will be conducted in 13 medical colleges. The name of participating centres is required. • What will be the common protocol? • Which will be a coordinating center to collect, process and analyze the data? • The number of field sites varies greatly across studies according to their size, complexity and purpose. How will this be handled? • Sample size calculation is not given. • Sample size calculation will be based on the research hypothesis. • Data analysis plan is very general. It should be specific to the research hypothesis. **EC Comment:** As above **EC Decision:** Revise and Re-submit. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P8***
9.	Research proposal entitled "***Relationship between implementation of evidence-based and supportive ICU care and outcomes of patients with acute respiratory distress syndrome (The ICU Liberation Study)***" submitted by Dr. Saumitra Misra, Assistant Professor, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/1455/23 dated 28th April, 2023. *Recommendation of **Primary reviewer:*** • Sample size calculations are not clear. There are too many numbers. Where are they coming from? Sample size formula is required. • There are too many objectives. • One primary objective should be sorted out and the rest should be put into secondary objectives.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The primary objective should be converted into a proper research hypothesis in terms of study variables and population parameters. Sample size should be done for this hypothesis. • Statistical analysis section is missing **EC Comment:** As above **EC Decision:** Revise and Re-submit. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P9***

19.	Research proposal entitled "***Objective determination of amount of glue injected in gastric varices for good clinical and technical outcome: A proof of concept study from a tertiary care Hospital of North India***" submitted by Dr. Ajay Kumar Patwa, Additional Professor, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1098/MED/23 dated 12th May, 2023. *Recommendation of* ***Primary reviewer:*** • In brief description objective of the study is not mentioned. • Study setting is not mentioned. • If data is to be retrieved from case records there is no need information sheet and consent form as PI already declares that laboratory data of interventional cases will be retrieved Jan 2022 to Dec 2022. • Inclusion/ exclusion criteria is not written in the text but mentioned in checklist • Consent form…is it needed as study seems to be retrospective; if yes, there are many terms that needs to be reframed. • In check list no of subjects is written as 6; one year data to be included in the study (as written in description). Statistical analysis of 6 data? **EC Comment:** As above **EC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P19***
20.	Research proposal entitled "***Surveillance of humoral and T-cell immunity for COVID-19 in population of Uttar Pradesh***" sponsored by MHM, UP Government submitted by Dr.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Geeta Yadav, Additional Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 520/23 dated 28th April, 2023. ***Recommendation of Primary reviewer:*** • Estimates of antibodies and T cell are to be done in KGMU and data is to be collected from various districts of Uttar Pradesh, what precautionary measures will be taken to maintain quality of the sample and who will be the responsible for it. • For sampling probably 10 districts of the state are to be selected; however, it is not mentioned anywhere that how many districts will be required for data collection. • The checklist indicates that any other will take the consent, which needs to be defined how anyone can take the consent and will any other be able to satisfy the query of the participants. • Will the participant be able to understand the study process as it is written? • Assent is not there. **EC Comment:** As above **EC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P20***
21.	Research proposal entitled ***"Development of risk scoring algorithm using clinical, biochemical, ultrasound and molecular markers to predict preeclampsia-A pilot study"*** sponsored by UP-CST submitted by Prof. Amita Pandey, Department of Obstetrics & Gynaecology, King George's Medical University, U.P., Lucknow vide letter no. OG/271/23 dated 1st May, 2023. ***Recommendation of Primary reviewer:*** • If females with 11-16 wks pregnancy are to be included in the study inclusion criteria should denote the same. • In Hindi consent form, at many places space in between words are missing. **EC Comment:** As above **EC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: 124th ECM IIA/P21***
22.	Research proposal entitled ***"Clinicopathological parameters of hemophilia patients at a tertiary care centre of Northern India"*** submitted by Prof. Rashmi Kushwaha, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 605/23 dated 19th May, 2023. ***Recommendation of Primary reviewer:*** • The research hypothesis is written under the heading of Aims & Objectives. • Expected outcome is written as study objectives. • PI declares that study is not a research activity and is a chart review then there is no need for consent form. **EC Comment:** As above **EC Decision:** Approval subject to modification. Give changes done in a tabular form.

1.	Research proposal entitled ***"Effect of nutraceutical potential of pumpkin seeds on glycaemic and lipid profile in type 2 diabetes mellitus patients"*** sponsored by CST U.P submitted by Miss. Poonam Sahu, Ph.D Scholar under the guidance Prof. Dileep Kumar Verma, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no. 3072/PHY/23 dated 19th April, 2023. ***Recommendation of Primary reviewer:*** • This is a clinical study of herbal remedies. Therefore an Ayurvedic co-investigator can be included. Moreover, kindly clarify if the processes of inclusion as a clinical trial need to be done? • Informed consent form for volunteers (as indicated in annexure 1 that volunteers and patient will be recruited). Study design as indicated in case Control- does Control refer to healthy subjects? • While study design flow chart suggests it to be randomised controlled trial- Kindly clarify. • Patient information sheet to be included in detail both in Hindi and English. • Sample size to be made molecular in respect to primary objective. Elaborate the numbers mentioned in difference in expected means. • The budget indicates 3.9- is it in thousands or lakhs? • Who will fund for pumpkin seed? The CST papers do not indicate anything about pumpkin seed purchase. Also the attached CST sanction letter is for some other project. Kindly explain? • Who will bear the cost of biochemical analysis and how much cost is expected for these tests per case basis. • Summarize the anticipated statistical analysis briefly. • Summarize randomization process. Will this be age and gender matched - kindly brief. **EC Comment:** As above **EC Decision:** Revise & Re-submit. Give changes done in a tabular form. ***Ref. code: 124th ECMIIB-Ph.D/P1***
2.	Research proposal entitled ***"Effectiveness of meta cognitive therapy in patients with***

Chairman, IEC

	obsessive compulsive disorder" submitted by Ms. Ayushi Gaur, Ph.D. Scholar, Amity Institute of Behavioral & Allied Sciences, Amity University Uttar Pradesh, Lucknow under the guidance Dr. Shivali Sharma, Assistant Professor, Amity University Uttar Pradesh, Lucknow, Through Dr. Shweta Singh, Professor Jr. Grade, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 728/Psy/23 dated 8th May, 2023. ***Recommendation of Primary reviewer:*** • No guide/ co-guide from King George medical University has been mentioned on first page of annexure 1 for this Ph.D. project. Kindly indicate who is the chief guide of this PhD work? • Scientific committee report/ approval is not attached. • In hypothesis, 4 points are repeated. Kindly correct. The aims do not indicate meta cognitive therapy, while hypothesis states the same. Kindly resolve the discrepancy. • Kindly elaborate sample size calculation with respect to the aims of the study. • What anticipated appropriate statistical analysis will be undertaken? Kindly brief. • Patient information sheet to be submitted as per standard operating procedures of ethics committee of King George's medical University both in English and Hindi. • Hence the investigator needs to address above issues and resubmit. **EC Comment:** As above **EC Decision:** Revise & Re-submit. Give changes done in a tabular form. ***Ref. code: 124thECMIIB-Ph.D/P2***
3.	Research proposal entitled ***"Elucidate the regulatory role of miRNAs in epithelial to mesenchymal transition in cervical cancer patients"*** submitted by Mr. Praveen Kumar, Ph.D Scholar, under the guidance Dr. Nitu Nigam, Associate Professor, Department of Center for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 74/CFAR/23 dated 15th May, 2023. ***Recommendation of Primary reviewer:*** • The account of budget is not indicated and sponsor is indicated as NA. Kindly specify the total • budget (split up) and kindly specify the source of funding. • Attach the CSIR JRF papers pertaining to the candidate. • Kindly fill up the left blanks in annexure 1. • 'National significance with rationale' indicates the details about prostate cancer (in males) while the project is for cervical cancer in females. • Patient information sheet in Hindi is to be included. • Name and contact of Guide to be included in informed consent form. • All study procedures undertaken on patient's sample need to be briefed in informed consent form to the patient and not labeled as NA. • The second and third aims pertain to the progression of cervical cancer and prognostic aspects of cervical cancer respectively, but there is neither indication of any clinical data

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	been collected nor any follow-up data. Kindly attach a case sheet to record the clinical findings and specify which specific clinical prognostic marker is intended to be correlated with molecular outcomes. • It is indicated that 60 normal cervical samples will be collected. Does it mean from normal subjects? What will be the indication to take samples from normal person?? Kindly specify. • It is further indicated that patients will be included on the basis of well-defined inclusion and exclusion criteria. Those criteria include both cervical cancer and other serious uncontrollable medical conditions, decreasing life expectancy' Please clarify. Inclusion and exclusion criteria may be modified accordingly. • The study design is case control and experimental if any control is included then kindly mention the inclusion criteria and include informed consent form as well as in information sheet for control. • How will clinical validation be done as shown in last flowchart? Also specify some tentative micro RNA and EMT markers **EC Comment:** As above **EC Decision:** Revise and re-submit. Give changes done in a tabular form. ***Ref. code: 124thECMIIB-Ph.D/P3***
4.	Research proposal entitled "***Assessment of Th2 inflammatory mediators and their correlation with clinical parameters in phenotypes of bronchial Asthma***" submitted by Ms. Shreya Tripathi, Ph.D. Scholar, under the guidance Dr. Ajay Kumar Verma, Professor Junior Grade, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 521/23 dated 18th May, 2023. *Recommendation of **Primary reviewer:*** • Patient information sheet to be submitted as per standard operating procedures of ethics, committee of King George medical University, both in English and Hindi. • The left blanks in annexure 1 should be filled. • Methodology indicates that blood sample will be collected but is indicated otherwise in annexure. • Kindly mention inclusion criteria of controls. The criteria of selecting attendants of patients need to be made carefully as attendants of asthmatics may have some genetic predisposition to Influence the markers under study. • It is indicated that age and gender matched controls will be collected. The criteria of selecting control child of 6y age should also be mentioned. • Where will the lab work be done or undertaken? • What would be the total budget of lab investigations? Kindly submit a rough split estimate. • No evidence is enclosed by the sponsor (University grants commission) that is indicated to fund the project. • Informed consent document from healthy subjects (controls) need to indicate that they will not directly be benefited from this 5 ml blood collection. **EC Comment:** As above **EC Decision:** Revise and re-submit. Give changes done in a tabular form.

IV **Brought to Ethics Committee after XVIII-PGTSC held on 26th May, 2023.**

Minutes of XVIII-PGTSC of "Institutional Ethics Committee" Meeting held on 26th May, 2023 from 1:30 PM ***virtual.***

The following Members were present in the Meeting:-

1. Dr. G.G. Agarwal -Member
2. Dr. Rajendra Nath -Member
3. Dr. Nisha Mani Pandey -Member
4. Dr. Anita Rani -Member
5. Dr. Shally Awasthi -Convener

The following Members could not attend the Meeting:-

1. Dr. D.N. Upadhyaya -He has given his written comment
2. Dr. A.A. Mahdi - He has given his written comment

IA **Action Taken**

1- Clarification of research proposal entitled ***"Assessment of snakebites reporting to emergency medicine Department"*** submitted by Dr. Utsav Anand Mani, SR, Department of Emergency Medicine, King George's Medical University, U.P., Lucknow vide letter no.140/EM/23 dated 11th May, 2023.

Previous PGTSC Comment:

- This seems to be a prevalence study. The primary objective and corresponding research hypothesis should be written in that light.
- The numerator and denominator should be properly defined.
- The sample size calculation should be done for the prevalence study. Simply giving number 500 is not enough.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• There is variety of "Major objectives". It should be split into primary and secondary objectives. • For achieving some of these objectives, the proper questionnaire would be required. ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: IX-PGTSC-IIA/P2***
2-	Clarification of research proposal entitled ***"Sentinel lymph node biopsy in post NACT breast cancer patients using low cost dual dye technique with carbon 12 nano particles and methylene blue dye-a pilot study"*** submitted by Dr. Anirudh Gupta, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 195/SY/23 dated 2nd May, 2023. ***Recommendation of Primary reviewer:*** • The study variables and study parameters should be identified. • The research hypothesis should be properly formulated in terms of study parameters. • This is a pilot study; the sample size calculation is not required. • The study design is not mentioned. It simply says "prospective study". ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XIV-PGTSC-IIA/P5***
3-	Clarification of research proposal entitled ***"A clinical comparison of efficacy of BASKA mask and LMA blockbuster for patients undergoing laparoscopic cholecystectomy: A prospective randomized comparative clinical study"*** submitted by Dr. Seema Reyaz, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. 82/Anaes/23 dated 4th April, 2023. ***Previous PGTSC Comment:-*** • The study variables and study parameters should be identified. • The research hypothesis should be properly formulated in terms of study parameters. • The sample size calculation is not given. It can be done only after defining the research hypothesis. • Statistical Analysis section is very general. It should be done according to the research hypothesis. ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XIV-PGTSC-IIA/P12***

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

4-	Clarification of research proposal entitled ***"Comparison of modified thoracolumbar interfascial plane block with erector spinae plane block for postoperative analgesia fillowing lumbar spine surgeries"*** submitted by Dr. Vaishali Singh, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/473/2023 dated 27th April, 2023. ***Previous PGTSC Comments:*** • After identifying the study variables and study parameters, the objective should be converted into research hypothesis in terms of the study parameters • This is comparative study. The study design is not mentioned. • Sample size calculation is not given. • Statistical analysis section should be more specific. It should be planned after defining the proper research hypothesis. ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XIV-PGTSC-IIA/P13***
5-	Clarification of research proposal entitled ***"A study to determine the prevalence of congenital CMV infection in neonates admitted in the NICU of a tertiary care center"*** submitted by Dr. Sujata Kumari, JRI, Department of Pediatrics, King George's Medical University, U.P., Lucknow vide letter no. 321/Ped/23 dated 13th April, 2023. ***Previous PGTSC Comment:-*** • PI has attached the Child assent form, but the study is of Neonates, therefore Guardian Consent Form in English and Hindi version is needed. ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XIV-PGTSC-IIA/P31***
6-	Clarification of research proposal entitled ***"Role of point of care lung ultrasound in ventilator associated pneumonia in Paediatric population"*** submitted by Dr. Twinkle Yadav, JRI, Department of Pediatrics, King George's Medical University, U.P., Lucknow vide letter no. 1054/Ped/23 dated 11th April, 2023.

Previous PGTSC Comment	PI response
Sample size calculation not done	Sample size attached separately
Guardian consent form submitted but PI Child should also be submit Child Assent form (As children of 1 yr. to 12 yrs. of age will be recruited)	Yes, Assent form attached separately

The reply from PI to the above Comments was forwarded to PR:-
Recommendation of PR: Approved

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	PGTSC Decision: Approval ratified ***Ref. code: XIV-PGTSC-IIA/P32***
7-	Clarification of research proposal entitled ***"The study of correlation between serum vitamin D3 and HBV DNA levels in hepatitis B virus infected Children: A prospective observational study"*** submitted by Dr. Moses Riamei, JRI, Department of Pediatrics, King George's Medical University, U.P., Lucknow vide letter no. 1208/Ped/23 dated 1st May, 2023. ***Previous PGTSC Comment:-*** • Detailed sample size calculation not done, only reference is given. • Guardian consent and Assessment form are same. PI to submit separate Child Assent form. ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XIV-PGTSC-IIA/P33***
8-	Clarification of research proposal entitled ***"Assessment of growth and complications amongst neonates receiving total parentral nutrition"*** submitted by Dr. Varsha Chaudhary, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 311/Ped/23 dated 12th April, 2023. ***Previous PGTSC Comment:-*** • Regular ICF-H/E –Attached, but PI should submit Guardian consent form. ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XIV-PGTSC-IIA/P52***
9-	Clarification of research proposal entitled ***"Role of neonatal sequential organ failure assessment score (nSOFA) for prediction of mortality among preterm neonates with respiratory distress syndrome"*** submitted by Dr. Vaishali Sahu, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. nil dated nil. ***Previous PGTSC Comment:-*** • Sample size discrepancy in SOP form (53 cases) and protocol (113 cases), please specify the sample size and its calculation. • Revise and submit Guardian consent form (E/H version) ***The reply from PI to the above Comments was forwarded to PR:-*** ***Recommendation of PR:*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XIV-PGTSC-IIA/P53***
10-	Clarification of research proposal entitled ***"A study to assess risk factors associated with febrile seizures in Children under five years of age"*** submitted by Dr. Harikeshwar Mishra, JRI, Department of Paediatrics, King George's Medical University, U.P.,

14- Clarification of research proposal entitled ***"A study of maternal liver dysfunction in early pregnancy and its correlation with gestational diabetes mellitus"*** submitted by Dr. Arushi Chaudhary, JRI, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. nil dated nil.

Previous PGTSC Comment	PI response
There are too many objectives. There should be one primary objective and the rest should be grouped into secondary objectives.	**Objective** - To assess the role of first trimester deranged liver function test as early predictor of Gestational diabetes mellitus
The primary objective should be converted into proper research hypothesis in terms of study parameters.	**NULL HYPOTHESIS** – Liver Dysfunction in early pregnancy is not an early predictor of Gestational Diabetes Mellitus **ALTERNATE HYPOTHESIS**–Liver Dysfunction in early pregnancy is an early predictor of Gestational Diabetes Mellitus
Sample size calculation and statistical analysis section should be in accordance with the research hypothesis.	**Sample size** We are going to study the correlation of Gestational Diabetes during first trimester with maternal liver dysfunction. In a previous study conducted by Chen et al. (Maternal liver dysfunction in early pregnancy predisposes to gestational diabetes mellitus independent of preconception overweight: A prospective cohort study. BJOG. 2022;129:1695–1703. https://doi.org/10.1111/1471-0528.17117). The incidence of GDM in women with Liver Dysfunction was 24.6%. In present study we also target a similar outcome. The sample size was calculated using the

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		following formula suggested by Charan and Biswas (2013)1 : $n = \frac{\left[Z_{\alpha} \sqrt{\left(1+\frac{1}{m}\right) p^{*}(1-p^{*})} + Z_{\beta} \sqrt{p1(1-p1)/m + p2(1-p2)} \right]^2}{(p_1 - p_2)^2}$ where, n: Sample size r = ratio of cases in each group= 1 p * : Pooled prevalence of the outcome = 60.15%= 0.60 Zα/2 : critical value of z at 95% confidence = 1.96 Zβ: critical value of z at 80% power = 0.84 p1, : proportion of event in group 1= 67.25 =0.672 p2: proportion of event in group 2= (58.67+54.55/2) = 54.55= 0.54 n= 1.96√(1+1/1)*(0.21)*(1-0.21)+ 1.84√[{(0.27)*(0.75)}/{1+(0.17)*(1-0.17)}]^/ (0.25-0.17)^2 = 405 Thus the calculated sample size is 405 for each group. Keeping a provision of data loss @ 10%, the proposed minimum sample size is 445 patients in each group. Statistical analysis The results will be presented in frequencies, percentages and mean±SD. The Chi-square test will be used to compare the categorical variables. The Unpaired t-test will be used to compare the continuous variables. The p-value<0.05 will be considered significant. All the analysis will be carried out on SPSS 21.0 version (Chica/dl go, Inc., USA).
	What are the cohorts in the study design?	**Study Design** - Prospective cohort study **Study Group** –Women with deranged Liver function test in 1st trimester of pregnancy visiting Antenatal care OPD in the Dept of OBS & GYN, KGMU, Lucknow **Control group**- Women with normal Liver function test in 1st trimester of pregnancy visiting Antenatal care OPD in the Dept of OBS & GYN, KGMU, Lucknow

16-	Clarification of research proposal entitled ***"Study of intraocular pressure variation in subjects with type II diabetes mellitus"*** submitted by Dr. Afreen Saif, JRI, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no. 160/23 dated 10th April, 2023.

Previous PGTSC Comment	PI response
This is prospective cohort comparative study.	I opted for Hospital based cross sectional study because I would take the required data at a snap and I won't be following the patients thereafter.
Define the two cohorts exclusively	Since it's a cross sectional study therefore I have kept two separate groups: **Group 1:** Males and females, age 20 years and above, with Type II diabetes mellitus. **Groups 2 :** Males and females, aged 20 years and above (without Type II DM) apparently healthy individuals
Identify one primary objective and classify the rest into secondary objectives.	**Primary Objectives:** To compare the intraocular pressure in diabetics and non diabetics **Secondary Objective:** To find out the impact of the duration of type II diabetes mellitus on intraocular pressure. To observe the relationship of anthropometric parameters and lipid profile with intraocular pressure.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Convert the primary objective into research hypothesis in terms of study parameters.	**Study Design** - Prospective cohort study **Study Group** –Women with deranged Liver function test in 1st trimester of pregnancy visiting Antenatal care OPD in the Dept of OBS & GYN, KGMU, Lucknow **Control group**- Women with normal Liver function test in 1st trimester of pregnancy visiting Antenatal care OPD in the Dept of OBS & GYN, KGMU, Lucknow
	Sample size calculation is arbitrary.	Type II diabetes mellitus is associated with raised intraocular pressure
	Sample size calculation and statistical analysis should be in coherence with the research hypothesis.	Sample size calculation is done on basis of prevalence of glaucoma among patients with Type II diabetes mellitus (prevalence of diabetes is 12% alone while prevalence of glaucoma in Type II diabetes mellitus ranges between 4.96%-14.6) The above mentioned lines has been quoted from: Dharmadhikari S, Lohiya K, Cheekar V, et al. Magnitude of determinants of glaucoma in Type II diabetics: A hospital based cross sectional study in Maharashtra, India. Oman fournal of ophthalmology 2015;8(1):974-980.
	Sample size calculation and statistical analysis should be in coherence with research hypothesis.	Attached separately

Previous PGTSC Comment	PI response
The study cannot be BOTH retrospective & prospective. Please choose one design of study.	Kindly note that we have arrived at the sample size by using the prevalence of breast cancer in India as per Globocon data 2022 and keeping confidence level of 90%. I would like to emphasize on the point that in our study we need to have paired samples i.e pretreatment biopsy and post treatment resection samples. As per HBCR data, around 40% patients who get biopsy done in KGMU do not undergo complete treatment here. Hence, getting required paired sample size may be difficult in prospective study only as MD Thesis is strictly time bound. Kindly consider our request to approve the retrospective and prospective type of study.
Since patient tissue is being used it will require patient consent whether prospective or retrospective. Consent CANNOT be waived unless the study is on anonymized data.	Kindly note that data will be completely anonymized. Patients won't be involved directly. The slides which have been already prepared from paraffin blocks for routine reporting will be reviewed. We will ensure that the slides will be coded and anonymity of data is maintained and can't be linked, relinked to the identifiable human subject. The cases will be observed by the PI and Co-PI only. The study is purely observational.

Previous PGTSC Comment	PI response
This is not "Cross-sectional Study" as mentioned in the study design.	The study is a **Prospective Cohort Comparative** study as two groups are being compared for their facial and dental proportions with the golden proportion.
This is prospective cohort comparative study. There are two groups under comparison.	The comment has been revised. Yes The study is a prospective cohort comparative study.
Research hypothesis should be properly formulated after identifying the study variables and study parameters.	**Research hypothesis** has been formulated. **NULL HYPOTHESIS** : Faces considered more beautiful exhibit the same parameters used by the orthodontist to assess the successful results. The more beautiful a face was judged to be by the panel , the less the putative golden proportions would differ from the real golden value (1.618) **ALTERNATE HYPOTHESIS** : Faces considered more beautiful fail to exhibit the same parameters used by the orthodontist to assess the successful results. The more beautiful a face was judged to be by the panel , the more the putative golden proportions would differ from the real golden value (1.618) **STUDY PARAMETERS** ARE

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		• FACIAL AESTHETIC DETERMINANTS : 9 proportions(7 vertical and 2 transverse) of the face . • DENTAL AESTHETIC DETERMINANTS : 7 smile characteristics. • So a total of 16 parameters will be assessed in this study.
	Sample size calculation is arbitrary.	**Sample size calculation done** at 90% power Sample size is calculated on the basis of maximum correlation between Dz and VAS scores using the formula: $$n = d\left[\left(\frac{z_\alpha + z_\beta}{C(r)}\right)^2 + 3\right]$$ Where • $C(r) = \frac{1}{2}\log_e \frac{1+r}{1-r}$ • $r = 0.32$, maximum correlation between Dz and VAS scores (Ref : Kiekens RM, Kuijpers-Jagtman AM, van 't Hof MA, van 't Hof BE, Maltha JC. Putative golden proportions as predictors of facial esthetics in adolescents. Am J Orthod Dentofacial Orthop. 2008 Oct;134(4):480-3.) • $d = 0.5$, the design effect • type I error $\alpha = 5\%$

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		corresponding to 95% confidence level • type II error $\beta = 10\%$ for detecting results with 90% power of study
	Statistical analysis section is missing.	Statistical analysis Section added. **Statistical Analysis :** SPSS latest available version and MS Excel will be used for statistical analysis of the data. Continuous variables conforming to a normal distribution will be expressed as mean ± standard deviation. Counting data will be expressed as number and percentages. The $\chi 2$ test and other appropriate tests will used to compare the proportion data between the groups. Correlation and regression analysis will be applied for finding relationships. Other appropriate statistical tests will be used. In all of the statistical analyses, $P < 0.05$ will be considered to be statistically significant.
	Why is there "Child assent form?"	Child assent form has been removed.
	The study subjects are supposed to be in the age group 18-35 years.	The study subjects are in age group 18-35 years. Hence the child assent form has been removed.

ENDOSURG/23/161 dated 19th April, 2023.

Previous PGTSC Comment	PI response
The title of the study is little confusing. The correlation is measured between two variables. What are these variable?	Fluorescence Assessment Software is an inbuilt software of Stryker spyphi machine which is a fluorescence imaging technology, which helps Quantify the intensity in percentage of the fluorescence signal through relative values (known as IP score). QP score measures vascularity (which would correlate with potential viability of parathyroid gland) will be compared with post-operative Serum parathyroid hormone (PTH) levels and clinical signs and symptoms of post thyroidectomy hypocalcemia. This study aims to study the performance of QP score as a surrogate for post-operative Parathyroid hormone levels for anticipating post thyroidectomy hypoparathyroidism.
What is the outcome measure for assessing parathyroid gland perfusion?	Outcome measure for parathyroid gland perfusion will be post-operative Serum Parathyroid hormone level and serum Calcium level along with signs and symptoms of hypocalcemia.
Sample size calculation and statistical analysis section are missing.	Sample size estimation and statistical analysis section has already been mentioned in the proposal. It has been re-attached for your reference.

Previous PGTSC Comment	PI response
Kindly confirm the sample size: 200/980/80	Total sample size 1960 patients included in the study. Sample size attached separately.
Confirm the study duration of 5 years /10 years. Title says 10 years and in the proforma it is mentioned 5 years.	This study is Retrospective study total duration 10 years.
Clarify the process of recruitment of the study population.	Operation theater list from the department and OPD record register of follow-up patients who come to Department of General Surgery, KGMU, Lucknow.
It appears that the PI wants to assess the outcome of patients, who have undergone anal fistula operations in the department and had been followed up for a minimum of 1 year. If so, there is no need for a written informed consent form to be signed by the patient.	Yes, No need for a written informed consent form and attached waiver form separately.
Therefore, the proforma should be submitted for waiver.	As per your advice waiver form attached separately.

Previous PGTSC Comment	PI response
Aim of the study is sketchy.	Respective changes have made in attached proforma copy.
Although in the material and methods section it is mentioned that the place of work will also be the Department of Medicine but there is no PI or Co-PI from the said department.	Following changes are made: a) PLACE OF WORK: Department of Pathology in collaboration with Department of Clinical Haematology. King George's Medical University, Lucknow b) STUDY POPULATION: All diagnosed cases of CML of all age groups will be taken. c) DIAGNOSIS WILL BE BASED ON: - 1.Clinical history 2. Complete blood count and PBS evaluation. 3. Bone Marrow Examination and BCR-ABL translocation studies. d) INCLUSION AND EXCLUSION CRITERIA INCLUSION CRITERIA: □ Patients of all age group will be included. □ Peripheral Blood Smear and Bone Marrow findings suggestive of CML, confirmed on BCR-ABL translocation studies.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		EXCLUSION CRITERIA: □ Other Leukemias. The present study will be performed in The Department of Pathology, King George's Medical University, Lucknow. All demographics including age, sex and gender will be recorded for all the 150 cases. □ Medical history –1) Number of cycles of Chemotherapy 2) Parent and sibling history 3) Organomegaly status □ Venous blood will be used for study purpose. □ Routine complete blood counts will be obtained using Five-part automated counter. Peripheral smear stained with Leishman's stain for morphological study. □ Bone marrow aspiration and trephine biopsy shall be done in all cases for diagnosis of CML which shall be confirmed with BCR-ABL translocation studies □ Vanin-1 Immunohistochemical analysis shall be done on trephine section of all confirmed cases of CML.
	Material and method section incomplete.	Respective changes have been made in attached proforma copy.

IB **Expedited review**

1- Expedited of research proposal entitled ***"A study on Digital screen exposure, temperament, emotional and behavioural problems in pre-schooler children"*** submitted by Ms. Anjana Palni, M.Phil student through her guide Dr. Pooja Mahour, Additional Professor,, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no.632/Psy dated 18th April, 2023.

The above research proposal was forwarded to two reviewers, for review:-
Recommendation of First Primary reviewer:

- Data will be collected from community setting like school. What are these Institutes?
- Sampling frame (List) of these schools is required.
- Title should exclude "preschool children" since the data will be collected from schools. Instead, it should mention the age-group of the subjects.
- Sample size formula is required. The sample size calculation is not clear.
- Nothing is said about the "reliability" and "validity" of the Instruments being used.
- Statistical analysis section be written in detail.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Recommendation ofSecondary reviewer: • On the scientific review committee decision statement is not ticked. • The role of investigators is missing. • The type of study is not ticked and the status of the review is not ticked. • The operational definition of the preschooler needs to be mentioned. • In the title preschooler children is written- preschooler itself includes children; the title needs to be modified. • If preschoolers are to be taken which type of schools are to be selected and what will be the selection criteria? • How long they will be able to retain a child for assessment in a school as proforma seems to be very lengthy? *What* **strategy will be adopted?** ***The above comments forwarded to PI was reviewed by PR*** **PGTSC Decision:** Approved ***Ref. code: XVIII-PGTSC-IB-M.Phil/P1***
2-	Expedited of research proposal entitled ***"A study of character strengths, perceived perceived parenting styles and peer relationship in adolescents with obsessive compulsive disorder"*** submitted by Ms. Pratibha Singh Chouhan, M.Phil student, through her guide Dr. Pooja Mahour, Additional Professor, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no.630/Psy dated 28th April, 2023. ***The above research proposal was forwarded to two reviewers, for review:-*** ***Recommendation of First Primary reviewer:*** • This is a case-control study. Each OCD should be matched with a control (healthy adolescents). • Sampling method is not clear. Different methods of recruitment are given for exposed and control group. • For each recruited OCD, the matched control should be selected at the same time. • Sample size calculation is arbitrary. The sample size formula is required. • Statistical analysis section is very general. It should be in detail and specific to the study objectives. ***Recommendation of Secondary reviewer:*** • On the scientific review committee decision statement is not ticked. • Guide and all co-investigators have almost similar roles and are limited to revising and approving the manuscript. PI is an M.Phil student and will need guidance and support at various steps of her work; which may be mentioned as the role-patient recruitment, supervision, monitoring, publication etc. • Is the PI going to apply interim analysis? • What will be the direct identifiers? • Both objectives seem to be similar. • Study is a broad term, the PI needs to specify that in the topic.

Chairman, IEC

	King George's Medical University, U.P., Lucknow vide letter no. 3435/Ortho/23 dated 29th March, 2023. ***Recommendation of Primary reviewer:-*** • What is the purpose of measuring "trochlear groove distance"? Not clear. • The title says "North Indian population". But the subjects will be recruited from KGMU only. • Sample size calculation is arbitrary. What are the different parameters used in the formula? How are the values arrived at? • What is the study variables (Measurements) used in the study? A list should be prepared. • Data analysis section is very general. It should be specific to the hypothesis of the study. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P1***
2.	Research proposal entitled ***"Adapted ERAS protocol versus conventional care in perforation peritonitis patients undergoing emergency laparotomy- A prospective comparative study"*** submitted by Dr. Johny Lalhruaitluanga, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 2370/Sy/23 dated 3rd March, 2023. ***Recommendation of Primary reviewer:-*** • Sample size calculation and data analysis sections are missing. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P2***
3.	Research proposal entitled ***"Role of plasmapheresis in organophosphate poisoning"*** submitted by Dr. Sujeet Kumar, JRI, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 753/Med/23 dated 28th March, 2023. ***Recommendation of Primary reviewer:-*** • This is not cross-sectional study. • It seems to be pre & post treatment study. It should be clearly mentioned in the primary objective and accordingly research hypothesis formulated. • Sample size mentioned is 20. How is this figure arrived at? Actually, the sample size calculation can be done only after formulating the hypothesis.This can be a pilot study. • Data analysis section is missing. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P3***
4.	Research proposal entitled ***"A study on adverse drug reactions in type 2 diabetes mellitus***

(Shally Awasthi)

(Alok Dhawan)
Chairman, IEC

	patients oral antidiabetic drugs in a tertiary care Hospital in Northern India" submitted by Dr. Neeraj Pathak, JRI, Department of Pharmacology & Therapeutics, King George's Medical University, U.P., Lucknow vide letter no. 299/Pharm/23 dated 12th April, 2023. ***Recommendation of Primary reviewer:-*** • Sample size calculation is not clear. What are the different parameters used in the formula? How are the values in the formula arrived at? • Statistical analysis section is very general. It should be specific to the research hypothesis of the study. **PGTSC Comment:** As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P4***
5.	Research proposal entitled ***"Evaluation of release of various metal ions during fixed orthodontic treatment and their genotoxicity: An in-vivo study"*** submitted by Dr. Chandana Himanshu, JRII, Department of Orthodontics & Dentofacial Orthopedics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 342/Ortho/23 dated 13th April, 2023. ***Recommendation of Primary reviewer:-*** • It is a before and after treatment study. There are two kind of treatments. So basically, there are three groups for comparison. • The study should be planned accordingly, and the hypothesis formulated properly. • Sample size calculation and statistical analysis section shall be done in accordance with the hypothesis formulated. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P5***
6.	Research proposal entitled ***"Clinical, biochemical and neuroimaging parameters of TBM patient after end of one year of antituberculosis"*** submitted by Dr. Praveen Kumar Prince, SRI, Department of Orthodontics Neurology, King George's Medical University, U.P., Lucknow vide letter no. 175/Neuro/23 dated 15th April, 2023. ***Recommendation of Primary reviewer:-*** • Covering letter mentions the project as 'Open label Randomized controlled trial' whereas the synopsis mentions it as being a prospective observational study. • Are any controls being used? • This is not clear from the methodology. • Will the design be altered then? • Section on 'Vulnerable subjects is mentioned as 'Yes' but no details are given. No mention of Special Group subjects in the proforma. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P6***

7.	Research proposal entitled ***"To study time-driven activity-based costing of computed tomography scans in a tertiary care Government teaching Hospital, Lucknow"*** submitted by Dr. Moina Wasi Khan, JRI, Department of Hospital Administration, King George's Medical University, U.P., Lucknow vide letter no. HA/186/23 dated 29th April, 2023. ***Recommendation of Primary reviewer:-*** • The title of the research project should not have location or Institution specifics. Will suggest removal of the word 'Lucknow' • In the Methodology, no mention is made of what kind of data will be collected to calculate the per unit time cost of CT Scans. • What volume of data will be collected is also not mentioned? How many studies are required to reach a valid conclusion? No data sheet/data collection format is attached to the proforma. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P7***
8.	Research proposal entitled ***"Evaluating the relation between surface characteristics and biofilm adhesion over different archwires and brackets- An in vivo study"*** submitted by Dr. Maheshwar Singh, JRII, Department of Orthodontics & Dentofacial Orthopedics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 356/Ortho/23 dated 25th April, 2023. ***Recommendation of Primary reviewer:-*** • Sample size mentioned is 33. However, in the sample size calculation it is mentioned that the sample size is 11 per type of wire. • There are six subgroups (there in each metallic as well as ceramic) • Shouldn't the sample size be 66? **PGTSC Comment:** As above **PGTSC Decision:** Revise & Re-submit. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P8***
9.	Research proposal entitled ***"Observation of oral microbiota and their effect on periodontium three months before and after debonding of fixed orthodontic appliance"*** submitted by Dr. Amar Dipika Singh, JRII, Department of Orthodontics & Dentofacial Orthopedics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 354/Ortho/23 dated 24th April, 2023. ***Recommendation of Primary reviewer:-*** • Sections on Type of subjects/Vulnerable subjects left blank in the proforma. **PGTSC Comment:** As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XVIII-PGTSC-IIA/P9***

4- Clarification of research proposal entitled "***Role of FGFR3 and TP53 gene methylation and their correlation with autophagy regulator gene expression in the progression of non-muscle invasive bladder cancer***" sponsored by UPCST, Lucknow submitted by Mr. Anil Kumar, Ph.D Scholar under the guidance Prof. Vishwajeet Singh, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 608/URO/ dated 19th July, 2023.

Previous EC Comment	PI response
Comment 1: Is this a PhD thesis?	Reply: Yes, this proposal is for PhD thesis.
Comment 2: The project does not make great sense still. The title has been altered, but the problem remains the same.	Reply: This study will shed light on methylation-mediated regulatory responses in the progression of non-muscle invasive bladder cancer. This study is a novel study to explore the unexplored genes expression and DNA methylation pattern in NMIBC. The study will focus on the following points. Epigenetic Analysis: The study focuses on the epigenetic modifications of FGFR3 and TP53 genes by examining the methylation patterns at their promoter sites. Epigenetic alterations play a crucial role in cancer development and progression, and specifically studying these modifications in bladder cancer adds to the current knowledge base. Autophagy Regulators: Investigating the expression of autophagy regulators, such as mTOR, ULK1, Beclin1, and LC3, in non-muscle invasive bladder cancer adds a novel aspect to the study. Autophagy is a cellular process with diverse roles in cancer, and understanding its involvement in bladder cancer may provide valuable insights into potential therapeutic strategies. Correlation Analysis: The study aims to correlate the methylation and expression

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		patterns of FGFR3 and TP53 genes with the expression levels of autophagy regulators. This correlation analysis can uncover potential interactions and relationships between these molecular factors, contributing to a more comprehensive understanding of their collective impact on bladder cancer progression. Clinical Relevance: Investigating the role of the methylation and expression patterns of FGFR3 and TP53 genes in the Progression of non-muscle invasive bladder cancer has significant clinical relevance. Identifying potential biomarkers or therapeutic targets associated with these genes can aid in Prognosis, treatment decision-making, and the development of personalized approaches for patients with bladder cancer.
	Comment 3: Title objectives and study plan don't match.	Reply: The study plan is revised and it is mentioned in Figure 1, in the summary of proposal.
	Comment 4: The study design is not mentioned.	Reply: This is a cohort study. It is mentioned in the corrected version of summary.
	Comment 5: Review of literature/background/references has not been mentioned.	Reply: The review of literature/background and references are attached herewith.
	Comment 6: There is no mention of how the sample size was calculated? Will there be a control group. If yes, what will be that?	Reply: Samples size was calculated by using formula of correlation between expression of markers and DNA methylation, we use r = 0.30, (minimum correlation between markers) where, r is the correlation coefficient that shows Positive correlation between tested markers and clinical parameters (progression, tumour stage, and grade). The value of r ranged from 0 to 1, and

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

			classified into following ranges. r = 0 (means, there is no correlation) r = 0.30-0.50, weak correlation r = 0.50-0.70, moderate correlation r = 0.70-0.90, strong correlation and r = 1 (means, perfect correlation). The expected correlation coefficient is 0.30 for mentioned markers in non muscle invasive bladder cancer. The formula used for sample size calculation is The sample size N= [(Z α +Zβ)/C] 2 +3 Where, α= 0.05, ( )= 0.20, The expected correlation coefficient (r)= 0.30 The standard normal deviate for α = Z α = 1.96 The standard normal deviate for β = Z β = 0.84 C = 0.5 * ln[(1+r)/(1-r)] = 0.3095 C = 0.5* ln [(1+0.30)/ (1-0.30)] C = 0.5* ln (1.857) C = 0.3095 Calculation: N= [(1.96+0.84)/C] 2 +3 N= [2.8/0.3095] 2 +3 N= (9.04 x 9.04) +3 N = 84.83 N= Total 85 samples Total sample size = 85= Group-1= non-muscle invasion bladder cancer(n=85) Group-2= normal bladder mucosal tissue will be taken from the patients of benign prostate hyperplasia (BPH) by cup shaped biopsy technique considered as control group. reference no.2.

"Promoter hypomethylation as potential confounder of Ras gene overexpression and their clinical significance in subsets of urothelial carcinoma of bladder. & quot; Mol Biol Rep 48(3): 2183-2199.
	Comment 7: What is progression how is it defined?	Reply: Progression means the increase in stage and grade of tumour. The most commonly used definition for non muscle invasive bladder cancer progression is proposed by the International bladder cancer group (IBCG). The proposed definition of cancer progression is an increase in T stage from CIS or Ta to T1 (lamina propria invasion), development of T2 or greater or lymph node (N+) disease or distant metastasis (M1), or an increase in grade from low to high. Reference: 1. Lamm D, Persad R, Brausi M, Buckley R, Witjes JA, Palou J, Böhle A, Kamat AM, Colombel M, Soloway M. Defining progression in nonmuscle invasive bladder cancer: it is time for a new, standard definition. J Urol. 2014Jan;191(1):20-7.doi: 0.1016/j.juro.2013.07.102. Epub 2013 Aug 22. PMID: 23973937.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Comment 8: What is the time cut off to label as non progressive?	Reply: The time cut off for non progressive bladder cancer varies, depending on specific clinical guidelines and criteria used in a study design or clinical setting and individual patient's characteristics. However, in this study protocol, 12 months of follow-up period will be taken to assess recurrence and progression of tumour through cystoscopic examination at every 3, 6, 9 and 12 months after initial TRUBT. CECT will be done if needed. This protocol is similar to EORTC guidelines. □ If no evidence of tumour recurrence or disease progression observed during the period of 12 months, the tumours will be classified as non-progressive. □ If the tumour recurs during the 12-month follow-up period on cystoscopic examination, a tumour biopsy (TURBT) is, taken for histopathological examination to assess the grade and T-stage of carcinoma. The tumour size, number, grade, and stage, and lymph node on CECT will be collectively analysed to label as progression. Reference: Sylvester, R. J., et al. (2006). &q uot; Predicting recurrence and p progression in individual patients with stage Ta T1 bladder cancer using EORTC risk tables: a combined analysis of 2596 patients from seven EORTC trials & quot; Eur Urol 49(3): 466-465; discussion 475-467.
	Comment 9: What clinical measures will be correlated and how?	Reply: In the proposed study we will be correlate promoter methylation of mentioned gene and their expression with clinical characteristics of patients such as symptoms, tumor grade, stage, number of tumours, shape, recurrence and

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		Progression of the tumor following TURBT (Histopathology report). The study will correlate these parameters by statistical analysis with Spearman or Pearson correlation methods through SPSS software.
	Comment 10: First page of IEC form, consents, PIS, missing.	Reply: First page of IEC form, consent form and PIS have been attached. In the earlier proposal also these forms were submitted.
	Comment 11: Very Sketchy proposal, especially form a PhD student.	Reply: The aim of this study is to investigate the role of FGFR3 and TP53 gene methylation and their correlation with autophagy regulator gene expression in the progression of non- muscle invasive bladder cancer. Due to the recurrent nature of NMIBC and the ability to progress from low-grade to high- grade tumors, constant surveillance is required. Low grade NMIBC tend to be associated with FGFR3 whereas high grade NMIBC shows loss function of TP53 gene, which suggests progression of tumor by distinct molecular pathways. The efforts have been made to define the pathway behind NMIBC progression, and attempts to identify biomarkers that can help to manage and treat the disease. This study will provide insight on the following points; Information about the epigenetic modifications occurring in proposed genes in relation to bladder cancer. Help to understand the activity and regulation of genes in the context of bladder cancer. This will provide insights into the involvement of autophagy in bladder cancer progression. The study will determine if there are any

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

			associations or correlations between the epigenetic modifications of FGFR3, TP53 and the regulation of autophagy regulators. This will provide insights into the potential role of these genes in the development and progression of bladder cancer and may contribute to the understanding of potential therapeutic targets or prognostic markers.

5- Clarification of research proposal entitled ***"Elucidating mechanisms underlying increased expression and activity of oncogenic kinases and their downstream targets regulating metastasis in breast cancer"*** sponsored by CSIR, New Delhi submitted by Prof. M.L.B. Bhatt, Head, Department of Radiotherapy, King George's Medical University, U.P., Lucknow vide letter no.405/RT/23 dated 11th May, 2023.

Previous EC Comment	PI response
Identify the study variables and population parameters	Population parameters: Set of population that will be incorporated in the current study include: Women belonging to both rural and urban areas. Women with variable educational background (uneducated, primary education and secondary/higher education will be included). Women patients diagnosed with breast cancer of age 30- 55 years. Study variables: Patients diagnosed with and without cancer (i.e., normal samples) in biopsy. Patients with and without relapse after standard chemotherapy.
Specify one primary objective and club	Primary objective:

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	rest into secondary objectives.	To identify the mechanisms underlying aberrant expression/function of regulatory factors involved in cancer progression and drug resistance.The mechanisms behind PIM1-mediated increased oncogenic activities are known, what and how does PIM itself is regulated in these cancers is poorly known. Here we propose to identify E3s and DUBs which may positively regulate stability of oncogenic kinases including PIM1 and thereby enhance their oncogenic kinase activity which may implications in increased cancer stemness and metastasis via regulating CD44. As a result, we aim to determine how PIM1 and its regulatory protein(s) are expressed in healthy individuals and breast cancer patients (primary and metastasized sample). We would also check for PIM1, regulatory E3s/DUBs and CD44 expression in both chemotherapy-treated individuals who experienced relapse and those who did not. Secondary objectives: 1. To elucidate mechanisms underlying regulation of increased expression/activity of PIM1, CD44 and USP10 in breast cancer. 2. To screen E3s/DUBs through immunoblotting for their ability to regulate factors (e.g., PIM, USP10, CD44 etc.) involved in cancer progression/drug resistance. 3. To decipher mechanism of PIM1 and CD44 regulation by identified E3s and DUBs. 4. Evaluate levels of identified E3s/DUBs and PIM1 in primary human samples of breast cancer.

(Shally Awasthi)

(Alok Dhawan)
Chairman, IEC

		5. Elucidating the underlying mechanism of increased stemness and metastasis in breast cancer by oncogenic kinases such asPIM1.
	Convert primary objective into research hypothesis using study variables and population parameters	Primary objective: To identify the mechanisms underlying aberrant expression/function of regulatory factors involved in cancer progression and drug resistance. The mechanisms behind PIM1-mediated increased oncogenic activities are known, what and how does PIM itself is regulated in these cancers is poorly known. Here we propose to identify E3s and DUBs which may positively regulate stability of oncogenic kinases including PIM1 and thereby enhance their oncogenic kinase activity which may implications in increased cancer stemness and metastasis via regulating CD44. As a result, we aim to determine how PIM1 and its regulatory protein(s) are expressed in healthy individuals and breast cancer patients (primary and metastasized sample). We would also check for PIM1, regulatory E3s/DUBs and CD44 expression in both chemotherapy-treated individuals who experienced relapse and those who did not. This study will include: Population parameters: Set of population that will be incorporated in the current study include: Women belonging to both rural and urban areas. Women with variable educational background (uneducated, primary education and secondary/higher education will be included). Women patients diagnosed with breast

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		cancer of age 30- 55 years. Study variables: Patients diagnosed with and without cancer (i.e., normal samples) in biopsy. Patients with and without relapse after standard chemotherapy.
	What is the study design?	Study Design: The aim is to elucidate the mechanism underlying increased expression and activity of PIM1, CD44 etc. and their regulation by E3s and DUBs in breast cancer patients. For this, patient samples will be obtained either in formalin or DMEM (Dulbecco's Modified Eagle Medium) cell culture media for IHC and cell culture-based experiments respectively. PIM1 has been reported to be upregulated in breast cancer. In order to identify the expression of PIM1 and its target gene/protein in cancerous condition, immunohistochemistry (IHC) results from the tissue sections of breast cancer will be compared to the control group i.e., (samples not diagnosed with breast cancer during biopsy). Since PIM1 is also involved in the development of drug resistance, IHC results from patients with tumor relapse will be compared to the group that does not show any relapse after chemotherapy. The findings in the above experimental conditions will be further extended in ex-vivo study using patient samples where following methods/techniques will be used – Protein isolation and western blotting. RNA isolation and determination of RNA levels in the given experimental conditions.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		Cell biology assays (Colony formation assay and mammoshpere assay) Study type: Analytical study Population parameters: Set of population that will be incorporated in the current study include: Women belonging to both rural and urban areas. Women with variable educational background (uneducated, primary education and secondary/higher education will be included). Women patients diagnosed with breast cancer of age 30- 55 years. Study variables: Patients diagnosed with and without cancer (i.e., normal samples) in biopsy. Patients with and without relapse after standard chemotherapy. Expected outcome: We anticipate that USP10 (a deubiquitinase), which has been linked to an oncogenic role in breast cancer, may control PIM1 kinase expression by stabilizing its protein, further fostering the growth and progression of breast cancer. As PIM1 has been discovered to be significantly expressed in cancer stem cells, we are further speculating on the significance of the USP10-PIM1- CD44 axis in enabling cancer cell migration by increasing stemness property in them.
	Sample size calculation is missing.	The sample size calculation is attached herewith as Annexure I.
	Data management and statistical analysis details are not given.	Data Management and analysis: Samples will be collected at KGMU and the processing of samples and experimentation work shall be performed at CSIR- CDRI as described in the methodology section. In order to compare

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		the mean expression between two groups, the student's test will be used. To compare the variance in the expression of two or more groups, the ANOVA test will be used. Benjamini- Hochberg procedure will be used to avoid Type I error (false positives).TheBenjamini–Hochberg method will be used to control the False Discovery Rate (FDR) using sequential modified Bonferroni correction for multiple hypothesis testing. The statistical analyses will be done using GraphPad prism v8. To analyse the IHC data, including diagnostic value of certain molecular expression and prognostic relationship of the biomarkers, results of the IHC will also be statistically analysed.
	Processing of samples and experimentation shall be done at CSIR-CDRI. It is not mentioned in the role of co-investigators.	Dr. Arun Kumar Trivedi, (Ph.D.) (Sr. Principal Scientist, CSIR-CDRI, Lucknow) 1. Conceptualization and designing of studies. 2. Supervision of sample processing and experimentation. 3. Data interpretation and its analysis Role of PIs attached herewith as Annexure II.

7- Clarification of research proposal entitled "***Evaluation of high risk proteins involved in breast cancer and their correlation with tumor aggressiveness and chemotherapy response: A retrospective study***" sponsored by CSIR-CDRI submitted by Dr. Sumaira Qayoon, Additional Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 890/23 dated 8th July, 2023.

Previous EC Comment	PI response
Annexure 1 needs to be filled up for 'risk and benefits', 'data monitoring', 'compensation for injury' etc.	The necessary changes have been done
It is indicated by astrix that written consent will be taken. Kindly clarify since consent waiver form is also attached.	Written consent from patients will not be necessary as this is a retrospective study and we will be using archived samples for which the waiver of consent form has been submitted.
Kindly indicate other centres involved in this multicentre study.	The centres involved in this multicentre study include Department of Pathology, KGMU, Lucknow and CSIR-Central Drug Research Institute, Lucknow.
The first objective indicates that meta-analysis will be undertaken to shortlist six high risk genes while budget indicates that immunohistochemistry will be undertaken from the very beginning of the study. Have those six genes been identified? If yes, then kindly mention	Yes, the six genes have been identified by meta-analysis study. The genes are BCL11A, IMPA2, LAMP3, HORMAD1, B3GNT5 and PDL1. The antibodies required for IHC studies will roughly cost Rs50,000/- each for a 100µL vial. We are anticipating the need for 2 vials for

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	them and if not then the budget quoted may change depending upon the antibody cost of specific genes that needs to be assessed. Kindly clarify.	antibodies every year since the number of samples is high. Therefore, a budget of 5 lakhs/yr and total of Rs15 lakhs for 3 years has been budgeted for antibodies, since they are the primary requirement for IHC studies.
	Regarding third objective to correlate protein expression with chemotherapeutic response, kindly mention the clinical parameters that need to be recorded and the RCB scoring. In addition also attach the data-sheet-proforma that will be used to record the various observations.	Response to chemotherapy will be assessed in terms of Residual Cancer Burden (RCB) and details have been added in material and methods section. Data sheet has been attached
	The second objective states a comparison between TNBC versus non-TNBC patients. What would be the sample size of each group- 100 or 200? Kindly state.	The sample size of TNBC and other subtypes i.e luminal A, Luminal B and Her2/Neu and Normal will be 64 samples for each group.
	Also mention clearly in methodology section as how will you approach each objective clearly.	The first objective of identifying the high-risk proteins through meta-analysis approach, has been completed. The second objective of analysing the expression of high-risk proteins in non-TNBC and TNBC groups will be done by using standard protocol of Immuno-histochemistry (IHC). The third objective of correlating the status of high-risk proteins with response to chemotherapy will be done by evaluating response of tumor to neoadjuvant chemotherapy. This will be assessed in terms of Residual Cancer Burden (RCB) and details have been added in material and methods section.
	What are the chronic immunological disorders that need to be excluded? Kindly state.	This point has been eliminated from the exclusion criteria.
	It is stated in hypothesis section that "in a related study m-RNA expression will be analysed in fresh biopsy tissue sample".	The hypothesis section that declares that "in a related study mRNA expression will be

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Is this ethically approved or will it be submitted? Since this seems to be a prospective study, the current submission being retrospective (based on blocks) seems different. Kindly clarify.	analysed in fresh biopsy tissue sample", is a different ongoing project. This project has obtained ethical clearance earlier (Ref code: 93rd ECM IIA/P5). So this has been deleted from hypothesis section of the current submission.
	Briefly mention the summary of anticipated statistical analysis.	Statistical analysis will be done using the following formula: • Assessments – Primary outcome variable will be at least a 2 folds change in gene expression of high-risk proteins between TNBC and other subgroups of breast cancer patients. – Secondary outcome variables- will be change in expression profile of high-risk proteins between same patient or same group "before" and "after" chemotherapy. Reference variable used for sample size collection is the formula: Number of samples (n) = [2 x (Z (1-α/2) + Z β) x σ 2]/Δ 2 , where Z P (Z (1- α/2) +Z β) = points on normal distribution to give required power and significance, α = significance level, β = power of the study, σ = standard deviation = [2 x (1.96+1.28) 2 x0.721 2]/0.5 2 = 64 of each group. • Total number of samples needed was calculated as follows: 64 patients belonging to one subgroup x 5 groups (TNBC, Luminal A, Luminal B, Her2,

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Normal) = 320 samples total. • The project has received conditional approval from CSIR-CDRI (Annexure-II).

EC Comment:

- Please submit the revised protocol which has incorporated all suggestions.

EC Decision: Approval subject to modification

Previous EC Comment	PI response
Estimate of the antibodies and T cell are to be done in KGMU and data to be collected from various districts. what precautions will be taken to maintain the samples and who will be responsible for it.	The lab technician at each PSU will collect the sample and medical officers will be responsible for overall sample adequacy, representativeness, monitoring and transport of samples. Training of all concerned staff will be done before collection of samples.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Samples will be transported in upright position in ice box. Details have been addedstudy procedure section of revised proposal.
For sampling 10 districts of the state are to be selected. However, it is not.mentioned anywhere how many districts. Will be required for data collection?	The samples will be collected from 10 district subdivided in 290 PSU (primary sampling units). The details are mentioned in sample size section of the revised proposal.
The checklist indicates that any other will take the consent, which needs to be defined how anyone can take the consent and will any other be able to satisfy the query of the participants.	The laboratory Technician will take the consent of participant or parents (in case of children). Training of all the staff involved will be done about the study.
Will the participants be able to understand the study process as it is written?	The study process is mentioned in both Hindi and English languages and the community mobilisers and lab technician will help participants to understand the study process in case of any query.
Assent is not there	Assent has been attached with revised proposal.

Previous EC Comment	PI response
Section Vulnerable subjects is incorrectly filled since patients with metastatic breast cancer will come under the category of seriously ill/terminally ill/vulnerable patients.	Revised annexure has been attached with the correction as suggested.
Section on biological/hazardous materials doesn't mention the use of blood investigation/CT Scan which is ionizing radiation.	Revised annexure has been attached with the correction as suggested. The CT scan which will be performed as a part of the protocol is used only for diagnosing purpose and will help the PI to better understand the disease and its spread, which is as per the routine standard practice. The exposure and the risk with the ionizing radiation that will be used in the CT scan will have the higher benefit to risk ratio.

Patient ID & age and gender: S-45-3-1439(MML)/65 years/Female
Patient Diagnosis: Right intracranial (Basal ganglia) bleed with midline shift.

Patient enrollment date: 27-05-2023
Patient enrollment Arm: Control
Patient follow up under study- No
Follow up visit completed- No
Planning on visit: Expired on 9th June, 2023
SAE detected on date: 28-05-2023
Follow up visit remaining: No
24 hrs. Notified to EC, Sponsor-Yes
14 days analysis report submitted to EC-No

Subject History:

A letter of PI was received in the Office of the Ethics Committee on 16th June, 2023, The Patient MML with subject Id-S-45-3-1439(MML)/65 years/Female was admitted on 27-05-2023 in the neurology emergency with c/o left side body weakness. She was a known case of hypertension on regular medication. Her GCS was 11 at the time of admission and she was diagnosed to have right intracerebral (basal ganglia) bleed with volume of approximately 47.0 ml with midline shift. Since she was fulfilling inclusion criteria, she was recruited after obtaining written informed consent from the family and randomized to the control arm. During the hospital stay she developed tachypnea and altered sensorium at 15:30 hrs. on 28th May, 2023. Respiratory rate was 30/min and saturation 88% on room air. The patient was placed on oxygen at 10 liters with non-re-breathable mask. Chest x-ray showed diffuse bilateral infiltrates in both lung fields suggestive of aspiration pneumonia. Further, she went into sepsis and AKI afterwards for which opinions from pulmonary medicine and nephrology were taken and treated accordingly with IV antibiotics, IVF, ANF, and diuretics and shifted to neurology ICU. Initially the patient showed some improvement as her chest x-ray and renal functions became better but later her further and breathing worsened, so she was intubated and put on mechanical ventilation. She suffered a cardiac arrest at 11:00 PM on 9th June, 2023. Two cycles of CPR were given as per ACLS protocol, but the patient couldn't be revived and declared clinically dead on 9th June, 2023 at 23:28 hrs.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Recommendation of PR: SAE (Aspiration pneumonia needed Intubation & mechanical ventilation during hospital stay resulting in death) is likely due to disease outcome (Right intracranial bleed with midline shift along with systemic hypertension) and not due to intervention as patient was randomized in control arm on 27-05-2023. Causal relationship can not be established and no compensation is required as the patient was properly treated in hospital and SAE happened due to her deteriorating condition on next day (28-05-2023) of enrollment, due to which she remained hospitalized and finally died due to cardiac arrest on 09th June, 2023. **ADR sub Committee Decision:** Noted as above ***Ref. Code:115th ECM IIA/P5***
Ib	ADR of research proposal entitled ***"Indian trial of Tranexamic acid in Spontaneous intracerebral Hemorrhage (INTRINSIC TRIAL)"*** submitted by Dr. Praveen Kumar Sharma, Additional Professor, Department of Neurology, K.G's Medical University, U.P., Lucknow vide letter no. 239/Neuro/23 dated 23rd May, 2023 & vide letter no. 255 /Neuro/23 dated 23rd May, 2023. **Patient ID & age and gender:** S-45-3-1368(AGA)/62 years/Female **Patient Diagnosis:** Left intracranial thalamic bleed with hydrocephalus and IVH. **Patient enrollment date:** 10-05-2023 **Patient enrollment Arm:** Intervention **Patient follow up under study-** Still admitted **Follow up visit completed-** NA **Planning on visit-** NA **SAE detected on date:** 18-05-2023 **Follow up visit remaining:** Yes **Notified to EC, Sponsor-**Yes **14 days analysis report submitted to EC-** NA **Subject History:** A letter of PI was received in the Office of the Ethics Committee on 26th May, 2023. The Patient, **AGA"** 62 years/Female with subject Id - S-45-3-1368, has been admitted on 10-05-2023 in the neurology emergency with c/o sudden onset unconsciousness. She is a known case of hypertension on regular medication. Her GCS was 11 at the time of admission and she has been diagnosed to have left intracerebral (thalamic) bleed with volume of approximately 8.7 ml with IV extensions with mild hydrocephalus. Since she was fulfilling inclusion criteria, she was recruited after obtaining written informed consent from the family and randomized to the intervention arm. She has been gradually improving so was shifted to the neurology ward on 13-05-2023. The patient developed

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	breathlessness and tachypnea at 9 am on 18-05-23. RR was 32/min, spo2 89% on room air. The patient was shifted back to neurology emergency for close monitoring. Currently, she is maintaining saturation on NRM with Oxygen supplementation 12 L /min. Her chest x-ray suggestive of aspiration pneumonitis and all the necessary measures are being taken to treat it. After that a letter was received in the Office office of the Ethics Committee dated 16th June, 2023 that AGA was discharged from the PI's side on 25th May, 2023 and her 90th day follow-up is due on 10th August, 2023. She had aspiration pneumonia on 18th May, 2023 and was managed with IV antibiotics and O2 support. Currently, she is recovering and her condition has been improved. The PI said in the letter that he will update to the Ethics Committee further about her health after following him up on the above said date. ***Recommendation of PR:*** SAE (Hospitalization due to aspiration pneumonia) on 18-05-2023 is most likely due to disease outcome (Left intracranial thalamic bleed with hydrocephalus and IVH) and not due to intervention (Tranexamic acid) as patient was randomized in intervention arm on 10-05-2023.She was gradually improving so was shifted to neurology ward. Subject was discharged on 25-06-2023. Currently she is recovering and her condition has been improved, Her follow up is due on 10th August, 2023 and PI will update to EC further about her health. **Causal relationship can not be established and no compensation is required** as patient was enrolled in intervention arm (10-05-2023) and SAE happened on 18-05-2023 due to aspiration pneumonia for which she was properly treated and was discharged on 25-05-2023 after recovery. **ADR sub Committee Decision:** Noted as above ***Ref. Code:115th ECM IIA/P5***

	Follow up visit remaining: Expired **24 hrs. Notified to EC, Sponsor-**Yes **14 days analysis report submitted to EC-**NA **Subject History:** A letter received in the Office of the Ethics Committee on 28th June, 2023. The Patient "AJH" with subject Id - S-45-3-1597(MML)/55 years/Male, admitted on 19-06-2023 in the neurology stroke ward with c/o sudden weakness right side of the body diagnosed to have left thalamic bleed, volume approximately 3.78 ml. He was randomized to the control arm and received stander treatment. The patient developed sudden onset breathlessness at 11 AM on 26-06-2023. He was tachypneic with Respiratory rate of 34/min and saturation was 92% at 10-12 of supplemental oxygen. His blood pressure was 100/80 mm HG. Upon CT Pulomonery angiography done around 6 pm. it was noted that the patient had acute thrombus in the pulmonary artery at its bifurcation extending into its Right and left branches. He was started on anticoagulation and this event was reported as SAE to the INTRAINSIC Trial coordinator thrombectomy by an intervention radiology in KGMU after getting informed consent at around 12.30 am 27.06.2023. He was also found to have a floating thrombus in the right femoral vein on venous Doppler of the right femoral vein. He Suffered cardiac arrest during the procedure. CPR was done as per standard protocol but could not be revived and was declared dead at 03:10 am on 27.06.2023. ***Recommendation of PR:*** SAE (pulmonary embolism during hospitalization) on 27-06-2023 is most likely due to disease outcome (Left Thalamic bleed with IV extension) and not due to intervention as patient was randomized in control arm on 19-06-2023. He developed sudden onset of breathlessness at 11:00 am on 26-06-2023 and on CT Pulmonary angiography a thrombus was found. He was started on anticoagulation, thrombectomy was done after taking his informed consent at around 12:30 am on 27-06-2023. But he suffered cardiac arrest during the procedure, CPR was done, but he could not be revived and declared dead at 03:10 am on 27-06-2023. **Causal relationship can not be established and no compensation is required** as patient was enrolled in control arm (19-06-2023). SAE (pulmonary embolism) happened on 27-06-2023 and for which he was given proper treatment in hospital, but during thrombectomy he died due to cardiac arrest. **ADR sub Committee Decision:** Noted as above ***Ref. Code:115th ECM IIA/P5***

	placebo-controlled, multicenter trial, assessing the impact of inclisiran on major adverse cardiovascular events in participants with established cardiovascular disease (VICTORION-2 PREVENT)*"** sponsored by M/s Novartis Healthcare Pvt. Ltd submitted by Prof. S.K. Dwivedi, Department of Cardiology, King George's Medical University, U.P., Lucknow, vide letter no.119/Cardio/Res/23 dated 26nd May, 2023. **Patient ID & age and gender:** 1014074/ 59/Yrs. Male **Subject diagnosis:** Sudden Cardiac Death **Patient enrollment date:** 19-12-2022 **Patient follow up under study-** Randomization (Day 1), M-3, M-9, M-15, M-21, M-27, M-33,M-39, M-45, M-51, M 57 to M-69 **Planning on visit-** Month 3 (04 Apr 2023) **SAE detected on date:** 09 May 2023 **Follow up visit remaining:** M-3, M-9, M-15 to M-69 **24 hrs.Notified to EC, Sponsor-**13 May 2023 **14 days analysis report submitted to EC-**13 May 2023 **Subject History:** A letter of PI was received in the Office of the Ethics Committee on 26th May, 2023. A follow up scheduled visit M-3 call was made to the Patient on 13th May, 2023 at 12:00 PM. Subject's family member revealed that the subject **expired** on 9th May 2023 around at 16:00 hrs. Patient complaint of breathlessness for which he consulted a local practitioner on 2nd 4th & 6th May 2023 & was relieved of his symptoms. On 9th May 2023 afternoon (around 4 o'clock), he developed uneasiness in chest & collapsed soon after and local practitioners announced him dead. Death Certificate is not available as he expired at home and death certificate from Government Office yet to receive. No changes were made in the cardiovascular medicine. ***Recommendation of PR: SAE (Death) on 09-05-2023 is likely due to disease outcome (Ant. wall MI with acute LVF resulting in sudden cardiac death) and not due to intervention (Inclisiran) as patient was randomized on 05-01-2023 and 4 months has elapsed after intervention when SAE occurred. Therefore **causal relationship can not be established and no compensation is required** as death occurred at home and no autopsy was done. **ADR sub Committee Decision:** Noted as above ***Ref. Code: 114th ECMIIC/P4***
III	ADR of research protocol no. Prof. S.K. Dwivedi, Department of Cardiology of this University via letter no. 206/Cardio/Res/23 dated 14th July, 2023.

Patient ID & age and gender: 1178105 & 51 yr/Male

Subject diagnosis: CAD/STEMI

Patient screening date: 14-02-2022

Patient follow up under study- Randomization visit M-1, M-2, M-3, M-4, M-5, M-6, M-9, M-12, M-15, M 18, M-21, M 24, M 27 and every three month Follow up till 4 Year.

Planning on visit- Month 15

SAE detected on date: 30-06-2023

Follow up visit remaining: M-15, M-18, M-21, M-24, M 27 and every three month Follow up till 4 Year.

24 hrs. Notified to EC, Sponsor-30 Jun-2023

14 days analysis report submitted to EC-14 July, 2023

Subject History:

A letter was received in the Office of the Ethics Committee on 14th July, 2023. The PI said that the SAE on 30th June, 2023 around 12:00 Earlier to that, many calls were made to remind the subject about follow up visit, but not answered. On 30-June-2023 subject's son received to the PI's call and informed that Subject expired on 1st April, 2023 He said that subject was having breathlessness when he went to toilet in the morning. He also had uneasiness along with this and suddenly he collapsed at around 07:00 o'clock on the same morning. His LAR called local practitioner where he confirmed that the subject expired. He was not taken to any hospital and expired at home. No autopsy was done. After many reminder calls. Subject's LAR did not provide any records and death certificate to ascertain the cause of death. Most likely it was sudden cardiac death and not related to study drug.

Recommendation of PR:

SAE (Death) on 01-04-2023 is likely due to disease outcome (CAD/STEMI) and not due to intervention (Pelacarsen -TQJ230) as patient was Screened on 14-02-2022 and randomized on 04-03-2022 and completed 12 month visit successfully and more than 1 year has elapsed after starting interventional drug when SAE occurred.

Therefore **causal relationship can not be established and no compensation is required** as death occurred at home and no autopsy was done.

(Death certificate is not available)

ADR sub Committee Decision: Noted as above. To be send to DCGI.

	Recommendation of PR:- • Date of SAE-09-05-2023. Date of detection of SAE-07-06-2023. Date of enrolment-04-01-2017. • The follow-up mentioned is only till five (5) years which should end in January 2022 but the section on remaining visits mentions the patient was to be followed up till June, 2025. Why? • The SAE (death) doesn't appear to be related to the study. **ADR sub Committee Decision:** Clarify the discrepancy in date. ***Ref. Code:60th ECM IIA/13***

Research proposal entitled "***Research elective under CBME: A teacher's perspective***" submitted by Dr. Sujita Kumar Kar, Additional Professor, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 784/Psy/23 dated 19th May, 2023. ***Recommendation of Primary reviewer:*** Approved **EC Decision:** As above ***Ref. code: 125th ECM IIA/P10***
11.	Research proposal entitled "***Longterm single versus dual antiplatelet therapy in patients with ischemic stroke due to intracranial atherosclerotic disease: A randomized trial***"

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	submitted by Dr. Praveen Kumar Sharma, Additional Professor, Department of Neurology, King George's Medical University, U.P., Lucknow vide letter no. 260/Neuro/23 dated 15th June, 2023. ***Recommendation of Primary reviewer:*** • Study variables and study parameters should be exclusively identified. • Research hypothesis should be stated in terms of the study parameters. • The sample size calculation is arbitrary in the absence of proper research hypothesis. • The statistical methods used to compare groups for primary outcomes, methods for additional analyses, such as subgroup analyses and adjusted analyses. • How the results will be presented: (i) Participants flow, (ii) baseline data, (iii) outcomes and estimation, (iv) adverse events, etc. **EC Comment:** As above **EC Decision:** Revise & Re-submit. Give the changes done in a tabular form. *Ref. code: 125th ECM IIA/P11*
12.	Research proposal entitled "***Effect of incentive spirometer exercise on pulmonary function in children with spastic cerebral palsy-A prospective randomized case-control study***" submitted by Dr. Sandeep Kumar Gupt, Assistant Professor, Department of PMR, King George's Medical University, U.P., Lucknow vide letter no. 5309/23 dated 16th June, 2023. ***Recommendation of Primary reviewer:*** • This is a pre-post prospective cohort study, as the same set of children shall be used to evaluate the effect of incentive spirometer exercise. • The study should be planned accordingly. • Study variables and parameters should be identified. • Research hypothesis should be stated in terms of study parameters. • Sample size calculation is incorrect as it is for independent samples. In the present case, samples are dependent (paired). • The statistical analysis section is very general and is for independent samples analysis. It should be rewritten in accordance with research hypothesis. **EC Comment:** As above **EC Decision:** Revise & Re-submit. Give the changes done in a tabular form. *Ref. code: 125th ECM IIA/P12*
13.	Research proposal entitled "***Transfer learning assisted classification of dementia sub-types using voice recordings: a cross-sectional study***" submitted by Dr. Shailendra Mohan Tripathi, Associate Professor, Department of Geriatric & Mental Health, King

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	George's Medical University, U.P., Lucknow vide letter no. 216/DGMH/23 dated 14th June, 2023. ***Recommendation of Primary reviewer:*** • The title should be more specific. The objective of the study is not clear from the title. • It is prospective comparative cohort study. The two groups are being compared. • The sample size calculation is not given. • The statistical analysis section is very general. It should be specific to the research hypothesis. **EC Comment:** As above **EC Decision:** Approval subject to modification. Give the changes done in tabular form. *Ref. code: 125th ECM IIA/P13*
14.	Research proposal entitled "***Effect of combination treatment with escitalopram and risperidone in punding behavior among patients with dementia-a retrospective study***" submitted by Dr. Shailendra Mohan Tripathi, Associate Professor, Department of Geriatric & Mental Health, King George's Medical University, U.P., Lucknow vide letter no. 217/DGMH/23 dated 14th June, 2023. ***Recommendation of Primary reviewer:*** • This is retrospective case-control study. • The cases and controls should be exclusively defined for studying the effectiveness. • Sample size calculation is not given. • In the absence of proper research hypothesis, the statistical analysis section looks arbitrary and incomplete. **EC Comment:** As above **EC Decision:** Approval subject to modification. Give the changes done in tabular form. *Ref. code: 125th ECM IIA/P14*
15.	Research proposal entitled "***Artificial intelligence guided BI-RADS classification for suspected breast mass using mammographic imaging data***" submitted by Dr. Priyanka Yadav, Assistant Professor, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no. 620/RD/23 dated 27th May, 2023. ***Recommendation of Primary reviewer:*** • This is a diagnostic test study. • Nothing is said about the evaluation of proposed method of classification. • The sensitivity and specificity of the proposed method are not discussed. • The sample size calculation is not given.

(Alok Dhawan)
Chairman, IEC

	• What kind of AI models shall be used? • The statistical analysis section is missing. **EC Comment:** As above **EC Decision:** Revise & Re-submit. Give the changes of done in tabular form. *Ref. code: 125th ECM IIA/P15*
16.	Research proposal entitled "***Atypical presentation of leprosy: A retrospective cross-sectional study***" submitted by Dr. Swastika Suvirya, Additional Professor & Head, Department of Dermatology, Venereology & Leprosy, King George's Medical University, U.P., Lucknow vide letter no. 149/Skin/23 dated 20th June, 2023. **EC Decision:** Waiver of consent may be given. *Ref. code: 125th ECM IIA/P16*
17.	Research proposal entitled "***A prospective observational study to compare the hemodynamic parameters in supine versus prone position in patients of acute respiratory distress syndrome, using transesophageal Doppler and ultrasound guided inferior vena cava distensibility***" submitted by Prof. Haider Abbas, Head, Department of Emergency Medicine, King George's Medical University, U.P., Lucknow vide letter no. 163/EMD/23 dated 9th June, 2023. ***Recommendation of Primary reviewer:*** • Age group needs to be defined • Hindi consent form needs to be written in simple and understandable sentences. **EC Comment:** As above **EC Decision:** Approval subject to modification. Give the changes done in tabular form. *Ref. code: 125th ECM IIA/P17*
18.	Research proposal entitled "***Postmastectomy pain patterns, associated risk factors & its impact on the quality of life of cancer patients in a tertiary health care center of Northern India- A retrospective & cross-sectional study***" submitted by Prof. Anil Kumar Gupta, Head, Department of Physical Medicine & Rehabilitation, King George's Medical University, U.P., Lucknow vide letter no. nil dated 16th June, 2023. ***Recommendation of Primary reviewer:*** • The study seems to be a cross sectional study. As postmastectomy patients coming to the PMR or General Surgery or after 3 months of mastectomy patients are to be contacted on the basis of records. The data is to be obtained cross sectionally. Thus, title and study design needs to be modified. • Under the heading **Collection of data** subheading **Subject**: study procedure is written. Is it a mixed study? Will face to face interview and telephonic interview be able to provide similar kind of authentic data? How the telephonic interview be

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	verified (audio/ video call)? What time duration will be there to complete one interview? How the points be drawn/ indicated by the patient on body chart? • Some of the sentences are written in past tense. • Hindi ICF needs to be written in simple and understandable language. **EC Comment:** As above **EC Decision:** Revise & Re-submit. Give the changes done in tabular form. *Ref. code: 125th ECM IIA/P18*

19.	Research proposal entitled "***Management of whole body burns-experience at our center and review of literature***" submitted by Prof. Vijay Kumar, Head, Department of Plastic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 862/23 dated 6th July, 2023.
	Recommendation of Primary reviewer:
	• On scientific review sheet
	  • In front of ICF it is written as included which is neither there nor needed, may be written as NA.
	  • None of the decision comments is ticked.
	• The title of the study needs modification. *Management of whole body burns-experience at our center and review of literature…..the word* **our** may be replaced by **a tertiary care** center or Department Name with the Institute Name.
	EC Comment:
	As above
	EC Decision: Approval subject to modification. Give the changes done in tabular form.
	Ref. code: 125th ECM IIA/P19

20.	Research proposal entitled "***Epidemiology of pediatric burn in tertiary care centre of north India-A pilot study***" submitted by Prof. Vijay Kumar, Head, Department of Plastic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 863/23 dated 6th July, 2023.
	Recommendation of Primary reviewer:
	• On the scientific review sheet
	  • In front of ICF it is written as included which is neither there nor needed.
	  • None of the decision comments is ticked.
	• During retrospective extraction of data on the study proforma it would be better to retrieve patient's information anonymously by providing unique ID and excluding the name.
	• The study needs a waiver, which may be given.

15- Clarification of research proposal entitled ***"A Follow up study of adolescents with depressive disorders"*** submitted by Dr. Nagendra Khatore, JRI, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 640/Psy/23 dated 2nd June, 2023.

Previous PGTSC comments:	Response by the Principal-Investigator
The study is for adolescents. The source of sample incudes adult psychiatry OPD as well as child and adolescent psychiatry OPD.	All patients of enrolled in the OPD of Department of Psychiatry, KGMU, Lucknow.
There are quite a few instruments being used for the assessment of outcome event. But the sample size uses just one scale (BDI-21 score).	This study sample size was initially calculated based on previous studies that focused on depression and used the BDI-21 score as the primary outcome measure. We recognized the need to expand our assessment tools to better capture the complex and multifaceted nature of mental health in adolescents. Addition to measuring depression, we have added several other assessment tools to our study to evaluate a broader range of outcomes. These tools include measures of suicidality, sleep quality and overall

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		functioning, which are critical components of mental health that can greatly impact the lives of adolescents. By including these measures, we hope to gain a more compreshensive understanding of the mental health of the adolescents in our study and identify potential areas for internvention and support.
	How the aggregate scores will be obtained from the different scales?	When using multiple scales to assess different variables, it is important to note that each scale measures a specific construct or domain, and therefore, it is not appropriate to calculate an aggregate score across all the scales. In the context, the scales used are meant to assess different variables, such as outcome, sleep, suicidality, temperament, and life events as stressors. Each of these variables is measured by a specific scale that is designed to capture the nuances and complexities of that particular construct.

28- Clarification of research proposal entitled ***"A prospective study to compare clinical outcomes of mastoid cavity obliteration using integrated fascio-periosteal flap in canal wall down mastoidectomy versus conventional canal wall down mastoidectomy"*** submitted by Dr. Shazila, JRI, Department of Otorhinolaryngology & Head & Neck Surgery, King George's Medical University, U.P., Lucknow vide letter no. 415/ENT/23 dated 25th May, 2023.

Previous PGTSC comments:

- Flow chart in methodology section should be included
- Sample size clarification–total sample size is 84, including two gps (42 in each gp) but in calculation total sample size given is 42 -please clarify
- Child Assent form in addition to regular ICF should be included as Children in age gp of 15-17 yrs. will also be taken in study

The above comment was forwarded to Principal-Investigator was reviewed by Primary reviewer.

Recommendation of Primary reviewer:-

Approved

PGTSC Decision: Approval ratified

29- Clarification of research proposal entitled ***"Prospective analysis of intra-operative neuromonitoring (IONM) in patients with intramedullary spinal cord tumors and its comparison with intramedullary surgeries without IONM: a single center study"*** submitted by Dr. Saurabh Raina, SRI, Department of Neurosurgery, King George's Medical University, U.P., Lucknow vide letter no. NS/864/23 dated 31st May, 2023.

Previous PGTSC comments	Response by the Principal-Investigator
Project has 13 Investigators with 8 from one department. This is untenable for a post graduate thesis.	This thesis isthesis as per your advice remove Co-Investigators total 6 Co0Investigaotrs included in the study.
Sample size mentioned 120 in the IEC form and 25 in the synopsis.	Total sample size is 25 patients included in the study, By mistake 120 in IEC form.
Several sections of the IEC form are left incomplete.	Filled IEC attached separately

The above comment was forwarded to Principal-Investigator was reviewed by Primary reviewer.

	• Identify one primary objective, and the rest should be grouped into secondary objectives. • Convert the primary hypothesis into a proper research hypothesis in terms of the study population parameters. • This study seems to be developing a "predictor" model. • There are certain guidelines for developing such model. You should cite those here. • The sample size calculation is missing. There is a proper formula for this. Presently it is very arbitrary. • Statistical analysis should be given in detail for developing prediction model. • In Study period (Patient enrolment: 1.5 minimum tentative) is not clear. Kindly explain. ***The above comment was forwarded to Principal-Investigator was reviewed by Primary reviewer.*** ***Recommendation of Primary reviewer:-*** Approved **PGTSC Decision:** Approval ratified ***Ref. code: XVII-PGTSC-IIA/P4***

study" sponsored by ICMR, New Delhi submitted by Mr. Abhinav Shukla, MBBS 2020 Batch through his Mentor Prof. Bandana Gupta, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 813/Psy/23 dated 27th May, 2023.

Previous PGTSC comments	Response by the Principal-Investigator
In SOP-Checklist- serial no. 8 – Written informed consent columns not ticked- Please revise it.	Written informed consent will be taken from students in the study as subjects, Revised checklist is attached as annexure.
According to the letter (no-45/Ethics/2023 dated 05-04-2023) received through Institutional Ethics Committee, some modifications regarding sample size from 382 to 1000 is requested from PI, but he did not revised the calculation. Therefore, revised sample size calculation for increased in sample size is needed.	Revised sample size calculation is attached as annexure.
Letter of ICMR–STS-grant indicating the name of concerned researcher-not given, please attach or send the approval letter to IEC as soon as PI receive it.	The results of ICMR STS 2023 applicants are yet to be announced on their official website. The study is survey l%csed using online Google forms to collect data which is free of cost. Therefore. we would like to continue our it does not receive a grant from ICMR STS 2023.

	PGTSC Comment: • As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P59***
60.	Research proposal entitled ***"Estimation of micro-RNA 429 in breast cancer"*** submitted by Dr. Shivangini Sharma, JR, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 747/23 dated 19th June, 2023. ***Recommendation of Primary reviewer:*** Approved **PGTSC Decision:** As above ***Ref. code: XIX-PGTSC-IIA/P60***
61.	Research proposal entitled ***"Estimation of micro-RNA 155 in breast cancer"*** submitted by Dr. Taniya Suryavanshi, JRI, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 746/23 dated 19th June, 2023. ***Recommendation of Primary reviewer:*** Approved **PGTSC Decision:** As above ***Ref. code: XIX-PGTSC-IIA/P61***
62.	Research proposal entitled ***"Caregiver burden in chronic obstructive pulmonary disease patients"*** submitted by Dr. Theepan Kumar S, JRI, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 353/CM/23 dated 1st July. 2023. ***Recommendation of Primary reviewer:*** • Nothing is said about the reliability and validity of the instrument to be used. • Can the scale be completed in a reasonable amount of time? • How much training is needed to learn how to administer it? • Sample size calculation is for prevalence study. It will use measurement scale methods. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P62***
63.	Research proposal entitled ***"Clinical outcome of idiopathic congenital talipes equinovarus treated with ponseti method"*** submitted by Dr. Nitin Jeenjwadia, SRI, Department of Pediatric Orthopedics, King George's Medical University, U.P., Lucknow vide letter no. 2466/PaedOrtho/23 dated 4th July, 2023. ***Recommendation of Primary reviewer:*** • Some details should be given about Pirani scoring method.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• How the numbers/scores would be extracted from this scale. • It seems to be a pre-post study done on a single sample. • The sample size calculation is incorrect as it is for two independent samples. • Statistical analysis section is missing. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P63***
64.	Research proposal entitled ***"Epidemiology of pediatric trauma victims admitted to the trauma centre of KGMU: A prospective observational study"*** submitted by Dr. Durga Krishna, SRI, Department of Pediatric Orthopedics, King George's Medical University, U.P., Lucknow vide letter no. 2465/PaedOrtho/23 dated 4th July, 2023. ***Recommendation of Primary reviewer:*** • The objective is not clear. It just says: To describe victim related factors like age, sex,…….. • What is the use of these variables? • Proper research hypothesis should be formulated after identifying the study parameters. • Sample size calculation, statistical analysis should be in coherence with research hypothesis. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P64***
65.	Research proposal entitled ***"CT guided evaluation of rotational deformity in femoral shaft fractures in Children treated by flexible elastic intra medullary nailing: A prospective cohort study"*** submitted by Dr. Praseeth K.R, SRI, Department of Pediatric Orthopedics, King George's Medical University, U.P., Lucknow vide letter no. 2467/PaedOrtho/23 dated 4th July, 2023. ***Recommendation of Primary reviewer:*** • Some details of evaluating Scales are required including their reliability and validity. • How are these scored? • Sample size calculation is for prevalence study, not for measurement scale. • The statistical analysis section is very general. It should be specific to the research hypothesis.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	PGTSC Comment: • As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P65***
66.	Research proposal entitled ***"Recurrence and survival analysis of gynaecological cancers in view of current institutional diagnostic practices"*** submitted by Dr. Anjali Gautam, JRI, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 858/23 dated 3rd July, 2023. ***Recommendation of Primary reviewer:*** • The primary objective should be very specific and clear. • The aim says: To study various risk factors associated with…….and behaviour of four common gynaecological cancers, particulary cervical cancer. • How be these factors measured? Data collection sheet/ questionnaire is required. • Sample size calculation is incorrect. It is for prevalence study. • Statistical analysis section is missing. **PGTSC Comment:** • As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P66***
67.	Research proposal entitled ***"Study of microsatellite instability expression in gallbladder cancer and its clinicopathological correlation"*** submitted by Dr. Ankit Kumar, SRI, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/1088/23 dated 4th July, 2023. ***Recommendation of Primary reviewer:*** • The study design is retrospective as well as prospective. • It cannot be both. Each type of study uses different methodology and analysis and sample size calculation. • It has to be split into two different parts. • Each type shall use different subjects. • Sample size calculations are not given. • Statistical analysis section is very general. It should be specific to the study objectives. **PGTSC Comment:** • As above **PGTSC Decision:** Revise & re-submit. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P67***
68.	Research proposal entitled ***"A study of clinicopathological profile and survival outcome of adult extremity soft tissue sarcoma after curative surgery"*** submitted by Dr. Monika

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Shekhawat, SRI, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/1093/23 dated 4th July, 2023. ***Recommendation of Primary reviewer:*** • The study design is retrospective as well as prospective. • It cannot be both. Each type of study uses different methodology and analysis and sample size calculation. • It has to be split into two different parts. • Each type shall use different subjects. • From the proforma (data collection form), it is not clear; How to derive outcomes of surgical patients in terms of disease-free survival and overall survival. • Sample size calculation and statistical analysis section is required. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P68***
69.	Research proposal entitled ***"Study of factors predicting regional lymph nodes metastasis in marjolin's ulcer"*** submitted by Dr. Prabhat Shukla, SRI, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/1089/23 dated 4th July, 2023. ***Recommendation of Primary reviewer:*** • In the aim it is supposed to be a prevalence study. • The primary objective is to find a predictive model. • The two are completely different objectives. • The objective should be well defined and study should be planned accordingly. • The study design is supposed to be retrospective as well as prospective. • This is also a contradiction. • Statistical analysis section is vague. **PGTSC Comment:** • As above **PGTSC Decision:** Approval subject to modification. Give changes done in a tabular form. ***Ref. code: XIX-PGTSC-IIA/P69***
70.	Research proposal entitled ***"Study of clinicopathological profile and survival outcomes of patients following curative surgical treatment for a second primary oral cancer"*** submitted by Dr. Priyanka Khilari, SRI, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/1091/23 dated 4th July, 2023. ***Recommendation of Primary reviewer:*** • The aim and objectives are not properly defined.

Previous EC Comment	PI response
Point 6 on page 17, Hindi consent mentions about CMC Ludhiana and not KGMU [Copy paste effect]. Same issue in English consent.	ICF has been updated as per the comment and the same has been attached.
They should check carefully to confirm if the consent is tailored for KGMU.	ICF has been updated as per the comment and the same has been attached.
Who will pay for the chemotherapy, surgery and complications, if they are there?	As this is a Pilot study and we are not proposing any change in treatment but timing, cost of chemotherapy and surgery have to be covered by the participating institution. Sponsor will cover the cost of 1 CT SCAN per patient recruited from KGMU Lucknow. However, If this pilot trial is found to be safe and efficacious then it will lead to the main trial in India and other global south countries which will be funded. The main trial will recruit a larger sample size with more centers involved having the potential to answer questions conclusively regarding our hypothesis and will be a funded trial. Any complications arising from the treatment as per the protocol will be covered through the Insurance for Foxtrot 2 India. Financial considerations are mentioned in the attached letter provided by the sponsor.
What about the issue of compensation?	Any complications arising from the treatment as per the protocol will be covered through the Insurance for Foxtrot 2 India. Financial considerations are letter provided by the sponsor.
These two issues and use of previously used drugs in different protocol - Expert in drug trial need to be consulted.	The drugs used in these trials are exactly the same which are used in routine practice. There is no change in the protocol of the drug administration. The Department of Surgical Oncology,

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		KGMU is providing chemotherapy for cancer patients including colon cancer for last 25 years. We have all the expertise to administer the chemotherapy drugs to the patients for this study. In addition we have included Prof. Kirti Srivastava, Department of Radiotherapy, who is also treating the colon cancer patients with these drugs on routine basis. We believe her vast experience as a drug expert will help in the study.
	The IEC of CMC, Ludhiana [list of documents is mentioned in the approval letter but it is not attached] and AIIMS, Rishikesh have approved the trial.	The same has been attached.
	The font of consent should be 14 and the line spacing should be more [1.5 at least]	Changes as per the comment have been updated in the ICF and same has been attached.

EC Comments:

- Kindly provide the insurance

EC Decision: Approved

Insurance received on 2nd September, 2023 by email & valid till 17th August, 20204.

2- Clarification of research proposal entitled ***"Evaluation of the safety and efficacy of Ganges water phage therapy in H. pylori related dyspepsia: A randomized controlled pilot-trial"*** submitted by Dr. Ajay Kumar Patwa, Additional Professor, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1668/MED/23 dated 10th August, 2023.

Previous EC Comment	PI response
The documents/certificates from government approved labs proving the water is untreated from Ganga river at Prayag should be submitted about quality of water, bacterial content etc. To prove that it is potable.	The water sampling will be done from Rudraprayag not Prayag. The water source has been tested by the state pollution control board government of Uttarakhand. The water from Rudraprayag is safe for drinking without Conventional water treatment and has been classified as "Class A". Please refer to the attached report, page No. 13, serial no. 4 ofthe provided table.
As far as I know, informally that the water in the river is not of quality to be	Please refer to the attached report Page No. 13 serial no. 4 of the provided table.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	used as drinkable	
	The project has ethical issues. Though people may be drinking this water, as medical doctors cannot give it to patients because the city municipality treats river water before supplying to the city homes	No conventional water treatment is required. The report is attached for reference.

Recommendation of Primary reviewer:

- H. pylori dyspepsia of medical condition for which treatment is available. Ganga water is not a medication; hence it cannot be prescribed by a doctor.

EC Comment: As above

EC Decision: Not approved

Ref. code: 121st ECM IIA/P4

3- Clarification of research proposal entitled ***"Effect of prospective bilateral superficial cervical plexus nerve block on post-thyroidectomy headache and cervical pain: A randomised controlled trial"*** submitted by Dr. Pooja Ramakant, Prof. Junior Grade, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. ENDOSURG/2023/213 dated 15th June, 2023.

Previous EC Comment	PI response
Compensation for injury: What if someone has allergic reaction to drug?	Although those patients who are allergic to the drugs will be excluded, still if they develop allergic reactions, they will be managed as per the guidelines and protocol of LAST (Local Anaesthetic Systemic Toxicity). The above has now been included in the methodology section and the Informed Consent forms.
Objectives very vague Objectives not well defined	Objectives have been modified and rewritten in a better manner: **Primary Objective:** To compare the efficacy of Preoperative Bilateral Superficial Cervical Nerve Block versus no block, on Post-Thyroidectomy Headache and Cervical Pain, as self-perceived by the patient using a Visual Analogue Scale. **Secondary Objective:** To compare intensity of pain in postoperative phase through visual analog scale. To compare total requirement of analgesic consumption

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	during the post-operative stay. To compare the duration of first request for analgesic. To compare the incidence of headache
Elements of RCT need to be mentioned	RCT Protocol has been attached
Data Analysis: What tests?	Student t-test and chi-square test will be used. The significant level will be considered as less than 0.05 (p<0.05). The above has been written now in the Methodology as well.
Implications: accurate dosage….Dosage is not being studied.	Accurate dosage— this phrase has now been removed.
Why subject participation for 4 months?	We believe, as per our department statistics, that 4 months will be enough to achieve the required sample size. Hence, subject participation will be for 4 months, followed by 2 months of data analysis and final report preparation.
Senior Resident can't be Co-Principal Investigator.	Senior Residents name has been removed from the list of Co-Principal Investigators.

Recommendation of Primary reviewer:

- Given the objectives, title can be notified as a Comparative study rather than a RCT.

EC Comment: As above

EC Decision: Approved with condition to change of Title

Ref. code: 123rd ECM IIA/P3

4- Clarification of research proposal entitled ***"Morphological and morphometric analysis of cadaveric lung in North Indian population"*** submitted by Dr. Arvind Kumar Pankaj, Additional Professor, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 263/ANAT/23 dated 14th August, 2023.

Previous EC Comment	PI response
Title	Morphological and Morphometric analysis of adult lung in north Indian population: a cadaveric study
OBJECTIVE	AIM- The aim of the study is to observe the morphology and morphometry of right and left human cadaveric lung. OBJECTIVE- 1. To study the normal length, breadth and

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	thickness of both right and left lungs. 2. To study the variations in the length, breadth and thickness, of both right left lungs. 3. To study the normal fissures, lobes and their variations, of both right and left lung. 4 To study the number of bronchi, pulmonary artery, pulmonary vein.
SAMPLE SIZE	100 Cadaveric Lung (50 Right and 50 Left Lung)
METHODOLOGY	One hundred isolated, adult formalin fixed cadaveric lungs preserved in the dissection hall of anatomy department of King George`s medical University, Lucknow were observed for the study. The lungs belonged to the adult age group between 45-75 years. No gender difference of the lungs was made in this study. Each lung was washed with water and carefully measured using a thread, measuring tape and measuring scale. Length, breadth, thickness of both right and left lungs were measured and recorded. So also the length of fissures (both horizontal and oblique fissures in case of right lung and oblique fissure in case of left lung), their depth were measured and recorded. Any unusual or rare variations were photographed using a DSLR camera.
STATISTICAL SECTION	Sample Size: The sample size formulae used are as follows: (Bernard, 5th edition) n= Sample size σ = Standard Deviation Δ = Difference of means κ= Ratio Z 1-α/2 = Two-sided Z value Z 1-β = Power • Statistical analysis of the data will be performed by using Statistical Package for Social Studies (SPSS) 23 rd version

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	package. • The mean, standard deviations and standard errors of all measurements will be estimated and 95% confidence interval, both upper and lower, will be calculated for all.
INFORMED CONSENT	I had attached waiver with ethical form.

Recommendation of PR:
Provisionally Approved
EC Decision: Approved

Ref. code: 124th ECM IIA/P6

5- Clarification of research proposal entitled ***"Randomized control trial of direct pulp capping using laser"*** submitted by Prof. Rakesh Kumar Yadav, Department of Conservative Dentistry & Endodontics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 238/Coms&Endo/23 dated 11th August, 2023.

Previous EC Comment	PI response
For example, (i) proper formulation of research hypotheses (ii) study variables, (iii) primary and secondary outcome measures, (iv) method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc), (v) How double blinding is done, (vi) how the success of masking assessed.	i. Proper formulation of research hypothesis Null Hypothesis: There is no significant difference in the success rates of direct pulp capping in permanent molars when using:- a. Biodentine and GIC, b. Er: YAG Laser and GIC and c. Er: YAG Laser, biodentine and GIC. Alternative Hypothesis: There is a significant difference in the success rates of direct pulp capping in permanent molars when using a. Biodentine and GIC, b. Er: YAG Laser and GIC and c. Er: YAG Laser, biodentine and GIC. ii. Study variables Success was assessed via evaluation of clinical symptoms a. Spontaneous pain b. Sensitivity on percussion and palpation c. Change of colour

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		d. Presence of edema or fistula in the soft tissue e. Pathologic mobility f. Lymphadenopathy of the related region And radiological outcomes a. Radiolucency at periapical or furcation area b. Pathological internal or external resorption c. Widening of the periodontal space d. Calcification of the pulp anal iii. Primary and secondary outcome measures. The primary outcome was the survival of the teeth. Survival was defined as a monosymptomatic tooth that responded to sensibility testing and did not exhibit any periapical changes radiographically. Follow up included pulp testing and periapical radiograph at 1 month and 6 months. The secondary outcome measure was Postoperative pain 1 week after treatment. The patients were asked whether they had any pain during the first 3 days after treatment. iv. Method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.) Random allocation sequence will be generated using random allocation software. v. How double blinding is done, The participants and the examiner will be blinded. The operator will not be blinded. vi. How the success of masking assessed

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Masking cannot be done as Biodentine and laser used during the pulp capping procedure. will be revealed to the principal investigator at the time of surgery.
There seems to be three groups for comparison	This is a multi-arm trial that uses a parallel- group design for the 3 groups included in the study.
The sample size calculation is arbitrary. It is for two group's comparison. It is due to absence of proper research hypothesis	The sample size calculation is based on the research article " Direct pulp capping with calcium hydroxide, mineral trioxide aggregate and biodentine in permanent young teeth with caries- Randomized Controlled trial" by Brizuela et.al.. Sample size n= Z 2 (1-P) x P e 2 here P=13.64% (failure of capping in calcium hydroxide) Z= 1.96 e=5% (margin of error) n= 1.96 2 x (1-0.1364) x 0.1364 0.05x 0.05 ~177 n=177 (for large population >10000) For small population, Sample size for small population N N'=N x n/N+n N'=42 for small population We divide the sample size 42 into three groups in one to one ratio (1:1). The sample size for each group is 14.
The statistical methods used to compare groups for primary outcomes, methods for additional analyses, such as subgroup analyses and adjusted analyses.	Data collected will be compiled on to a MS Office excel worksheet & will be subjected to statistical analysis using an appropriate package like SPSS software. Fischer exact test will be used to determine if there are nonrandom associations between two categorical variables.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		Keeping alpha error at 5% and Beta error at 20%, power at 80%, p<0.05 will be considered statistically significant. At the time of sample size calculation, beta error was kept to be at 10% and power at 90%.
	How the results will be presented (i)participants flow, (ii)baseline data, (iii)outcomes and estimation, (iv)adverse events, etc.	(i)Participants flow Details of participant flow will be given in the form of a diagram describing the total number of participants enrolled in the study, and those excluded (based on the inclusion and exclusion criteria) or lost to follow up. Any protocol deviations if occur, will be specified. The time period of recruitment along with the period of follow up will be mentioned. (ii)Baseline data A tabular presentation providing details about baseline demographics and clinical Characteristics of the participants will be given. (iii)Outcomes and estimation For every outcome, a summary of study results including the mean and standard deviation will be specified for each group. (iv)Adverse events No adverse events have been reported so far with either of the planned interventions, but in case they occur will be specified.

8- Clarification of research proposal ***"Development of risk scoring algorithm using clinical, biochemical, ultrasound and molecular markers to predict preeclampsia-A pilot study"*** sponsored by UP-CST submitted by Prof. Amita Pandey, Department of Obstetrics & Gynaecology, King George's Medical University, U.P., Lucknow vide letter no. OG/241/23 dated 17th August, 2023.

Previous EC Comment	PI response
If females with 11-16 weeks pregnancy are to be included in the study, inclusion criteria should denote the same.	In this study 100 pregnant women with singleton pregnancy have to be registered in 2 groups depending on their past obstetric history – whether they have a history of PE/Eclampsia in previous pregnancy or not. Pregnant women come for antenatal booking and check-up anytime between missing a

(Alok Dhawan)
Chairman, IEC

		period to late in pregnancy. After their first registration visit, they usually come after 2-3 months. In order to avoid missing any patient who comes before 11 weeks of pregnancy, all women coming for ANC booking upto 16 weeks of pregnancy will be registered. Patients who are registered before 11 weeks gestation will be appropriately instructed to come between 11- 16 weeks for the investigations. Pregnant women with singleton pregnancy attending antenatal OPD upto 16 weeks gestation. **Inclusion criteria –** **Group A**- 50 pregnant women with a history of PE/ eclampsia in previous pregnancy **Group B**- 50 pregnant women without any history of PE/ eclampsia in previous pregnancy
	In Hindi consent form space missing between words	Necessary correction made in the Hindi consent form.

Previous PGTSC comments	Response by Principal Investigator
The study design is not mentioned	Study design has been mentioned. (Enclosed in Proforma) STUDY DESIGN This is a prospective study and the pre-op study variables will be compared with that of post op variables.
Aims and objectives should be converted into proper research hypothesis in terms of the study variables and parameters.	Aims and objectives has been converted into proper research hypothesis in terms of the study variables and parameters. (Enclosed in Proforma) RESEARCH HYPOTHESIS Stock TMJ prosthesis in patients needing Total Joint Replacement will lead to relief of symptoms and improved study variables involving electromyography study, bite force, maximum inter-incisal opening, pain, functional and aesthetic rehabilitation along with patient satisfaction pre- and post-Operatively.
Sample size calculation is arbitrary. It can be done only after identifying the study design and the research hypothesis.	Sample size calculation has been revised after identifying the study design and the Research hypothesis. (Enclosed in Proforma) SAMPLE SIZE CALCULATION

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		Sample Size at 80% Power of Study Sample size is calculated on the basis of proportion of mean pain reduction in the study cases using the formula: Where p1 = 0.67 [=(8.5-2.8)/2.8] expected proportion of mean pain reduction in the study cases p2 = 1.0 expected proportion of mean pain reduction in the study cases under null hypothesis when procedure not applied (Ref. Eric J. Granquist; Peter D. Quinn (2011). Total Reconstruction of the Temporomandibular Joint with a Stck Prosthesis., 19(2), 221–232.) e = 0.5, the attributable risk considered to be clinically significant Type I error, α=5% Type II error β=20% for setting power of study 80%. The sample size is calculated to be n = 6.
	Statistical analysis section is incomplete. It can also be done only after identifying the proper research hypothesis.	Statistical analysis section is completedafter identifying the proper research hypothesis. (Enclosed in Proforma) STATISTICAL ANALYSIS: SPSS latest available version (presently ver 29) and MS Excel will be used for statistical analysis of the data. Continuous variables conforming to a normal distribution will be expressed as mean ± standard deviation. Counting data will be expressed as number and percentages. The unpaired test/ANOVA will be used for inter-group analysis. The χ2 test will be used to compare the proportion data between the groups. Other appropriate statistical tests will be used. In all of the statistical analyses, P < 0.05 will be consid red to be statistically significant.

9- Clarification of research proposal entitled ***"To study time-driven activity-based costing of computed tomography scans in a tertiary care Government teaching Hospital, Lucknow"*** submitted by Dr. Moina Wasi Khan, JRI, Department of Hospital Administration, King George's Medical University, U.P., Lucknow vide letter no. HA/406/23 dated 9th August, 2023.

Previous PGTSC comments	Response by Principal Investigator
The title of the research project should not have location or Institution specifics.	As per your Recommendation I have taken out the word Lucknow from my

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Will suggest removal of the word 'Lucknow'	title. Now my Title is "To study time-driven activity-based costing of computed tomography scan in a tertiary care government teaching hospital"
	In the Methodology, no mention is made of what kind of data will be collected to calculate the per unit time cost of CT Scans.	Process mapping, time-motion study, and activity-based costing are three major tools that will be used to calculate the per unit time cost of CT scan.
	What volume of data will be collected is also not mentioned? How many studies are required to reach a valid conclusion? No data sheet/data collection format is attached to the proforma.	Total of three CT scan machines functional in main KGMU will be taken for the study. All cases of the functional CT scan machine will be taken for the study for a period of one month each.The observational data will be collected for one month each, of all three functional CT scan units to reach a conclusion. As per your recommendation, I have attached the datasheet.

25-	Clarification of proposal proposal entitled ***"Study of prevalence and factors associated with cognitive dysfunction in systemic lupus erythematosus, attending a tertiary care centre"*** submitted by Dr. Rupal Prasad, SRI, Department of Clinical Immunology & Rheumatology, King George's Medical University, U.P., Lucknow vide letter no. 652/23 dated 12th August, 2023.

Previous PGTS Comment:	**PI response**
There is no co-guide from Pathology or Biochemistry Department for supervising biochemical investigations.	Study is based on only clinical questionnaire. Blood investigation will be performed routinely; no additional investigation will be done for the study. Hence Co-guide from pathology and biochemistry is not necessary for the study.

The above comment was forwarded to PR:

27- Clarification of proposal proposal entitled ***"Recurrence and survival analysis of gynaecological cancers in view of current institutional diagnostic practices"*** submitted by Dr. Anjali Gautam, JRI, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 1104/23 dated 17th August, 2023.

Previous PGTS Comment:	**PI response**
The primary objective should be very specific and clear.	Primary objective: To record and study survival of gynaecological cancer patients in and around Lucknow
The aim says: To study various risk factors associated with…….and behaviour of four common gynaecological cancers, particulary cervical cancer.	Aim: To statistically co-relate findings of various diagnostic tests currently being used in our institute, for gynaecological cancer management. Secondary objective: To study associated risk factors and recurrence in different histological cancer types.
How are these factors measured? Data collection sheet/ questionnaire is required	These factors will be measured from archival data available in department of Pathology, at the time of biopsy submission. Phone numbers of patients who received histopathology reports will be retrieved and patients will be contacted either on phone or during their follow up visits in department of Obstetrics & Gynecology. Questionnaire and data collection excel sheets are being finalised.
Sample size calculation is incorrect. It is for prevalence study.	Sample size is calculated based on previous studies conducted as follows: nevent ≥ $2(Z1-\alpha/2 + Z1-\beta)$ 2 (log4 HR) 2

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		Where, n- sample size HR- Hazard ratio (1.25) α- type 1 error (0.05) β-type 2 error (0.2) Z- Z statistic for a level of confidence,for the level of confidence of 95%,which is conventional, Z value is 1.96 Sample size= 316 Reference: Matsuo K, Purushotham S, Jiang B, Mandelbaum RS, Takiuchi T, Liu Y, Roman LD. Survival outcome prediction in cervical cancer: Cox models vs deep-learning model. Am J ObstetGynecol. 2019 Apr;220(4):381.e1-381.e14. doi: 10.1016/j.ajog.2018.12.030. Epub 2018 Dec 21. PMID: 30582927; PMCID: PMC7526040.
	Statistical analysis section is missing.	Statistical analysis is done as follows- A range of bivariate/multivariate statistical analysis will be used to fulfil the objective of the proposed study. The mean and its standard error will be calculated for continuous variable. The categorical variable will be described using frequency distribution and percentages. The t-test, the chi-square test, log rank test and Kaplan meier plots will be used to check the significance of independent variables. Besides cox-proportional hazard model will also be employed to analyse the risk factor of survival of cancers.

	Anaes/574/23 dated 24th May, 2023. ***Recommendation of Primary reviewer:-*** • Kindly provide properly filled Patient Informed Sheet. **PGTSC Comment:** As above **PGTSC Decision:** Approval subject to modification with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P30***
31.	Research proposal entitled ***"A study of prevalence and correlates of DHAT syndrome in young males diagnosed with depression"*** submitted by Dr. Abhay Narayan Dwivedi, JRI, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 1114/Psy/23 dated 19th July, 2023. ***Recommendation of Primary reviewer:-*** • Approved **PGTSC Decision:** As above ***Ref. code: XX-PGTSC-IIA/P31***
32.	Research proposal entitled ***"Prevalence and correlates of obsessive compulsive symptoms and obsessive compulsive disorder in patients of schizophrenia"*** submitted by Dr. Rahul, JRI, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 1113/Psy/23 dated 19th July, 2023. ***Recommendation of Primary reviewer:*** • Null hypothesis is not properly defined. The correlation is measured between two continuous variables, not between "prevalences". • The sample size calculation is not clear. The right formula is required. • The statistical section is very general. It should be specific to the hypothesis and objectives. **PGTSC Comment:** As above **PGTSC Decision:** Approval subject to modification with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P32***
33.	Research proposal entitled ***"Additive effect of nitroglycerine spray with lignocaine spray lignocaine spray alone on haemodynamic responses to laryngoscopy and endotracheal intubation a comparative study"*** submitted by Dr. Vasioullah Khan, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/577/23 dated 24th May, 2023. ***Recommendation of Primary reviewer:*** • Title should be: ""Additive effect of nitroglycerine spray with lignocaine spray and lignocaine spray alone on haemodynamic responses to laryngoscopy and endotracheal intubation: a comparative study". • The study design is "prospective cohort study". • The patients will be divided randomly among two cohorts. • Give the details of randomization.

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Sample size calculation is not clear. Explain the different parameters (standard deviation, mean etc.) used in the formula. What are the variables whose mean and standard deviations are used? Actually the research hypothesis should be stated in terms of parameters of the study design. • The statistical section is very general. It should be specific to the hypothesis and objectives. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P33***
34.	Research proposal entitled ***"Role of soluble triggering receptor expressed on myeloid cells-1 (sTREM-1) in neonates with early and late-onset neonatal sepsis"*** submitted by Dr. Shradha Gupta, JRI, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 501/23 dated 22nd July, 2023. ***Recommendation of Primary reviewer:*** • It is not clear whether it is a comparative study (Comparison between sTerM-1 levels of two kinds of neonates) or correlation study (Correlation or association between SterM-1 level and severity of infection). • The severity of infection has to be defined. • The sample size formula is for prevalence study. Anyway, it can be formulated after clarification of "primary objective" as in point 1. • Statistical analysis section is missing. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P34***
35.	Research proposal entitled ***"Impact of left bundle branch area pacing vs right ventricular apical pacing on cardiac function on intermediate (3 Month) term"*** submitted by Dr. Usha Kiran Kurrey, SR, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 1382/Cardio/23 dated 30th June, 2023. ***Recommendation of Primary reviewer:*** • It is a prospective cohort study. • Two groups (cohorts) are being compared. • The study variables (including outcome variable "LV systolic function") and study parameters should be exclusively defined. • The primary objective should be converted into research hypothesis using the study parameters. • The sample size calculation is arbitrary. It should be specific to the research hypothesis. • The statistical analysis section is general. It should be specific to the research

(Shally Awasthi)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	hypothesis. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P35***
36.	Research proposal entitled ***"Efficacy of microvascular couplers for venous microanastomosis in the reconstruction of oral defects"*** submitted by Dr. Ranjeet Singh, JR, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 730/OMFS/23 dated 27th July, 2023. ***Recommendation of Primary reviewer:*** • This seems to be a comparative study. • The control group should be properly defined. • The null hypothesis is not properly defined. It should be defined in terms of study parameters and variables, which should be identified for the study. • The sample size is for prevalence study. It should be specific to the research hypothesis. • The statistical analysis section is general. It should be specific to the research hypothesis. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P36***
37.	Research proposal entitled ***"A study of weekly brief telephonic intervention in patients with alcohol Dependence"*** submitted by Dr. Shobhit Nain, JRI, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 1127/Psy/23 dated 20th July, 2023. ***Recommendation of Primary reviewer:*** • The outcome "Cumulative abstinence duration" should be exclusively defined. Its method of measurement should be outlined. • The null hypothesis is defined in terms of the parameter (e.g. mean, proportion etc.) not the variables. • How the controls are selected. The detail is required. • Sample size calculation is arbitrary. It can be defined after properly defining the research hypothesis. • Statistical analysis section is missing. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P37***
38.	Research proposal entitled ***"Clinical audit on peripartum and postpartum***

	hysterectomy at a tertiary care center and its outcome" submitted by Dr. Ananya Verma, JRI, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/935/23 dated 1st August, 2023. ***Recommendation of Primary reviewer:*** • The primary objective is not clear. It says to find "incidence" and "risk factors". • The two objectives are completely different paradigms. Both require different kinds of study designs and methods. • The primary objective should be specific and converted into a proper research hypothesis involving study variables and study parameters. • In the absence of proper hypothesis, sample size calculation, methodology etc. has no meaning. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P38***
39.	Research proposal entitled ***"To evaluate the additional diagnositic role of thoracoscopic pleural lavage and brush in undiagnosed exudative pleural effusion"*** submitted by Dr. Ravi Kant Pandey, SR, Department of Pulmonary & Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. 935/PDCC/23 dated 31st July, 2023. ***Recommendation of Primary reviewer:*** • In the title word "additional" is not clear. IN addition to "what"? • Aim and objective is not clear. How "diagnostic role of thoracoscopic pleural lavage and pleural brush" is measured? • The study variables and parameters should be exclusively identified. • Research hypothesis should be formulated in terms of the study parameters. • Sample size calculation is arbitrary. It should be done in accordance to the proper research hypothesis. • Methodology and statistical analysis section should be properly explained. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P39***
40.	Research proposal entitled ***"A comparative study of maternal serum lactate level during pregnancy and after delivery and it's correlation with fetomaternal outcome"*** submitted by Dr. Pratibha Singh, JRI, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/934/23 dated 1st August, 2023. ***Recommendation of Primary reviewer:*** • Aims & Objectives gives a list of measuring different maternal lactate levels. • No proper research hypothesis is formulated.

Research proposal entitled ***"To compare opioid free and opioid based anaesthesia techniques for intraoperative hemodynamic stability and overall outcome in patients undergoing supratentorial craniotomy"*** submitted by Dr. Prachi, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/570/23 dated 24th May, 2023. ***Recommendation of Primary reviewer:*** • It is a prospective cohort comparative study. • Two groups are being compared. These groups should be exclusively defined. Randomization will be performed in allotting the subjects to the two groups. Method of randomization should be explained. • Research hypothesis should be defined in terms of the parameters after identifying these from the study. • Sample size calculation is arbitrary. It can be formulated only after formulating the proper research hypothesis. • The statistical analysis section is very general. It should be specific to the research hypothesis. **PGTSC Comment:** As above **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XX-PGTSC-IIA/P41***
42.	Research proposal entitled ***"Comparative study between analgesic effect of conventional radio freouency vs pulsed radio frequency lesioning of glossopharyngeal nerve in patients of oropharyngeal cancer suffering from orofacial pain"*** submitted by Dr. Yashika Singh, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/594/23 dated 24th May, 2023. ***Recommendation of Primary reviewer:*** • It is a prospective cohort comparative study. • Two groups are being compared. These groups should be exclusively defined. Randomization will be performed in allotting the subjects to the two groups. Method of randomization should be explained. • Research hypothesis should be defined in terms of the parameters after identifying these from the study. • Sample size calculation is arbitrary. It can be formulated only after formulating the proper research hypothesis.

Decision: Approval subject to fullfillment & Administrative formalities

Ref. code: 126thECMIIC/P2

3. Research protocol no. 1366-0031 entitled ***"A phase II, randomized, placebo-controlled, double-blind, parallel-group, and efficacy and safety study of at least 48 weeks of oral BI 685509 treatment in adults with early progressive diffuse cutaneous systemic sclerosis"*** sponsored by M/s Boehringer Ingelheim Pharma GmbH & Co. KG, Birkendorfer submitted by Dr. Puneet Kumar, Associate Professor, Department of Clinical Immunology & Rheumatology, King George's Medical University, U.P., Lucknow vide letter no. Rh/CT/91/2023 dated 7th August, 2023.

Recommendation of reviewer:-

- IEC proforma Clinical Trials' section mentions the study as a Phase III study but the title and detailed synopsis mention it as Phase II study.
- DCGI approval doesn't mention KGMU site.
- CTRI registration doesn't mention KGMU site.
- CTA form is without details and signatures.
- IEC form mentions blood sample being sent abroad but protocol mentions list of routine tests which can be done inside the county.
- Please specify which tests will be conducted outside India and why?

Previous IEC Decision: Defer to the next Meeting because quorum was incomplete.

Dated 25th October, 2023

	the policy is. ***The above comments forwarded to the Principal-Investigator:-*** Reply has not been received from the Principal-Investigator. **Decision:** Reminder will be send to the Principal-Investigator ***Ref. code: : 123rd ECM IIA/P3***
5-	Clarification of research proposal entitled "***Evaluation of high risk proteins involved in breast cancer and their correlation with tumor aggressiveness and chemotherapy response: A retrospective study***" sponsored by CSIR-CDRI submitted by Dr. Sumaira Qayoom, Additional Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 1405/23 dated 30th September, 2023. **Previous EC Comment:** 1. Annexure one needs to be filled up such as for 'risk and benefit', 'data monitoring', 'compensation for injury', etc. 2. It is indicated by asterix that written consent will be taken. Kindly clarify since consent waiver form is also attached. 3. Kindly indicate other centers involved in this multicenter study. 4. The first objective indicates that metanalysis will be undertaken to shortlist six high risk genes while budget indicates that immunohistochemistry will be undertaken from the very beginning of the study. Have those six genes been identified? If yes, then kindly mention them and if not then the budget quoted may change depending upon the antibody cost of specific gene that needs to be assessed. Kindly clarify. 5. Regarding the third objective to correlate protein expression with chemotherapeutic response, kindly mention the clinical parameters that need to be recorded and the RCB scoring. In addition, also attach the data-sheet-proforma that will be used to record the various observations. 6. The second objective states a comparison between TNBC versus non-TNBC patients. What would be the sample size of each group- 100 or 200? Kindly state. 7. Also mention clearly in methodology section as how will you approach each objective clearly. 8. What are the chronic immunological disorders that need to be excluded? Kindly state. 9. It is stated in hypothesis section that "in a related study m-RNA expression will be analyzed in fresh biopsy tissue sample" Is this ethically approved or will it be submitted? Since this seems to be a prospective study, the current submission being retrospective (based on blocks) seems different. Kindly clarify. 10. Kindly attach pre-designed proforma as indicated in data management section. 11. Briefly mention the summary of anticipated statistical analysis ***The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-*** ***Recommendation of reviewer:*** • Kindly provide summary of changes in a tabular format. ***The above comments forwarded to the Principal-Investigator was reviewed by reviewer:-*** **Second opinion of Primary** | **PI response**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	reviewers	
	The clarification needs to be given regarding if immunological disorders are not excluded (or included in the exclusion criteria), would they not affect the results.	According to the recent literature:- 1. Thyroid disorders 1 2. Diffuse scleroderma 2 3. Psoriasis 2 Have been found to be associated with Breast cancer. Therefore mentioned diseases should be excluded. These conditions have been added as exclusion criteria. The point is highlighted in revised. Protocol submitted.
	Also, regarding consent waiver, care need to be undertaken not to disclose identity of archived samples.	The identity of the patients will not be disclosed. The cases will be completely anonymised and will be studied by PI and CO-PI.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-

Decision: Approved

Ref. code: : 123rd ECM IIA/P4

6- Clarification of research proposal entitled ***"Effect of nutraceutical potential of pumpkin seeds on glycaemic and lipid profile in type 2 diabetes mellitus patients"*** submitted to CST U.P under supervision of Miss. Poonam Sahu, Ph.D. Scholar under the guidance Prof. Dileep Kumar Verma, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no. 3399/PHY/23 dated 4th October, 2023.

Previous EC Comment	PI response
This is a clinical study of herbal remedies. Therefore, an Ayurvedic co-investigator can be included. Moreover, kindly clarify if the processes of inclusion as a clinical trial need to be done?	The modification has been done and an Ayurvedic co-investigator has been included in the study. Details are as follows: Dr. Naresh Patel BAMS Emergency Medical Officer, Nishat Hospital, Lalbagh, Lucknow Mobile No.- 9450110180 Yes, the study will be registered on the CTRI (Clinical Trial Registry of India) website soon after the Ethical approval of the

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		study from the Institution.
	Informed consent form for volunteers (as indicated in annexure 1 that volunteers and patient will be recruited). Study design as indicated in case Control- does Control refer to healthy subjects?	Modification has been done – Only the T 2 DM patients coming to the OPD will be a part of the study. No, the term Control does not indicate healthy subjects. T 2 DM patients who are receiving standard conventional treatment for the disease, and to whom pumpkin seed administration will not be done in the study, will act as 'Control.'
	While study design flow chart suggests it to be ariables controlled trial- Kindly clarify.	The study design is Randomised Control Study and the modified study design has been attached.
	Patient information sheet to be included in detail both in Hindi and English.	Attached
	Sample size to be made molecular in respect to primary objective. Elaborate the numbers mentioned in difference in expected means.	The sample size has been calculated with respect to primary objective on the basis of previous study done. Study reference: Monica, S. J., John, S., Madhanagopal, R., Sivaraj, C., Khusro, A., Arumugam, P., ... & Emran, T. B. (2022). Chemical composition of pumpkin (Cucurbita maxima) seeds and its supplemental effect on Indian women with metabolic syndrome. Arabian Journal of Chemistry, 15(8), 103985. The sample size required in each group was calculatedby solving the following formula: Where, Z α/2 = the critical value of the Normal distribution at α/2

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		Z β = the critical value of the Normal distribution at β σ 2 = the population variance d = the difference in means Formula Reference: Kirwood, B. R., & Sterne 2nd, J. A. C. (2003). Essential Medical Statistics, Blackwell Publishing. Edition II. Chapter 35. Page 420 From the above mentioned study, 94.71 was the mean at baseline and 89.86 was the mean after intervention. Thus the difference in the mean would be 4.85. So, the value of d = 4.85 & d 2 =23.52.
	Who will fund for pumpkin seed?	ICMR will fund for pumpkin seed.
	Who will bear the cost of biochemical analysis and how much cost is expected for these tests per case basis?	The cost of biochemical analysis will be funded by ICMR by the purchase of test kits from the project fund. The estimated cost of a biochemical test per patient is Rs. 680/-.
	Summarize the anticipated statistical analysis briefly.	Data analysis will be carried out using SPPS software. We will compare each group pre- and post- intervention by paired T-tests. With the help of unpaired T-tests, we compare the intervention and control groups. Biochemical variables will be compared by ANOVA. For all statistical tests, the significance level will set at P & lt; 0.05.
	Summarize randomization process. Will this be age and gender matched – kindly brief.	Simple random sampling method will be used in which each member of the population has an equal chance of being selected. Random number table method will

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Dated 25th October, 2023

	be used. The study does not use age or gender matching during the randomization process. Patients will be assigned randomly to different groups with the help of random no. table method without considering age or gender to maintain unbiased allocation to both the groups and equal opportunity for all the patients in each group.

The above comments forwarded to the Principal-Investigator was reviewed by Primary reviewer:-

Second opinion of Primary reviewer:-	**PI response**
The Co-Investigator is just and Ayurvedic graduate working as emergency medical officer in a private (Nishot) hospital. It would have been better to recruit the Co-Investigator from some academic background (Ayurvedic College or Ayurvedic research center). Moreover the CV of Investigator from outside of KGMU also needs to be included.	The modification has been done. Details are as follows:- Dr. Prakash Raj Singh, Assistant Professor, Department of Kriya Sharir, Govt. P.G. Ayurvedic College & Hospital, SSVV, Varanasi. Mobile No.-9415228314 Email- prakashrajsingh65@gmail.com CV attached
To make sure that CTRI registration is approved before start of project.	Yes, the study will be registered on the CTRI (Clinical Trial Registry of India) website soon after the Ethical approval of the study from the Institution.
Also attach ICMR letter if available that indicats funding for pumpkin seeds & biochemical testing. A split overall budget in this regard would be appreciated.	Attached

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

The above comments forwarded to the Principal-Investigator was reviewed by Primary reviewer:-

Third opinion of reviewer:-

- The Investigator has indicated the funding resource from another project)of ICMR) that has specific budget for specific simultaneous study and also the Ph.D. guide along with Principal-Investigator of ICMR project to comment if both projects can be carried out simultaneously rationally with funding (& manpower) from the budget allocated from single project only.

The above comments forwarded to the Principal-Investigator response have given by the Principal-Investigator.

Comment:

- Kindly provide the UPCST proposal.

Decision: Revise & Re-submit with response to queries in tabular format.

Ref. code: 124thECMIIB-Ph.D/P1

7- Clarification of research proposal entitled ***"Elucidate the regulatory role of miRNAs in epithelial to mesenchymal transition in cervical cancer patients"*** submitted by Mr. Praveen Kumar, Ph.D Scholar under the guidance Dr. Nitu Nigam, Associate Professor, Department of Center for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 187/CFAR/23 dated 16th September, 2023.

Previous Comment	PI response
The account of budget not indicated and sponsor is indicated as NA. Kindly specify the total budget (split up) and kindly specify the source of funding.	Corrected included the budget and the source of funding included. Page No. 1
Attach the CSIR-JRF papers pertaining to the candidate.	The JRF-NET Certificate has been enclosure
Kindly fill up the left blanks in annexure-1	Corrected. Page No. 1-4
'National significance with rational' indicates the detail about prostate cancer (in male) while the project is for cervical cancer in females.	Corrected Page No. 6
Patient information sheet in Hindi is to be included.	Patients information sheet in Hindi has been attached Page No.12-13

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Name and contact of Guide to be included in informed consent form.	Name and contact of guide included in informed consent form. Page No. 14 and 16.	
	All study procedures undertaken on patient's sample need to be briefed in informed consent form to the patient and not labeled as NA.	I have mentioned briefly about the study procedure. Page No. 14 and 16	
	The second and third aims pertain to the progression of cervical cancer and prognostic aspects of cervical cancer respectively, but there is neither indication of any clinical data been collected nor any follow-up data. Kindly attach a case sheet to record the clinical findings and specify which specific clinical prognostic marker is intended be correlated with molecular outcomes.	Socio-demographic and clinical data were added and patients case sheet were attached in methodology. Page No.27.	
	It is indicated that 60 normal cervical samples will be collected. Does it mean from normal subject? What will be the indication to take samples from normal person??Kindly specify.	Corrected, methodology Page No. 27	
	It is further indicated that patients will be included on the basis of well-defined inclusion and exclusion criteria. Those criteria included both cervical cancer and other serious uncontrollable medial conditions, decreasing life expectancy please clarify. Inclusion and exclusion criteria may be modified accordingly.	Changes done, inclusion and exclusion criteria has been modified. Page No.26 and 27	

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

The study design is case control and experimental if any control is included then kindly mention the inclusion criteria and include informed consent form as well as in information sheet for control.	This study is only case and control, inclusion and exclusion criteriais mention according controls. Page No.27
How will clinical validation be done as shown in last flowchart? Also specify some tentative micro RNA and EMT markers.	Changes done in flowchart. Some tentative miRNA and EMT markers already show in Review of literature and mention in the methodology also Page No. 31 and 32

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-

Second opinion	PI response
Split budget need to be added.	Total budgets has been added Colom No.04 and CSIR-JRF/SRF award letter attached on page no.45
Regarding patients 9 & 11- Kindly enclosed ICF & information sheet for health controls both in English & Hindi.	We have to take 2ml blood sample from patients which do not have to be reported, Colom 11 ICE got tick by mistake and information sheet for health controls both English and Hindi are attaché. Page no.05 and 37 to 42.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-

Third opinion of reviewer:-

1. Split budget needs to be indicated in term of manpower and contingency, including consumables & needed instrument etc if needed.
2. Total budget as indicated is 2,42,646/- While the letter quoted in Annexure indicates 4,40,000/-? Why this discrepancy? There is no indication for contingency.
3. The above quoted letter suggest stipend for only one year (Nov 22 to Oct 23) While duration of prospective project is quoted as 3 yrs. What will be the source of funding after October, 2023. Kindly clarify through proper documents.
4. Mention the source of funding for laboratory work through proper documentation form funding agency.
5. Hence a three yr prospective funding should be submitted for this 3 yr

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

prospective study.

6. Kindly rectify your mistake in annexure 1.

The above comments forwarded to the Principal-Investigator vide this office letter no.1744/Ethics/2023 dated 27th September, 2023.

IEC Decision: Comments to be forwarded to PI to seek her in the forthcoming IEC Meeting

8- Clarification of research proposal entitled ***"Assessment of Th2 inflammatory mediators and their correlation with clinical parameters in phenotypes of bronchial Asthma"*** submitted by Ms. Shreya Tripathi, Ph.D. Scholar, under the guidance Dr. Ajay Kumar Verma, Professor Junior Grade, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 992/23 dated 16th September, 2023.

Previous EC Comment	PI response
The left blanks in annexure 1 should be filled.	Left blanks in Annexure 1 is filled as mentioned in EC comments. [Pg-1-3]
Methodology indicates that blood sample will be collected but is indicated otherwise in annexure.	We apologize for the same. Now, blood sample collection is mentioned in the ethical SOP. Please refer to page no.2
Kindly mention inclusion criteria of controls. The criteria of selecting attendants of patients need to be made carefully as attendants of asthmatics may have some genetic predisposition to influence the markers under study.	Thanks for the suggestion. I have added the inclusion criteria of controls. Healthy controls will be enrolled who are medically fit and has no underlying disease. It will be taken care that if attendants of asthmatics will participate as control, they are medically fit and not having any respiratory symptoms. Inclusion criteria of controls is added in the revised summary. Please refer to page no 24, 25.
It is indicated that age and gender matched controls will be collected. The criteria of selecting control child of 6 y age should also be mentioned.	The inclusion criteria of control child & gt;= 6 years of age is mentioned in the summary. Please refer to page no.25.
Where will the lab work be done or	Laboratory work will be carried out

(Hardeep Singh Malhotra)

Provisionally Approved

Decision: Approved

Ref. code: 124thECMIIB-Ph.D/P4

9-	Clarification of research proposal entitled ***"Elucidate the role of miRNA mediating epithelial to mesenchymal transition in chronic myeloid***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

leukemia" sponsored by DST Inspire Fellowship submitted by Ms. Surbhi Gupta, under the guidance Dr. Nitu Nigam, Associate Professor, Department of Center for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 190/CFAR/23 dated 20th September, 2023.

Previous EC Comment	PI response
The objectives are unclear, vague.	To analyze differential micro RNA in peripheral blood mononuclear cells (PBMC) of chronic myeloid leukemia patients for epithelial to mesenchymal transition. 2. Validation of differential differentially expressed (DE) genes in CML patients through qPCR. 3. To explore the role of screened miRNA in CML pathobiology and disease course.
What is the primary objective?	The primary objective of the study is to identify the different differential microRNA and to investigate their expression in chronic myeloid leukemia mediating through epithelial to mesenchymal transition.
Sample size calculation is based on which objective?	It is based on the first objective in which different micro RNA will be determined through sequencing. After that expression of selected miRNA having vital role in chronic myeloid leukemia mediating through epithelial to mesenchymal transition (EMT). Then the identified miRNA will be validated in all the CML patient samples through RT-PCR Finally, the pathobiology and disease course will be analyzed in CML modulating through epithelial to mesenchymal transition. Therefore the miRNA that has impact in CML regulating through

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		epithelial to mesenchymal will work as biomarkers for disease diagnosis.
	Sample size of 30, appears to be too little for this type of research.	The study is not related to population of India but the population of chronic myeloid leukemia epithelial cases in India whose prevalence is very small and we are studying the status of miRNA expressions in these cases. The CML in correlation with epithelial to mesenchymal transition (EMT) is yet more to explore. The new sample size for the proposed study is 55.

The above comments were forwarded to the Principal-Investigator which was put-up in the IEC Meeting:-

Decision: A Sub-Committee will be constituted & call to PI with her guide for discussion.

12-	Clarification of research proposal entitled ***"Integrated transciptomic and metabolmic analysis of metabolic disturbances in hormone receptor positive breast cancer cells"*** sponsored by Council of Science & Technology U.P. Lucknow submitted by Prof. Anand Kumar Mishra, Head, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. EndoSurg/359/23 dated 22nd September, 2023.

Previous EC Comment	PI response
Comment 1: The project is very sketchy.	Initially, We were submitting the short

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		summary of the proposal. Now We submit the detailed proposal which contain all necessary information regarding the project.
	Comment 2: Sample size, inclusion, or exclusion of subjects not included.	**Sample Size:** The sample size was calculated based on a previous study that reported the average fold-changes of metabolites (Amino acid, bile acid, carbohydrates, vitamins and cofactors) in breast cancer is 3.3% (Park et al.,2019), 95% level of confidence and Error rate, usually set at 0.05 level is 4. Total 50 patients will be included in this study. We have used following statistical formula to calculate patient's sample size. Same has been mentioned in method section of research proposal on page on. 6. n=Z 2 P(1-P)/d 2 Where, • n = sample size, • Z = Z statistic for a level of confidence, for the level of confidence of 95%, which is conventional, Z value is 1.96. • P = expected prevalence or proportion (in proportion of one; if 3.3%, P = 0.033), • d = precision (in proportion of one; if 5%, d = 0.05). n=1.96x1.96x0.033x0.967/0.05 2 n=49.04
	Comment 3: Matched controls not properly defined.	Tissue adjacent to a tumor will be considered as matched control in this study. It represent a patient's normal cells, has characteristics

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	that distinguish it from both healthy and tumor tissue.
Comment 4: In objective 2 it is mentioned that expression analysis of corresponding genes will be carried out, but neither any gene has not been mentioned nor methodology for the same provided.	Please find the list of metabolites of interest. Patient survival will be correlated by using bioinformatics software Kaplan Meier Plotter. Mentioned in page number 6. Metabolites Boric acid Carbonate Citrate lactic acid L-Valine Glycine Phosphoric acid Lactate Isocitrate Succinate Butanedioic acid Uracil Serine L-Threonine Tromethamine α-Ketoglutarate L-Aspartic acid L-Glutamic acid D-Fructofuranose D-Glucose Palmitic acid Myo-inositol
Comment 6: how come the molecular biology unit (it is mentioned as the department) of the university can be the sponsoring Institution?	Pardon, It happened by mistake. This study is funded by Council of Science and technology, Uttar Pradesh.

14- Clarification of research proposal entitled ***"Effect of incentive spirometer exercise on pulmonary function in children with spastic cerebral palsy-A prospective randomized case-control study"*** submitted by Dr. Sandeep

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Kumar Gupt, Assistant Professor, Department of PMR, King George's Medical University, U.P., Lucknow vide letter no. 5658/23 dated 14th September, 2023.

Previous EC Comment	PI response
Study design and planning	Cohort of Spastic cerebral palsy children are divided into two group after randomization a) First group (study group) also called Cases will do incentive spirometer plus conventional respiratory exercises and PFT parameters and MPT will be measured at base line and after 4 weeks of exercise program. b) Second group called control will do only conventional respiratory exercise and PFT parameter/variables will be measured at base line and after 4 weeks of exercise program.
Study variable and parameters	Study independent variable are age, gender, height, GMFCS score etc. Pulmonary function testing parameters or outcome variables like Vital capacity (VC), Forced expiratory volume in 1st second (FEV 1), FEV 1 /FVC, Tidal Volume (TV), Peak expiratory flow (PEF), Expiratory Reserve Volume (ERV) and Maximum Phonation Time (MPT). Specified and mentioned in revised proposal.
Research Hypothesis should be stated in terms of parameters.	Study Parameters are stated in hypothesis in revised proposal.
Sample size Calculation	Revised sample size is 27 in each group (Total-54)
Statistical Analysis	Rewritten in accordance with research hypothesis.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-

	Recommendation of reviewer: Provisionally Approved **Decision:** Approved ***Ref. code: 125th ECMIIA/P12***
15-	Clarification of research proposal entitled "***Transfer learning assisted classification of dementia sub-types using voice recordings: a cross-sectional study***" submitted by Dr. Shailendra Mohan Tripathi, Associate Professor, Department of Geriatric & Mental Health, King George's Medical University, U.P., Lucknow vide letter no. 314/DGMH/23 dated 6th September, 2023.

Previous EC Comment	PI response
The title should be more specific. The objective of the study is not clear from the title.	Revised title of my research proposal is: "Transfer Learning assisted classification of Dementia Subtype Using Speech sample from patients and healthy individuals : A Cross-Sectional Study.
It is prospective comparative cohort study.The two groups are being compared.	The above study is neither a cohort or a case control study. It is cross sectional study. We are going to do a Multiple class Classification. The classes used in the study are Cognitive normal individuals, Alzheimer's dementia, Vascular dementia, Fronto-temporal lobe dementia and Dementia of Lewy body".
Sample size calculation is not given.	We are going to use "Transfer learning (MFCC based neural network algorithm)- an artificial intelligent technique", which can work with a small sample size. However, it needs a minimum of 15-20 samples to

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		provide meaningful output. So, we have decided on 20 samples which is the minimum requirement of the algorithm to produce good results.
	The statistical analysis section is very general. It should be specific to the research hypothesis.	The voice recordings will be analyzed and classified using Convoluted neural network. The performance of the model will be assessed using F1 score, Accuracy, Area under the curve, Recall and Precision. Basic stats are not applicable for this study, as we are trying to build a artificial intelligence model.

The above comments were forwarded to the Principal-Investigatór and the response was reviewed by reviewer:-
Recommendation of reviewer:

16- Clarification of research proposal entitled "***Effect of combination treatment with escitalopram and risperidone in punding behavior among patients with dementia-a retrospective study***" submitted by Dr. Shailendra Mohan Tripathi, Associate Professor, Department of Geriatric & Mental Health, King George's Medical University, U.P., Lucknow vide letter no. 313/DGMH/23 dated 6th September, 2023.

Previous EC Comment	PI response
This is retrospective case-control study.	This retrospective study will be conducted within a hospital setting to investigate the impact of combining Escitalopram and Risperidone on pounding behavior in individuals with dementia. In this study only patients with dementia (diagnosed) will be recruited. 2. This is not a case- control study

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		rather a hospital records-based study.
	The cases and controls should be exclusively defined for studying the effectiveness.	Subjects who have received a formal diagnosis of dementia, in accordance with the ICD-10 or DSM-5 criteria, will be enrolled as "cases." 2. The assessment of effectiveness will be centered around the changes observed in the scores of two standardized measures, namely the Neuropsychiatric Inventory (NPI) and QUIP-RS scale. 3. As it is a hospital record-based study, so we have no controls.
	Sample size calculation is not given	It is a hospital record-based study, this study will utilize data from the previous 12 months.
	In the absence of proper research hypothesis, the statistical analysis section looks arbitrary and in complete.	This study will adopt a hospital record-based approach, drawing on data from the preceding 12 months. 2. Additionally, hypothesis of the study had been added to new protocol. HYPOTHESIS- Null Hypothesis (H0): There is no significant change in the severity of punding ariable among patients with dementia when treated with a combination of Escitalopram and Risperidone. Alternative Hypothesis(H1): Treatment with a combination of Escitalopram and Risperidone leads to a significant reduction in the severity of pending behavior among patients with dementia. Statistical analysis:

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		In our analysis, we'll differentiate between parametric and non-parametric tests based on data distribution. For parametric data assuming normality, we'll use Repeated Measures ANOVA, within-group contrasts, and post hoc tests (Tukey's HSD or Bonferroni correction) for significant interval identification. Subgroup analysis will employ independent t-tests. Non-parametric data will undergo the Wilcoxon Signed-Rank Test for change assessment, the Friedman Test for multi-time point evaluation, and the Mann-Whitney U Test for subgroup comparison. We'll calculate effect sizes, conduct regression analysis, explore correlations, and visualize data using line plots orscatterplots.

23-	Clarification of research proposal entitled ***"Role of preoperative chlorhexidine mouth wash in the prevention of postoperative respiratory complications in patients with poor oral hygiene undergoing elective surgery-randomized controlled trial"*** sponsored by UP Council of Science & Technology, Lucknow submitted by Dr. Shefali Gautam, Additional Professor, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/1221/23 dated 29th September, 2023.

Previous EC Comment	PI response
The Study of objective are not clear	Study objective revised
RCT fundamentals are missing	Methodology revised as per CONSORT Guidelines.
Sample size calculation is arbitrary	Sample size recalculated as per primary objective
Statistical method for analysis not clear	Revised

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	How will the result have presented?	Data analysis revised and CONSORT Flow diagram added

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-
Recommendation of reviewer:
Provisionally Approved
Decision: Approved

Ref. code: 126th ECMIIA/P2

24- Clarification of research proposal entitled "***Analysis of pitfalls encountered in squash cytology in adult and pediatric patients with central nervous system lesions: A tertiary Hospital experience***" submitted by Dr. Shalini Bhalla, Additional Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 1425/23 dated 6th October, 2023.

Previous EC Comment	PI response
This is a retrospective observational study.	Retrospective observational study mentioned in study design
How the pitfalls are evaluated? The outcome variables should be properly defined.	For identifying the pitfalls, the clinical and radiological information provided would be reviewed for incomplete information. Squash cytology smears would be reviewed for the cause of pitfalls as insufficient material, nonrepresentative material and missed diagnosis. Added in material and methods of proposal.
What will be the use of pitfall evaluation?	1) To create awareness of pitfalls encountered during intraoperative squash cytology diagnosis. 2) To highlight importance of good clinical-radiological correlation with squash cytology for definitive diagnosis Added in aims and objectives
After identifying the study variables and parameters, the research hypothesis should be properly formulated.	Knowledge of limitations and errors of squash smear cytology help pathologists identify pitfalls that can

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		occur during intraoperative diagnosis Added in Hypothesis and objectives.
	In the absence of research hypothesis, sample size calculation seems to be arbitrary and out of context.	Sample size recalculated and minimum Sample size is 182. The calculation for sample size has now been added in heading sample size
	Statistical analysis section is missing	The cases were categorized into true positives, false positives, true negatives, and false negatives. Diagnostic accuracy, sensitivity, and specificity, Positive and negative predictive value will be calculated from Galan and Gambino method. Added in data management and analysis.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-
Recommendation of reviewer:
Provisionally Approved
Decision: Approved

Ref. code: 126th ECMIIA/P3

25- Clarification of research proposal entitled "***Prospective analysis in histopathology services in a Government Teaching Hospital: A road map to internal quality assessment***" submitted by Dr. Shalini Bhalla, Additional Professor, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 1426/23 dated 6th October, 2023.

Previous EC Comment	PI response
In the KGMU proforma where form has to be filled by PI, under the heading of type of study, The PI has marked on both single center and multicentric study.	Single center study has been mentioned in the type of study.
In the patient information sheet: PI has copy pasted the guidelines.	Since it is a retrospective study so patient information sheet is not required
Aims and objectives are not clear.	To identify reasons for the delay in

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Dated 25th October, 2023

	Objective should be precise.	release of complete histopathology reports in the preanalytical, analytical and post analytical phases. To take measures to correct the cause of delay in each of the three phases. To calculate the improvement in the turnaround time of histopathology reports post implementation of corrective measures Objectives are redefined under heading Aims and objectives.	
	It would have better if data collection instruments were added in the proposal.	Preanalytical, analytical and post analytical quality variables were analysed.Preanalytical variables: 1.Requistion form-name, age, sex, UHID, Lab number, clinician name, department name, clinical diagnosis mentioned, specimen name, clinical history relevant, investigations mentioned or not, date of specimen collection. 2.Specimen-Preoper ariable with name, age, sex and site of specimen, formalin adequacy. 3.Grossing-Adequate number of cassettes taken and ariable, grossing done as perprotocol, worksheet attached, regressing done & amp; for what was ariables.4. Tissue processing & embedding (power failure/technical fault of automatic tissue processor)5. Cutting of sections (restain/deep cut)6. Staining of slides mounting& labelling7. Special satins required.Analytical variables:1.Concurrence of histology and cytology reports if available 2.Misclassification –	

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		positive/negative or benign/malignant, grade, stage, margins etc. 3. .Delay due to incorrect block/ slide identification 4. Delay due to incomplete information- contact number, Investigation, immunohistochemistry.Post analytical ariables: 1.Turnaround Time (TAT)maintained or not (the time between thereceipt of a sample in the laboratory andwhen the report is ready forcollection/dispatch)2.Erroneous/ missing non diagnostic information; dictation/typing error.3. 3.Delay in dispatch of report in somecases for already generated reports because of haphazard arrangement ofoffline reports Data collection instruments are added in study design and methods section.
	Waiver form is wrongly filled. Since this study will be research without involvement of identification of individual subjects, therefore the appropriate has to be filled.	The waiver form is filled appropriately again and attached.
	Being a retrospective study, it would be better if it is mentioned in the study title as well as in the methodology section.	Prospective has been change to retrospective study in the study title andmethodology section "Retrospectiveanalysis in histopathology services in aGovernment teaching Hospital: A road map to internal quality assessment"

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-

Recommendation of reviewer:

26- Clarification of research proposal entitled "***Preventive strategy practices for pressure injury in Indian ICUs (Prevent-PI-ICU)***" submitted by Dr. Sai Saran, Assistant Professor, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/1868/23 dated 22nd September, 2023.

Previous EC Comment	PI response
While on PI states that this is a single center study in Annexure 1 on the other hand there are indications of it being a multicentre study across ICU at hospitals in India which involvement of many medical colleges and with these 10 to 15 institutions per hospitals	Changed as multicenter
Point 4 annexure 1 indicates that no patient related data will be collected. Then why ICF?	Informed Consent form removed
In the Undertaking by Principal Investigator- only one name is entered for other institutes. Include others too.	Names of other investigators were added
Since it is stated that current study is online survey with no actual patient related data-then what is the role of patient information sheet	As per the suggestion, Patient information sheet was removed
Kindly include the steps of sample size calculation. Is it the number of beds or number of ICUs or number of hospitals?	As per a study by Lebuo et al, the prevalence of is 64.8%. [9] The following simple formula would be used for calculating the adequate sample size in prevalence study; $n=Z^2 P(1-P)d^2$ Where n is the sample size, Z is the statistic corresponding to level ofconfidence, P is expectedprevalence. [10]The sample size was calculated based on beds.
How will data and safety	Based on the suggestion, data and

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	monitoring board be involved? What sort of adverse effects are anticipated if there is no actual patient involvement?	safety monitoring board is removed.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-

Recommendation of reviewer:

- The Investigator has addressed the comments raised and as no consent will be taken (as per investigator), the same is to be mentioned in point 8 of annexure-1 (Not Otherwise), Also approval subject to above rectifications.
- Waiver of consent may be given.

Decision: Approved

Ref. code: 126th ECMIIA/P10

27- Clarification of research proposal entitled "***A retrospective study of the epidemiological and clinical features of patients presenting with obstructive sleep apnea in a North Indian tertiary care centre***" submitted by Dr. Jyoti Bajpai, Assistant Professor, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1014/Res/23 dated 18th September, 2023.

(Alok Dhawan)
Chairman, IEC

	with the checklist.
Why Vulnerable Samples have been ticked?	As any of the mentioned vulnerable subjects can be a MDR patient if he/she found suitable for the study then only they will be included.
Bio-banking is beingdone: what will be stored, for what purposes?	Sputum culture positive isolates are being stored according to sample retention policy of NABL accredited lab, this is a routine T B Laboratory activity not only for the purpose for Ph.D. thesis.
Hindi patient information sheet should be written properly. Google translate should not be used?	Amendment has been done.
Is the Ph.D. student will not work in the laboratory?	The student will enroll the patients from the dept. of respiratory medicine, collect sputum samples, process samples in T.B. Laboratory, perform the MIC, perform gene sequencing, maintain and analyze data.
What are the primary secondary objective measures?	For primary objectives, outcome measures will be: □ Culture conversion □ Treatment outcome in terms of cured, died, treatment failure and lost to follow up □ Frequency of primary and secondary drug resistance For secondary objectives, outcome measures will be: □ Comparative efficacy of culture conversion and treatment outcome of all oral longer with shorter oral bedaquiline containing regimens.
How long will Patient be followed?	It will be done at intervals defined by the NTEP for both the regimens for maximum 6 months (Bedaquiline is given to the patients for a maximum period of 6 months).

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Why 2 groups have been included?	Two groups have been included because we want to know the frequency of primary and secondary Bedaquiline resistance.
	When and why will drug resistant profiling be done?	Drug resistant profiling will be done at the time of initial screening of patient samples and when any follow up sample will be culture positive. This will be done to check any change in drug resistant status of M. tuberculosis.
	Statistical tests and methodology need to be elaborated.	For primary objective outcome: Cox regression method for relationship between an event (death, recurrence) occurring over time. To study frequencies chi square test will be used. For secondary objective: Kappa statistics for agreement between two groups.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-

Recommendation of reviewer:

- Researcher has not made the changes in the manuscript as per the reviewer comments and her reply. The modified manuscript must be submitted for review.

The above comment forwarded to the Principal-Investigator:-

Reply has not given by the Principal-Investigator.

Decision: Reminder will be send to the Principal-Investigator

30- Clarification of research proposal entitled ***"To explore the relationship between periodontitis and preterm delivery with fcγ receptor polymorphisms as genetic susceptibility factor"*** submitted by Dr. Iman Baig, Ph.D 2019 Scholar through her guide Prof. Pavitra Kumar Rastogi, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 1400/P/23 dated 3rd October, 2023.

Previous EC Comment	PI response
Sponsor information row related to 1. Indian the PI has added self	The study is self-sponsored by PI hence sponsor information says Self-

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	funded
Statement 7 ii. And iv. Are ticked but details are nowhere mentioned in the protocol	Statement 7 ii. And iv. Relating to information regarding nature of samples and state of samples. Samples will be venous blood 2 ml and will be analysed after storage in -20 degrees Celsius
This is a PhD proposal, which needs to be written thoroughly with a proper, rationale, literature review and knowledge gap. Further the proposal should include a robust methodology with outcome of the study.	Proposal has been corrected to be more thorough with addition of rationale and knowledge gap. Methodology has been updated with outcome of the study
The questionnaire uses words like bad habit/adverse habit in personal history, better to use one type of word at both places.	Questionnaire has been updated to reflect the same wording in both places.
Hindi ICF needs to be written in simple sentences, at many places she is written as she needs to be modified.	Hindi ICF has been re-written in simpler language and the error of she has been corrected.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by reviewer:-
Recommendation of reviewer:

- As is clear from the 1st subsection of IEC, i.e., Sponsor Information, it is for external funding agencies, be they Indian or any other. It needs to be filled out as none or not applicable, and then PI may declare that the expenses would be borne by him.
- IEC point no. 7. iv PI chooses the option yes and states the collected sample will be stored. The point is about the use of preexisting samples..., so the option to be chosen is 'No'
- In Pt Information Sheet (both English & Hindi) point no. 7 to be revisited, why to write **you can** drive, **drink**.....मदिरा का सेवन कर सकते हैं. ICF and Patient information sheets need to be written in simple language.
- Kindly clarify the current status.

Decision: Revise & Re-submit with response to queries in tabular format.

1-	Research proposal entitled ***"Targeting epigenetic modulators of EZH2 and SGLT to mitigate renal toxicity and chronic kidney disease progression"*** submitted by Prof. Vishwajeet Singh, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 451/Nephro/23 dated 12th October, 2023. ***The above research proposal was forwarded to two Primary reviewers:-***

Recommendation of First Primary reviewer	PI response
Reporting of adverse events has been ticked as 'No'. Adverse events	We had changed the status of adverse event from "No" to "Yes"

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	must be reported to the regulatory bodies including the IEC.	with reporting to sponsor and IEC.
	Physical risk/discomfort has also been ticked as 'No' whereas kidney biopsy is planned to be done which will entail physical discomfort and risk. Please clarify.	We had changed the status from "No" to "Yes" We are primarily focused to take the urine sample for the proposed study. If kidney biopsy will be done form management point of view (Kidney biopsy is not always done for the management) then the biopsy sample will be shared to PI.
	Possible risks of renal biopsy must be mentioned in the patient information sheet.	The kidney biopsy now a day done by ultrasound guided with 18 G needle by using the Doppler mode the chances of injury to vessels is negligible. The patient discomfort is also very minimal. In the case of renal biopsy there is no risk or minimal risk available. However, the department of Nephrology, KGMU is equipped with state of art technology and yet we have not found any major risk or problem associated with renal biopsy. Although the possible risk has been mentioned in the patient's information sheet.
	The above comments were forwarded to the Principal-Investigator, reply received by the Principal-Investigator which were forwarded to Primary reviewer:- Provisionally approved ***Recommendation of Secondary reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: 127th ECMIB/P1***	
2-	Research proposal entitled ***"Pan-India epidemiological, virological and genomic surveillance for Human Influenza, COVID 19 and RSV through DHR-ICMR VRDL Network"*** submitted by Dr. Shruti Radera, Assistant Professor, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 885 dated 11th October, 2023. ***The above research proposal was forwarded to three Primary reviewers:-*** ***Recommendation of Primary reviewer:***	

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

1. In the following project the consent form needs to be corrected. As the consent is to be taken from parents for the children so it cannot be in first person. Both Hindi and English formats need to be corrected.
2. Title of the Project: Pan India Epidemiological, Virological and Genomic Surveillance for Human Influenza, RSV and COVID-19 through DHR-ICMR VRDL Network.

Recommendation of Secondary reviewer	PI response
The calculated sample size is 329-330, but the sample being collected has been declared as 240. Please clarify.	Calculated sample size in proposed study is 329-330, however it is a multicentric study which will be conducted at 15 centers. It was thought to screen 3600 children to achieve this sample size assuming 10% positivity as per available data. To achieve this target, 240 children will be screened at each study center (240x15=3600)
Title and methodology of the study (molecular/genomic analysis of viral samples) does not correlate with the stated objectives of the study (Clinical profile of patients/factors associated with hospitalization and death)	As per research protocol, clinical details of enrolled cases will be collected which will help to meet objectives of the proposed study on various forms/data sheets eg. at the time of admission, on admission summary form, laboratory related information will be collected on laboratory form and at the time of discharge, on discharge summary form. Required specimen will be processed for various respiratory viruses. Blood specimen will be collected and investigated for various investigations as per clinical condition of the patient which will be recorded on data sheets. All this information will help us in meeting the objectives of proposed study (Data sheets/forms attached)
ICMR approval/budget sanction letter not attached.	The submitted proposal is a part of DHR-ICMR-VRDL network.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Therefore, no separate budget has been sanctioned, however one junior nurse will be appointed as an additional manpower (Sanctioned letter attached)

The above comments forwarded to the Principal-Investigator was reviewed by secondary reviewer:-

Second opinion of secondary reviewer, received on 19th October, 2023:-

1. The response to query numbers 1 and 2 are adequate, however the response to query number 3 is inadequate since the Grant letter attached is not for the said study. In such a case who will bear the cost of the investigations/treatment being offered to the subjects enrolled in the study?

Recommendation of third reviewer	**PI response**
In Scientific review Committee report, the name of one of the Co-PI (Prof. Amita Jain) is there: therefore it is requested to revise the SRC.	SRC has been revised and is attached in enclosures.
ICF (E/H)-regular attached but as the recruited subjects are children in age group of 1 month and Hindi version.	Informed consent form (E/H) has been revised as advised (Enclosure attached)
Letter of inclusion of KGMU as one of the center/site for this study by sponsoring authority (ICMR/New Delhi) is not attached. Please give the letter of inclusion/collaboration.	The submitted proposal is a part of DHR-ICMR-VRDL network.(Letter of collaboration is attached in enclosure)

The above comments were forwarded to the Principal-Investigator, response received on 18th October, 2023.

Comment:

- Discussion was done with Prof. Amita Jain to clarify whether KGMU was included as one of the Centre for the study or not, to which she confirmed that KGMU is an inherent part of DHR/ICMR VRDL Network.
- A letter has also been attached by the PI

Decision: The above response is being forwarded to the third reviewer for his comments while the comments of the first and second reviewers shall be sent to the Principal Investigator.

In inclusion criteria, Age and Sex specification-not mentioned. 3. Tentative approval letter from ICMR through email is attached but PI to submit the final approval letter from ICMR for this project. ***The above comments forwarded to the Principal-Investigator, response received on 19th October, 2023.*** **Comment:** • Kindly provide the screenshot of ICMR website. • Kindly provide Consent/Child Ascent form • The above response to be forwarded to Secondary reviewer for review. **Decision:** The above response to be forwarded to First & Secondary reviewer for review. ***Ref. code: 127thECMIB/P3***
II-A	**New Proposal**
1.	Research proposal entitled "***A prospective research study to collect images from oral cavity of participating subjects to build an artificial intelligence based tool for supporting the early detection of oral cancers***" submitted by Prof. U.S. Pal, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 762/OMSD/23 dated 10th August, 2023. ***Recommendation of reviewer:-*** 1. On one hand sponsor is ORAICLE Company of UK but it is mentioned in annexure 1 as Rikaian technology Private Limited. Why is this discrepancy? 2. The budget per patient includes honorarium for research team and not for patients visit. Kindly indicate the total budget including institutional overhead.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	3. In annexure 1 kindly indicate anticipated duration of study period. 4. In point 7 of annexure 1 it is indicated that NO organ tissue will be sampled. Then how will biopsies be obtained? 5. In annexure 1 it is indicated that sample will not be sent abroad but the protocol (page 10) indicates that sponsor (from UK) may request for blocks at the end of the study. 6. While 'NO' is indicated in data monitoring (annexure 1), it is clearly indicated in protocol that severe adverse event data needs to be monitored and reported to ethical committee as well as to sponsor (page 22) 7. In brief description of protocol, kindly categories methodology in PICO format, (population, intervention comparison, outcome) 8. Regarding potential risk, kindly summaries the specific anticipated adverse events. 9. The sample size selection specifies that study will be shared by ORAICLE and participating sites. What are those other participating sites? Has ethical clearance, been opted? 10. If compensation for injuries is included, more specific details regarding the type of injuries with examples and the amount of compensation for them needs to be stated in informed consent form rather than a generic statement. 11. Kindly indicate the names of other medical institutes, hospitals or institutions where the study is to be conducted. 12. Will the clinical expert or panel of expert belong to other sites or ORAICLE 13. Patient information sheet should detail about possible side-effects as stated in company's protocol as well as elaborate the compensation part. 14. Indemnity and insurance document sare legal document and should be submitted separately. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format. ***Ref. code: 127th ECM IIA/P1***
2.	Research proposal entitled ***"Outbreak analysis of acute conjunctivitis in Lucknow district of Uttar Pradesh"*** submitted by Prof. Prashant Gupta, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 595/23 dated 11th August, 2023. ***Recommendation of reviewer:-*** Approved **Decision:** Approved ***Ref. code: 127th ECM IIA/P2***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

3.	Research proposal entitled "***Exploring the role of hybrid multidimensional MRI in the detection of clinically significant prostate cancer: A virtual biopsy***" submitted by Dr. Durgesh Dwivedi, Associate Professor, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no. 971/RD/23 dated 25th August, 2023. ***Recommendation of reviewer:-*** Approved **Decision:** Approved ***Ref. code: 127th ECM IIA/P3***
4.	Research proposal entitled "***An analysis of the anomalous fissure of ligamentum teres hepatis: A morphological perspective in North Indian population***" submitted by Dr. Heena Singh, Assistant Professor, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 293/ANAT/23 dated 30th August, 2023. ***Recommendation of reviewer:-*** 1. Ph.D. scholar cannot be made a Co-PI. 2. Number of subjects: not mentioned. 3. Other points of section 5 not addressed. 4. Section 6: not addressed 5. Section 8: Consent: form whom/for what? 6. Section 10: If risks are not reasonable compared to anticipated benefits: Unethical to do the study. In view of this, there is no point doing this research. The rest of the proposal has thus not been reviewed. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format. ***Ref. code: 127th ECM IIA/P4***
5.	Research proposal entitled "***Differential profiling and assessment of early phase non-coding RNAs and adipokines in healthy controls, pre-diabetic, and diabetic patients- A pilot study***" submitted by Prof. Wahid Ali, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 1243/23 dated 29th August, 2023. ***Recommendation of reviewer:-*** • It is CDRI sponsored project, to be conducted by KGMU, SMS Jaipur and CDRI. It is clear that the patients will be enrolled from Medicine Department but the role of SMS Jaipur and CDRI is unclear. Will the samples be transferred to Jaipur/ CDRI for some part of the study. What will be the contributions of KGMU pathology department. Kindly explain the workflow clearly. • Who will collect informed consent from patients and when? • Kindly, define criteria to Label study subjects as healthy, pre-diabetic

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	or diabetic. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format. ***Ref. code: 127th ECM IIA/P5***
6.	Research proposal entitled "***Study of clinical outcomes of neuropsychiatric events in systemic lupus erythematosus patients attending Rheumatology clinic at a tertiary care centre***" submitted by Dr. Kriti Kishor, Assistant Professor, Department of Clinical Immunology & Rheumatology, King George's Medical University, U.P., Lucknow vide letter no. Rh/698/23 dated 29th August, 2023. ***Recommendation of reviewer:-*** 1. This seems to be one-group pretest-posttest design. 2. In the present form, the primary objective does not indicate it clearly. 3. The study variables and study parameters should be explicitly outlined. 4. The primary objective should be converted into research hypothesis in terms of the study parameters. 5. The sample size formula is arbitrary. It is for prevalence study. This is not a prevalent study. 6. The statistical analysis section is incomplete. It should be specific to the research hypothesis. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P6***
7.	Research proposal entitled "***Effect of flipped classroom teaching as an addon to the routine Teaching in understanding of Anatomy during first professional Teaching***" submitted by Prof. Rakesh Kumar Diwan, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 297/ANAT/23 dated 4th September, 2023. ***Recommendation of reviewer:-*** 1. They are trying to compare two different teaching methods. 2. This is prospective cohort study. 3. The two groups should be explicitly defined. 4. The questionnaire is required. Its detail of construction (including items) is required. 5. The method of assessment of the questionnaire should be outlined. 6. How the reliability and validity of the questionnaire would be assessed? 7. How much training is needed to learn how to administer it? 8. Sample size calculation and statistical analysis section is required. **Comment:** As above

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)

	Decision: Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P7***
8.	Research proposal entitled "***Development and assessment of Nanopore sequencing protocol for rapid drug resistance testing of Mycobacterium tuberculosis against 13 drugs of the new anti-tubercular drug regimens targeting multiple genes***" submitted by Prof. Amita Jain, Head, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 689/23 dated 6th September, 2023. ***Recommendation of reviewer:-*** • Approved for waiver **Decision:** Approved for waiver ***Ref. code: 127th ECM IIA/P8***
9.	Research proposal entitled "***Assessment of pain and discomfort during scaling and root planning procedures with topical anesthetic agents***" submitted by Prof. Pavitra Rastogi, Department of Periodontology & Implantology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 1375/P/23 dated 15th September, 2023. ***Recommendation of reviewer:-*** 1. Title of the proposed study says "Assessment of pain and discomfort" but when and how these assessments will be done is not clear. It is better to give a flow of planned study. 2. In KGMU proforma authors have marked "None" under the heading of clinical trials while in methodology it is clearly mentioned that this is a clinical trial. 3. Under the heading of study design, it has been mentioned that the proposed study will be a randomised split mouth clinical trial. How randomisation, blinding levels and methods are being done, not mentioned. 4. It would be better if the title clearly mention it as a randomised control trial. 5. Basis of sample size estimation is not mentioned. 6. How authors will reach some conclusion is not mentioned. At least there should be a plan of statistical analysis given. 7. There should be a mention of a clinical trial registry that will be done once we get ethical clearance. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P9***
10.	Research proposal entitled "***Role of heavy metal toxicity in progression of bladder cancer and their effect on quality of life***" sponsored by CST-UP submitted by Prof. Vishwajeet Singh, Department of Urology, King George's

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Medical University, U.P., Lucknow vide letter no. 753/URO/23 dated 5th September, 2023. ***Recommendation of reviewer:-*** 1. In this case control study the sample size as indicated is 94 cases and 94 controls i.e. total 180. So kindly rectify the total sample size as 180 in your submission. (Annexure 1 and text) 2. If Controls are healthy subjects then kindly mention their source and inclusion criteria. 3. If healthy controls are to be sampled then separate informed consent and information sheets need to be re-submitted both English and Hindi. 4. Kindly indicate a split budget as submitted. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P10***
11.	Research proposal entitled "***Identification of metabolic signature and their role among unknown aetiology of chronic kidney disease (CKDu)***" submitted by ICMR under supervision of Prof. Vishwajeet Singh, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 384/Nephro/23 dated 5th September, 2023. ***Recommendation of reviewer:-*** Approved **Decision:** Approved ***Ref. code: 127th ECM IIA/P11***
12.	Research proposal entitled "***Ellipsoid zone restoration correlates with final visual outcome in diabetic macular edema and macular hole surgery: A comparative analysis***" submitted by Prof. Sandeep Saxena, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no. 2020/OPH/23 dated 19th September, 2023. ***Recommendation of reviewer:-*** 1. Regarding sponsor information it is written as 'NA'. Then it is regarded as being ''international government'' as well as ''national industry''. Kindly resolve 2. While laboratory work up includes blood sampling, why annexure 1 indicates NO against the use of body fluids 3. Is the risk not reasonable compare to benefits (annexure 1, point10) 4. Kindly elaborate the role of DSMB. What are the anticipated adverse events that need to be reported to EC 5. If this is a retrospective study, then how will informed consent be obtained? Will the patient be called again? kindly make it clear

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Dated 25th October, 2023

	6. It is indicated as retrospective study, while methodology indicates that "after admission all patients will be assessed ----------". Kindly rectify the language and indicate whether it is analysis of archival records 7. In informed consent form the purpose of study procedure and benefit from studies, is not patient friendly. Kindly simplify the language for patient to understand. Both English and Hindi versions needs correction 8. The patient information sheet needs revision in a language that the patient may understand better. Also kindly examined carefully to exclude 'chronic dacryocystitis'(point 5) and replace it with your actual diagnosis. Both English and Hindi versions need correction. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P12***
13.	Research proposal entitled ***"Nurse-led genetic counseling in improving awareness and implementation of screening services for hereditary women's cancer (NuGenA)"*** submitted by Govt. of West Bengal under supervision of Prof. Nisha Singh, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/1240/23 dated 30th August, 2023. ***Recommendation of reviewer:-*** 1. In IEC proforma each box has a question mark which is probably an inadvertent error; however, this needs to be deleted. 2. The letter of intent is in the form of an email, which was sent to the PI long back on 27th January 2023 for which a reply was solicited by 5th Feb. Also ethical approval letter from the study site is enclosed, which is very old i.e. 4-12-2020. There is no mention of KGMU. A fresh letter of intent along with details will be needed. 3. Is there any provision for compensation and/or insurance for healthy relatives of the Cancer patient? 4. KGMU is not mentioned as a study site not in the CTRI. It seems from the proposal that only samples will be taken from KGMU. 5. IEC subsection 5 reveals 30 subjects in a year will be recruited whereas the proposal of 100 women in the first 24 months (preparatory phase) will be identified. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P13***
14.	Research proposal entitled ***"A quality improvement study to assess patient satisfaction in surgical out patient Department at a tertiary care Hospital in North India: A cross sectional study"*** submitted by ICMR under supervision

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	of Dr. Saumya Singh, Associate Professor, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 2355/23 dated 29th August, 2023. ***Recommendation of reviewer:-*** 1. Section 5: Duration of Subjects participation: not mentioned. 2. What is the role of volunteers in this study? 3. Why take Vulnerable Subjects in this study? 4. Why take Special group: "Staff" in this study? 5. Section 6: Why use direct identifiers? 6. Section 8 ii: Volunteer consent is not checked 7. Section 10: If risks are not reasonable compared to anticipated benefits: Unethical to do the study. In view of this, there is no point doing this research. The rest of the proposal has thus not been reviewed. 8. Section 10 iii: What is the expected direct benefit to the subject? **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P14***
15.	Research proposal entitled "***An analysis of risk factors associated with delayed presentation, neglected presentation and relapse in cases of clubfoot treated with ponseti technique at the clubfoot clinic of KGMU: A record review***" submitted by Dr. Vikas Verma, Associate Professor, Head, Department of Paediatric Orthopaedics, King George's Medical University, U.P., Lucknow vide letter no. 2585/PaedOrtho/23 dated 15th September, 2023. ***Recommendation of reviewer:-*** 1. Kindly submit the list of anticipated outcome variables and summaries the statistical analysis as per the respective variables. **Comment:** As above **Decision:** Approval subject to modification as per comments ***Ref. code: 127th ECM IIA/P15***
16.	Research proposal entitled "***Prospective global platform to evaluate and enhance cognitive and functional trajectories after stroke (PROSPECT)***" submitted by Hamilton Health Sciences through its Population Health Research Institute Hamilton General Hospital under supervision of Dr. Praveen Kumar Sharma, Additional Professor, Department of Neurology, King George's Medical University, U.P., Lucknow vide letter no. 426/Neuro/23 dated 21st September, 2023. ***Recommendation of reviewer:-***

(Hardeep Singh Malhotra)

19.	Research proposal entitled "***Radiation induced damage in head and neck and its management by hyperbaric oxygen therapy-randomized control trial***" submitted by Prof. Vijay Kumar, Head, Department of Plastic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1245/23 dated 30th September, 2023. ***Recommendation of reviewer:-*** 1. If it is really, RCT, all the fundamentals are missing. 2. For example, (i) proper formulation of research hypotheses, (ii) study variables, (iii) primary and secondary outcome measures, (iv) method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.), (v) How double blinding is done, (vi) how the success of masking assessed. 3. The two comparative groups should be explicitly identified. 4. The sample size calculation is not given. 5. The statistical methods used to compare groups for primary outcomes, methods for additional analyses, such as subgroup analyses and adjusted analyses. 6. How the results will be presented: (i) Participants flow, (ii) baseline data, (iii) outcomes and estimation, (iv) adverse events, etc. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P19***
20-	Research proposal entitled "***Oral health practice of dental professionals towards self oral care***" submitted by Dr. Sumit Kumar, Professor Jr. Grade, Department of Public Health Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 607/PHD/23 dated 27th September, 2023. ***Recommendation of reviewer:-***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Dated 25th October, 2023

	1. There are some primary guidelines, which should be followed in the construction of a scale. 2. Only some textual references are given for the questionnaire. It should be given explicitly, explaining where the items come from: (i) previous scale, (ii) clinical observations, (iii) expert opinion, (iv) patients' report, (v) research finding, (vi) theory. 3. Are they were assessed for (i) endorsement frequency, (ii) restriction in range, (iii) comprehensions, (iv) lack of ambiguity, (v) lack of value-laden or offensive content? 4. How is the scale checked for internal consistency? 5. Does it have good test-retest reliability? 6. What method is used to find the reliability coefficient? 7. How was the sample size calculated? 8. Does the scale have face validity? 9. Is there evidence of content validity? 10. Has it been evaluated for criterion validity? 11. With what groups has the scale been validated? 12. Can the scale be completed in a reasonable amount of time? 13. How much training is needed to learn how to administer it? 14. How the questionnaire will be evaluated to generate numerical score, so that it can be used in the assessment of the attitude and practices of the dental professionals? **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 127th ECM IIA/P20***

	127th IEC Decision	Forwarded to the forthcoming IEC Meeting will be scheduled on 08th December, 2023.
	PGTSC proposals	
	4-Ms. Pragati Maurya, MBBS student for STS grant under the guidance of Prof. Dileep Kumar Verma, Department of Physiology, KGMU, UP, Lucknow	***To study effect of examination stress on autonomic functions and salivary pH among medical students'*** received on 17th October, 2023.
	127th IEC Decision	Permission granted for an expedited review.
	5-Dr. Ujjawal Yadav, JR-I under the guidance of Prof. Avinash Agarwal, Head, Critical Care Medicine, KGMU. UP, Lucknow	***Comparative evaluation of different priming solutions in prevention of hypotension in critically ill patients undergoing slow low efficiency extended dialysis (SLED) a randomized controlled trial*** received on 17th October, 2023. He has submitted incomplete ICF
	127th IEC Decision	Returned in original to the Principal-Investigator with condition to kindly provide the complete Informed Consent form, Patient Information Sheet & full proposal.
3-	1. Regarding applications for an expedited review, it was noted that some proposals that were missing the deadline had been intimated well in advance by the funding agencies and a timely submission to the IEC was delayed on part of the Principal Investigator. 2. It was also noted that applications for an expedited review were being submitting arbitrarily instead of conforming to the IEC-SOP. To ease submission, a new form is being developed stating the need of an expedited review. 3. Similarly, applications seeking waiver of consent were not conforming the	

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	IEC-SOP. A new waiver form is being developed to aid smooth submission and processing of the submitted proposal. 4. Concerns were raised regarding suppositional and anticipatory grant of IEC approval for proposals being submitted to funding agencies or regulatory authorities where the approval is not mandatory such as CTRI, WHO, etc. It was, thus, decided that in instances where there is lack of clarity, that the Principal Investigator answers the query "Is it mandated by the Funding agency/ Regulatory authority to submit an IEC approval along with the proposal?". 5. Several proposals list self-funding in the section on funding. It was approved that such inadvertent errors must be avoided to the best possible extent. 6. An urgent need to have a unit (a department in the long-term) of Biostatistics for the teaching and training of UG/PG/PhD/Faculty/others, as well as for the pre-submission vetting of proposals (especially for theses) was observed. 7. There was an alarming concern regarding several projects seeking permission to send samples (blood/tissue/etc.) abroad without regulatory approval. Additionally, most Principal Investigators have failed to disclose these facts explicitly in their proposals raising doubts on the intention and sanctity of the proposal. An appraisal of ***"National Ethical Guidelines For Biomedical And Health Research Involving Human Participants, Indian Council Of Medical Research 2017"*** was done and following sections were noted: a. 3.8.3 International collaboration; - The institution/EC should not accept international proposals which cannot be conducted in the country of origin. b. 11.4.2 Transfer of biospecimens: - An MTA should be executed if the biospecimens are likely to be shipped from the host institution to collaborating institutions within the country or abroad. The EC should oversee the process of the in-country and international material transfer. Mandatory regulatory clearances with appropriate MoU are required if biospecimens are to be sent overseas. *See section 3.8.3 for further details.* Directorate General of Foreign Trade (DGFT) has issued a notification related to transfer of human biological material for commercial purposes.

V	Guidelines of PGTSC
-4	**XXI-PG Thesis Sub-Committee (PGTSC)** met on 12th October 2023 to discuss the proposals to be presented in the **127th Institutional Ethics Committee (IEC)** scheduled on 25th October 2023. As per agenda item IV (Other Matter), discussion was held to revise the existing SOP drafted on 1st April 2021. The revision was necessitated to cope up with an increase in the number of theses submitted and to upgrade the current guidelines to suit the changing landscape of research. Following members were present and contributed to the discussion. 1. Prof. Rajendra Nath - Member 2. Prof. Anupam Mishra - Member 3. Prof. Anita Rani - Member 4. Prof. Divya Narain Upadhyaya - Member 5. Prof. Nisha Mani Pandey - Member 6. Prof. Hardeep Singh Malhotra - Convener Following members were not present: Prof. Abbas Ali Mahdi (Committed elsewhere) and Prof. G.G. Agarwal (Ill-health). The proceedings, and decisions taken thereof, were as follows: 1. All theses will be submitted ONLY after "**Departmental Scientific Committee (DSC)**" review. These shall mandatorily include: a. Declaration on statistical review, stating the name of the person (faculty/statistician internal or external to KGMU; may or may not be a part of DSC) conducting the same. **b.** CONSORT Statement, ***if a randomised controlled trial is being conducted.*** c. STROBE Statement, ***if an observational study is being conducted.*** 2. To meet an increasing demand of PG Theses evaluation, it was proposed that the number of members be increased from an existing 10 to 15 members; it was unanimously accepted. 3. The quorum for **PGTSC** will be of 50% of all members (including Member-Secretary of **IEC**). 4. The existing criteria on proposal allocations was modified where each member will get "not more than 10" thesis/dissertation proposals (down from up to 15) at least 10 days prior to the date of the meeting. Only in exceptional circumstances, and with permission of the member concerned, shall this number be increased. 5. Members are expected to submit their suggestions/comments to the office of **IEC** electronically (by e-mail) at least 3 days before the scheduled

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	meeting of the **PGTSC**. 6. It was reiterated that the **PGTSC** should meet once a month to evaluate the thesis proposals. In the event that the number of proposals is ≤5, the same may be deferred to the next meeting but before the scheduled **IEC** to prevent any inadvertent delay. 7. PGTSC meeting will preferably be done in-person. Members, who are out-of-town or cannot attend in-person due to work exigencies, etc. can join online, the link of which shall be provided by the office of IEC. 8. Minutes of the meeting will be prepared and approved by circulation by the PGTSC preferably within 3 working days (not beyond 5 working days). 9. Decisions taken in the PGTSC need to be communicated to the student concerned within 7 working days of approval. 10. Minutes of PGTSC will be put up for ratification before the ensuing IEC. 11. Theses work involving drugs/ devices/ or similar interventions will be sent directly to IEC. 12. PG Thesis/Dissertation proposals will be evaluated as follows: Dental Sciences/ Medical Sciences/ M.Phil courses/ Nursing courses. 13. To serve as a ready reckoner, it was decided to prepare and post "eContent", including the Checklist of the required documents, to everyone concerned in KGMU. It is expected that it would streamline the process of submission and reduce the number of errors.
VI	**Brought to Ethics Committee after XIX-PGTSC held on 21st November, 2023**

8- Clarification of the research proposal entitled ***"Comparative evaluation of maxillofacial morphology in unilateral and bilateral cleft lip and palate subjects: A CBCT study"*** submitted by Dr. Nainsi Jain, JRII, Department of Orthodontics & Dentofacial Orthopedics, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 1649/Ortho/23 dated 12th September, 2023.

Previous PGTSC Comment	PI response
Will such patients be included into the study who have been already operated for cleft repair or those in which no surgery has been done?	In this study only those patients will be used in whom no surgery is done.
Will the three groups be age and sex matched?	Yes
Sample size is mentioned 57 at one place and 60 at one place.	Corrected, to maintain evenness of 3 groups and 6 subgroups 60 is the sample size we are taking in this study.
Vulnerable subjects has been ticked as 'No' whereas children are being used as study subjects.	Corrected as children or adolescent children from age group of 15-19 are bing included in studyk so the response has been made yes in children and vunerable subjects.
Who will bear the cost of the CBCT?	CBCT is required investigation in cleft lip and palate patients so patient will bear the cost.
Is this investigation part of standard treatment protocol?	Yes in cleft lip and palate patients CBCT is done to examine the extent of clefts.
How much radiation will the children be exposed to?	Since examining arches require small FOVs there radiation exposure will be on average 103μSv. The "as low as reasonably achievable" (ALARA) principle is recommended also for the use of CBCT.
Will this help in their further treatment?	Yes, for surgical treatment planning and

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	orthodontic treatment.
Why will the controls undergo CBCT and the associated radiation to be a part of the study?	Controls are the patients have undergone CBCT for other pathological condition and dental treatment. Their CBCT records can be obtained from Oral medicine and Radiology department KGMU.

	There are two co-supervisors mentioned on page 3 while four co-supervisors on page their names are also not the same. Kindly finalise the list in annexure 1 it is stated 'NO' against "where subjects from both sexes be recruited". Now which gender is to be taken? Kindly indicate and include in inclusion criteria.	Both sexes included in the study attached separately.
	Annexure 1 point 7 states 'NO' against use of body fluids but methodology involves blood sampling.	Attached separately
	What are the anticipated adverse effects (annexure 1 point11)- they need to be added in ICF.	No adverse events included in the study, attached separately.
	Patient information sheet both in English and Hindi needs to be submitted as per SOP of EC KGMU in annexure 1, 120 sample is required. While sample size calculation is 174. Why so?	Attached separately
	What are the various complications of type two diabetes mellitus as per the aims kindly indicate. It is not even indicated in inclusion criteria	----
	What is the outcome measures needed for analysis?	Attached separately
	Kindly summarise anticipated statistical analysis.	-----
	The above comment forwarded to Principal-Investigator was reviewed by Primary reviewer. ***Second opinion of Primary reviewer:-*** • Anticipated statistical analysis summary not attached • Patient Information sheet very carelusly framed. Previous PGTSC Comment	**PI response**
Nothing is said about the reliability and validity of the instrument to be used.	Zarit caregiver burden assessment scale is a validated tool with Cronbach's alpha 0.646. It has a mean Kappa value of 0.961. (Sinha A et.al)
Can the scale be completed in a reasonable amount of time?	Yes, the scale can be completed in a reasonable amount of time.
How much training is needed to learn how to administer it?	Before administering the Zarit burden scale, individuals can typically become proficient in its administration within a relatively short amount of time with the provision of basic instructions and practice.
Sample size calculation is for prevalence study. It will use measurement scale methods.	Zarit burden interview contains 22 questions, scoring from (0-88).

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		0-21: No burden-Mild burden 22-40: Mild-moderate burden 41-60: Moderate-severe burden 61-88: Severe burden. In this study we will calculate the mean burden score

32- Clarification of the proposal entitled ***"Epidemiology of pediatric trauma victims admitted to the trauma centre of KGMU: A prospective observational study"*** submitted by Dr. Durga Krishna, SRI, Department of Pediatric Orthopedics, King George's Medical University, U.P., Lucknow vide letter no. 2606/PaedOrtho/23 dated 3rd October, 2023.

Previous PGTSC Comment	PI response
The objective is not clear. It just says: To describe victim related factors like age, sex,……..	The objectives have been rewritten as 1. To study time, place and person. distribution of Paediatric trauma among patients admitted to trauma center of KGMU. 2. To describe certain factors related to treatment of Paediatric trauma patients admitted to the trauma centre of KGMU 3. To do a subgroup analysis based on age and sex.
What is the use of these variables?	DEMOGRAPHIC CHARACTERISTICS- Analysis of variables like age and sex can help us identify age and sex specific trends in injury mechanism and injury severity. INJURY RELATED CHARACTERISTICS- Analysing variables like mode of injury, site of injury, severity of injury and pattern of injury will help in identifying prevalence in each category, which type of injuries are more severe at presentation.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		Identifying such patterns will help in formulating policies to minimise/ prevent such occurrences. TREATMENT RELATED FACTORS Analysing variables like time since injury to presentaion, vehicle used for transport, referral from other centres and outcome of admission will help in identifying the efficacy/ any lacunae in emergency medical services.
	Proper research hypothesis should be formulated after identifying the study parameters.	Research hypothesis: Demographic factors like age and sex may have an effect on injury mechanism, severity of injury and outcome of admisson. Null hypothesis: Demographic factors like age and sex do not have an effect on injury mechanism of injury, injury severity and outcome of admission.
	Sample size calculation, statistical analysis should be in coherence with research hypothesis.	A previous study has reported the incidence of rate for paediatric injury to be 10460 per one lac per one year. (7) Sample size= 160 was calculated used the formula $n \geq \frac{NZ^2_{1-\alpha/2}p(1-p)}{d^2(N-1)+Z^2_{1-\alpha/2}p(1-p)}$ 95% CI per 5% margin error per 144+ 10% drop out = 160 patients Alpha- Type 1 error rate p: expected proportion d: marginal error rate N: Population size

Previous PGTSC Comment	PI response
The purpose of this study is to evaluate the cranial index. However, it is worth mentioning that the researcher intends to examine the correlation between body statures and hand and foot dimensions in the statistical analysis. This particular aspect is not explicitly mentioned in the proposal or objectives.	I am removing the correlation between body and stature part from the data analysis of my project. As it is not part of my project **Correction:** correlation coefficient will be used to analyse the sexual dimorphism of cranial index with significance at P<0.05

	1. As stated in Annexure 1 this study involves a (herbal) medicine of Indian system of medicine. So it would be better to include an ayurvedic co investigator. 2. This is stated to be double blind RCT. Kindly mention the technique of allocation, randomization & double blinding. Is placebo not indicated here? 3. Who will bear the cost of curcumin & tests. Do you plan to register this RCT.?? 4. Summarize the anticipated outcome variables and anticipated statistical analysis of the same. 5. Kindly mention the dose, duration , brand and mode of administering curcumin. 6. No need to submit the SOP guidelines of Pt information sheet. Instead kindly submit the actual patient information sheet both in English & Hindi accordingly. 7. Kindly revise "purpose of study" & "Study procedure" in ICF in such a language that the patient may understand. 8. In annexure 1 regarding use of biological specimen it is indicated as "NA" while lower down 'Yes' in indicated for the use of infectious & biohazardous specimen. This is contrasting statement. Also no indication of blood collection is mentioned for IL &TNF? 9. Kindly refer to CONSORT guidelines for RCT before resubmitting **PGTSC Comment:** As above **PGTSC Decision:** Modify & Re-submit with response to queries in tabular format. ***Ref. code: XXI-PGTSC-IIA/P3***
4.	Research proposal entitled ***"Effect of dexmedetomidine, propofol, and midazolam on diaphragm function assessed by ultrasound in postoperative patients: A randomized comparative study"*** submitted by Dr. Jyoti Sharma, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/573/23 dated 24th May, 2023. ***Recommendation of reviewer:*** 1. Scientific review committee should be revised as the name and signature of Chief Guide (Prof. G. P. Singh) is there in present SRC report. 2. SOP-Checklist point no.-10 ,Risk & benefit –marked as risk is not reasonable –please clarify and properly mark the section -10. 3. In Inclusion/ Exclusion criteria- Pregnant & lactating women criteria not mentioned 4. As this is randomized study, PI must mention the method of randomization and attach the Flow chart of the study. 5. Case record form–not attached

What is P1 and P2 in sample size? Kindly include the steps of sample size calculation. 3. Kindly include a copy of semi structured self administered proforma that will be used to extract details. 4. Kindly explain the short-term survival and how does it include febrile neutropenia / chemo toxicity 5. How and when will you assess febrile neutropenia and chemo toxicity? Kindly incorporate in your submission. 6. In point 10 of annexure 1, do you think that the risk here is not reasonable as compare to anticipated benefits. 7. Kindly elaborate on DSMB. What are the anticipated adverse events that need to be reported to IEC. 8. If patient information sheet is attached then where is informed consent

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	form? How will you obtained informed consent retrospectively? There is no consent waiver application either. 9. Kindly revise the patient information sheet specially points 479 13 14, 1517 and submit English and Hindi version both 10. By which parametres will you assess the response to neo adjuvant chemotherapy? Is it just the pathological response? Also includes the RECIST criteria. 11. Kindly summarize the anticipated continuous variables and proportional data that would be analyzed. 12. The scientific review committee report has not does not have a seal of chairperson. **PGTSC Comment:** As above **PGTSC Decision:** Modify & re-submit with response to queries in tabular format. ***Ref. code: XXI-PGTSC-IIA/P49***
50.	Research proposal entitled ***"Use of clinical nomogram with ICG based iymph node yield assessment in inguinal lymph node dissection in patients of carcinoma penis: A prospective observational study"*** submitted by Dr. Harsh, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 210/SY/23 dated 27th July, 2023. ***Recommendation of reviewer:*** 1- Section on 'Biological/hazardous material' is ticked as 'No' but lymph node dissection/biopsy is part of the project. 2- Patient information sheet is incomplete. 3- No Patient information sheet in Hindi has been attached. **PGTSC Comment:** As above **PGTSC Decision:** Modify & re-submit with response to queries in tabular format. ***Ref. code: XXI-PGTSC-IIA/P50***
51.	Research proposal entitled ***"Efficacy of early versus expectant artificial rupture of membranes in reducing induction delivery interval following cervical ripening by combined misoprostol and mechanical method: A randomized controlled trial"*** submitted by Dr. Arti Verma, JRI, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/081/23 dated 1st August, 2023. ***Recommendation of reviewer:*** 1. In SOP-Checklist point no-3, clinical trial–marked as NA (As this study is RCT, please correct, Point no.5 Vulnerability–marked as–No, but pregnant women are to be recruited-Please revise SOP Checklist *2.* CRF-Not attached **PGTSC Comment:** • Kindly modify the title ***"A randomized control study"*** in place of

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	"Randomized control trial" **PGTSC Decision:** Modify & re-submit with response to queries in tabular format. ***Ref. code: XXI-PGTSC-IIA/P51***
52.	Research proposal entitled ***"Lesion characterstics using IVUS imaging in diabetic individuals undergoing PCI and its impact on plaque modifying strategies"*** submitted by Dr. Rajesh Prasad Sharma, SRI, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 1641/Cardio/23 dated 11th August, 2023. ***Recommendation of reviewer:*** 1-The study has eight investigators from the same department with overlapping roles. Please reduce the number of Co-PIs or define their unique roles. 2-Sample size has not been calculated. Number of participants has not been mentioned. **PGTSC Comment:** • Kindly modify the title ***"Randomized control study" in place of "Randomized control trial"*** **PGTSC Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXI-PGTSC-IIA/P52***
53.	Research proposal entitled ***"A comparative study between acenocoumarol versus apixaban anticoagulants used in treatment of deep vein thrombosis patients at KGMU, a tertiary care centre- A prospective observational study"*** submitted by Dr. Madhulika Tiwari, JRI, Department of Pharmacology & Therapeutics, King George's Medical University, U.P., Lucknow vide letter no. 623/Pharm/23 dated 25th August, 2023. ***Recommendation of reviewer:*** 1. It may not be proper for the lay-patient to decide which particular anticoagulant drug to choose for himself and that too without giving any information of the drug profile to the patient. This is unethical. 2. Both the drugs have different pharmacokiinetics and pharmacodynamics, different risk profiles and side-effects, different requirements for compliance and patient monitoring. Only the investigator can decide which drug is to be given in a particular patient depending upon the patient profile itself. 3. How many cases of deep vein thrombosis are encountered in one year? Will the patient be admitted or treated on OPD basis? 4. Has pharmaco-economic-consideration been thought of? Who will fund this study? Patient or KGMU? 5. While dreaded complications like pulmonary embolism is anticipated by investigator apart from recurrence of DVT and requirement of regular liver function / kidney function tests, then why there is no plan to inform adverse events to IEC as per annexure.

Chairman, IEC

	treated successfully and discharged on stable condition therefore no compensation is required. **Previous ADR sub Committee Decision:** Defer to the next Meeting because quorum was incomplete **ADR sub Committee Decision:** Noted as above ***Ref. code: 102nd ECM IIA/P24***
Ib	ADR of research proposal entitled ***"Digoxin in patients with rheumatic heart disease-a randomized placebo controlled trial*** submitted by Dr. Prof. Rishi Sethi, Department of Cardiology, K.G's Medical University, U.P., Lueknow vide letter no. 266/Cardio/Res/2023 dated 1st August, 2023 & preliminary email dated 19th July, 2023 at 10:19 AM. **Death** **Patient ID & age and gender:** 063/39 year/Female **Patient Diagnosis:** RHD/Sev-MS/MVA 0.8cm **Patient enrollment date:** 07-12-2022 **Patient enrollment arm-**Digoxin **Patient follow up under study-**6th Month ,12th Month , 18th Month, 24th Month, 30th Month, 36th Month. **Follow up visit completed-**Enrolment & Baseline Follow-up **Planning on visit-** 6th M **SAE detected on date:** 04th May-2023 **Follow up visit remaining:** 6th Month, 12th Month, 18th Month, 24th Month, 30th Month, 36th Month. **Notified to EC, Sponsor-**19th July-2023 **14 days analysis report submitted to EC-**1st August, 2023 **Subject History:** A letter was received in the Office of the Ethics Committee on 1st August, 2023 from PI informing that the subject's LAR has informed to the PI repeated reminder calls for 6 months follow-up, but, the telephonic calls were not answered by the subject. The subject's LAR informed to PI on 18th July, 2023 that the patient had complaints of acute excruciating pain in abdomen on 3rd May, 2023 for which she underwent a few Investigations and was referred to some higher treatment centre. The subject could not be hospitalized anywhere and she passed away on 4th May 2023 morning around 6:30 AM at her home. As per the previous consultation and reports of ultrasound submitted by the LAR, it seems that the subject had gross ascites with absent peristalsis and intestinal perforation that might be the cause of the subject's death. The death of the subject is not related to the Investigational

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Bhawan)
Chairman, IEC

drug. No autopsy was done.

Recommendation of reviewer:-

- Patient enrolment date 07-12-2022. Skipped 6 month follow up in May, 2022. SAE occurred-04-05-2023. SAE detected on 18-07-2023. Notification to EC-19-07-2023.
- Patient was suffering from ascites and possible ileus and passed away due to this-The SAE doesn't appear to be related to the drug under study.

ADR sub Committee Comment:

- Letter asking for explanation that why 6th month visit was skipped and the SAE was detected on 18th July. 2023.

ADR sub Committee Decision: Defer to the next Meeting because quorum was incomplete.

DR sub Committee Decision: Approval subject to response reviewed from PI.

IA	Action Taken
1-	Clarification of research proposal entitled ***"Elucidate the role of miRNA mediating epithelial to mesenchymal transition in chronic myeloid leukemia"*** sponsored by DST Inspire Fellowship submitted by Ms. Surbhi Gupta, under the guidance Dr. Nitu Nigam, Associate Professor, Department of Center for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 190/CFAR/23 dated 20th September, 2023.

Previous EC Comment	PI response
The objectives are unclear, vague.	To analyze differential micro RNA in peripheral blood mononuclear cells (PBMC) of chronic myeloid leukemia patients for epithelial to mesenchymal transition. 2. Validation of differential differentially expressed (DE) genes in CML patients through qPCR. 3. To explore the role of screened miRNA in CML pathobiology and disease course.
What is the primary objective?	The primary objective of the study is to identify the different differential microRNA and to investigate their expression in chronic myeloid leukemia

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		mediating through epithelial to mesenchymal transition.
	Sample size calculation is based on which objective?	It is based on the first objective in which different micro RNA will be determined through sequencing. After that expression of selected miRNA having vital role in chronic myeloid leukemia mediating through epithelial to mesenchymal transition (EMT). Then the identified miRNA will be validated in all the CML patient samples through RT-PCR Finally, the pathobiology and disease course will be analyzed in CML modulating through epithelial to mesenchymal transition. Therefore the miRNA that has impact in CML regulating through epithelial to mesenchymal will work as biomarkers for disease diagnosis.
	Sample size of 30, appears to be too little for this type of research.	The study is not related to population of India but the population of chronic myeloid leukemia epithelial cases in India whose prevalence is very small and we are studying the status of miRNA expressions in these cases. The CML in correlation with epithelial to mesenchymal transition (EMT) is yet more to explore. The new sample size for the proposed study is 55.
	The above comments were forwarded to the Principal-Investigator which was put-up in the Meeting:- **Previous Decision:** A Sub-Committee will be constituted & call to PI with her guide for discussion. **Comment:** • The existing short-coming were informed in person and asked for rectification. **Decision:** Research proposal to be re-submitted ***Ref. code: 124thECM II B-FS/P1***	
2-	Clarification of research proposal entitled ***"Elucidate the regulatory role of miRNAs in epithelial to mesenchymal transition in cervical cancer patients"*** submitted by Mr. Praveen Kumar, Ph.D. Scholar under the guidance Dr. Nitu Nigam, Associate Professor,

(Alok Dhawan)
Chairman, IEC

criteria included both cervical cancer and other serious uncontrollable medical conditions, decreasing life expectancy please clarify. Inclusion and exclusion criteria may be modified accordingly.	
The study design is case control and experimental if any control is included then kindly mention the inclusion criteria and include informed consent form as well as in information sheet for control.	This study is only case and control, inclusion and exclusion criteria is mention according controls. Page No. 27
How will clinical validation be done as shown in last flowchart? Also specify some tentative micro RNA and EMT markers.	Changes done in flowchart. Some tentative miRNA and EMT markers already show in Review of literature and mention in the methodology also Page No. 31 and 32

The above comments were forwarded to the Principal-Investigator and the response was reviewed by Primary reviewer:-

Second opinion	**PI response**
Split budget need to be added.	Total budgets have been added Column No.04 and CSIR-JRF/SRF award letter attached on page no.45
Regarding patients 9 & 11- Kindly enclosed ICF & information sheet for health controls both in English & Hindi	We have to take 2ml blood sample from patients which do not have to be reported, Column 11 ICE got tick by mistake and information sheet for health controls both English and Hindi are attaché. Page no.05 and 37 to 42.

The above comments were forwarded to the Principal-Investigator and the response was reviewed by Primary reviewer:-

Third opinion of Primary reviewer:-

- Split budget needs to be indicated in term of manpower and contingency, including consumables & needed instrument etc if needed.
- Total budget as indicated is 2,42,646/- While the letter quoted in Annexure indicates 4,40,000/-? Why this discrepancy? There is no indication for contingency.
- The above quoted letter suggest stipend for only one year (Nov 22 to Oct 23) While duration of prospective project is quoted as 3 yrs. What will be the source of funding after October, 2023. Kindly clarify through proper documents.
- Mention the source of funding for laboratory work through proper documentation

6-	Clarification of research proposal entitled "***Effect of flipped classroom teaching as an addon to the routine Teaching in understanding of Anatomy during first professional Teaching***" submitted by Prof. Rakesh Kumar Diwan, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 515/ANAT/23 dated 29th November, 2023.

Previous EC Comment	PI response
They are trying to compare two different teaching methods	Yes, Lectures will be taken using traditional method (didactic) and flip classroom methodology. A comparative analysis of flip classroom teaching method with lecture based session will be done by obtaining the score of the students.
This is prospective Cohort study	Yes, it is repeated measures designed and prospective experimental comparative study.
The two groups should be explicitly defined.	Total first year MBBS students are 250, that are divided into two groups A and cConsist of 125 students each.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	The questionnaire is required. Its detail of construction (including items) is required.	This is a pilot study. A structured questionnaire to assess the learner's perceptions about Flipped Classroom Teaching will be obtained from the participants. A sample (questionnaire) has been attached for reference.
	The method of assessment of the questionnaire should be outlined.	Each group will teach the class by traditional and flipped classroom method and after completion of the class post session assessment MCQ will be conducted. A structured questionnaire to assess the learner's perception about flipped classroom teaching methodology will be obtained from the participants. A sample (MCQ format) has been attached for reference.
	How the reliability and validity of the Questionnaire would be assess.	This is a pilot study, questionnaire is validated by internal and external experts of our Anatomy Department. A structured questionnaire to assess the learner's perception about flipped classroom teaching methodology will obtain from the participants. This validated questions for reference (Aristotle, et al: Flipped classroom methodology vs traditional didactic lectures in undergraduate medical students) The kappa statistic is frequently used to test interrater reliability. The importance of rater reliability lies in the fact that it represents the extent to which the data collected in the study are correct representations of the variables measured. After Collecting the scores of flipped and traditional class methodology, this test will be done.
	How much training is needed to learn how to administer it.	Questionnaire is in simple English language. Therefore, no training is required.
	Sample size calculation and statistical analysis section is required.	Sample Size: The sample size for the present study was estimated for repeated

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		measures between factors ANOVA using G*Power software. Considering a minimum clinical significant difference of 2 units between any two duration groups, the minimum number of participants required in each duration group was estimated as 103 for 95% power and 5% level of significance, assuming the within standard deviation to be 5. After accounting for the attrition of 10%, the final sample size would be 114 in each duration group. Statistical Analysis: Continuous and categorical variables related to patient's demographic, and clinical data will be presented as mean and SD and percentages, respectively.[AD1] Student's t-test will be used for continuous variables and Chi-square test for categorical variables to analyse the significant difference between groups. A p-value < 0.05 will be considered statistically significant. Multivariate analysis will be performed using repeated measures ANOVA to assess the group differences and multiple linear regression to find the significant predictors of outcome variables.

	DCGI-Hospitalization
I-	ADR of research proposal entitled INVICTUS: entitled ***"Investigation of rheumatic AF Treatment using vitamin K antagonists, rivaroxaban or aspirin studies"*** M/s Gilead Sciences Inc submitted by Prof. Rishi Sethi, Department of Cardiology, K.G's Medical University, U.P., Lucknow vide letter no. 1645/Cardio/Res/2021 dated 2nd July, 2021. **SAE term:** Hospitalized for valve replacement **Patient ID & age and gender:** R-M-010-0084, 47/Male **Patient diagnosis:** RHD/Sev MS/Post-BMV/in AF/EF-42%/NYHA III/Fuc of MVR with 31 M **Patient enrolled date:** 15-11-2018 **Patient enrolled in Arm-**Rivaroxaban 20 mg OD **Patient follow up under study-** 1st Month, 6th Month, 12th Month & every 6th Month till 5 year **Follow up visit Completed-** 1st Month, 6th Month, 12th Month, 18th Month, 24th Month, 30th Month (completed by telephonic visit-07-Jun-2021) **Planning on Visit-** No planning on visit **SAE detected on Date:** 24th June, 2021 (Hospitalization) **Follow up visit remaining:** 36th Month, 42nd Month, 48th Month, 54th Month, 60th Month **24 Hrs. Notified in EC, Sponsor & DCGI by Email:** 24th June, 2021 **14 Days analysis report submitted EC & DCGI:** 03rd July, 2021 **Subject History:** A letter was received in the Office of the Ethics Committee on 2nd July, 2021 from PI informing that the Subject was hospitalized for 11 days i.e. from 27th January, 2021 to 6th Feb, 2021 in the CTVS department for valve replacement, subject's last visit was done on 7th June, 2021 (30th Month visit) telephonically and the subject had not disclosed about this event at that time. Subject's unscheduled visit was done on 24th June, 2021 and then while reviewing his medical records, we became aware about the event. ***Recommendation of Primary reviewer:-*** SAE (Hospitalization) is due to disease outcome (RHD/ Sev. MS/ P-BMV / in AF/EF-42%/NYHA III/ Fuc MVR with 31M valve) and not due to intervention (Rivaroxaban) as patient was taking VKA for more than 2 year 7 months and completed 30th Month visit without any complaint. Subject made an unscheduled visit on 24th June, 2021 due to breathlessness. While scrutinizing his medical record PI came to know about subject's SAE (Hospitalization from 27th January, 2021 to 6th February, 2021 for visit in CTVS department for valve replacement surgery). Therefore, causal relationship cannot be established and no compensation is warranted as the subject was successfully treated and discharged from the hospital. **Comment:- Besides aforementioned, nothing further.** **Decision: Approved**

	inhibitory antibodies to factor VIII or IX sponsored by Novartis Health Care Pvt. Ltd. submitted by Prof. S.P. Verma, Department of Clinical Hematology, K.G's Medical University, U.P., Lucknow vide letter dated 1st August, 2023, 15th August, 2023, 12th September, 2023 & 18th November, 2023. **Sub.:** 356000505004 Event term **As per the subject, he fell down on the road after** being hit by some vehicle on July 25, but he did not inform anybody in his family or the site. On July 29, the subject experienced a severe headache and vomiting, so his mother went to the local hospital and the local doctor advised a CT scan. As per the CT scane report, the subject experienced a CNS bleed and the local doctor advised the subject take some medication. As per the advice, PI-500 IU Factor VIII was administered on July 29, 2023. PI advised the subject to visit the site with all the reports. On July 31, the subject came to the site with reports and met with PI. PI advised some medication to the subject and as per the standard of care, 500 IU of factor VIII was advised OD for 7 days. After 7 days, repeat the CT. Hospitalization is not required. After 07 days from 29th July, 2023.The CT scan was performed on 4th August, 2023 and as per the CT report subject intracranial hematoma was reducing but not resolved and as per the subject the pain is also reducing and vomiting was stopped. So PI advised to repeat CT scan after 7 days and continue the 500 IU factor administration for more 7 days. Prescribed medications were stopped on 4th August, 2023. Only 500 IU factor VIII was continuing for more 07 days and Valprol-CR 300 (Sodium Valproate (200mg) + Valproic Acid (87mg) OD continue for more 03 months. Factor administration was stopped on 12-08-23 PI advised to Subject for repeat CT scan after 02 days. Subject CT scan was done on 16th August, 2023 and as per the report size of hematoma was reducing. For safety purpose PI advised to subject 250 IUfactor VIII administration for more 07 days. Factor administration was start on 16th August, 2023 to 22nd August, 2023. ***Recommendation of Primary reviewer:-*** SAE (Hospitalization) was due to severe headache and vomiting because of CNS bleed, which was detected by CT Scan and this was the result of accidental injury and fall of the subject after being hit by some vehicle. Therefore SAE is not related to clinical trial intervention. Subject was treated successfully for this accidental injury and had recovered is no casual relationship between the SAE & the intervention; no compensation is, therefore, warrented. **Comment:- Besides aforementioned, nothing further.** **Decision: Approved** ***Ref. code: 101stECMIIC/P18***

Dated 8th December, 2023

Subject History:

A letter of PI was received in the Office of the Ethics Committee on 2nd November, 2023 from PI & email dated 20th October, 2023 at 10:49 AM. The subject was enrolled on 16th January, 2023 in the Digoxin study.

The subject was contacted on 14th April, 2023 for the 3 months telephonic follow-up, but the subject's contact numbers were not reachable and switched off. The subject was repeatedly contacted on reminder calls for 6 month visit calls (window period till 16th September, 2023) but the calls were not answered.

The subject was again contacted 20th October, 2023 when the subject's LAR informed that the subject was having complaint of breathlessness and dyspnea since 29th January, 2023.

The subject was not able to reach the hospital and he died on the way on 31st January, 2023.

A follow up scheduled visit M-3 call was made to the Patient on 20th October, 2023 that the subject's LAR received the call on 20th October, 2023 and informed that the subject was having a complaint of breathlessness and dyspnoea since 29th January, 2023. The subject was not able to reach the hospital and he died on the way on 31st January, 2023. A local practitioner came and confirmed the patient's death and no autopsy was done. Despite multiple reminders the subject's LAR was unable to provide the death certificate of the subject. The SAE is not related to the investigational drug.

Recommendation of reviewer:

- Enrolment date – 16.01.2023. TAVI insertion was done on 05.10.2023.
- SAE occurred on 12.10.2023. Complete Heart Block
- SAE detected on 13.10.2023 when patient reported to hospital with syncope. Patient was hospitalized and Pacemaker implantation wad done on 14.10.2023. Patient was discharged on 16.10.2023.
- 24-hour report on 17.10.2023 (late – 4/5 days after SAE occurrence and after patient discharge from hospital)
- 14-day analysis report on 30.10.2023 (late)
- CHB is one of the complications of TAVI. But PI has reported that the SAE is not due to the study. Explanation may be sought on this and the reason for late reporting.

Comment:- Reply received from PI has been reviewed.
Decision: Approved

Subject History:

A letter of PI was received in the Office of the Ethics Committee on 22nd November, 2023 from PI & preliminary email dated 7th November, 2023 at 03:51 PM .A follow up scheduled visit M-3 telephonic follow-up and 6 months actual follow-up visit at the PI's site, the call were not answered. The subject's LAR informed on 6th November, 2023 that the subject was admitted for MVR surgery on 28th June that the subject was admitted for MVR surgery and was kept under observation as she had complaints of post-surgery fever and delirium. The subject passes away on 5th July, 2023 in the hospital around 6.28 AM due to sudden cardiac arrest and postoperative delirium. The SAE is not related to the investigational drug.

- The SAE documents for the above subject was sent on 21st November, 2023 around 2:00 PM (within the 14 days time limit) at the EC office but because of some meeting there was no staff available to receive the SAE documents and they were returned back so we recent the documents on the very next day i.e. 22nd November, 2023.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Recommendation of both reviewers : May be / Provisionally approved **Decision:** Approved ***Ref. code:128th IEC IB/P1***
2-	Expedited review of research proposal entitled ***"Optical coherence tomography (OCT) and its brain volume correlated in Alzheimer's disease: A cross-sectional study"*** submitted by Dr. Shailendra Mohan Tripathi, Additional Professor, Department of G.M.H., K.G's Medical University, U.P., Lucknow vide letter no. nil dated 14th October, 2023. ***The above research proposal was forwarded to two reviewers, for review.*** *Recommendation of First reviewer :* Provisionally approved *Recommendation of Secondary reviewer :* • The researcher has mentioned in point 10, that the risks outweigh the benefits. Such a study is unethical. Such protocols should not be considered for review leave alone. **Decision:** Approved ***Ref. code:128th IEC IB/P2***
3-	Expedited review of research proposal entitled ***"Development of artificial intelligence (A1) for screening, early diagnosis and treatment of oral potentially malignanat disorders (OPMDs) through population-based registry"*** submitted by Prof. Uma Shanker Pal, Department of Oral & Maxillofacial Surgery, FODS, K.G's Medical University, U.P., Lucknow vide letter no. 1018/OMSD/23 dated 29th November, 2023. ***The above research proposal was forwarded to two reviewers, for review.*** *Recommendation of first reviewer :* The project looks fine just two things in certain places e.g. in the first point of the research question language needs improvement, Moreover, references are cited in the text but are not listed. *Recommendation of Secondary reviewer :* • The title mentions the word 'registry' which registry is being used? • In the section on Sponsor, National Industry is ticked. Which Industry is the sponsor of the study? • Subject selection/calculation-How will a population of 5,69,117 be surveyed? Or will the actual sample size be smaller? • Section on 'Special Group Subjects' mentions 'Any other'. Please specify. • Section on 'Risk' - Risk is reasonable has been ticked as No. Minimal Risk has been ticked. • Advertising for the project has been ticked as 'Yes'. Please furnish advertisement material which will be used for the same. • Section on 'Risk' - Risk is reasonable has been ticked as No. Minimal Risk has

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	been ticked. • Reporting of adverse events is ticked as 'yes' - to Sponsor/IEC. Please mention what adverse events are expected in the PIS/ICF. • Patient information sheet in Hindi not attached. • PI proposes to use an AI algorithm based App for diagnosis, screening etc. Details about the App and its developer are missing. How will the photos /data generated by the App be stored? Will it be stored in the App, servers? Who will ensure safety of the data generated by the App? ***The above comments were forwarded to the Principal-Investigator which was forwarded to Secondary reviewer:-*** ***Recommendation of Secondary reviewer:*** • The title mentions the word 'registry'. Which registry is being used? The response to this query still mentions a 'population-based registry' without details of which registry is being used. • In the section on sponsor, National Industry is ticked. Which Industry is the sponsor of the study?-ICMR has been mentioned as sponsor which is not an 'Industry'. This needs changes in the IEC form. • Section on 'Risk' –Risk is reasonable has been ticked as No. Minimal risk has been ticked-Needs changes in the IEC form as per the response of the PI. • Reporting of adverse events is ticked as 'Yes'-to Sponsor/IEC-Needs changes in the IEC form. ***The above comments were forwarded to the Principal-Investigator:*** Provisionally approved **Decision:** Approved ***Ref. code:128th IEC IB/P3***
4.	Expedited review of research proposal entitled "***Improved data on dengue covering differences in epidemiological surveillance, patient demographics, the health seeking behavior of patients and standards of care***" under supervision of Prof. Avinash Agrawal, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1950/DCCM/23 dated 2nd November, 2023. ***The above research proposal was forwarded to two reviewers, for review.*** ***Recommendation of first reviewer:-*** • This is a multi-centre study. • There are certain guidelines for multi-centre studies. These must be followed. Only a list of potential sites is given. The name of participating centres is required. • What will be the common protocol? • Which will be a coordinating centre to collect, process and analyze the data? • The number of field sites varies greatly across studies according to their size, complexity and purpose. How will this be handled?

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Dated 8th December, 2023

	• Sample size calculation is arbitrary. This is due to the fact that there are too many objectives. • Identify one primary objective and put the rest into secondary objectives. The primary objective should be converted into a proper research hypothesis in terms of the study variables and parameters. • Sample size calculation will be based on the research hypothesis defined in step 7. • Data analysis plan is very general. It should be specific to the research hypothesis. • The reliability and validity of instruments have to be assessed. • Can the scale be completed in a reasonable amount of time? • How will it be scored/evaluated? ***Recommendation of Secondary reviewer:-*** May be / Provisionally approved **Decision:** Approved subject to incorporation/inclusion of responses wherever applicable in the revised proposal. ***Ref. code: 128th ECM IB/P4***
5-	Expedited review of research proposal entitled "***A cytogenetic study of suspected cases of chromosomal in Uttar Pradesh region of North India***" under supervision of Prof. Rakesh Kumar Verma, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 497/ANAT/23 dated 24th November, 2023. ***The above research proposal was forwarded to two reviewers, for review.*** ***Recommendation of First reviewer:-*** • This is a prospective multicentric project conditionally approved for funding by ICMR. • The submitted project lacks scientific committee report that may be considered with the approval by project selection committee of ICMR. Still scientific committee report is necessary to assess the technical aspects of this project. • IRB of a centre (AIIMS Rishikesh) has approved the project subject to mandatory reporting of adverse events. But in this submission there are no anticipated adverse events (Annexure 1 point II). Why this confusion? • Is the risk not reasonable compared to anticipated benefits. (Annexure 1 point 10) • The patient information sheet (English & Hindi version) need to be re-written as per SOP of EC KGMU. • In ICF the email of, PI needs to be added. Also the 'study procedure' and 'Benefits of study' need to be elaborated and in a language that patient can understand. Kindly revise. • There is no indication of funding for KGMU. It seems that full budget will given to the nodal centre (AIIMS Gorakhpur). How will the budget be allocated to KGMU and for what purpose kindly enclose split budget as well for KGMU including institutional overhead. • The background states that chromosomal anomalies are "most significant" cause

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	of genetic disorders in human which actually is not correct. They may be common but certainly not the 'most significant'. Hence a scientific review committee needs to assess the entire project. • Regarding expected out-comes what are the anticipated determinants of chromosomal disorders? • Where will the chromosomal study be under taken? Which laboratory? Which department? Who will under take this lab work. (Individual or team?) ***Recommendation of secondary reviewer:*** • The researcher has mentioned in point 10, that the risks outweigh the benefits. Kindly clarify. **Comment:** • Patient enrolment, budget & initiation of project only after formal IEC approval. **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 128th ECM IB/P5***
II-A	**New Proposal**

	revised in a manner that it reflects that the study will be done after getting ethical approval. **EC Comment:** As above **EC Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 128thECM IIA/P2***
3.	Research proposal entitled "***Association of bedtime procrastination with sleep behavior and subjective well-being in the Indian population- A cross-sectional study***" under supervision of Dr. Sujit K Kar, Additional Professor, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 1582/Psy/23 dated 3rd October, 2023. ***Recommendation of reviewer:-*** • The reliability and validity of instruments have to be assessed. • Can the scale be completed in a reasonable amount of time? • How will it be scored/evaluated? • Give the exclusive list of social media platforms to be used in the study. • Why do you want to choose convenient sampling? It is a non-probability sampling method. • The non-probability samples cannot depend upon the rationale of probability theory. At least with a probabilistic sample, we know the odds or probability that we have represented the population well. We are able to estimate confidence intervals for the statistic or do the testing of hypotheses. With non-probability samples, we may or may not represent the population well, and it will often be hard for us to know how well we've done so. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 128thECM IIA/P3***
4.	Research proposal entitled "***Functional and radiological outcome of combined PRIF with plate osteosynthesis and percutaneous screw fixation of pelvic ring fracture and/or acetabulum fractures: experience at tertiary care centre***" under supervision of Dr. Ravindra Mohan, Assistant Professor, Department of Orthopedic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 14022/OS/23 dated 12th October, 2023. ***Recommendation of reviewer:-*** • Annexure 1 is grossly incomplete. Kindly complete. • Enumerate all the outcome variables & accordingly describe anticipated statistical analysis. • Kindly submit patient information sheet as per SOP of EC KGMU. • Under taking by PI indicates the possibility of unexpected & serious adverse

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	events. Is it just a generic statement? What are those events-kindly specify & add in ICF & patient information sheet. • If this is a retrospective project then it seems that these patients will be called for follow-up evaluation? **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 128th ECM IIA/P4***
5.	Research proposal entitled "***Efficacy of Hyper Baric Oxygen Therapy (HBOT) in management of Diabetic Foot Ulcer-A Randomized control trial***" under supervision of Prof. Vijay Kumar, Head, Department of Plastic & Reconstructive Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1269/23 dated 6th October, 2023. ***Recommendation of secondary reviewer:*** • The researcher has mentioned in point 10. that the risks outweigh the benefits. Kindly clarify. **Comment:** • As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 128th ECM IIA/P5***
6.	Research proposal entitled "***Primary obstructive megaureter with urolithiasis: 20 years' single centre experience***" submitted by Prof. Apul Goel, Head, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 879/URO/23 dated 18th October, 2023. ***Recommendation of reviewer:-*** May be / Provisionally Approved **Decision:** Approved ***Ref. code: 128th ECM IIA/P6***
7.	Research proposal entitled "***Development of patient derived organoid bio-bank as a resource for drug response studies and precision medicine application in triple negative breast cancer***" sponsored by ICMR, New Delhi submitted by Prof. Pooja Ramakant, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. EndoSurg/374/23 dated 29th September, 2023. ***Recommendation of reviewer:-*** No ethics issues. But the information brochures need to explain 'tumor organoids' and system to validate. ' A small piece of breast tumor taken from the biopsy will be grown in a tube / bottle and as it develops similar to a tumor mass, it will be used to study the effects/ efficacy of the medicine.' Something like this.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Comment: • Issues associated with Bio safety & Bio banking alongwith commercialisation of the material. • Needs detailed clarification. **Decision:** Revise & Re-submit with response to comments in tabular format. *Ref. code: 128thECM IIA/P7*
8.	Research proposal entitled "*To evaluate the variables in mouth opening among the population of northern India: An observational study*" under supervision of Prof. Pavitra Rastogi, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. nil dated 6th October, 2023. ***Recommendation of reviewer:-*** May be / Provisionally Approved **Decision:** Approved *Ref. code: 128thECM IIA/P8*
9.	Research proposal entitled "*Diagnostic evaluation of index molecular test lit (s) compared to the microbiological reference standard for detection of adult pulmonary tuberculosis*" submitted to ICMR New Delhi under supervision of Dr. Parul Jain, Associate Professor, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 813/23 dated 13th October, 2023. ***Recommendation of reviewer:-*** • Project incomplete • Review of literature not provided • No references **Comment:** Approved subject to incorporation of reviewer's concern. Ethical clearance of other Centre's. Names of Participating Centres. **Decision:** Revise & re-submit *Ref. code: 128thECM IIA/P9*
10.	Research proposal entitled "*Centre of Excellence for adolescent Health and Development in KGMU, Lucknow*" submitted to NHM (National Health Mission) under supervision of Prof. Sujata Deo, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/1642/23 dated 27th October, 2023. ***Recommendation of reviewer:-*** • Title should be "Justification for establishment of Centre of Excellence for adolescent Health and Development in KGMU, Lucknow." • Identify one primary objective and the rest should be clustered into secondary objectives. • Identify study variables and population parameters.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Convert the primary objective into "research hypothesis" using the study variables and parameters of step 3. • Sample size calculation is arbitrary. It should be specific to the research hypothesis of Step 4. • The statistical analysis section is very general. It should be in tune with the research hypothesis and other objectives of the study. **Comment:** As above **Decision:** Re-submit with clarification ***Ref. code: 128th ECM IIA/P10***
11.	Research proposal entitled "***Evaluation of clinico-pathological characteristics, prognostic factors and treatment outcomes in patients with ewing sarcoma in children and young adults***" under supervision of Dr. Nishant Verma, Additional Professor, Department of Pediatrics, King George's Medical University, U.P., Lucknow vide letter no. 3437/Ped/23 dated 31st October, 2023. ***Recommendation of reviewer:-*** May be / Provisionally Approved **Decision:** Approved ***Ref. code: 128th ECM IIA/P11***
12.	Research proposal entitled "***Effectiveness of continuing nursing education on knowledge regarding intellectual property right among nursing professionals working in various states of India***" under supervision of Mrs. Sudha Mishra, Assistant Professor, KGMU College of Nursing, King George's Medical University, U.P., Lucknow vide letter no. 1738/23 dated 2nd November, 2023. ***Recommendation of reviewer:-*** • The IEC format needs to be filled out properly; please look at point no.8 and the checklist. • Please check ICF statement and correct no. of participants. • Proposal description:- a. Title states that the study is on nursing professionals working in various states of India; but the study protocol does not reflect. b. Methodology to be written properly. c. Subject inclusion/ exclusion criteria should be there. d. Procedure of the study is missing **Comment:** • As above **Decision:** Revise & Re-submit with response to comments in tabular format. ***Ref. code: 128th ECM IIA/P12***
13.	Research proposal entitled "***Development of psychological assessment tool for the***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	assessment of problematic internet use (PIU) among adults" under supervision of Prof. Shweta Singh, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 1816/Psy/23 dated 2nd November, 2023. ***Recommendation of reviewer:-*** • No ethics issues. • It should be made clear that how many times the questionnaire will be filled. The study is said to last for 5 months. **Comment:** As above **Decision:** Provisionally approved with condition to kindly explain that how many times the questionnaire will be filled. The study is said to last for 5 months. ***Ref. code: 128th ECM IIA/P13***
14.	Research proposal entitled "***Comparative evaluation of carbamazepine and botox treatment of trigeminal neuralgia***" under supervision of Dr. Akhilanand Chaurasia, Associate Professor, Department of Oral Medicine & Radiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 523/PM&R/23 dated 28th October, 2023. ***Recommendation of reviewer:-*** • Approved with suggestion: The number of subjects calculated are 169 + 10% drop outs. But only 50 patients will be enrolled in each group leading to a total of 150. Therefore, number of patients in each group shall be increased. **Comment:** • Kindly include a Co-Investigator from the Department of Neurology, KGMU, UP, Lucknow. **Decision:** Approval subject to modification. ***Ref. code: 128th ECM IIA/P14***
15.	Research proposal entitled "***Role of urinary monocyte chemoattractant protein-1 (MCP-1), plasminogen activator inhibitor-1 (PAI-1), neutrophil gelatinase- associated lipocalin (NGAL) and liver-type fatty acid binding protein (L-FABP) as urinary biomarkers for early detection of renal damage in posterior urethral valves (PUV)***" under supervision of Prof. Archika Gupta, Department of Pediatric Surgery, King George's Medical University, U.P., Lucknow vide letter no. 927/PedSY/23 dated 7th November, 2023. ***Recommendation of reviewer:-*** • No ethics issues. But the patient information brochure does not mention, whether blood or urine or both or any other sample will be collected. Needs to be clear. • The information brochure should be for the parents as the patient will be a child. The language needs improvement .e.g. , 'WHY HAVE I BEEN CHOSEN? - SINCE YOUR PATIENT IS HAVING POSTERIOR URETHRAL VALVE SO YOUR CHILD IS CHOSEN'

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Whether micturating cystourethrography will be done for the research or it is a part of the routine follow up and management? • Hindi brochure mentions that serum creatinine will be done while English brochure mentions only urine and MCU. • Need to improve Hindi and English patient info brochures. **Comment:** As above **Decision:** Approved subject to incorporation of reviewer's comments. ***Ref. code: 128th ECM IIA/P15***
16.	Research proposal entitled "***Evaluating the efficacy of oblique of oblique osteotomy and uniplanar distraction in TMJ ankylosis patients***" under supervision of Prof. Geeta Singh, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 960/ONSD/23 dated 1st November, 2023. ***Recommendation of reviewer:-*** • It is not a proposal. • Here they are presenting the results of a study already conducted on 10 patients with TMJ ankylosis in the period between January 2021 and January 2023. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format. ***Ref. code: 128th ECM IIA/P16***
17.	Research proposal entitled "***Feedback collection for the modified postpartum intrauterine device (PPIUD) (Tcu380A) with inserter in postparum women who underwent vaginal delivery***" submitted by Pregna International Ltd. under supervision of Prof. Anjoo Agarwal, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/1757/23 dated 10th November, 2023. ***Recommendation of reviewer:-*** May be / Provisionally Approved **Decision:** Approved ***Ref. code: 128th ECM IIA/P17***
18.	Research proposal entitled "***Designing and implementation of health care model in patients with stage 2 breast cancer***" under supervision of Prof. Pooja Ramakant, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. 427/EndoSurg/23 dated 3rd November, 2023. ***Recommendation of reviewer:-*** • I'm one of the co-investigators of this project.

Recommendation of reviewer:-

May be / Provisionally Approved

Decision: Approved

Ref. code: 121st ECM IIA/P6

4. Modification of research proposal entitled "***To evaluate the bone mineral status in children with type 1 diabetes mellitus-a hospital based case-control study***" submitted by Dr. Arpita, Associate Professor, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no.3485/Ped/2023 dated 9th November, 2023.

Recommendation of reviewer:-

(i) The proposal were revised and revisions are enlisted as study design has been changed from case control to cohort study while in the revised proposal there is still exclusion and inclusion criteria for the controls in the revised protocols.

(ii) Bifurcation of budget is well described but from where the researchers will get the fund/budget is not given.

(iii) Since, I was not the primary reviewer for the unrevised proposal and the current revised proposal doesn't have ICF forms, KGMU specific proforma, departmental approval etc. So, I would not able to comment on these.

IA	**Action Taken**
1	Clarification of research proposal entitled ***"Co-incidence of liver fibrosis with OSMF in areca nut habituals-An observational study"*** submitted by Dr. Karina Hyanki, JRI, Department of Oral Medicine & Radiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 483/OM&R/22 dated 4th October, 2023.

Previous PGTSC Comments	PI response
There are four sections: Research question, research hypothesis, aims and objectives. They do not syndromes.	1- **Dr. Anurag Tripathi** B.D.S, M.D.S. Additional Professor, Department of Oral Medicine and Radiology Faculty of Dental Sciences, King George's Medical University, U.P. Lucknow 2- **Prof. (Dr). Ranjit Kumar Patil** Professor and Head, Department of Oral Medicine and Radiology, Faculty of Dental Sciences, King George's Medical University U.P.,

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Lucknow. 3- **Prof (Dr.) Sumit Rungta** D.M (Gastroenterology) Professor (Jr. Grade) & Head, Department of Medical Gastroenterology, King George's Medical University, U.P., Lucknow.
The statements under these sections are contradictory and confusing.	Is there any co relation between fibrosis in osmf and liver fibrosis in osmf patients having areca nut ? Comparison of liver fibrosis in control group of OSMF patients with OSMF patients having areca nut habit?
There should be one primary research hypothesis clearly stated. Everything thing else should be subjected to secondary objectives.	To find the degree oif hepatic changes in OSMF patients having areca nut, using Elastography amd Liver Function Test (LFT) To find the incidence of liver fibrosis in various grades of fibrosis occurring in OSMF patients having areca nut habitual.
Aim	To find the degree of hepatic changes in OSMF patients having areca nut, using Elastography and Liver Function Test (LFT)
Objective	To find the incidence of liver fibrosis in various grades of fibrosis occurring in OSMF patients having areca nut habitual.
Methodology	Enclosed
Budget	Self-funded
Sample size	32

6 Clarification of research proposal entitled *"Intramedullary nailing vs hemireplacement arthroplasty in unstable intertrochanteric femur fracture in elderly"* submitted by Dr. Krishna Mani Shukla, JRI, Department of Physical Medicine & Rehabilitation, King George's Medical University, U.P., Lucknow vide letter no. 1290/Ortho/23 dated 17th October, 2023.

Previous PGTSC Comments	PI response
The study is very similar to another study from the same department by Dr. Ritesh Chakoo under Dr. Mayank Mahendra. This will result in a salami study. Please reconsider either of the two studies.	Thesis of Dr. Krishna Mani Shukla is based on a broader aspect of hip preservation surgery only (PFN). On the other hand thesis of thesis of Dr. Krishna Mani Shukla is based on comparative study pertaining to hip replacement surgery (hemireplacement)
IEC proforma is incompletely filled.	Attached separately
Sample size is mentioned as 100 at one place and 80 at another.	Sample size attached separately
No clinical end point is given when the scoring will be done.	Modified Harris hips score will be used. Age range between 40-070 years both male and female will be recruited in the study.

The above comment forwarded to the Principal-Investigator was reviewed by the reviewer:-

Second opinion of reviewer	PI response
Typing errors in clarification of point no.1	Yes, Thesis of Dr. Ritesh Chako is based on a broader aspect of hip preservation surgery only (PFN). On the other hand thesis of thesis of Dr. Krishna Mani Shukla is based

7 Clarification of research proposal entitled ***"Clinical outcome of idiopathic congenital talipes equinovarus treated with ponseti method"*** submitted by Dr. Nitin Jeenjwadia, SRI, Department of Pediatric Orthopedics, King George's Medical University, U.P., Lucknow vide letter no. 2466/PaedOrtho/23 dated 4th July, 2023.

Previous PGTSC Comments	PI response
Some details should be given about Pirani scoring method.	The Pirani Score is a simple and reliable system to determine severity and monitor progress in the Assessment and Treatment of Clubfoot. It is an easy to use tool, developed to assess the severity of each of the individual components of Clubfoot. It is used both as a means to assess the severity of the Clubfoot at initial presentation and for ongoing monitoring of the patient's progress. The Pirani Clubfoot Score documents the severity of the deformity and sequential scores are an excellent way to monitor progress.
How the numbers/scores would be extracted from this scale.	In Pirani score 6 well described clinical signs of clubfoot. Three of these signs indicate primarily Hind Foot Contracture (HFC) and three signs indicate primarily Mid Foot Contracture (MFC). Hind Foot Contracture (HFC) - 1. Posterior crease (PC), 2. Rigid Equinus(RE), 3. Empty Heel (EH) Mid Foot Contracture (MFC) -

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	1. Curved lateral border, 2. Medial crease, 3. Coverage of the talar head Each component will be scored as 0 (normal), 0.5 (mildly abnormal), or 1 (severely abnormal). Pirani scoring of each component and the total scores will be maintained at each visit on a weekly interval. The least total score for all categories combined will be 0 and the maximum score as 6.
It seems to be a pre-post study done on a single sample.	Assessment of pre-correction and post-correction of deformity is done following the same process on weekly visits of the patient till full correction is achieved. Pirani scoring at initial presentation (Pre correction) and follow same process in every weekly visit till achieving full correction (post correction)
The sample size calculation is incorrect as it is for two independent samples.	Corrected sample size statistical al calculation is enclosed herewith.
Statistical analysis section is missing.	Data will be recorded on Microsoft excel sheet. Categorical variables will be described using frequency table of histograms. Continuous variables will be described using measures of central tendency (mean, median and mode) and measures of dispersion like SD. Correlation and a test for correlation will be used to find the significant correlation between the Pirani score and the total number of casts. A probability value of 0.05 will be accepted as the level of statistical significance.

8	Clarification of research proposal entitled ***"CT guided evaluation of rotational deformity in femoral shaft fractures in Children treated by flexible elastic intra medullary nailing: A prospective cohort study"*** submitted by Dr. Praseeth K.R, SRI, Department of Pediatric Orthopedics, King George's Medical University, U.P., Lucknow vide letter no. 2612/PaedOrtho/23 dated 5th October, 2023.

Previous PGTSC Comments	PI response
Some details of evaluating Scales are required including their reliability and validity.	Attached separately
How are these scored?	These are measured in the axial view CT scan taken in the final follow-up of the patient after the fracture has united. The torsion angle of the femur is compared to the opposite normal side and the difference is noted in degrees using standard CT scan axial slices. It' there is a difference then it is counted to be in the category of rotational malalignrrient of'the fenatll following TENS surgery.
Sample size calculation is for prevalence study, not for measurement scale.	Attached separately
The statistical analysis section is very general. It should be specific to the research hypothesis.	Statistical analysis will be done by finding outthe number of patients with malrotation (asmeasured by the Torsion angle of ie femw of the operated side compared to the normal side añer complete fracture union) following the surgery expressed as a per-centage out of ie total number of patients studied. Data ofpatients with malrotation will be entered in Microxoñ Excel and chi-

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		square analysis will be done for categorical variables, T-test and ANOVA analysis will be done for continuous variables usiclg IBM Corp.'s SPSS version. 27. Statistical significance was defined as a p value<0.05

	Please attach diagnostic criteria for TBM according to Marais et al.	 Diagnostic criteria CLINICAL (MAXIMUM CATEGORY SCORE = 6) Symptom duration of more than 5 days Systemic symptoms suggestive of TB (1 or more of: weight loss/poor weight gain in children), night sweats or f History of recent close contact with an individual with pulmonary TB or a positive TST/IGRA in a child < 10 year Focal neurological deficit (excluding cranial nerve palsies) Cranial nerve palsy CSF (MAXIMUM CATEGORY SCORE = 4) Clear appearance Cells: 10–500 per µl Lymphocytic predominance (>50%) Protein raised(>1 g/dl or greater than 1 g/L CSF to plasma glucose ratio of less than 50% or an absolute CSF glucose concentration less than 2.2 mmol/L CEREBRAL IMAGING (CT AND/OR MRI) (MAXIMUM CATEGORY SCORE = 6) Basilar exudate Focal meningeal enhancement Tuberculoma Infarct Pan-cerebral brain hypodensity EXTRANEURAL TB (MAXIMUM CATEGORY SCORE = 4) Chest radiograph suggestive of active TB (excluding miliary TB) Chest radiograph suggestive of miliary TB CT/MRI/US evidence of TB outside the CNS AFB identified or *M. tuberculosis* cultured from another source i.e., sputum, lymph node, gastric washing, urine **Exclusion of alternative diagnoses**- An alternative diagnosis must be confirmed microbiologically, serologica **Definite TBM** = AFB seen on CSF microscopy, positive CSF *M. tuberculosis* culture, or positive CSF *M. tuberc* suggestive of meningitis or AFB seen in the context of histological changes consistent with TB brain or spinal c changes, or miliary meningitis on autopsy). **Probable TBM** = Total score of ≥ 12 (if neuroimaging available) (total score of ≥ 13 if unavailable) **Possible TBM** = Total score of 6–11 (if neuroimaging available) (total score of 6–9 if unavailable) **Not TBM** = Alternative diagnosis established, without a definitive diagnosis of tuberculous meningitis or other c TBM: tuberculous meningitis; TB: tuberculosis; TST: tuberculin skin test; IGRA: interferon gamma release assay; CSF: c cerebrospinal fluid; CNS: Central Nervous System; US: ultrasound; AFB: acid fast bacilli; NAAT: nucleic acid amplificatio

The above comment forwarded to the Principal-Investigator was reviewed by the reviewer:-

Second opinion of Primary reviewer:-

- SOP-Checklist-again not ticked properly-please attach SOP-Checklist separately.
- Give a complete calculated sample size with the method.
- The tool-Diagnostic criteria for tuberculosis meningitis are attached but not readable-Please send it again.
- Review the CONSORT statement.
- DCGI approval/repurposing of Azathioprine.

The above comment forwarded to the Principal-Investigator was reviewed by the reviewer:-

Provisionally approved

PGTSC Decision: Send to regular IEC:-

- DSMC to periodically review the progress/protocols
- Who would bear the cost of treatment/adverse events/ insurance etc.
- Provisionally approval has cancelled.

	Previous PGTSC Comment:- • Kindly provide properly filled Patient Informed Sheet. ***The above comment forwarded to the Principal-Investigator was reviewed by the reviewer:-*** Provisionally approved **PGTSC Decision:** Approved ***Ref. code: XX-PGTSC-IIA/P30***
19	Clarification of research proposal entitled ***"Role of soluble triggering receptor expressed on myeloid cells-1 (sTREM-1) in neonates with early and late-onset neonatal sepsis"*** submitted by Dr. Shradha Gupta, JRI, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 501/23 dated 22nd July, 2023. ***Previous PGTSC Comment:-*** • It is not clear whether it is a comparative study (Comparison between sTerM-1 levels of two kinds of neonates) or correlation study (Correlation or association between SterM-1 level and severity of infection). • The severity of infection has to be defined. • The sample size formula is for prevalence study. Anyway, it can be formulated after clarification of "primary objective" as in point 1. • Statistical analysis section is missing. ***The above comment forwarded to the Principal-Investigator was reviewed by the reviewer:-*** Provisionally approved **PGTSC Decision:** Approved ***Ref. code: XX-PGTSC-IIA/P34***
20	Clarification of research proposal entitled ***"Efficacy of microvascular couplers for venous microanastomosis in the reconstruction of oral defects"*** submitted by Dr. Ranjeet Singh, JR, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 918/OMFS/23 dated 12th October, 2023.

Previous PGTSC Comments	PI response
EC Comment 1 This seems to be comparative study	This is not a comparative study, this is an interventional study with the results of those compared with previous literature data.
EC Comment 2 The control group should be properly defined.	As this is not an comparative study & results where compared with previous published literature, there is no need of control group.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	EC Comment 3 The null hypothesis is not properly defined. It should be defined in terms of study parameters and variables, which should be identified for the study.	The null hypothesis is properly defined and corrections done as advised and attached in proforma.
	EC Comment 4 The sample size is for prevalence study. It should be specific to research hypothesis.	Sample size was calculated on the basis of efficacy of coupler in venous anastomosis and not for the prevalence. Which is appropriate for the research hypothesis?
	EC Comment 5 The statistical analysis section is general. It should be specific to research hypothesis.	Continuous variables conforming to a normal distribution will be expressed as mean ± standard deviation. Counting data will be expressed as number and percentages. The independent-samples t-test will be used for inter-group analysis of quantitative data. The $\chi 2$ test will used to find association between study variables. In all of the statistical analyses, $P < 0.05$ will be considered to be statistically significant. SPSS latest available version and MS Excel will be used for statistical analysis of the data.

Chairman, IEC

Dated 8th December, 2023

	Recommendation of reviewer: • Seal of Chairperson in scientific review committee is missing. • Annexure 1 patient 5 states that sample size is only 58 but sample size indicates 58 per group. Similarly the study period in annexure 1 patient 5 is 1.5 years while elsewhere it is 1 year. Kindly resolve the discrepancy. • Is the risk not reasonable compared to anticipated benefits? (Annexure 1 patient 10) • What are the anticipated adverse events that need to be reported to IEC? (Annexure 1 patient 11) • Kindly complete the check list part of Annexure 1. • If this a RCT then refer to CONSORT statement for further refirement. • The text in sample size calculation is printed carelessly. Kindly correct. • Being RCT, kindly mention about allocation & randomization method to be followed. Also submit the methodology in a flowchart format. • Are there only 2 outcome variables? If more mention them • Elaborate the anticipated statistical data management analysis as per the outcome variables. • In ICF the 'Study procedures' & 'Benefits of study' need to be re-written, elaborated & in the language that patient can better understand. • Patient information sheet is totally wrong and cannot be accepted. Regretfully the patient information sheet of another study from QMH (Dr. Nivedita Prakash) is identical with this submission. Kindly rewrite in a customized fashion, according to submitted project. **PGTSC Comment:** As above **PGTSC Decision:** Modified & re-submit with response to queries in tabular format. ***Ref. code: XXII-PGTSC-IIA/P15***

12. Dr. Anita Rani -Member
13. Dr. D.N. Upadhyaya -Additional Member-Secretary, IEC
14. Dr. Hardeep Singh Malhotra -Member-Secretary, IEC, ex-officio

The following Member was not present in the Meeting:-

1. Dr. Shubha R Phadke

	Action Taken
1-	Clarification of modified research protocol version 3.1.2 entitled "***Evaluate the effectiveness, safety and tolerability of various doses of linezolid in combination with bedaquiline and pretomanid in adults with extensively drug-resistant (XDR),MDR with additional resistance to fluroquinolones or second line injectables, intolerant/non-responsive multidrug-resistant (MDR) pulmonary tuberculosis in India***" sponsored by ICMR, New Delhi submitted by Prof. Surya Kant, Department of Respiratory Medicine vide letter no. 009/24 dated 3rd January, 2024. ***Previous Comments:*** • The Iinvestigator has submitted an updated protocol version for approval but has not indicated if earlier version was ethically approved. • Although the new version is approved by the institutional ethics committee of the National Institute of Research in Tuberculosis, no evidence of KGMU approval is enclosed. • They need to submit annexure 1 and ICF as per SOP of EC IRB KGMU. • Since adverse effects include lethal life threatening consequences including death, a proper patient information sheet needs to be enclosed as per SOP of EC IRB KGMU. • The PI may think of incorporating co-investigators from other specialties if there is a high chance of such side effects such as cardiac events etc. This may further facilitate continuous monitoring.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Who will bear the cost of treatment and hospitalization of patients with adverse events: patient himself? or KGMU? or ICMR? • Where and how will the Whole Genome Sequencing be done? • Clear documents for Trial-Registration and insurance needs to be submitted. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** **Decision:** Approved ***Ref. code: 109th ECMIB/P7***
2-	Clarification of research proposal entitled ***"Lung oscillometry registry for patients with various Respiratory disorders and healthy subjects (LEAD Study)"*** submitted by Prof. Surya Kant, Head, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 10/24 dated 3rd January, 2024.

Previous Comment	PI response
To attach the original proposal (Correspondence) of CREST and ARISE network	Annexure-1 (attached)
To attach the full designation of all the investigators involved	Annexure-2 (attached)
To attach patient information sheet both in English & Hindi	Annexure-3 (attached)
Kindly mention the names of various centers involved in the study (National & International) rather than referring the EC to link	Annexure-4 (attached)

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.
Recommendation of PR: Approved
Decision: Approved

Ref. code:115th ECM IIA/P13

3- Clarification of research proposal entitled ***"Effect of dopamine as VEGF antagonist on progression of sepsis to septic shock, ALI (acute lung injury) and AKI (acute kidney injury)"*** submitted by Dr. Zia Arshad, Additional Professor, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. 263/CCU/2023 dated 19th December, 2023.

Previous Comment	PI response
Patient information sheet is not attached.	Revised & Attached
Methodology is grossly incomplete. Kindly elaborate the details of intervention, comparison & outcome.	Methodology is re-written intervention; comparison & outcome are described in detail.
Kindly revise methodology & data sheet	Methodology re-written & Data Sheet

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	in relevance the sepsis & septic shock.	Revised (attached)
	Anticipated adverse event is still not added in ICF.	Tachycardia
	Not complied. Methodology to be re-written as per the points rose earlier.	Methodology re-written

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Second opinion of reviewer:

- The submitted methodology is acceptable now.
- The left blanks in annexure 1 need to be completed such as number of subjects etc.
- The patient information sheet is incorrect; it should be as per the guidelines already attached with this revised submission.
- The consent form should detail 'study procedure' according to the patients understanding and relevant layman language.
- Kindly refer to the SOP of IEC (KGMU website).

The aforementioned comments were sent to the Principal-Investigator vide office letter no.2862/Ethics/2024 dated 5th January, 2024. Awaiting reply from the PI.

Decision: Reminder to be sent to the PI

Ref. code:119thECM IIA/P3

4- Clarification of research protocol no. DEN302 entitled ***"A randomized, double-blind, placebo-controlled, phase 3 trial to investigate the safety and immunogenicity of a dengue tetravalent vaccine (Live Attenuated) (TDV) administered subcutaneously to healthy subjects aged 4 to 60 years in India"*** sponsored by M/s Takeda Vaccines, Inc. submitted by Dr. D. Himanshu, Additional Professor, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. MED/CT/26/23 dated 7th December, 2023.

Previous comment:

- PI has sent the Declaration statement (given by Sponsor) regarding sample transportation to abroad, but permission from regulatory authorities for the same is missing -PI is requested to send the same or justify.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Recommendation of PR: Approved

Decision: Approved

Ref. code:121stECMIIC/P2

5- Clarification of research proposal entitled ***"Effect of nutraceutical potential of pumpkin seeds on glycaemic and lipid profile in type 2 diabetes mellitus patients"*** submitted by Miss. Poonam Sahu, Ph.D. Scholar under the guidance Prof. Dileep Kumar Verma, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no. 3602/PHY/23 dated 22nd December, 2023.

	Provide UPCST proposal	I have submitted my PhD synopsis for ethical approval. Earlier I was employed as a Junior Research Assistant (JRA) in UP-CST project and the project tenure has ended on 5th July 2023. (Sanction letter and Appointment proof attached) Currently, I am employed as Junior Research Fellow (JRF) in ICMR Adhoc-project (Sanction letter and Appointment proof attached). The objectives of my Ph.D. synopsis and ICMR project are same. The Ph.D. guide and the Principal-Investigator of ICMR project is Dr. Dileep Kumar Verma in both the cases.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.
Recommendation of PR: Approved
Decision: Approved

Ref. code:124thECMIIB-Ph.D/P1

6- Clarification of research proposal entitled ***"Study on clinical outcomes and drug resistance profile (both phenotypic and genotypic) in MDR tuberculosis patients treated with bedaquiline containing regimen"*** submitted by Mrs. Rashmi Ratnam, Ph.D. 2021 Scholar through her guide Prof. R.A.S. Kushwaha, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1213/Resp/23 dated 6th December, 2023.

Previous Comment	PI response
Budget has to be mentioned in rupees, not by naming the funding agency?	150000/- Rs. As this is only a Ph. D. thesis work, no budget is provided by any funding agency. The TB testing consumables are supplied by National Tuberculosis Elimination Program (NTEP). The bedaquiline drug and other required items will be purchased by the scholar herself as the scholar is working at IRL TB LAB as a microbiologist.
No. of subjects to be recruited not mentioned?	90 MDR patients will be recruited in the study. The sample size and its estimation were already mentioned in the proforma attached with the checklist. Page No. 8.
Why Vulnerable Samples have been ticked?	As any of the mentioned vulnerable subjects can be a MDR patient if he/she found suitable for the study then only they will be included.
Bio-banking is being done: what will be	Sputum culture positive isolates are being

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	stored, for what purposes?	stored according to sample retention policy of NABL accredited lab, this is a routine T B Laboratory activity not only for the purpose for Ph.D. thesis.
	Hindi patient information sheet should be written properly. Google translate should not be used?	Amendment has been done accordingly. Page No.11
	Is the Ph.D. student will not work in the laboratory?	Student will work in laboratory as the student will enroll the patients from the dept. of respiratory medicine, collect sputum samples, process these samples in T.B. Laboratory and will conduct test MIC for bedaquiline, gene sequencing in the laboratory also maintain and analyze the results.
	What are the primary & secondary objective measures?	For primary objectives, outcome measures will be: Culture conversion Treatment outcome in terms of cured, died, treatment failure and lost to follow up Frequency of primary and secondary drug resistance in genotypic and phenotypic DST. For secondary objectives, outcome measures will be: Comparative efficacy of culture conversion and treatment outcome of all oral longer with shorter oral bedaquiline containing regimens. Page No.: 10
	How long will Patient be followed?	It will be done at intervals defined by the NTEP for both the regimens for maximum 6 months (Bedaquiline is given to the patients for a maximum period of 6 months).
	Why 2 groups have been included?	Two groups have been included because we want to know the frequency of primary and secondary Bedaquiline resistance.
	When and why will drug resistant profiling be done?	Drug resistant profiling will be done at the time of initial screening of patient samples and when any follow up sample will be culture positive. This will be done to check any change in drug resistant status of M. tuberculosis. Page No.: 9.
	Statistical tests and methodology need to	For primary objective outcome: Cox

7- Clarification of research proposal entitled ***"To explore the relationship between periodontitis and preterm delivery with Fcγ receptor polymorphisms as genetic susceptibility factor"*** submitted by Dr. Iman Baig, Ph.D. 2019 Scholar through her guide Prof. Pavitra Kumar Rastogi, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 4026/P/23 dated 18th December, 2023.

Previous Comment	PI response
As is clear from the 1st subsection of the IEC, i.e., Sponsor information, it is for external funding agencies be they Indian or any other It needs to be filled out as none or not applicable, and then PI may declare that the expenses would be borne by him.	Sponsor information has been revised and re-filled as none or not applicable and the PI has then further declared that the expenses would be borne by her.
IEC point no. 7.iv PI chooses the option yes and states the collected samples will be stored. The point is about the use of pre-existing samples. So the option to be chosen is no.	The correct option has been selected and marked as no.
In Pt. Information Sheet (both English and Hindi) point no. 7 to be revisited, why to write you can drive, drink.....मदिरा का सेवन कर सकते हैं. ICF and Patient information sheets need to be written in simple language.	Patient information sheet (both English and Hindi) point no.7 has been revised and written in simpler language.

10- Clarification of research proposal entitled ***"Study of clinical outcomes of neuropsychiatric events in systemic lupus erythematosus patients attending Rheumatology clinic at a tertiary care centre"*** submitted by Dr. Kriti Kishor, Assistant Professor, Department of Clinical Immunology & Rheumatology, King George's Medical University, U.P., Lucknow vide letter no. Rh/998/23 dated 15th December, 2023.

Previous Comment	PI response
Comment 1/2/3: Study variables and Primary objectives	PRIMARY OBJECTIVE: To assess the impact of immunosuppression on clinical outcomes (Likert scale) and change in health related QOL in terms of SF-36 and Lupus QOL in a multidisciplinary assessed and prospectively followed up cohort of patients with Neuropsychiatric Lupus. SECONDARY OBJECTIVES: 1. To study the proportion of NPSLE patients achieving LLDAS and impact of LLDAS on HRQOL in terms of Lupus QOL and SF-36 at 1 year. 2. To study the proportion of NPSLE patients achieving remission as per

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	DORIS definition of SLE remission and impact of remission on HRQOL in terms of Lupus QOL and SF-36 at 1 year. 3. To assess damage accrual as measured by SDI (SLE damage index) at 1 year and its impact on HRQOL in NPSLE. 4. To study whether different pathophysiological mechanism (inflammatory/pro-thrombotic) impact HRQOL (SF-36 :PCS and MCS and Lupus QOL 8 domains) in NPSLE patients at 1 year 5.To study whether different pathophysiological mechanism (inflammatory/pro-thrombotic) impact NPSLE patients achieving LLDAS or remission as per DORIS definition of SLE remission . 6. To study the effect of SLE disease duration and duration of neuropsychiatric symptoms on HRQOL at 1 year. 7. To study the spectrum of autoantibody profile of patients of NPSLE. 8. To study the spectrum of radiological findings in patients of NPSLE.
Comment 4: Research hypothesis	Does immunosuppression in NPSLE improve clinical outcomes and impact HRQOL in terms of SF-36 and Lupus QOL at 1 year follow up
Comment 5: Sample size	Since there are no studies from India which have assessed Clinical outcomes and HRQOL in NPSLE patients followed up prospectively, considering this a pilot study all NPSLE patients enrolled over 1 year will be included with a minimum sample size of 20.
Comment 6: Statistical analysis	All data will be expressed as mean (±standard deviation), medians with interquartile range (IQR) or proportion if applicable. Independent associations between clinical- demographic variables

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Dated 12th January, 2024

		(age, gender, disease duration, duration of NP event, lag time between SLE diagnosis and NP event presentation, change in SLEDAI-2K [cSLEDAI-2K], SDI at first visit and 1 year, antiphospholipid syndrome diagnosis, NP SLE diagnosis and NP SLE pathophysiological phenotypes) will be investigated by univariate linear regression analysis, using the change in Likert scale, SF-36 MCS and PCS , Lupus QOL domains as the dependent variables. Variables with univariate associations with a p & lt; 0.20 will be retested in a multivariate model. Secondly, a multiple variable analysis will be performed in order to test for the contributory or confounding effect of several independent variables.
	The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer. ***Recommendation of reviewer:*** • Provisionally Approved **Decision:** Approved ***Ref. code: 127th ECM IIA/P6***	
11-	Clarification of research proposal entitled ***"Role of heavy metal toxicity in progression of bladder cancer and their effect on quality of life"*** sponsored by CST-UP submitted by Prof. Vishwajeet Singh, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 1097/URO/23 dated 29th December, 2023. ***Previous comments:-*** • In this case control study the sample size as indicated is 94 cases and 94 controls i.e. total 180. So kindly rectify the total sample size as 180 in your submission. (Annexure 1 and text) • If Controls are healthy subjects then kindly mention their source and inclusion criteria. • If healthy controls are to be sampled then separate informed consent and information sheets need to be re-submitted both English and Hindi. • Kindly indicate a split budget as submitted. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** **Comment:**	

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• In information sheet for healthy subjects it is important to mention the process of blood sampling through venepuncture technique. The same to be indicated in ICF. • The 'Study procedure' section in ICF needs to be less technical & more as per patient-understandable language. • Kindly demarcate the ICF for patients and Healthy subjects separately. **Decision:** Approval subject to appropriate modification of the current proposal. ***Ref. code:127th ECM IIA/P10***
12-	Clarification of research proposal entitled ***"Ellipsoid zone restoration correlates with final visual outcome in diabetic macular edema and macular hole surgery: A comparative analysis"*** submitted by Prof. Sandeep Saxena, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no. 2213/OPH/23 dated 29th December, 2023. **Previous Comment:** • The methodology indicates that the study has already been done while the overall impression is that of a prospective study of retrospective records plus follow-up. Also the steps of sample size calculation need to be mentioned. ***The aforementioned comments were forwarded to the Principal-Investigator vide office letter no.2861/Ethics/2023 dated 5th January, 2024. Awaiting reply from the PI.*** **Decision:** Reminder to be sent to the PI ***Ref. code:127th ECM IIA/P12***
13-	Clarification of research proposal entitled ***"Nurse-led genetic counseling in improving awareness and implementation of screening services for hereditary women's cancer (NuGenA)"*** submitted by Govt. of West Bengal under supervision of Prof. Nisha Singh, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/2010/23 dated 14th December, 2023. ***Previous comment:*** • In IEC proforma each box has a question mark which is probably an inadvertent error; however, this needs to be deleted. • The letter of intent is in the form of an email, which was sent to the PI long back on 27th January 2023 for which a reply was solicited by 5th Feb. Also ethical approval letter from the study site is enclosed, which is very old i.e. 4-12-2020. There is no mention of KGMU. A fresh letter of intent along with details will be needed. • Is there any provision for compensation and/or insurance for healthy relatives of the Cancer patient? • KGMU is not mentioned as a study site not in the CTRI. It seems from the proposal that only samples will be taken from KGMU. • IEC subsection 5 reveals 30 subjects in a year will be recruited whereas the proposal of 100 women in the first 24 months (preparatory phase) will be identified.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Second opinion of reviewer	PI response
Question mark in each box	Corrected IEC proforma with errors deleted is enclosed.
LOI	New LOI with details dated 11 th Dec.23 is attached.
Provision for compensation	There is no provision of compensation or insurance included since the study involves counseling only.
KGMU as a site in CTRI	The CTRI was done at the start of study from the principal investigating site. KGMU received a letter of intent for inclusion in the study starting with training of nurses at KolGOTrg. Two permanent nurses from genital cancer control unit were thereby trained and study proposal is being sent now for starting the study with a new letter of intent dated 11th December 2023. After the ethics approval from KGMU it will be updated as study site in CTRI as mentioned in point number 10 of new letter of intent. Simultaneously a research advisory approval dated 24 th November 2023 is also being attached. The Ovarian and Breast cancer patients at high risk for hereditary cancers will be counseled for genetic testing and samples of those accepting the testing will be sent to KolGOTrg.
Sample size	Correction regarding subject recruitment done in both IEC subsection 5 as well as in proposal.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Third opinion of the reviewer:

- PI informed the collaborating PI of the referred project that, after getting ethical approval from each site, the names of the study sites would be updated (Point no.10).
- The Patient Information Sheet and consent forms (Hindi and English) need modifications.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

These need to be written in simple language so that the participant may understand the purpose and procedure of the study.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Recommendation of the reviewer:

Provisionally approved

Decision: Approved

17- Clarification of research entitled ***"Study the role of tumor suppressor genes as a biomarker for early detection of lung cancer"*** sponsored by M/s Climate Trends Limited Liability Partnerships submitted by Ms. Afreen Mehdi, Ph.D. Scholar under the guidance of Prof. Surya Kant, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1386/Res/23 dated 11th December, 2023.

Previous Comment	PI response
IEC needs to be fulfilled properly	We apologize for the same. Now, we have filled the IEC proforma correctly.
The project seems to be an industry – sponsored study but PI indicates it as a Govt. sponsored.	We are sorry for unintentional mistake and making confusion in funding information. Ms. Afreen Mehdi (Ph.D. Scholar) is working as a Research Assistant in the She will bear all the charges of laboratory experiments from her stipend. Also, here we would like to clear that current proposed project work is not sponsored from any funding agency.
Is the budget sanctioned in the name of the PI? Related documents to the same need to be enclosed.	Please refer to the 'Response 2.'
Patient information sheet needs to be filled Properly.	We are sorry for the same, now we have filled patient information sheet properly as per our best of knowledge.
Consent is to be written in simple and	The inadvertent mistake is regrated. We

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	comprehensive language.	have written the consenting the simple and easy language which is understandable to study participants.
	PI wishes to add healthy controls, inclusion, and exclusion criteria for the same to be included and separate ICF to be prepared.	Thanks for the suggestion we have enclosed the informed consent for cases and controls separately. Please find it in the revised IEC pro-Pharma.
	If healthy controls are to be added, who will pay for their investigations?	Healthy volunteers will not be charged for the same. PhD student will bear all the expenses.
	The study title and aim are to determine the role of tumour suppressor genes as a biomarker but in the objectives the first Objectives is to find the epidemiological status of lung cancer, which needs revision	Thanks for the suggestion; we have replaced it as secondary objective. Because for better understanding of disease burden and to find out the correlation between tumour suppressor gene and patients characteristics, we have to explore the symptoms, risk factors, and clinical features of the lung cancer patients.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Second opinion of the reviewer:

- As it is a Ph.D. research proposal, a thorough review of the literature, identified research gaps and proper rationale for the study would help in developing the protocol in a better way.
- In inclusion criteria, the PI writes: -
  All healthy people. Where this population will be identified should be described. Also, an operational definition of healthy individuals needs to be given.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to reviewer vide office letter no.2890/Ethics/2024 dated 10th January, 2024. Awaiting reply awaited from the reviewer.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Recommendation of the Reviewer:

Provisionally Approved

Decision: Approved

Ref. code:128th ECM IIA/P9

24- Clarification of research proposal entitled ***"Comparative evaluation of carbamazepine and botox treatment of trigeminal neuralgia"*** under supervision of Dr. Akhilanand Chaurasia, Associate Professor, Department of Oral Medicine & Radiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 523/OMS/2/24 dated 8th January, 2024.

Previous Comment:-

- Approved with suggestion: The number of subjects calculated are 169 + 10% drop outs. But only 50 patients will be enrolled in each group leading to a total of 150. Therefore, number of patients in each group shall be increased.

The aforementioned comment was sent to the Principal Investigator, the response of which was reviewed by the Member-Secretary, IEC.

Provisionally approved

Decision: Approved

Ref. code: 128th ECM IIA/P14

25- Clarification of research entitled ***"Role of urinary monocyte chemoattractant protein-1 (MCP-1), plasminogen activator inhibitor-1 (PAI-1), neutrophil gelatinase- associatrd lipocalin (NGAL) and liver-type fatty acid binding protein (L-FABP) as urinary biomarkers for early detection of renal damage in posterior urethral valves (PUV)"*** under supervision of Prof. Archika Gupta, Department of Pediatric Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1128/Ped.Sy/23 dated 28th December, 2023.

Previous Comment:-

- No ethical issues. But the patient information brochure does not mention, whether blood or urine or both or any other sample will be collected. Needs to be clear.
- The information brochure should be for the parents as the patient will be a child. The language needs improvement .e.g. , 'WHY HAVE I BEEN CHOSEN? - SINCE YOUR PATIENT IS HAVING POSTERIOR URETHRAL VALVE SO YOUR CHILD IS CHOSEN'
- Whether micturating cystourethrography will be done for the research or it is a part of the routine follow up and management?

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Hindi brochure mentions that serum creatinine will be done while English brochure mentions only urine and MCU. • Need to improve Hindi and English patient info brochures. ***The response to the aforementioned comments were reviewed by the Member-Secretary, IEC.*** Provisionally Approved **Decision:** Approved ***Ref. code:128thECM IIA/P15***
26.	Clarification of research proposal entitled "***Development of patient derived organoid bio-bank as a resource for drug response studies and precision medicine application in triple negative breast cancer***" sponsored by ICMR, New Delhi submitted by Prof. Pooja Ramakant, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. EndoSurg/2024/01 dated 2nd January, 2024. **Previous Comment:** • The information brochures need to explain 'tumor organoids' and system to validate. • 'A small piece of breast tumor taken from the biopsy will be grown in a tube / bottle and as it develops similar to a tumor mass, it will be used to study the effects/ efficacy of the medicine.' • Issues associated with Bio safety & Bio banking alongwith commercialisation of the material. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of the Reviewer:*** • The answer to comment one about organoids and 'validation' is too scientific to understand by a layperson who is required to give the consent? • Description in simple language in Hindi and English should be give, **Comment:** As above **Decision:** Approved with the said modification. ***Ref. code: 128thECM IIA/P7***
27.	Clarification of research proposal entitled "***Designing and implementation of health care model in patients with stage 2 breast cancer***" under supervision of Prof. Pooja Ramakant, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. 07/EndoSurg/23 dated 3rd January, 2024. ***Recommendation of secondary reviewer:-*** • Comments in Departmental Scientific Review absent. Stamp of Chairperson missing. • IEC form incomplete. The Check boxes have to be ticked. • Patient Information Sheet in Hindi not present.

	about the death of his father which occurred on 18th August, 2023. On detailed evaluation of records provided from patient's son it was found that patient has dizziness and became unconscious on 15th August, 2023 in the morning. Subject was taken to local hospital and referred to super specialty hospital with the diagnosis Right sided paralysis. He was hospitalized on 15th August, 2023 and his treatment started in the evening. Some primary investigations done and CT scan revealed the Left sided fronto-parietal infarct during the course of hospitalization. Subject expired on 18th August, 2023 in the hospital. No Autopsy was done. Most likely cause of death was not related to study drug as per the documents provided by the patient's LAR. **Death certificate provided.** ***Recommendation of reviewer:*** **a- Enrolment date**-07-03-2022 **b-The SAE (Death) occurred on:** 18-08-2023. **c-SAE detected on:** 30-11-2023 **d- Details of Event:** Patient has dizziness and became unconscious on 15th August ,2023, he was taken to local hospital and referred to super specialty hospital with diagnosis of Rt. sided paralysis, he died on 18th August due to left sided fronto-parietal infarct (revealed by CT Scan). This is likely due to disease progression (Acute (1W+RV+PW) MI) and not due to intervention (TQJ230) as he was taking it from more than 1 year and 8 months. No autopsy was done **e- 24 hrs notification by email:** 01-12-2023. **f- 14 day analysis submitted on :** 14-12-2023. **g- Causal relationship and Compensation:** The causal relationship of SAE (Death) with intervention cannot be established and no compensation is warranted. **Comment:-** Reply received from PI has been reviewed. **Decision:** Approved ***Ref. code: 101st ECM IIC/P18***

552/Cardio/Res/2023 dated 18th December, 2023 & preliminary email dated 5th December, 2023 at 4:05 PM.

Death

Site no.: 109
Patient ID & age and gender: P-036/ 21 years/Female
Patient Diagnosis: RHD/Sev-MS/MVA 1.3 cm.

Patient enrollment date: 10-08-2023

Patient enrollment arm-Digoxin
Patient follow up under study-6th Month ,12th Month , 18th Month, 24th Month, 30th Month, 36th Month.
Follow up visit completed-Enrolment & Baseline Follow-up
Planning on visit- 12th M
SAE detected on date: 04-12-2023
Follow up visit remaining: 12th Month, 18th Month, 24th Month, 30th Month, 36th Month.
24 hours, notified to EC, Sponsor-05-12-2023
14 days analysis report submitted to EC-18th December, 2023
Subject History:

A letter was received in the office of the Ethics Committee on 19th December, 2023 by PI, The subject had to visit the site on 10th September, 2023 for 12-month actual on site visit. The PI informed the patient regarding the visit on 6th September, 2023 as a reminder calls made to the subject, she did not answer the calls. The subject's LAR informed to PI on 4th December, 2023 that the subject had complained of breathlessness and dyspnoea since 22nd November, 2023. Her condition deteriorated on 23rd November, 2023 and she passed away on 23rd November, 2023 at home around 11:15 PM. As per the information given by the patient's LAR, it seems to be a case of worsening of Heart failure. A local practitioner came and confirmed the patient's death and no autopsy was done.

Recommendation of reviewer:

- Enrolment date –10.08.2023.
- Skipped 12-month follow-up which is given as 10.09.2023.
- SAE detected on 4th December 2023.
- Notification to IEC by email on 05.12.2023.
- 14-day notification on 18.12.2023.
- No date present on the causality letter attached by the PI.
- The SAE (death) doesn't appear to be related to the study, and appears to be an outcome of the disease process. The patient died at home and no autopsy was performed. However, the dates given in the documents are incorrect at several places which need to be corrected.

After several monthly calls subject's LAR picked the call on 15th December, 2023 and informed to the PI that the subject suffered a sudden cardiac arrest while talking with his daughters and within 10 minutes and he expired on 9th October, 2023 at 11:30 AM. Subject expired at home hence no documents are available and No autopsy was done. **Death certificate provided by LAR.** ***Recommendation of reviewer:*** **a- Enrolment date-**04-12-2014 **b-The SAE (Death) occurred on:** 09-10-2023. **c-SAE detected on :** 15-12-2023 **d- Details of Event:** The Subject's LAR informed to PI that on 15th December, 2023 the subject suffered a sudden cardiac arrest while talking with his daughters and within 10 minutes he expired on 9th October, 2023 at 11:30 AM . SAE (death) is most likely due to disease progression (CAD /Chronic Stable Angina) as the subject was randomized in Invasive arm on 04-12-2014 and he remains alive for more than 8 years 10 months after randomization. He died at home and autopsy was not done. **e- 24 hrs notification by email:** 15-12-2023. **f- 14 day analysis submitted on:** 29-12-2023. **g- Causal relationship and Compensation:** The causal relationship of SAE with intervention cannot be established and no compensation is warranted. **Decision:** ***The above study follow-up extended till 2025 vide letter 1796/Ethics/19 dated 13th December, 2019.*** Approved ***Ref. code: 60th ECM IIA/P13***
8	ADR of research proposal entitled ***"Digoxin in patients with rheumatic heart disease-a randomized placebo controlled trial"*** submitted by Dr. Prof. Rishi Sethi, Department of Cardiology, K.G's Medical University, U.P., Lucknow vide letter no. 593/Cardio/Res/23

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

dated 26th December, 2023 & preliminary email dated 14th December, 2023 at 3:43 PM.

Death

Site no.: 109

Patient ID & age and gender: S-50/ 39 years, DOB 15-07-1982/Female

Patient Diagnosis: RHD/Sev-MS/MVA 1.0 cm.

Patient enrollment date: 12-11-2022

Patient enrollment arm-Digoxin

Patient follow up under study-6th Month ,12th Month , 18th Month, 24th Month, 30th Month, 36th Month.

Follow up visit completed-Enrolment & Baseline Follow-up & 6 months Follow-up

Planning on visit- 12th Month

SAE detected on date: 20-12-2023

Follow up visit remaining: 12th Month, 18th Month, 24th Month, 30th Month, 36th Month.

24 hours, notified to EC, Sponsor-21-12-2023

14 days analysis report submitted to EC-04th January, 2024

Subject History:

A letter was received in the office of the Ethics Committee on 3rd January, 2024 by PI, The subject was visited the site on 6th June, 2023 for 6 months actual on site visit. The subject was last contacted telephonically on 6th September 2023 for 9 month telephonic follow-up call. The subject got hospitalized on 20th September, 2023 valve replacement Surgery and got discharged on 3rd October, 2023 after the procedure. The subject was contacted telephonically on 6th December, 2023 for 12th month visit follow-up reminder call, but, the subject didn't answer the call. The subject was again contacted on 20th January for reminder call. The subject's LAR picked the call and informed that the subject had complaints of breathless and discomfort on 30th November, 2023 and she passed away on the same day at home around 12:00 AM.

As per the informed given by the patient's LAR, it seems to be a case of sudden cardiac death. A local practitioner came and confirmed the patient's death and no autopsy was done. Despite multiple reminders the subject's LAR was unable to provide the death certificate of the subject. The SAE is not related to the investigational drug.

Recommendation of reviewer:

a- **Enrolment date-**12-11-2022

b- **The SAE (Death) occurred on:** 30-11-2023.

c- **SAE detected on :** 20-12-2023

d- **Details of Event:**. The subject's LAR after repeated calls picked the call on 20th December and informed that the subject had complaints of breathless and discomfort on 30th November, 2023 and she passed away on the same day at home around 12:00 AM. The SAE (death) is most likely due to disease progression (RHD/Sev-MS/MVA 1.0 cm-valve replacement surgery done on September ,2023) resulting in sudden cardiac arrest and not due to intervention (Digoxin),which he was taking for more than 1 year and 15 days. Death occurred at home and no autopsy was done.

	e- 24 hrs notification by email: 21-12-2023. **f- 14 day analysis submitted on:** 04-01-2024 **g- Causal relationship and Compensation:** The causal relationship of SAE with intervention cannot be established and no compensation is warranted. **Comment:-** Reply received from PI has been reviewed. **Decision:** Approved ***Ref. code: 102nd ECM IIA/P24***
IB	**Expedited review**
1-	Expedited review of research proposal entitled ***"Anant Muskaan: A Multi-site implementation research of primary school-based tooth brushing and oral health education in India"*** submitted by Prof. Vinay Kumar, Head, Department of Public Health Dentistry, Faculty of Dental Sciences, K.G's Medical University, U.P., Lucknow vide letter no. nil dated 14th October, 2023. ***The above research proposal was forwarded to two reviewers, for review.*** ***Recommendation of Primary reviewer: Awaiting reply from the primary Reviewer.*** ***Recommendation of Secondary reviewer :*** • The scientific review committee report needs to give specific comments such as acceptable/satisfactory or unacceptable/ not satisfactory. • The Chairman of scientific evaluation committee & principal investigator cannot be the same person. • In this implementation research project proposed by ICMR (with a grant of >2 crore split across the 3 phase of this study), kindly provide anticipated split of grant if available (contingency, manpower, transport etc.) • Kindly notify what efforts have been made by PI to identify the various private & public schools/manpower involved in this study. How would you plan for sampling to be done while selecting the research subject? • Kindly include patental information sheet & teacher's information sheet along with their respective consent forms as you have submitted. In this regard kindly follow the guidelines as per SOP of EC KGMU website. • In annexure 1 (point 10), is the risk not reasonable compared to anticipated benefits? What are the anticipated adverse events? Kindly make necessary incorporations. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of the IEC after discussion and considering the response received from the PI to comments raised by the secondary Reviewer:*** Approved **Decision:** Approved ***Ref. code:129th IEC IB/P1***
2-	Expedited review of research proposal entitled ***"Impression of tobacco related products for general and specific carcinogenicity and screening of patients with oral pre cancer***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	and cancer on genetic polymorphism involved in DNA base excision repair genes and risk of oral cancer and precancer" submitted by Prof. Shadab Mohammad, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences, K.G's Medical University, U.P., Lucknow vide letter no. OMSD/047/23 dated 2nd November, 2023. ***The above research proposal was forwarded to two reviewers, for review.*** ***Recommendation of the primary Reviewer :*** Provisionally approved ***Recommendation of Secondary reviewer:*** ***Awaiting reply from the secondary Reviewer.*** ***Recommendation of the IEC after discussion and considering the response received from the PI to comments raised by the primary Reviewer:*** Approved **Decision:** Approved ***Ref. code:129th IEC IB/P2***
3-	Expedited review of research proposal entitled ***"Multiparametric MRI-based radiomics and machine learning models for diagnosis and classification of renal tumors"*** submitted by Dr. Durgesh Kumar Dwivedi, Additional Professor, Department of Radiodiagnosis, K.G's Medical University, U.P., Lucknow vide letter no. 1267/RD/23 dated 2nd December, 2023. ***The above research proposal was forwarded to two reviewers, for review.*** ***Recommendation of Primary reviewer :*** Provisionally approved ***Recommendation of Secondary reviewer :*** ***Awaiting reply from the secondary Reviewer*** ***Recommendation of the IEC after discussion and considering the response received from the PI to comments raised by the primary Reviewer:*** Approved **Decision:** Approved ***Ref. code:129th IEC IB/P3***
4-	Expedited review of research proposal entitled ***"Prognostic role of TBI-Indused white matter changes: A longitudinal advanced diffusion MRI study leveraging super-resolution and Artificial Intelligence"*** submitted by Dr. Durgesh Kumar Dwivedi, Additional Professor, Department of Radiodiagnosis, K.G's Medical University, U.P., Lucknow vide letter no. 1302/RD/2023 dated 13th December, 2023. ***The above research proposal was forwarded to two reviewers for review.*** ***Recommendation of Primary reviewer :*** • Section on Vulnerable subjects is incorrectly filled. • Section on benefits to the subject/society incomplete. • Budgetary details not submitted. ***The above comments were forwarded to the Principal-Investigator, reply has given by PI was forwarded to reviewer vide this office letter no. 2895/Ethics/2023 dated 10th January, 2024.***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Recommendation of reviewer: Provisionally approved ***Recommendation of the secondary reviewer: Awaiting reply from the secondary reviewer.*** ***Recommendation of the IEC after discussion and considering the response received from the PI to comments raised by the primary Reviewer:*** Approved **Decision:** Approved ***Ref. code:129th IEC IB/P4***
5-	Expedited review of research proposal entitled ***"Uncovering the gene expression profile of programmed cell death ligand 1 (PD-L1) gene and its polymorphism and its association in regulation to platinum drug resistance in head and neck squamous cell carcinoma"*** submitted by Prof. Navin Singh, Department of Radiotherapy, K.G's Medical University, U.P., Lucknow vide letter no. 1204/RT/2023 dated 15th December, 2023. ***The above research proposal was forwarded to two reviewers for review.*** ***Comments of Primary reviewer:-*** • It is indicated clearly in annexure 1, that the samples will be sent abroad since facility is not available in India & its necessary clearance has been obtained. In this regard kindly submit. (a) Clearance formalities with Govt. of India regarding shipping the bio-specimen abroad. (b) In which overseas laboratory will the samples be shipped? © Who is the overseas collaborator? Kindly include his CV/details. What would be then change in patent policy as described by UPCST? • How & from where will the healthy controls be selected? There needs to be a separate comment form & information sheet for health subjects before any invasive procedure can be undertaken. • Is the risk not reasonable compared to benefits (annexure 1 point 10). Kindly rectify? • Kindly submit the details (steps) of sample size calculation that concluded a sample of 160 patients. Also the PI states that this is a 'pilot preliminary experiment' in this regard. • Kindly fill in the left blank spaces in annexure such as number of subjects etc. ***Comments of Secondary reviewer:-*** The IEC form needs to be filled out properly. • Please check point no. 5 of the IEC, which states 160 subjects and in the proposal total subjects seem to be double as written 160 pts and 160 controls. • Further, the proposal reveals healthy controls, again control (healthy individuals) …patients without chemotherapy, needs clarity. • 7.ii **'No'** is ticked whereas work methodology and research plan of the study point 2 states collection of tissue and blood samples to be extracted. • 7.ix yes is ticked are samples to be sent abroad..... now here in the proposal it is indicated

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	o 7.ix a & b what kind of clearance has been obtained? • 10.i ticked as **'No'** • The proposal portrays 2 kinds of study to be done, which need a proper description. • ICF for the control group is not given. • ICF and Patient information sheets should be written in simpler and more understandable language. ***The above comments were forwarded to the Principal Investigator:*** ***Awaiting reply from the PI.*** **Decision:** Reminder to be sent to the PI ***Ref. code:129th IEC IB/P5***
6-	Expedited review of research proposal entitled ***"A clinical evaluation of severity and management of peri-implantitis around dental implant in post COVID 19 patients-Randomized control trial"*** submitted by Dr. Mayank Singh, Prof. Jr. Grade, Department of Prosthodontics, Faculty of Dental Sciences, K.G's Medical University, U.P., Lucknow vide letter no. 665/23 dated 22nd December, 2023. ***The above research proposal was forwarded to two reviewers for review.*** ***Comments of Primary reviewer:-*** • This is a sanctioned RCT by UPCST. • As per annexure 1, healthy subjects will be recruited but no such indication is there in inclusion criteria, kindly resolve. • Since no DCGI clearance, copy of insurance policy or copy of CTA are attached, it is expected that PI will take care of formalities. • The PI has not mentioned as how will randomization & allocation be carried out? • Is the risk not reasonable as compared to benefit (see annexure 1 point 10). Kindly rectify. *Comments of Secondary reviewer:-* • The Chairperson of the SRC is one of the Co-Investigators. • Point no. 10.i needs to be ticked appropriately. • The Hindi patient Information sheet needs to be written clearly and more simply. ***The aforementioned comments were sent to the Principal Investigator, the response to which was reviewed by both reviewers:*** Approved **Decision: Policy decision required on the conduct of randomized controlled trial/ academic trial/ investigator-initiated trial or their counterparts as "study" when there is no provision for the insurance of subjects involved.** ***Ref. code:129th IEC IB/P6***
7-	Expedited review of research proposal entitled ***"Unraveling the role of salivary RxociRs in the regulation of immune evasion in prostate cancer"*** submitted by Dr. Shivali Duggal, DST-WOS A, through Prof. Kaleem Ahmad, Department of Biochemistry, K.G's Medical University, U.P., Lucknow vide letter no. Bio/2023/964 dated 22nd December, 2023.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	The above research proposal was forwarded to two reviewers for review. *Recommendation of Primary reviewer*:- Provisionally approved *Awaiting reply of from the secondary Reviewer.* *Recommendation of the IEC after discussion and considering the response received from the PI to comments raised by the primary Reviewer:* Approved **Decision:** Approved *Ref. code:129th IEC IB/P6*
II-A	**New Proposal**
1.	Research proposal entitled "*Correlation between functional disability and Radiological severity in North Indian patients with osteoarthritis knee-A cross-sectional study*" submitted by Dr. Sandeep Kumar Gupt, Assistant Professor, Department of Physical Medicine & Rehabilitation, King George's Medical University, U.P., Lucknow vide letter no. 5917/23 dated 28th November, 2023. *Recommendation of reviewer:* Approved **Decision:** Approved *Ref. code: 129th ECM IIA/P1*
2.	Research proposal entitled "*Oral sodium hyaluronate supplementation results in release of vitreomacular traction*" submitted by Prof. Sandeep Saxena, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no. 1049/OPH/23 dated 30th November, 2023. *Recommendation of reviewer:* • The study duration in annexure is mentioned as 2 months while elsewhere it is stated as 3 months. Kindly resolve. • As per annexure 1 point 10, is the risk not reasonable as compared to benefit? Kindly resolve. • As per annexure 1, if there is plan to report adverse events than kindly mention those anticipated adverse events and also state them in ICF & patient information sheet. • In ICF, the study procedure indicates that the work has already been done in a young male. Is this a retrospective case report for which ethical permission is sought? • The Hindi version of ICF does not reflect the English version and rather quotes some other pathology pertaining to macular hole. Kindly note that both English & Hindi versions of ICF need to communicate the same information. • While only 2 cases (One young & Other old) to be recruited in this study, the patient information sheet again mentions that young patient has already undergone this intervention. What about the older subject? Is this retrospective or prospective? • If adverse events are planned to be reported then why "no side effect" is mentioned in patient information sheet. **Comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	As above **Decision:** Revise & re-submit with appropriate response to comments in a tabular format. ***Ref. code: 129th ECM IIA/P2***
3.	Research proposal entitled "***A randomized controlled trial of early valve replacement in severe asymptomatic aortic stenosis (EASY-AS)***" submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 409/Cardio/23 dated 6th December, 2023. ***Recommendation of reviewer:*** ◦ The IEC sponsor information column is to be ticked appropriately. Indian Institutional and International both cannot be ticked simultaneously. ◦ ICF is not as per standard format and Hindi is also hard to understand. ◦ This study is a Multicentric/ Multinational study which is to be coordinated by an external investigator from UK. The PI has the opportunity to be a coordinating center; however, no correspondence/ invitation related to the same is available. PI. check pg 3/61 to 6/61. ◦ If studies reveal that early valve replacement is beneficial, is randomization appropriate? As per my understanding before obtaining consent from the patient and randomization everything will be explained to him. In such a situation, after knowing everything, if a patient has been randomized to a particular group of treatment and he prefers to change his group, what will the researchers do? ◦ Protocol pg nos. 16-19 are missing. **Comment:** As above **Decision:** Revise & re-submit with response to comments in a tabular format ***Ref. code: 129th ECM IIA/P3***
4.	Research proposal entitled "***Partial penectomy under local anaesthesia: A retrospective review of our experience***" submitted by Dr. Madhur Anand, Assistant Professor, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 1013/URO/23 dated 30th November, 2023. ***Recommendation of reviewer:*** • The primary objective must be elaborated. It just says "Summarize our experience of performing partial penectomy under local anaesthesia." • You must express the objective in terms of study variables (e.g. clinical history, radiological and laboratory investigations) and population parameters. • The study design is not clear. It says "Retrospective observational study of prospective collected data". • Sample size calculation is not given. It is since research hypothesis is not properly

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	defined. • Statistical analysis is incomplete. It should be specific to the research hypothesis. **Comment:** As above **Decision:** Revise & Re-submit with response to comments in tabular format ***Ref. code: 129th ECM IIA/P4***
II-B	**New Ph. D. Proposal**
1.	Research proposal entitled "***Nutrigenomic insights into thalassemia: resveratrol's influence on HIF-1α and clock/BMAL1 genes expression, oxidative stress and bone mineral density (BMD) of North Indian thalassemia patients***" submitted by Ms. Neha Rawat, Ph.D Scholar under the guidance Dr. Nitu Nigam, Additional Professor, Department of Centre for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 284/CFAR/23 dated 7th December, 2023. ***Recommendation of reviewer:*** • Sample size calculation not mentioned. • The type of study to be conducted is not clear. • It has been mentioned that the subjects will be recruited from the Department of Paediatrics but the age group mentioned is 15-65 years. • The consent form needs to be corrected as for minors the consent has to be taken from the parents or the legal guardian. • Where the BMD will be carried out and the make of the instrument shall also be mentioned. • The dosage of Resveratrol is also not mentioned. **Comment:** As above **Decision:** Revise & re-submit with response to comments in a tabular format ***Ref. code: 129th ECMIIB-Ph.D/P1***
2.	Research proposal entitled "***The role of multi-parametric MRI-based surrogate biomarkers for specific gene mutations in the characterization of glioma***" submitted by Ms. Shweta Dubey, Ph.D. Scholar under the guidance Prof. Anit Parihar, Head, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no. 1241/RD/23 dated 22nd November, 2023. ***Recommendation of reviewer:*** Approved **Decision:** Approved ***Ref. code: 129th ECMIIB-Ph.D/P2***

(Alok Dhawan)
Chairman, IEC

	Previous Comment: • The letter should have come from the PI. **Previous Decision:** Re-submit **Decision:** Approved *Ref. code: 118th ECMIB/P1*
2-	**As per advised by Prof. D.N. Upadhyaya, the following PGTSC research proposals will be discussed in the Full Ethics Committee Meeting:-**
a.	Clarification of the research proposal entitled *"Evaluation of postoperative outcomes of advanced electrosurgical devices v/s conventional clamp and tie technique for neck dissection- A randomized control trial"* submitted by Dr. Aryan Dwivedi, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1245/SU/23 dated 29th December, 2023.

Previous PGTSC Comment	PI response
The PI has changed the title of the study from Randomised control trial to Randomized control study but has applied for CTRI registration. If indeed it is a trial, the proposal needs to be accompanied with a CONSORT statement and needs to be put up in the full committee meeting.	As per your advice titled changed trial to Study. CTRI registration applied (attached separately) mandatory ethical approval. CONSORT statement attached separately.

The above comment was forwarded to the Principal-Investigator was reviewed by Dr. D.N. Upadhyaya:-

Recommendation of Dr. D.N. Upadhyaya:-

- The PI has changed the title of the study from *'Randomised Control trial' to 'Randomised Control Study'* but has applied for CTRI registration and has furnished a CONSORT STATEMENT.
- PI will need to supply details of funding and insurance for Serious Adverse Events.
- The project will need to be submitted for a Full IEC meeting for approval and not PGTSC meeting.

Comment:

Decision: Policy decision required on the conduct of randomized controlled trial/ academic trial/ investigator-initiated trial or their counterparts as "study" when there is no provision for the insurance of subjects involved.

Ref. code: XXI-PGTSC-IIA/P41

b.	Research proposal entitled *"Cyanoacrylatevs tacker for mesh fixation in laparoendoscopic inguinal hernia repair-double blinded, randomized control trial"* submitted by Dr. Vivek Vishwakarma, JRI, Department of General Surgery, King

Previous PGTSC Comments	PI response
This is not cross-sectional study.	This is Prospective Observational study.
It seems to be pre & post treatment study. It should be clearly mentioned in the primary objective and accordingly research hypothesis formulated.	Attached separately
Sample size mentioned is 20. How is this figure arrived at? Actually, the sample size calculation can be done only after formulating the hypothesis. This can be a pilot study.	Total 28 cases included in the study. (Attached separately)

Previous PGTSC Comments	PI response
This seems to be a pretest-posttest study design. The same set of subjects is being used before and after supplementation.	Yes
Everything should be planned for this design, including primary objective and corresponding research hypothesis.	Yes, Now as per suggestion, we have done all changes.
There are too many secondary objectives. Actually, these are the data which will be collected during the study.	We have removed some objectives.
Sample size calculation is missing. Only a number (88) is given without any justification.	Sorry for this mistake. Now we have incorporate the calculation.
The statistical analysis section is very general. It should be specific to the research hypothesis.	The statistical analysis has been modified.

	percutaneous mitral balloon valvotomy in patients with mitral stenosis" submitted by Dr. Rahul Sahu, SRI, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 2260/Cardio/23 dated 23rd November 2023. **Previous PGTSC Comments:** • If it is really, RCT, all the fundamentals are missing. • The two groups to be compared for efficacy should be defined exclusively. • For example, (i) proper formulation of research hypotheses, (ii) study variables, (iii) primary and secondary outcome measures, (iv) method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.), (v) How double blinding is done, (vi) how the success of masking assessed. • The sample size calculation is arbitrary in the absence of proper research hypothesis. The different quantities used in the formula are not clear. • The statistical methods used to compare groups for primary outcomes, methods for additional analyses, such as subgroup analyses and adjusted analyses. • How the results will be presented: (i) Participants flow, (ii) baseline data, (iii) outcomes and estimation, (iv) adverse events, etc. ***The above comment forwarded to the Principal-Investigator was reviewed by the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXI-PGTSC-IIA/P77***
31-	Clarification of research proposal entitled ***"Clinical, demographic, psychological and molecular profile in patients of pre-extensively drug resistant pulmonary tuberculosis"*** submitted by Dr. Anjali, JRI, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1208/Res/Med/23 dated 9th November, 2023. **Previous PGTSC Comments:** • Sample size calculation has to be done. There can be no 'Pilot Study' in a dempgraphic cross-sectional study. • Inclusion criteria seem to be incorrect. Please check ***The above comment forwarded to the Principal-Investigator was reviewed by the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXI-PGTSC-IIA/P87***

Previous PGTSC Comments	PI response
The title mentions that the study is an RCT. If it is a Trial, it will need a CTRI registration, a CONSORT statement and submission for a full Committee meeting. Otherwise please change the title to Randomization Control study.	Evaluation of Aloe vera loaded nanofibrous scaffold in vital pulp therapy: A randomized controlled study.
Sample size mentions 20 patients in each group but the total sample size is also 20. Please correct this.	Sample size=20 (in each group) Number of groups=2 Total sample size=40
Section on Consent is incomplete.	Section on consent is completed and attached.
Age group in Material and Methods is 18-40 years and that in the inclusion criteria is 17-57 years.	Age group 17-57 years

48.	Research proposal entitled ***"Comparative evaluation of different priming solutions in prevention of hypotension in critically ill patients undergoing sustained low efficiency dialysis (SLED) a randomized controlled trial"*** submitted by Dr. Ujjwal Yadav, SR, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/1904/2023 dated 11th October, 2023. ***Recommendation of reviewer:*** • If it is really, RCT, all the fundamentals are missing. • For example, (i) proper formulation of research hypotheses, (ii) study variables, (iii) primary and secondary outcome measures, (iv) method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.), (v) How double blinding is done, (vi) how the success of masking assessed. • The sample size calculation is arbitrary in the absence of proper research hypothesis. • The statistical methods used to compare groups for primary outcomes, methods for additional analyses, such as subgroup analyses and adjusted analyses. • How the results will be presented: (i) Participants flow, (ii) baseline data, (iii) outcomes and estimation, (iv) adverse events, etc. • Statistical analysis section is very general. It should be specific to the research hypothesis. **Comment:** • Kindly modify the title to ***"A randomized controlled study"*** in place of ***"Randomized control trial"*** **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIII-PGTSC-IIA/P48***
49.	Research proposal entitled ***"Macular thickness and vascular density changes with treatment in unilateral amblyopia - optical coherence tomography angiography based study"*** submitted by Dr. Mariam Saad, JRI, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no. 686/OPH/2023 dated 18th November, 2023.

Institutional Ethics Committee Meeting,

OFFICE OF THE ETHICS COMMITTEE

Administrative Block

Minutes of 130th IEC Meeting held on 9th March, 2024

(Registration No.: ECR/262/Inst/UP/2013/RR-19)

Minutes of the 130th Institutional Ethics Committee Meeting held on **9th March, 2024 from 02:15 P.M. till 5:00 P.M.** in the Board-Room, Administrative Block, King George's Medical University, U.P., Lucknow **in hybrid mode.**

The following Members were present in the Meeting:

1. Dr. Alok Dhawan -Chairman
2. Dr. G.G. Agarwal -Member
3. Mrs. Akansha Dubey -Member
4. Mrs. Vasundhara Kumari -Member
5. Mr.Ujjawal Krishna -Member
6. Dr. G.G. Agarwal -Member
7. Dr. Rajendra Nath -Member
8. Dr. Anita Rani -Member
9. Dr. Anupam Mishra -Member
10. Dr. Nisha Mani Pandey -Member
11. Dr. D.N. Upadhyaya -Additional Member-Secretary, IEC
12. Dr. Hardeep Singh Malhotra -Member-Secretary, IEC, ex-officio

The following Members were not present in the Meeting:

1. Dr. Shubha R Phadke
2. Dr. Akaksh Agarwal
3. Dr. K.K. Yadav

	Action Taken
1.	Clarification of research proposal entitled "***Effect of dopamine as VEGF antagonist on progression of sepsis to septic shock, ALI (acute lung injury) and AKI (acute kidney injury)***" submitted by Dr. Zia Arshad, Additional Professor, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. 46/CCU/2024 dated 6th February, 2024. **Previous EC Comment:-** • The submitted methodology is acceptable now.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The left blanks in annexure 1 need to be completed such as number of subjects etc. • The patient information sheet is incorrect; it should be as per the guidelines already attached with this revised submission. • The consent form should detail 'study procedure' according to the patients understanding and relevant layman language. • Kindly refer to the SOP of IEC (KGMU website). ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** • Kindly fill in the left blank spaces in annexure 1 pt 5 (i), such as number of subjects etc. • The 'Study procedure' section of ICF should explain the patient regarding the procedure that he will undergo and that too in patient friendly language. Moreover the corresponding part in Hindi version communicate similar information. • The initial part of patient information sheet mentioning the guidelines should be deleted. In addition the word 'Randomized trial' needs to be avoided altogether. • If there are any anticipated adverse events as per annexure 1 point 11, then they need to be included in ICF & patient information sheet. ***The aforementioned comments were sent to the Principal-Investigator.*** ***Awaiting reply from the PI.*** **Decision:** Reminder to be sent to the PI ***Ref. code: 119th ECM IIA/P3***
2-	Clarification of research proposal entitled "***Evaluation of lignocaine HCl as a therapeutic and diagnostic tool in myofascial pain dysfunction syndrome (MPDS0 and internal derangement***" submitted by Prof. U.S Pal, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. nil dated 17th February, 2024. **Previous Comment:-** • There are 4 groups of patients: Patients who will not have effect of Lignocaine, MPDS, ID, ID+MPDS. • Measurements are made at 4 time points. • A difference to detect a difference of 1.3% (of what?) will be detected in 20 patients. • I don't think this is feasible. • Outcome measure will be what type of measurements: N/O/I/R? • Why will direct identifiers be used? ***Studied by another investigator at the request of the Principal Investigator after Chairman's permission.*** ***Recommendation of Secondary reviewer.*** PI has already made corrections according to the comments, which are valid and made by Primary Reviewer as- • PI cleared that Indirect Identifiers will be taken • Efficacy measures are added • Sample size calculation is revised • Case Record form is attached

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• PI has given satisfactory answer to quarries of Primary Reviewer for ADR and Compensation • Grouping has also been explained by PI • But PI has not corrected the SOP-Checklist accordingly and did not highlighted the change in protocol–PI should send the corrected SOP-Check list and protocol (Highlighted) with incorporating additional comments, which are as follows: 1. As this is not a Clinical Trial and the Drug Lignocaine is already approved in India, therefore SOP-Checklist must be corrected (SECTION-3 and subsections I, ii, iii). Section 6 – Privacy and Confidentiality–section–I-Indirect Identifier not ticked according to the corrections made by PI in answer to quarries made by Primary Reviewer. Secondly-in section ii- Confidential handling of data by staff is not ticked as YES (Therefore PI is required to send corrected and revised SOP-Check list) 2. In Inclusion /Exclusion criteria–Age/ Sex criteria not mentioned 3. Study design–PI mentioned it as prospective study, which is to be corrected/clarified, as the study design seems to be prospective Interventional and comparative prospective/post operative study. 4. For clarity in methodology PI should add Flow chart of the study. ***The above Comment forwarded to PI vide letter no.2539/Ethics/2023 dated 15th December, 2023 but reply has not been received.*** Reply pending from PI. **Decision:** Reminder to be sent to the PI ***Ref. code: 119th ECM IIA/P18***
3-	Clarification of amended research protocol no. RVP-30-001 RECOVER entitled ***"Brilaroxazine (RP5063), phase 3, randomized, 28 days, double-blind, placebo-controlled, multicenter study to assess the safety and efficacy of brillaroxzine (RP5063) in subjects with an acute exacerbation of schizophrenia, followed by a 52-week open-label extension"*** sponsored by M/s Revive Pharmaceuticals Holdings. (Alok Dhawan)
Chairman, IEC

4-	Clarification of research proposal entitled ***"Elucidate the regulatory role of miRNAs in epithelial to mesenchymal transition in cervical cancer patients"*** submitted by Mr. Praveen Kumar, Ph.D. Scholar under the guidance Dr. Nitu Nigam, Associate Professor, Department of Center for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 297/CFAR/23 dated 10th January, 2024. **Previous EC Comment:-** • Are there enough funds to be revised before re-submission? • No charge should be levied to subjects. • It is understood that no intervention is involved. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** Provisionally Approved **Decision:** Approved ***Ref. code: 124th ECMIIB-Ph.D/P3***
5-	Clarification of research proposal entitled ***"Elucidate the role of miRNA mediating epithelial to mesenchymal transition in chronic myeloid leukemia"*** sponsored by DST Inspire Fellowship submitted by Ms. Surbhi Gupta, under the guidance Dr. Nitu Nigam, Associate Professor, Department of Center for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 296/CFAR/23 dated 10th January, 2024. **Previous Comment:** • The existing short-coming were informed in person and asked for rectification. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** Approved **Decision:** Approved ***Ref. code: 124th ECM II B-FS/P1***
6-	Clarification of research proposal entitled ***"Impact of awareness of menstrual hygiene and identification of premenstrual dysphoric disorder on quality of life among adolescent Girls in Rural and Urban Area, Lucknow"*** sponsored by Office of Dean, Research & Development, KGMU Lucknow submitted by Dr. Rashmi P. John, Assistant Professor, Department of College of Nursing, King George's Medical University, U.P., Lucknow vide letter no. 94/PF/24 dated 20th January, 2024. **Previous Comment:** • Objectives are not well defined. Objectives should be specific. The reviewer is unable to decide whether you will try to find out level or something else in the awareness of menstrual hygiene. Similarly in the second objective what will be your objective like diagnosis, burden of symptoms for PMS and PMDD is not clear. • Statistical Analysis of various scores/answers/scales are not given. • Since the study population is adolescent girls from the school question number 20 and 21 (How satisfied are you with your personal life and how satisfied are you with your sex life) are not permissible school environments. Moreover, we need a child's Assent

Decision: Approval subject to fulfillment & Administrative formalities

Ref. code: 126th ECMIIC/P1

10- Clarification of research proposal entitled "***An analysis of the anomalous fissure of ligamentum teres hepatis: A morphological perspective in North Indian population***" submitted by Dr. Heena Singh, Assistant Professor, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 650/ANAT/23 dated 21st February, 2024.

Previous Comment:

- Data management cannot be NA
- Part of methodology has been written in past tense.

The aforementioned comments were reviewed by the Member-Secretary, IEC. Recommendation of reviewer.

Provisionally approved

Decision: Approved

Ref. code: 127th ECM IIA/P4

11- Clarification of research proposal entitled ***"Differential profiling and assessment of early phase non-coding RNAs and adipokines in healthy controls, pre-diabetic, and diabetic patients- A pilot study"*** submitted by Prof. Wahid Ali, Department of Pathology, King George's Medical University, U.P., Lucknw vide letter no. 30/24 dated 11th January, 2024.

Previous Comment:

- It is CDRI sponsored project, to be conducted by KGMU, SMS Jaipur and CDRI. It is clear that the patients will be enrolled from Medicine Department but the role of SMS Jaipur and CDRI is unclear. Will the samples be transferred to Jaipur/ CDRI for some part of the study? What will be the contributions of KGMU pathology department? Kindly explain the workflow clearly.
- Who will collect informed consent from patients and when?
- Kindly, define criteria to Label study subjects as healthy, pre-diabetic or diabetic.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Provisionally Approved

Decision: Approved

Ref. code: 127th ECM IIA/P5

12- Clarification of research proposal entitled "***Role of heavy metal toxicity in progression of bladder cancer and their effect on quality of life***" sponsored by CST-UP, Lucknow submitted by Prof. Vishwajeet Singh, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 117/URO/24 dated 21st February, 2024.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Previous Comment:

- ICF for patients & healthy volunteers is same.

The aforementioned comments were sent to the Principal-Investigator.

The response received was reviewed and found to be reasonable.

Decision: Approved

Ref. code: 127th ECM IIA/P10

13- Clarification of research proposal entitled ***"A quality improvement study to assess patient satisfaction in surgical out patient Department at a tertiary care Hospital in North India: A cross sectional study"*** submitted by ICMR under supervision of Dr. Saumya Singh, Associate Professor, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 73/24 dated 9th January, 2024.

Previous EC Comment	PI response
Section 5: Duration of Subjects participation: not mentioned	Duration of Subjects participation is 3 months.(It has been corrected in the proposal)
What is the role of volunteers in this study?	Volunteers will be excluded from the study.
Why take Vulnerable Subjects in this study?	Vulnerable Subjects will be excluded from the study.
Why take Special group: "Staff" in this study?	Special group: "Staff" has been removed from the study.
Section 6: Why use direct identifiers?	No direct identifiers word will be included in the study.
Section 8ii: Volunteer consent is not checked.	Not Applicable (As volunteers will not be included)
Section 10: If risk are not reasonable compared to anticipated benefits: Unethical to do the study. In view of this, there is no point doing this research. The rest of the proposal has thus not been reviewed.	There is no risk to participants because this is only a questionnaire based study.
Section 10iii: What is the expected direct benefit to the subject?	These are expected direct benefits to the subject: • This study will help to increase general awareness in patients and attendants regarding the services and facilities available. • Patients can avail the facilities provided by hospital eg. Vippana, Ayushman card etc.(Financial benefits) • This study will give subjects a

		chance to discuss the problems and challenges

The aforementioned comments were sent to the Principal-Investigator.
Awaiting response from PI.

Decision: Reminder to be sent to the PI

Ref. code: 127th ECM IIA/P14

14- Clarification of research entitled ***"An analysis of risk factors associated with delayed presentation, neglected presentation and relapse in cases of clubfoot treated with ponseti technique at the clubfoot clinic of KGMU: A record review"*** submitted by Dr. Vikas Verma, Associate Professor, Department of Paediatric Orthopaedics, King George's Medical University, U.P., Lucknow vide letter no. 2810/PaedOrtho/24 dated 18th January, 2024.

Previous EC Comment	PI response
Kindly submit the list of anticipated outcome variables and summarise the statistical analysis as per the respective variables	The outcome variables are 1. Delayed presentation 2. Neglected presentation 3. Relapse SECTION ON STATISTICAL ANALYSIS HAS BEEN REWRITTEN AS FOLLOW:- "The data will be entered in MS EXCEL spreadsheet using a password protected computer. Statistical analysis will be done using Statistical Package for Social Sciences (SPSS) version 23.0.Categorical variables will be presented in number and percentage (%) and continuous variables will be presented as mean ± SD and median. Normality of data will be tested by Kolmogorov-Smirnov test. Quantitative variables will be compared using Unpaired t-test (for normally distributed data) or Mann-Whitney Test (when the data sets are not normally distributed) between two groups. For three groups, Anova (for normally distributed data) and Kruskalwallis test (for non parametric data) would be used. Qualitative variables will be compared using Chi-Square test /Fisher's exact test. Bivariable analysis would be done to identify factors associated with delayed presentation, neglected presentation and relapse. Factors associated with < 0.25

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		significance on bivariate analysis will be used to design separate logistic regression models to predict delayed presentation, neglect and relapse. A p value of <0.05 will be considered as significant."

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Provisionally Approved

Decision: Approved

Ref. code: 127th ECM IIA/P15

15- Clarification of research entitled ***"Radiation induced damage in head and neck and its management by hyperbaric oxygen therapy-randomized control trial"*** submitted by Prof. Vijay Kumar, Head, Department of Plastic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 31/24 dated 10th January, 2024.

Previous EC Comment	PI response
Fundamentals of RCT are missing Research hypothesis is missing Study variables Primary and secondary outcome Measures Method used to generate random allocation How double blinding is done	Research hypothesis and study variables, primary and secondary outcomes, method to use random allocation, method of blinding, etc added in methodology.
The two comparative groups should be explicitly identified	Modified and added in the study
The sample size calculation is not given	Sample size calculation is added in the study
Method for statistician analysis.	Method for statistician analysis added in the study.
How the result will be presented Participants flow, Baseline data Outcomes and estimation, Adverse events	Added in the methodology

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Provisionally Approved

Comment:

- Kindly modify the title *"A randomized control study"* in place of *"Randomized control trial"*

Decision: Approval subject to modification of the title

Dr. Anupam Mishra did not take part in the discussion and making decision.

Ref. code: 127th ECM IIA/P19

16- Clarification of research proposal entitled ***"To investigate the potential source of DNA and its STR-DNA profiling for human identification from the most challenging body fluids in a medico-legal setting"*** submitted by Office of the Dean, Research & Development, KGMU

	Lucknow under supervision of Dr. Anshu Priya, Assistant Professor, Department of Forensic Finger Printing Lab (CFAR) King George's Medical University, U.P., Lucknow vide letter no. 39/FMT/24 dated 1st February, 2024. **Previous Comment:** • Approval subject to modification of ICF (English & Hindi) into simple language. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** Provisionally Approved **Decision:** Approved ***Ref. code: 127th ECM II B-IMR-F/P1***
17-	Clarification of research protocol no. CTIN816A12201 entitled "***A randomized, multi-centric, placebo-controlled, participant, and investigator blinded study to evaluate the safety, tolerability and efficacy of TIN816 in adult patients at risk for acute kidney injury following cardiac surgery***" submitted by M/s Novartis Healthcare Private Limited under supervision of Dr. Sarvesh Kumar, Professor Junior Grade, Department of Cardiovascular & Thoracic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 172/CVTS/24 dated 23rd February, 2024. **Previous Comment:** • IEC form section 7 (I-VIII) are still mentioned as 'NO' which means no samples are being collected. • Study may be after some minor changes in the IEC form and subject to acknowledgement/approval from DCGI once it is obtained. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** Provisionally Approved ***The following documents were reviewed in its Meeting:-***

20- Clarification of research proposal entitled "***Association of bedtime procrastination with sleep behavior and subjective well-being in the Indian population- A cross-sectional study***" under supervision of Dr. Sujit K. Kar, Additional Professor, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 2419/Psy/24 dated 22nd February, 2024.

Comments of the reviewers	Response
1. The reliability and validity of the instruments to be assessed.	It has been added to the description of the tools.
2. Can the scale be completed in a reasonable amount of time?	The scales can be completed in 20 minutes time.
3. How will it be scored/evaluated?	The tools used are likert scales. The responses are coded and added to get the total score.
4. Give the exclusive list of social media platforms to be used in the study.	It has already been provided. …….. circulating the questionnaire link on social media networking sites like Watsap, Twitter, Facebook, Instagram, Telegram.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	5. Why do you want to choose convenient sampling? It is a non-probability sampling method. The non-probability sample cannot depend upon the rationale of probability theory. At least with a probabilistic sample, we know the odds or probability that we have represented the population well. We are able to estimate confidence intervals for the static or do the testing of hypotheses. With non-probability samples, we may or may not represent the population well, and it will often be hard for us to know how well we have done so.	We have revised it. We will be using a convenient and purposive sampling method. For online surveys it is the most commonly used sampling technique. We agree the limitation of this method: *a study conducted on a convenience and purposive sample was methodologically sound, the internal validity would be good; but because the sample was both a convenience and purposive sample, the external validity would be limited by the restrictions defined by the convenience and purposive nature of the sample.* However, considering the feasibility this method is the appropriate method for survey.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

23- Clarification of research proposal entitled ***"Dietary profile, cognitive status and Vitamin B12 level in aging individuals with type2 diabetes mellitus: A cross sectional Hospital comparative study"*** under supervision of Ms. Vidya Priya, Ph.D. Scholar under the guidance Dr. Nisha Mani Pandey, Professor Jr. Grade, Department of Geriatric Mental Health, King George's Medical University, U.P., Lucknow vide letter no. 44/DGMH/24 dated 5th February, 2024.

Previous EC Comment	PI response
Although in the title it is mentioned that the B12 level will be assessed but neither its methodology is given nor it is mentioned where it will de estimated	Vitamin B12assay will be done by using ARCHITECT i1000 which uses the CMIA (Chemiluminescent Microparticle Immunoassay) method. The test will be performed in the ICU stat lab (Gandhi ward) running under the Department of Biochemistry.
It is mentioned in the materials and method section that no biochemical estimations will be carried out.	Patients are to be recruited from the OPDs of Medicine and Geriatric Mental Health. The biochemical investigation will be advised by the consultant as per the usual treatment protocol the researcher will note down the B12 level from their report. However to clarify the statement. Please check pg no 6 subheading D.

Previous EC Comment	PI response
In SOP-Checklist -Point no.-3 vaccine is ticked ? And subdivision (ii) & (iii)-not ticked.	Point 3.1 should be drugs not vaccine it was inadvertently ticked on vaccine (we are doing trial for drug IMP – cemdiseran and Pzelimab and vaccine Comparator – Raviluzumab and Eculuzimab is supporting therapy recommended by protocol) Attached document from protocol explains about the Vaccine. Point 3.2 IMP cemdiseran and Pzelimab is not approved globally, but comparator Raviluzumab and Eculuzimab is approved in USA.
Point no.-7-(ix) -necessary clearance for sending Samples abroad - ticked as yes, but clearance letter is missing-PI to clarify.	Point 7 Necessary clearances for sending Samples to abroad is not applicable for this study as per the regulatory.

27- Clarification of protocol no. DRL-IND-NDA08-TEG/2022 entitled ***"Multi-national, multi-centric, prospective, randomized, double-blind, active-controlled, parallel-group study to evaluate the efficacy and safety of tegoprazan in patients with erosive gastroesophageal reflux disease"*** submitted by M/s Dr. Reddy's Laboratories Ltd. under supervision of Dr. Ajay Kumar Patwa, Principal Investigator, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. MED/CT/09/2024 dated 29th January, 2024.

Previous EC Comment	PI response
The SRC of the department has not confirmed the content of the proposal, but merely written ' Attached in Dossier'. The SRC has to affirm the scientific validity of the study.	The SRC reviews the Study dossier and confirm all the mentioned documents are attached in the dossier so they mention **attached in the dossier.**
Specific budget is not mentioned either in the IEC form or the CTA.	Budget was mentioned in the study as per the IEC requirements.
The DCGI Approval letter attached to the application is protocol amendment approval letter. Please attach the original letter.	Attached the DCGI approval letter for protocol version 3.0.
No approval letter mentioned KGMU as a	The DCGI notification for site addition of

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

site.	KGMU is attached for reference. KGMU is an additional site for the study, once we get the EC approval then we will go ahead and submit for DCGI approval to the site to be added in the study.
Insurance is Valid only up to March 2024 which will lapse soon	The sponsor has already initiated the process of extending the insurance of the current policy for next year. As soon as the insurance renewal certificate is received, it will be shared with the site well in advance of the expiry. But the Insurance is Valid till March 2024, before the expiry we will notify the EC as well.

- SRC document of the department has to be submitted again attesting the validity of the study

PI mentions that budget has been mentioned in the study but the same doesn't find mention in the IEC form, and has not been submitted to the reviewer.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Decision: Reminder to be sent to the PI

Ref. code: 129th IEC IB/P5

29- Clarification of research proposal entitled" ***Partial penectomy under local anaesthesia: A retrospective review of our experience"*** submitted by Dr. Madhur Anand, Assistant Professor, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 112/URO/URO/23 dated 17th February, 2024.

Previous EC Comment	PI response
Primary objective elaboration	We have performed partial penectomy under local anesthesia for the past several years, however, there is only one published abstract in the available literature on the feasibility of this surgery under local anesthesia. Therefore, we wish to assess our outcomes in performing this surgery under local anesthesia to make a recommendation for others to try or not to try. To express it better, we have modified our primary objective as "to assess the feasibility of performing partial penectomy under local anesthesia or nerve block".
Express the objective in terms of study variables	The feasibility will be assessed by the following variables: Intraoperative: patient reported pain scores intraoperatively, operative time and blood loss, requirement of additional analgesia or conversion of the procedure to general anaesthesia. Postoperative: pain scores at 1, 6 and 24 hours after surgery, postoperative stay at the hospital, analgesia requirement and completeness of tumor resection (margins) at the final histopathological evaluation
Study design is not clear	We reviewed our data and found that we have data of 45 patients undergoing partial penectomy under local anaesthesia. Since this is the first study, the clear outcomes are not yet available for a proper sample size calculation. We therefore intend to include all these patients in the case group. For control group we intend to include 45 age matched controls.
Statistical analysis specific to the research hypothesis	Statistical analysis will be done with t-test for independent variables with SPSS software.Additionally descriptive statistics with mean, standard deviation and range will be done for appropriate variables (age, pain scores, hospital stay, blood loss, number of analgesic doses etc.)

The aforementioned comments were sent to the Principal-Investigator, the response to which

Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	was forwarded to the reviewer. Provisionally Approved **Decision:** Approved ***Ref. code: 129th IEC IIIA/P4***
30-	Clarification of research proposal entitled "***Nutrigenomic insights into thalassemia: resveratrol's influence on HIF-1α and clock/BMAL1 genes expression, oxidative stress and bone mineral density (BMD) of North Indian thalassemia patients***" submitted by Ms. Neha Rawat, Ph.D. Scholar under the guidance Dr. Nitu Nigam, Additional Professor, Department of Centre for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 382/CFAR/24 dated 22nd February, 2024. **Previous Comment:** • Sample size calculation not mentioned. • The type of study to be conducted is not clear. • It has been mentioned that the subjects will be recruited from the Department of Paediatrics but the age group mentioned is 15-65 years. • The consent form needs to be corrected as for minors the consent has to be taken from the parents or the legal guardian. • Where the BMD will be carried out and the make of the instrument shall also be mentioned. • The dosage of Resveratrol is also not mentioned. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** Provisionally Approved **Decision:** Approved ***Ref. code: 129th ECMIIB-Ph.D/P1***
31.	Clarification of research proposal entitled "***Relationship between implementation of evidence-based and supportive ICU care and outcomes of patients with acute respiratory distress syndrome (The ICU Liberation Study)***" submitted by Dr. Saumitra Misra, Assistant Professor, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/073/24 dated 3rd February, 2024. **Previous comment:** • Sample size calculations are not clear. There are too many numbers. Where are they coming from? Sample size formula is required. • There are too many objectives. • One primary objective should be sorted out and the rest should be put into secondary objectives. • The primary objective should be converted into a proper research hypothesis in terms of study variables and population parameters. Sample size should be done for this hypothesis. • Statistical analysis section is missing ***The aforementioned comments were sent to the Principal-Investigator, the response to which***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	was forwarded to the reviewer. Provisionally approved **Decision:** Approved ***Ref. code: 124th ECM IIA/P9***
32.	Clarification of expedited review of research proposal entitled **"*Improved data on dengue covering differences in epidemiological surveillance, patient demographics, the health seeking behavior of patients and standards of care*"** under supervision of Prof. Avinash Agrawal, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/147/24 dated 4th March, 2024. ***The above research proposal was forwarded to two reviewers, for review.*** ***Recommendation of Dr. G.G. Agarwal:-*** • This is a multi-centre study. • There are certain guidelines for multi-centre studies. These must be followed. Only a list of potential sites is given. The name of participating centres is required. • What will be the common protocol? • Which will be a coordinating centre to collect, process and analyze the data? • The number of field sites varies greatly across studies according to their size, complexity and purpose. How will this be handled? • Sample size calculation is arbitrary. This is due to the fact that there are too many objectives. • Identify one primary objective and put the rest into secondary objectives. The primary objective should be converted into a proper research hypothesis in terms of the study variables and parameters. • Sample size calculation will be based on the research hypothesis defined in step 7. • Data analysis plan is very general. It should be specific to the research hypothesis. • The reliability and validity of instruments have to be assessed. • Can the scale be completed in a reasonable amount of time? • How will it be scored/evaluated? ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the primary reviewer.*** ***Recommendation of Secondary reviewer:-*** • Provisionally approved ***Recommendation of Secondary reviewer:-*** • Provisionally approved **Decision:** Approved ***Ref. code: 128th ECM IB/P4***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

14 days analysis report submitted to EC-19th January, 2024
Subject History:

A letter of PI was received in the Office of the Ethics Committee on 19th January, 2024 from PI. The subject 121 was randomized on 26th May, 2023 in the Digoxin study. The subject was called telephonically on 26th August, 2023 for a 3 months. The subject's number was switched off. The subject was contacted telephonically on 25th November, 2023 for 6 month follow-up visit on site. But, the provided numbers were not reachable. The subject was contacted again on 25th December, 2023 for a 6 months visit reminder calls. This time the patient didn't answer the calls.Despite repeated reminder calls the subject did not answer any of the calls, the subject was again contacted on 8th January 2024 for the 6 month actual on site due visit. The subject's LAR picked the call and informed that the subject had complains of breathlessness and urine retention on 13th July, 2023. As per the LAR, she was not able to reach the hospital and she passed away at home on 13th July, 2023 around 1.00 PM. As per the information given by the patient's LAR, it seems to be a case of heart failure. A local practitioner came and confirmed the patient's death and no autopsy was done. Despite multiple reminders the subject's LAR was unable to provide the death certificate of the subject. The SAE is not related to the investigational drug.

Recommendation of reviewer:

a- **Enrolment date-**26-05-2023
b- The SAE (Death) occurred on: 13-07-2023.
c- SAE detected on : 08-01-2024
d- Details of Event: SAE (Death) is likely due to disease outcome (RHD/Sev.-MS/MVA 0.8 cm) and not due to intervention (Tab Digoxin) as patient was randomized in enrolment arm of Digoxin -on 26-05-2023 and SAE occurred on 13-07-2023 ,i.e. more than 1½ months have elapsed after intervention . Patient died at home after developing breathlessness and urine retention. The SAE according to PI is most likely due to progression of disease leading to heart failure. No autopsy was done.
e- 24 hrs notification by email: 08-01-2024.
f- 14 day analysis submitted on : 19th January , 2024.
g- Causal relationship and Compensation: Causal relationship of SAE (Death) with intervention cannot be established; therefore, no compensation is warranted.

Comment: Besides aforementioned, nothing further

Decision: Approved

The above mentioned patient was recruited in this clinical trial after fulfilling due checklist and informed consent. His clinical details are as follows. Patient with subject Id- S-45-3-2718, 58 years/Male, admitted on 14.01.2024 in the Emergency medical ward with c/o sudden weakness of right side of the body diagnosed to have Left intracerebral (basal ganglia) bleed, volume approximately 32.45 ml. He was transferred to Neurology emergency on the same day (14.01.2024), and there he was randomized to the intervention arm and was given Tranexamic acid and other standard treatment. The patient had h/o chronic alcoholism. On 17.01.2024 after a few episodes of coffee colored vomit us & coffee-colored gastric contents in RT. Gastro medicine opinion was taken. Patient's GCS fell from E2V1M5 TO E1V1M5 and the patient developed respiratory distress, for which the patient was shifted to ICU under critical care medicine and was intubated there on the same day around 5pm (17.01.2024).Post intubation Patient was not maintaining saturation at 100% FiO2 for which chest X Ray was done and it showed right sided pneumothorax. ICD was inserted for the same. Repeat routine investigations were suggestive of sepsis with multiple organ dysfunction in view of raised TLC; deranged blood urea and creatinine. Blood cultures and urine cultures were sent and accordingly antibiotics were upgraded. Patient was managed with inotropes for hypovolemic shock. Patient condition gradually deteriorated, GCS fell to E1VTM1, vasopressor support increased are not maintain vitals on 24/1/2024, in view of persistent encephalopathy and deranged serum urea, CRRT was done for 48 hrs. post CRRT patient had persistent hyperkalemia and metabolic acidosis and was planned for the 2nd cycle of CRRT. Dose of vasopressors was increased in view of refractory shock. Patient landed into sudden cardiac arrest on 27/1/2024 at 7:00 am, CPR was given according to ACLS protocol. Despite all methods of CPR, the patient couldn't revive. The patient was dead and death was declared at 08:25 am on 27.01.2024. *Recommendation of reviewer:*

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	a. Enrolment date – 14.01.2024 b. SAE detected on 17.01.2024 (GI bleed) which was managed but patient kept deteriorating. Further SAE (death) occurred on 27.01.2024. c. Notification to IEC on 19.01.2024 (for first SAE), and 27.01.2024 by email (for death on 27.01.2024) d. Total patients in the study – 48. SAE – 11. Deaths – 6. e. The SAE (death) doesn't appear to be related to the study and seems to be an outcome of the disease process. Patient deteriorated and died during the same admission in the hospital. No compensation, therefore, is warranted. **Comment: Besides aforementioned, nothing further** **Decision: Approved**
4	***Ref.code: 115th ECMIIA/P5*** ADR of research proposal entitled ***"Digoxin in patients with rheumatic heart disease-a randomized placebo controlled trial"*** submitted by Dr. Prof. Rishi Sethi, Department of Cardiology, K.G's Medical University, U.P., Lucknow vide letter no. 752/Cardio/Res/24 dated 26th February, 2024 & preliminary email dated 13th February, 2024 at 3:49 PM. **Death** **Site no.: 109** **Patient ID & age and gender:** R-099/21 Year/Male **Patient Diagnosis:** RHD/Sev-MS/MVA 0.7 **Patient enrollment date:** 11-03-2023 **Patient enrollment arm-**Digoxin **Patient follow up under study-**6th Month ,12th Month , 18th Month, 24th Month, 30th Month, 36th Month. **Follow up visit completed-**Enrolment & Baseline **Planning on visit-** 6th Month **SAE detected on date:** 12-02-2024 **Follow up visit remaining:** 6th Month, 12th Month, 18th Month, 24th Month, 30th Month, 36th Month. **24 hours, notified to EC, Sponsor-**13-02-2024 **14 days analysis report submitted to EC-**26th February, 2024 **Subject History:** A letter was received in the office of the Ethics Committee on 26th February, 2024 by PI. The subject contacted telephonically on 11th Jun, 2023 for a 3-month telephonic follow-up call. The subject's number was switched off. Despite further multiple reminder calls made to the subject, the calls were not answered from any of the number provided by the subject. The subject's 6 month visit was overdue so again repeated calls were made to the subjects for 6 month visit completion. These calls were

(Hardeep Singh Malhotra)

	Subject History: A letter was received in the office of the Ethics Committee on 26th February, 2024 by PI. Study Coordinator made a scheduled monthly follow up call to the subject on 13th February, 2024 at 13:30 PM. Subject's son picked the call and informed to PI that subject passed away on 28th January, 2024 at 11:30 PM. LAR informed that subject had sudden weakness in right upper limb on 7th January, 2024 for which he was taken to the hospital, where he was hospitalized for 03 days and discharged on 10th January, 2024. After few days on 28th January, 2024, at around 09:00 AM in morning, subject became unconscious & his LAR took him to Trauma Centre, where he expired at night on 28th January, 2024 around 11:30 PM. Family members destroyed all documents of hospitalization after cremation and death certificate was also not provided. No autopsy was done. *Recommendation of reviewer:* **a. Enrolment date – 09.05.2016** **b. Follow-up completed – All (till five years). Study on extension now.** **c. SAE date – 28.01.2024. SAE detected on – 13.02.2024.** **d. Patient became unwell on 07.01.2024. Admitted to hospital (which?) and discharged after 3 days on 10.01.2024. Again, became unwell on 28.01.2024, brought to Trauma Centre, died in the night of 28.01.2024.** **e. 24-hr notification to IEC by email on 13.02.2024.** *f.* **14-day notification to IEC on 27.02.2024** *g.* **Number of patients in study – 102. SAE – 18. Deaths – 18.** h. Patient was on extended follow-up. No details regarding the extension of study present in the IEC letter attached to the file. i. The patient had worsening heart failure and was admitted to the hospital twice. The SAE (death) doesn't appear to be related to the study intervention; therefore, no compensation is warranted. **Comment: Besides aforementioned, nothing further** **Decision: Approved** ***Ref. code: 60th ECM II-A/P13***

	Patient follow up under study-Randomization visit, Month 1.5, Month 3, Month 6, Month 12, Month 18, every month telephonic Follow up till 5 year. **Follow up visit completed**-Randomization visit, Month 1.5, Month 3, Month 6, Month 12, Month 18 **Planning on visit-** Telephonic Follow-up Visit of month of February, 2024. **SAE detected on date:** 15-Feb-2024 **Death:** 24-01-2024 **Follow up visit remaining:** Telephonic Visits (Every Month) till 2025 **24 hours, notified to EC, Sponsor-**15-Feb-2024 **14 days analysis report submitted to EC-** 29-Feb-2024 **Subject History:** A letter was received in the office of the Ethics Committee on 28th February, 2024 by PI. Study Coordinator made a scheduled monthly follow up call to the subject on 15th February, 2024 at 14:00 PM. Subject's son picked the call and informed to PI that subject passed away on 24th January, 2024 at 12:12 PM. LAR informed that subject had complained of whole body pain on 23rd January, 2024 at night and next day subject's son was taking him to the hospital but patient died on the way and did not reach the hospital. Since there was no hospital visit or medical care given, no documents were available to PI, related to his death. *Recommendation of reviewer:* a- **Enrolment date-**03-08-2017 **b- The SAE (Death) occurred on:** 24-01-2024. **c- SAE detected on :** 15-02-2024 **d- Details of Event:** SAE (Death) is likely due to disease outcome (Coronary Artery Disease/Chronic Stable Angina) and not due to intervention as patient was randomized in Conservative arm-on 04-08-2017 and SAE occurred on 24-01-2024 i.e. more than 6 yrs. and 5 months have elapsed after intervention . Patient developed whole body pain on 23-01-2024 in night and next day subject's son has taken him to the hospital but he died on the way on 24-01-2024. No autopsy was done and no documents were available to the PI for review. **e- 24 hrs notification by email:** 15-02-2024. **f- 14 day analysis submitted on:** 29-02-2024. **g- Causal relationship and Compensation:** Causal relationship of SAE (Death) with intervention cannot be established and therefore, no compensation is warranted. **Comment: Besides aforementioned, nothing further** **Decision: Approved** ***Ref. code: 60th ECM II-A/P13***
IB	**Expedited review**
1-	Expedited review of research proposal entitled ***"To validate the efficacy of an artificial intelligence (AI)-based developed mobile application for cataract detection in selected districts of Uttar Pradesh"*** sponsored by TSU, Lucknow submitted by Prof. Apjit Kaur, Head,

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Department of Ophthalmology, K.G's Medical University, U.P., Lucknow vide letter no.7994/OPH dated 18th December, 2023 & letter no.8301/OPH dated 1st February, 2024.

The above research proposal was forwarded to two reviewers.

Recommendation of Primary reviewer	**PI response**
The sponsor mentioned in the covering letter is UP Technical Support Unit (TSU) and the sponsor mentioned in the project synopsis is India Health Action Trust (IHAT), however none of these are mentioned in the IEC proforma where Sponsor detail is marked as NA	Uttar Pradesh Technical Support Unit (UPTSU) has been established by GoUP to provide techno-managerial support to medical, health, family welfare and nutrition departments. India Health Action Trust (IHAT) is a non-government organization which operates the UPTSU. This study is a joint learning work by KGMU and IHAT. Further, it is mentioned that the study partner IHAT will bear all the cost related to this study. Hence, there are no other separate sponsors to this study. That's why the sponsor details are marked as NA. The relevant details are added in the study protocol as well **(refer page.no: 8 of the study protocol)**
Sponsor details along with budgetary allocation must be submitted	There is no sponsor to this study.
Recommendation of Secondary reviewer	**PI response**
Inclusion/Exclusion criteria for subjects- not defined clearly- PI to clarify	Inclusion & exclusion criteria have been revised and added to the study protocol and IEC form **(Refer (i) page.no: 5 of the study protocol (ii) in IEC form under section-5 subject selection)** *Inclusion:* The population above 50 years of age with normal looking eyes on torchlight. *Exclusion:* a) Diffuse macular to leucomatous corneal opacity covering central part of the cornea b) chronic anterior uveitis resulting in seclusion pupilae where Crystalline lens/ intra ocular lens cannot be discerned well
Two types of ICFs are enclosed- PI to justify	The content in both consent forms is the same.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		In KGMU format, there are 2 separate versions of consent forms have been prepared: one in English and another in Hindi. Further, a consent form, which has both Hindi and English in a single version, has been prepared for the ease of use in the field. The content of this consent form is as same as the one in KGMU format. This consent form will be used in the field during data collection.
	Budget requirement for the KGMU Center has not been given.	The cost required for the study will be borne by IHAT, the study partner. KGMU will provide the overall guidance to this study. Hence, the budget requirement for KGMU was not included.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the both reviewers.
Recommendation of Primary reviewer:-
Provisionally approved
Recommendation of Secondary reviewer:-
Provisionally approved
Decision: Approved

II-A	**New Proposal**
1.	Research proposal entitled **"*Development implementation and evaluation of protocolized cardio-obstetric care in improving maternal cardiac, obstetric and fetal outcomes of pregnant women with heart diseases in India*"** funded by ICMR, New Delhi submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 618/Cardio/Res/24 dated 17th January, 2024. ***Recommendation of reviewer:-*** • This is a comprehensive study consisting of many objectives. • The study must be split into different parts. • Each part requires formulation of research hypotheses, identification of outcome measure, calculation of sample size etc. • The research hypothesis will be in terms of study parameters (Such as mean, standard

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	deviation, prevalence etc.). • This is a multi-centric study. • There are certain guidelines for multi-center studies. These must be followed. Only a list of potential sites is given. The name of participating centres is required. • What will be the common protocol? • Which will be a coordinating center to collect, process and analyze the data? • The number of field sites varies greatly across studies according to their size, complexity and purpose. How will this be handled? • Sample size calculation is arbitrary. Only tentative numbers are mentioned. This is due to the fact that the aim/objective is not clearly defined. The outcome event should be clearly defined. The primary objective should be converted into a proper research hypothesis in terms of the study variables and parameters. • Sample size calculation (using appropriate formula) will be required. • Data analysis plan is very general. It should be specific to the research hypothesis. **Comment:** As above **Decision:** Revise and resubmit with response to comments in a tabular format.

(Alok Dhawan)
Chairman, IEC

	Medical University, U.P., Lucknow vide letter no. 1263/CM/24 dated 3rd February, 2024. ***Recommendation of reviewer:-*** • The title should be more explicit defining the target population exclusively. • The present study looks like to be multi-stage stratified random sampling. • It should be accordingly planned. • The sample size calculation will use stratified sampling methods, may be proportional allocation. • Nothing is said about the reliability of the instrument. • Nothing is said about the face validity and content validity of the instrument. • What is the construct validity of the instrument? • Research hypothesis should be defined in term of the population parameters involved in the study. • The population parameters will be derived from the quantitative evaluation of the instrument being used. **Comment:** As above **Decision:** Revise and resubmit with response to comments in a tabular format. ***Ref. code: 130th ECM IIA/P16***
17.	Research proposal entitled "***2023 ESCP collaborating group audit and cohort study: wound closure and SSI prevention in abdominal surgery with long term follow-up (WOLVERINE)***" submitted by Dr. Shiv Rajan, Associate Professor, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/449/24 dated 10th February, 2024. ***Recommendation of reviewer:-*** Approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P17***
18-	Research proposal entitled "***Identifying host-protein biomarkers for predicting infectious disease in low resource health care settings; and experimental study to enhance infectious disease surveillance***" submitted by Prof. Avinash Agarwal, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter nos. DCCM/2024/0032 dated 22nd January, 2024 & DCCM/2024/0069 dated 2nd February, 2024. ***Recommendation of reviewer:-*** • This is a retrospective case-control study. It should be accordingly planned. • Identify the study variables (variables associated with acute febrile illness). • Identify the study parameters (such as mean, proportion, standard deviation etc.). These will be derived from the study variables. • Define the research hypothesis using the study parameters. • Calculate the sample size using the research hypothesis. There is no sample size given. • The statistical analysis will be specific to the research hypothesis. **Comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	As above **Decision:** Approval subject to clarification with response to comments in a tabular format. ***Ref. code: 130th ECM IIA/P18***
19-	Research proposal entitled "***Feasibility, acceptability & students' perception about MiniCEX for WPBA in Obstetrics & Gynaecology postgraduate education***" submitted by Prof. Amita Pandey, Department of Obst. & Gynaecology, King George's Medical University, U.P., Lucknow vide letter no. OG/481/24 dated 20th February, 2024. ***Recommendation of reviewer:-*** Approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P19***
20-	Research proposal entitled "***Can kangaroo mother care (KMC) during the first 72 hours lead to improved breastfeeding and growth among normal birth weight newborns? A randomized controlled trial***" submitted by Prof. Mala Kumar, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 239/Ped/2024 dated 20th February, 2024. ***Recommendation of reviewer:-*** • The Chief Investigator is the chairperson of the SRC. • In the patient information sheet, both of the names of the person to whom contact is to be made are not from KGMU • Kindly modify the title ***"A randomized control study"*** in place of ***"Randomized control trial"*** **Comment:** As above **Decision:** Approval subject to clarification ***Ref. code: 130th ECM IIA/P20***
21-	Research proposal entitled "***Acceptability of value added courses in Pathology for phase 2 MBBS students***" submitted by Prof. Riddhi Jaiswal, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 135 dated 19th February, 2024. ***Recommendation of reviewer:-*** • Nothing is said about the reliability and validity of the instrument. • How be the instrument converted into quantitative score? • Research hypothesis will be in terms of the study parameters (mean, proportion etc.) derived from the quantitative scores. • Sample size calculation is not given. • Statistical analysis (quantitative as well as qualitative) has to be more specific. At present, it is unclear. **Comment:** As above **Decision:** Revise and resubmit with response to comments in a tabular format. ***Ref. code: 130th ECM IIA/P21***
22-	Research proposal entitled "***Piloting & refinement of an in-facility supportive care package***

VII	**Other Matter with the permission of Chairman**
	Other matters discussed in the meeting are as under: 1. The matter whether a faculty member who has left KGMU can continue to guide a post-graduate/ PhD thesis or not, was discussed at length. It was agreed that faculty members who have superannuated should not continue to be the 'Chief Guide' and should transfer the responsibility to an eligible (should be a P.G Teacher) and appropriate (related to the subject) faculty member. However, the overall matter of superannuated faculty members and those who were otherwise not

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	available (lien, deputation, etc.) was noted to be beyond the purview of IEC; it was decided to refer the matter to relevant authorities for an amicable resolution. 2. The unprecedented load of post-graduate theses (>400) was discussed in the meeting. It was agreed that a post-graduate thesis screening and advisory group (PGT-SAG) be formed to speed up screening and to serve as an advisor to the thesis candidates. The group shall function under the PGT-SC and shall not have any decision-making power whatsoever. As per discussions with the Hon. Vice Chancellor, a token amount of Rs. 1000=00 (One thousand only) for a minimum batch of 10 (up to 15) may be given after obtaining a formal approval from her office. 3. With an increasing number of proposals, the human resource needs an increase to support the working of Ethics Cell. To manage the same and to reduce the use of paper, a push towards a software-based process of submission, review, presentation, finalisation and archival of proposals is urgently needed. 4. It was unanimously agreed that any proposal that goes beyond the ambit of the practice of modern medicine, viz. involving AYUSH or any other alternative system, shall mandatorily require inclusion of an investigator formally trained and well-versed in the subject under-consideration; inclusion of private partners should be best avoided and is strongly discouraged. In line with aforementioned, the SRC must have an expert related to the subject for a meaningful evaluation and review of the proposal. 5. It has been noted that certain proposals mandate inclusion of a subject-specific expert for critical inputs that otherwise cannot be obtained from the formal IEC. In consonance with ICMR/AIIMS-New Delhi documents, it was approved that such subject-experts can be invited from within or outside KGMU for their expertise; these experts, however, shall not have any decision-making powers in the proposal-under-consideration or any other proposal listed in the IEC agenda on that date. 6. To address the deficiency in reporting of SAE for non-DCGI/ Phase IV trials on SUGAM portal, it was decided to hold a meeting with the Pharmacovigilance Committee of KGMU and involve them to formalize the same for smooth functioning. 7. Regarding 'Academic Trials/Study', it was discussed that there is an urgent need to earmark a corpus dedicated to issues related to insurance/compensation etc., if any, in the conduct of such studies. 8. The letter of approval from the IEC needs to be restructured to mention the validity of approval, conditional modifications leading to invalidation of approval, and other issues pertinent to the given proposal. 9. The last SOP-KGMU was created in 2019 and was completing 5 years since its inception. It was discussed that this necessitates that a newer version of SOP be created in view of several new notifications and regulatory guidelines with an increased ambit of application.
V	**Brought to Ethics Committee after XXIV-PGTSC held on 29th February, 2024**
	Minutes of the XXIV-PGTSC of IEC Meeting ***in hybrid mode*** held on **29th February, 2024 02:00 P.M. till 5:00 P.M.** on III-floor, Central Library, King George's Medical University, Lucknow. ***The following Members were present in its Meeting:-*** 1- Dr. G.G. Agarwal -Member 2- Dr. A.A. Mahdi -Member 3- Dr. Anupam Mishra -Member 4- Dr. Rajendra Nath -Member

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	5- Dr. Nisha Mani Pandey -Member ***The following Members were not present in its Meeting:-*** 1. Dr. D.N. Upadhyaya -He has sent his in written comment 2. Dr. Anita Rani -She has sent her written comment
IA	**Action Taken**
1-	Clarification of research proposal entitled ***"Prevalence of overweight and obesity amongst adolescents along with their multidimensional factors in rural and urban school settings of Lucknow"*** submitted by Dr. Ajit Kumar Singh, JRI, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 1266/CM/23 dated 5th February, 2024. ***Previous PGTSC Comment:-*** • The questionnaire is required to study the association between obesity/overweight/underweight and the multidimensional factors. • The study can be planned only after the construction of the questionnaire. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XVI-PGTSC-IIA/P9***
2-	Clarification of research proposal entitled ***"Efficacy of tissue engineered scaffold in recession coverage: A randomized clinical trial"*** submitted by Dr. M. Priyadarshini, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 1038/P/23 dated 21st December, 2023.

PGTSC Comments	PI response
Even with remote possibility of allergic reaction, the investigator has to be prepared with its management protocol and more importantly mention it in patient information sheet .in the rarest of such event that will bear the cost of management?	The material used in the study holds no possibility of any potent allergic reaction but in the rarest of such event the material will be removed and the patient will be managed medically. The cost of management will be beared by the primary investigator. The following is mentioned in the Patient information sheet and is attached below.
Regarding point 4, the investigator states that "PCONSORT guidelines are attached." since this is RCT , kindly refer to the checklist of CONSORT statement to refine the submission.	The study design is refined according to the checklist of CONSORT and attached below.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

Recommendation of reviewer:-
Reply awaited from reviewer side.

Comment:

- Kindly modify the title to "Randomized controlled study"
- Kindly provide PGT declaration form

Decision:

- **Pending, subject to submission of PGT Declaration form and response to comments in a tabular format.**

Ref. code: XIX-PGTSC-IIA/P3

3- Clarification of research proposal entitled ***"A comparative study of ozone therapy and photodynamic therapy as an adjunct to scaling and root planning in chronic periodontitis"*** submitted by Dr. Shilpi Mangal, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 4108/P/24 dated 12th January, 2024.

Previous comment	PI response
CTRI Registration	After getting approval from IEC (Institutional Ethics Committee). Registration for CTRI will be done.
Consort guidelines	Checklist attached
Aged matched randomization	Each group is further divided into different age groups i.e. 18-34, 35-54, 55-75. Here randomization is through stratified randomization, so that each group has an equal chance of participation and that is how age matching is achieved.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.
Provisionally approved

Decision:

- **Pending, subject to submission of PGT Declaration form.**

Ref. code: XIX-PGTSC-IIA/P4

4. Clarification of research proposal entitled ***"The impact of low pressure negative pleural suction versus underwater seal drainage in patient of thoracic trauma: A randomized controlled trial"*** submitted by Dr. Shahnawaz Ahmad, JRI, Department of Trauma Surgery, King George's Medical University, U.P., Lucknow vide letter no. 839/TS/23 dated 21st December, 2023.

Previous Comment:-

- Please provide sample size and its calculation
- Please rectify the ICF, as per standard guidelines.
- Please provide a properly filled Patient Information Sheet.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.
Recommendation of Primary reviewer:-

- Provisionally approved

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Comment: • Kindly modify the title to *"randomized controlled study"* instead of *"randomized control trial"* **Decision:** • **Pending, subject to submission of PGT Declaration form and response to comments in a tabular format.** *Ref. code: XIX-PGTSC-IIA/P28*
5-	Clarification of research proposal entitled ***"Role of parasternal intercostals plane block using ropivacaine in attenuating hemodynamic fluctuations at the time of sternotomy in patients undergoing elective cardiac surgery"*** submitted by Dr. Mohd Akhtar Ansari, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/1635/24 dated 5th February, 2024. ***Previous comments:*** Revised Patient Information Sheet not related to study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of Primary reviewer:-*** Provisionally approved **Decision:** Approved *Ref. code: XX-PGTSC-IIA/P11*
6-	Clarification of research proposal entitled ***"A study on episodic memory impairments and functional connectivity networks using resting state functional MRI in patients of intractable mesial temporal lobe epilepsy- A prospective observational study"*** submitted by Dr. Om Prakash, SRI, Department of Neurology, King George's Medical University, U.P., Lucknow vide letter no. 391/Neuro/23 dated 20th December, 2023. **Previous comment:-** • Child Assent Form is not in correct format and English/Hindi versions are not the same (PI to re-submit correct Child Assent Form in both versions). Guardian consent form not needed. • Questioners are not given. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of Primary reviewer:-*** Provisionally approved **Decision:** Approved *Ref. code: XX-PGTSC-IIA/P18*
7-	Clarification of research proposal entitled ***"To study the effect of curcumin on inflammatory markers and microbial flora in hemimaxillectomy patients with obturator prosthesis: A randomized controlled study"*** submitted by Dr. Yangchin Drema, JRI, Department of Prosthodontics Crown & Bridges, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 722/24 dated 9th January, 2024.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Previous PGTSC Comments: • As stated in Annexure 1 this study involves a (herbal) medicine of Indian system of medicine. So it would be better to include an Ayurvedic Co-Investigator. • This is stated to be double blind RCT. Kindly mention the technique of allocation, randomization & double blinding. Is placebo not indicated here? • Who will bear the cost of curcumin & tests. Do you plan to register this RCT.? • Summarize the anticipated outcome variables and anticipated statistical analysis of the same. • Kindly mention the dose, duration , brand and mode of administering curcumin. • No need to submit the SOP guidelines of Pt information sheet. Instead kindly submit the actual patient information sheet both in English & Hindi accordingly. • Kindly revise "purpose of study" & "Study procedure" in ICF in such a language that the patient may understand. • In annexure 1 regarding use of biological specimen it is indicated as "NA" while lower down 'Yes' in indicated for the use of infectious & biohazardous specimen. This is contrasting statement. Also no indication of blood collection is mentioned for IL &TNF? • Kindly refer to CONSORT guidelines for RCT before resubmitting ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Comment:** • Kindly modify the title to ***"randomized controlled study"*** instead of ***"randomized control trial"***; correct the same within the proposal as well as in annexures. **Decision:** • **Pending, subject to submission of PGT Declaration form and response to comments in a tabular format.** ***Ref. code: XXI-PGTSC-IIA/P3***
8-	Clarification of research proposal entitled ***"A comparative evaluation of the clinical & biological outcome of different provisional crowns on immediate loaded implant in maxillary esthetic zone-A randomized controlled trial"*** submitted by Dr. Deepak Verma, JRI, Department of Prosthodontics Crown & Bridges, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 712/24 dated 4th January, 2024. **Previous comment:-** • Kindly provide the cost of two types of implants. • The cost of the Implant, if borne by the patient, may be a concern for its blind selection. Patient Information sheet: Kindly fill it properly. • Kindly modify the title ***"A randomized control study"*** in place of ***"Randomized control trial"*** ***The aforementioned comments were sent to the Principal-Investigator, the response to which***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	was forwarded to the reviewer. *Recommendation of Primary reviewer:-* Provisionally approved **Decision:** • Approved *Ref. code: XXI-PGTSC-IIA/P11*
9-	Clarification of research proposal entitled ***"To determine prevalence of suboptimal levels of Vitamin D in preterm very low birth weight neonates in an NICU and to monitor response to treatment with Vitamin D"*** submitted by Dr. Abiya Nabi, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 125/Ped/24 dated 3rd February, 2024. **Previous comment:-** • The role of PI is not provided. • Annexure 1… the title of the proposal to be corrected as there is no space between words. • The patient information sheet needs to be revised as per the needs of the protocol. • The proposal aimed to enroll and assesse the newborn at age 4-10 days and at 38±2 wks after supplementation with 1000 IU/day Vit D levels or on discharge of the newborn. How the PI will approach for assessment after 38±2 wks, if the newborn will discharge much before 38±2 wks? Will she visit newborn place for final assessment? ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of Primary reviewer:-*** Provisionally approved **Decision:** Approved *Ref. code: XXI-PGTSC-IIA/P14*
10-	Clarification of research proposal entitled ***"Evaluation of ozone therapy in comparison with occlusal splint in treating internal derangement of temporomandibular joint: A randomized controlled trial"*** submitted by Dr. Satyendra Pratap Singh, JRI, Department of Prosthodontics Crown & Bridges, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 713/24 dated 6th January, 2024. ***Previous comment:*** • If it is really, RCT, all the fundamentals are missing. • For example, (i) proper formulation of research hypotheses, (ii) study variables, (iii) primary and secondary outcome measures, (iv) method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.), (v) How double blinding is done, (vi) how the success of masking assessed. • The sample size calculation is arbitrary in the absence of proper research hypothesis. The different quantities used in the formula are not clear. There is no design effect for this study. It is for cluster-randomized trial. • The statistical methods used to compare groups for primary outcomes, methods for

(Hardeep Singh Malhotra)

Chairman, IEC

- Title of the study needs correction.
- There are many objectives; it should be restricted to 1-2 objectives.
- Sentences written in the inclusion/ exclusion criteria of the study are in present and past tense which needs to be recomposed.
- In the study procedure it is written that *a pilot study on 30 subjects has been done for the validation and reliability of the study tool…* is the questionnaire developed by the investigator; if yes, what tests of reliability and validity were applied?
- The flowchart written with procedure portrays selection of study population=Lko….and training and calibration of personnel …? Needs clarification.
- There is no mention about how the study participants will be identified and recruited for the study?
- As this study is to be done on students medical, dental and nursing students there will be no need to provide *guidelines for patient information sheet*, if PI wishes to provide any information to the participants it may be tailored as participant's information sheet.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

No stamp on covering and SRC.	Stamped covering and SRC attached
Study aim should be re-framed as written in past tense.	The aim of the study to evaluate the knowledge and practice towards mouth-self-examination

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

		among tobacco users in urban and rural population.
	Patients are to be taken from OPD of KGMU too, where patients come from different places. A clear mention in the inclusion criteria regarding patient recruitment would be better.	**Inclusion Criteria:** 1. Patients attending the Outpatient Department (OPD) of King George's Medical University (KGMU) and Banthra Satellite Centre. 2. Patients will be selected based on convenience sampling, categorized into urban and rural populations based on their respective places of origin.
	The study duration is only 3 months and 300 rural/ urban patients are to be recruited, will it be feasible for the PI to complete the task in the said period.	Gantt Chart attached
	Consent form to be written in an understandable language.	Consent form attached in an understandable language.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Recommendation of Primary reviewer:-

29- Clarification of research proposal entitled ***"Effect of long-term use of electroacoustic devices on hearing of healthy young adults"*** submitted by Dr. Sunil Kumar Paharia, JRI, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no. nil dated 2nd January, 2024.

Previous Comment:

- Hypothesis and primary objective do not match. These are stating different statements.
- Identify the study variables and study parameters.
- Convert the primary objective into proper research hypothesis in terms of study variables and parameters.
- The Sample size calculation is arbitrary. It is for prevalence study. It should be specific to the research hypothesis formulated in step 3.
- The statistical analysis section is general. It should be specific to the primary and secondary objectives of the study.

The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

Previous Comment	PI response
Kindly clarify the sample size calculation in more detail.	In methodology, the sample size calculation is mentioned in detail.
On One hand it is indicated that the patients will be selected randomly (in patient-information sheet) while on the other hand it is mentioned that sampling will be according to PPS (Population proportion to size) model. In case of latter kindly clarify further, (Methodology).	The researcher will select patients by random sampling method and the same is mentioned in methodology as well as in patient information sheet. The corrections are made and are enclosed.

Whether he will submit Human Subject Review Waiver Form (HSRWF) for retrospective part of the study. **Comment:** • The retrospective nature of the study may be included in the title. **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P3***
4.	Research proposal entitled ***"Prediction of hamstring graft thickness for anterior cruciate ligament reconstruction by anthropometric measurement: A prospective study"*** submitted by Dr. Amit Kumar, JRI, Department of Orthopaedic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1104/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** • There are 2 sets of annexure 1 where in sample sizes are indicated as 48 and 100 respectively. Kindly correct. • Is the risk not reasonable compared to benefits (Annexure 1 point 10). Kindly complete the left out blanks. • If there is a plan to report adverse events (annexure 1 pt 11) then what are those events? They need to be stated in ICF and patient information sheet as well. • What is the role of healthy volunteers as indicated in annexure 1 (pt 8). There needs to be separate ICF & information sheet for them.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• Kindly enumerate the various outcome variables and summarize their statistical analysis in that context. **Comment:** As above **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P4***
5.	Research proposal entitled ***"A comparative study of outcome of tympanoplasty with cortical mastoidectomy vs tympanoplasty alone for mucosal type of chronic otitis media"*** submitted by Dr. Abhilash Verma, JRI, Department of Oto-Rhino-Laryngology & Head & Neck Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1245/23 dated 8th December, 2023. ***Recommendation of reviewer:-*** Approved **Decision:** As above ***Ref. code: XXIV-PGTSC-IIA/P5***
6.	Research proposal entitled ***"Assessment of 'probable surgical" traumatic Brain injury (TBI) patients"*** submitted by Dr. Samarthan SL, SRI, Department of Neurosurgery, King George's Medical University, U.P., Lucknow vide letter no. 2304/NS/23 dated 8th December, 2023. ***Recommendation of reviewer:-*** Approved **Comment:** Kindly include the study design in the title. **Decision:** Revise & re-submit with response to the aforementioned comment. ***Ref. code: XXIV-PGTSC-IIA/P6***
7.	Research proposal entitled ***"To elucidate the role of serum nogo-a as predictor of Neurological recovery in spinal cord injury (SCI):A prospective study"*** submitted by Dr. Akash Singh, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1106/Ortho/23 dated 8th December, 2023. ***Recommendation of reviewer:-*** • In SOP-Checklist point no. 10 (Risk & benefit)-ticked as not reasonable and point no.7 (Use of biological samples) ticked as NO but samples will be taken-PI to correct the SOP-Checklist. • SCIM tool is not attached-please include. **Comment:** As above **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P7***
8.	Research proposal entitled ***"Role of strain and shear wave ultrasound elastography in evaluating solid breast masses"*** submitted by Dr. Ananya Verma, JRI, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no. 1045/RD/23 dated 24th November, 2023. ***Recommendation of reviewer:-***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	Provisionally approved **Comment:** • Kindly include in the title the design of the study **Decision:** Provisionally approved ***Ref. code: XXIV-PGTSC-IIA/P8***
9.	Research proposal entitled ***"Hirayama disease: role of magnetic resonance imaging and utility of MR neck angiography"*** submitted by Dr. Ishita Srivastava, JRI, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no. 1046/RD/23 dated 25th November, 2023. ***Recommendation of reviewer:-*** Provisionally approved **Comment:** • Kindly include in the title the design of the study **Decision:** Provisionally approved ***Ref. code: XXIV-PGTSC-IIA/P9***
10.	Research proposal entitled ***"Association of serum periostin, IL 4 and IL 13 with severity of Asthma- an observational study"*** submitted by Dr. Swapnil Gupta, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 3600/Ped/23 dated 9th December, 2023. ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIA/P10***
11.	Research proposal entitled ***"Influence of comorbidites on functional outcome post total Knee replacement: A prospective cohort study"*** submitted by Dr. Juzer Jamil, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1102/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIA/P11***
12.	Research proposal entitled ***"Knee self efficacy and patient satisfaction post anterior cruciate ligament reconstruction: A prospective and retrospective study"*** submitted by Dr. Manjul Gupta, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1108/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** • The design of the study, as mentioned in the title, may be modified to "An ambispective study". • The sample size in annexure 1 point 5 is 95, while in methodology mention it is 105. Kindly correct. • Is the risk not reasonable compared to anticipated benefits? (Annexure 1 pt 10)

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• What is the role of healthy volunteers (Annexure 1 pt 8) Separate ICF & information sheet to be included for them? • What are the anticipated adverse events that need notification (Annexure 1 pt 11) • The latter part of methodology is in past tense. It needs correction. • Kindly enumerate all the anticipated outcome variables & summarize the statistical analysis based upon those variables. • Since this also has a retrospective component, how will the consent be obtained from them? Also kindly reformate 'Study procedure' section of ICF in a more patient friendly Language. **Comment:** As above **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P12***
13.	Research proposal entitled ***"A prospective comparative study to evaluate the results of ACL reconstruction using hamstrings vs quadriceps tendon graft"*** submitted by Dr. Ayush Kumar, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1098/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** • In SOP-Checklist, point no.10 (Risk & benefit) ticked as not reasonable-PI to correct. **Comment:** As above **Decision:** Approval subject to modification ***Ref. code: XXIV-PGTSC-IIA/P13***
14.	Research proposal entitled ***"Functional outcome and health-related quality of life in younger patients with femoral Neck fracture treated with canulated cancellous screw: A prospective cohort study"*** submitted by Dr. Mahesh Kumar, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1099/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIA/P14***
15.	Research proposal entitled ***"A prospective study to evaluate the results of correction of angular deformities around the knee using computer assisted indigenous hexapod fixator system"*** submitted by Dr. Vivek Kumar, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1097/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** • IEC to be filled properly- specially point no. 5, 8, 10, 11. • As it is a follow up of OPD patients with angular deformity; title should reflect the same.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• In study population patients with angular deformity attending OPD to be written. • If patients 12 years and above age are to be taken there should be guardian consent and patient assent form. **Comment:** As above **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P15***
16.	Research proposal entitled ***"Evaluation of effect of very low diet protein with ketoacid analogues supplementation in patients with chronic kidney disease"*** submitted by Dr. Anshuman Mishra, JRI, Department of Biochemistry, King George's Medical University, U.P., Lucknow vide letter no. Bio/925/23 dated 14th December, 2023. ***Recommendation of reviewer:-*** Approved **Decision:** • Approved ***Ref. code: XXIV-PGTSC-IIA/P16***
17.	Research proposal entitled ***"A study on effects of organo-chlorine pesticide exposure on progression of chronic myeloid leukemia"*** submitted by Dr. Syed Mohd Abuturab Rizvi, JRI, Department of Biochemistry, King George's Medical University, U.P., Lucknow vide letter no. Bio/926/23 dated 14th December, 2023. ***Recommendation of reviewer:-*** • In SOP-checklist, point no.10 (Risk & benefit) ticked as not reasonable-PI to correct. • In inclusion criteria-Age and sex specifications of the patients not mentioned-PI to include. • Detailed sample size calculation is missing-Discrepancy in total sample size given (75) and in grouping (25/50) but in calculation n=31 is mentioned PI to clarify. • As this is a comparative cross-sectional study-flow chart of methodology is needed. • The title of the study mentions "progression of chronic myeloid leukemia" while the design of the study is cross-sectional; how will you achieve your objective/s? • Case record form is not attached. **Comment:** As above **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P17***
18.	Research proposal entitled ***"Role of strain and shear wave ultrasound elastography in chronic kidney disease patients"*** submitted by Dr. Suryang Chaurasia, JRI, Department of Radiodiagnosis, King George's Medical University, U.P., Lucknow vide letter no. RD/848/23 dated 16th December, 2023. ***Recommendation of reviewer:-*** • This is a prospective comparative cohort study; kindly include this in the title too. • The two cohorts (Treatment and control) should be explicitly defined.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(Alok Dhawan)
Chairman, IEC

	• The sample size formula is inappropriate. It is for prevalence study. • After stating the research hypothesis (involving study variables and parameters) properly, right sample size formula should be used. • The statistical hypothesis section is very general. It should be specific to the research hypothesis. **Comment:** • Kindly include ***"Study design"*** in the title **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P18***
19.	Research proposal entitled ***"Epidemiology of acute febrile illness in a medical ward and ICU of a tertiary care centre of Northern India"*** submitted by Dr. Prince Kumar Singh, JRI, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 2011/Med/23 dated 4th December, 2023. ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIA/P19***
20.	Research proposal entitled ***"Comparison of limb occlusion pressure and standard pneumatic tourniquet pressure in total knee arthroplasty -A prospective study"*** submitted by Dr. Ravi Kumar, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1107/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** Approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIA/P20***
21.	Research proposal entitled ***"Validation of open injury scores in predicting salvageability of limb in type III B open tibial fractures"*** submitted by Dr. Utkarsh Bansal, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1197/Ortho/23 dated 6th December, 2023. ***Recommendation of reviewer:-*** • Informed consent mentions the study as Case control study. Please correct this. • Informed consent in Hindi not present. **Comment:** • Kindly clarify **"Study design"** • Title is different in the section on "Role of responsibilities" **Decision:** Revise & re-submit with response to queries in tabular format. ***Ref. code: XXIV-PGTSC-IIA/P21***
22.	Research proposal entitled ***"Evaluation of patient reported outcome in arthroscopically reconstructed anterior cruciate ligament tear using autologous tendon grafts"*** submitted by Dr. Sagar Meena, JRI, Department of Orthopaedics Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1198/Ortho/23 dated 6th December, 2023.

The following Member was not present in the Meeting:

- Hon'ble Justice Ritu Raj Awasthi

IA	Action Taken PGTSC Subcommittee held on 08-05-2024
1-	Clarification of research proposal entitled ***"Effect of mindful meditation an anxiety, haemodynamic parameters and inflammatory markers on patients undergoing surgery for varicose veins"*** submitted by Dr. Chaitanya Gahlot, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/627/24 dated 5th March, 2024. **Previous Comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• The project is written in a sketchy way. To write a proposal a proper description of the problem statement along with a relevant review of literature, existing research gap, relevance of the study along with objectives to be there, which is missing? Further, there is a need for suitable methods to address the concerns. The introduction of the study barely talks about the research gap as per the topic chosen for the study. Methodology also not gives any clue about the strategy that is to be adopted for mindful meditation. • Who will guide modification techniques? ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** According to the clarification, the Sr. Chief PI will be responsible for the meditation procedure. Approval to the study may be provided in consensus with the learned committee members. **Decision:** Level 4: Not approved. ***Ref. code: XXI-PGTSC-IIA/P81***
2	Research proposal entitled ***"Laboratory markers of hematoma expansion in acute intra cerebral haemorrhage patients: A prospective observational study"*** submitted by Dr. Saritesh Kumar Thakur, SR, Department of Neurology, King George's Medical University, U.P., Lucknow vide letter no. 109/Neuro/24 dated 6th March, 2024. ***Recommendation of reviewer:*** • The plan of study is very clear • However, the entire Introduction under PROJECT SUMMARY is a mismatch to the proposal. To be re-written • In annexure 7, point no 20, name of Member secretary, IEC to be removed **PGTSC Comment:** As above **PGTSC Decision:** Level 1: Approved – with or without suggestions or comments ***The aforementioned comments were sent to the Principal-Investigator vide letter no.291/Ethics/2024 dated 09-05-2024 reply received from PI by email dated 09-05-2024.***

PGTSC COMMENT	CLARIFICATION WITH CHANGES ACCORDING TO COMMENT
However, the entire Introduction under Project Summary is a mismatch to the proposal. To be rewritten.	Intracerebral hemorrhage (ICH) is a devastating neurological event marked by the sudden rupture of blood vessels in the brain, leading to hematoma expansion and perilesional edema. These complications can cause increased intracranial pressure,

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	secondary brain injury, and poor outcomes. Understanding the mechanisms underlying these processes is crucial for managing acute ICH effectively. Factors like low serum calcium, elevated RDW, altered leukocyte counts, low LDL and total cholesterol, and high serum ferritin levels are associated with hematoma expansion and edema formation. A prospective observational study aims to explore laboratory markers related to hematoma expansion and perilesional edema in acute ICH patients. By identifying specific biomarkers through serial measurements and comprehensive assessments, the research could enhance prognostication and guide therapeutic interventions, ultimately revolutionizing personalized medicine in ICH management. Rewritten Project Summary is attached.
In annexure 7, point no 20, Name of Member Secretary, IEC to be removed.	Name of Member Secretary, IEC removed as per comment. **20. Contact for further information** **Name of the PI - Dr Saritesh Kumar Thakur** **Address – Department of Neurology, KGMU, Lucknow** **Telephone Numbers – 7879079793** 20. अधिक जानकारी के लिए संपर्क करें पीआई का नाम - डॉ सरितेश कुमार ठाकुर पता - न्यूरोलॉजी विभाग, केजीएमयू, लखनऊ टेलीफोन नंबर – 7879079793 Corrected sheet attached.

Your name and address removed so that you cannot be recognized from it.

17. What will happen to the results of the research/trial study?

If the results get published you shall not be recognized in the document.

18. Who is organizing and funding the research/trial?

The research is being organized by Department of Neurology, King George Medical University, Lucknow and is not being funded by any private or government agency.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	19. Who has reviewed the study? Study has been reviewed and approved by Institutional Ethics Committee, KGMU, Lucknow. **20. Contact for further information** **Name of the PI - Dr Saritesh Kumar Thakur** **Address – Department of Neurology, KGMU, Lucknow** **Telephone Numbers – 7879079793** **21. Legally authorized representative** Legally authorized representative (LAR), under applicable law or judicial authority, can give consent on behalf of a prospective participant who, for either legal or medical reasons, is unable to give consent herself/himself to participate in research or to undergo a diagnostic, therapeutic or preventive procedure as per research protocol, duly approved by the ethics committee. We Thank you of taking part in this study. **Decision:** Approved ***Ref. code: XXV-PGTSC-IIA/P27***
3-	Research proposal entitled ***"Burden of depression, anxiety, stress among School-going adolescents and factors affecting utilization of mental health services by School going adolescents of Lucknow disterict-A cross-sectional study"*** submitted by Dr. Abhinav Kumar, JRI, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 1306/CM/24 dated 14th February, 2024. ***Recommendation of reviewer:*** • There are multiple objectives. It is suggested to identify one primary objective and the rest should be clubbed into secondary objectives. **Comment:** As above **PGTSC Decision:** Level 1: Approved – with or without suggestions or comments • Put-up will be IEC Meeting which will be held on 13-05-2024. **Decision:** Approved ***Ref. code: XXV-PGTSC-IIA/P18***
IB	**Action Taken of IEC**
1.	Clarification of research proposal entitled ***"Mechanisms of autophagy-mediated cell survival in breast cancers and its implication in therapeutics and diagnostics"*** submitted by Prof. M.L.B. Bhatt, Department of Radiotherapy, King George's Medical University, U.P., Lucknow vide letter no. 1472/RT/2024 dated 21st February, 2024. **Previous comment:** • Clarification related AUTOPHAGE RELATED GENES IN BREAST CANCER • Looks ok. Autophagy related genes-can be simplified. • Just as studies related to genes which can be important modifies of effects of therapies.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• Word [UTAK] FOR TISSUE SAMPLE CAN BE REPLACED BY ट्यूमर का नमूना या सर्जरी से निकले ट्यूमर का थोड़ा हिस्सा। ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 116th ECM IIA/P7***
2.	Clarification of research proposal entitled ***"Effect of dopamine as VEGF antagonist on progression of sepsis to septic shock, ALI (acute lung injury) and AKI (acute kidney injury)"*** submitted by Dr. Zia Arshad, Additional Professor, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. 75/CCU/2024 dated 26th March, 2024. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** **Previous comment:** • Kindly fill in the left blank spaces in annexure 1 pt 5 (i), such as number of subjects etc. • The 'Study procedure' section of ICF should explain the patient regarding the procedure that he will undergo and that too in patient friendly language. Moreover the corresponding part in Hindi version communicate similar information. • The initial part of patient information sheet mentioning the guidelines should be deleted. In addition the word 'Randomized trial' needs to be avoided altogether. • If there are any anticipated adverse events as per annexure 1 point 11, then they need to be included in ICF & patient information sheet. ***Recommendation of reviewer:*** • The investigator has responded to all the queries of the reviewer. However, one of the co-investigators (Prof. GP Singh) has retired from KGMU. It needs to be corrected. **Decision:** Modified as above ***Ref. code: 116th ECM IIA/P7***
3.	Clarification of research proposal entitled ***"Evaluation of lignocaine HCI as a therapeutic and diagnostic tool in myofascial pain dysfunction syndrome (MPDS0 and internal derangement"*** submitted by Prof. U.S Pal, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences King George's Medical University, U.P., Lucknow vide letter no. OMSD/809/2024 dated 17th February, 2024. **Previous comment:** • As this is not a Clinical Trial and the Drug Lignocaine is already approved in India, therefore SOP-Checklist must be corrected (SECTION-3 and subsections I, ii, iii). • Section 6 – Privacy and Confidentiality–section–I-Indirect Identifier not ticked according to the corrections made by PI in answer to quarries made by Primary Reviewer.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• Secondly-in section ii- Confidential handling of data by staff is not ticked as YES • (Therefore PI is required to send corrected and revised SOP-Check list) • In Inclusion /Exclusion criteria–Age/ Sex criteria not mentioned • Study design–PI mentioned it as prospective study, which is to be corrected/clarified, as the study design seems to be prospective Interventional and comparative prospective/post operative study. • For clarity in methodology PI should add Flow chart of the study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 119th ECM IIA/P18***
4.	Clarification of research proposal entitled "***Study on clinical outcomes and drug resistance profile (both phenotypic and genotypic) in MDR tuberculosis patients treated with bedaquiline containing regimen***" submitted by Ms. Rashmi Ratnam, Ph.D. 2021 Scholar through her guide Prof. R.A.S. Kushwaha, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 954/24 dated 22nd April, 2024. **Previous comment:** • Kindly inform if any charges would be levied on the participants/subjects involved. ***The aforementioned comments were reviewed by the Member-Secretary, IEC.*** Provisionally approved **Decision:** Approved ***Ref. code: 126th ECMIIB-Ph.D/P1***
5.	Clarification of research proposal entitled ***"Radiation induced damage in head and neck and its management by hyperbaric oxygen therapy-randomized control study"*** submitted by Prof. Vijay Kumar, Head, Department of Plastic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 457/24 dated 9th April, 2024. **Previous comment:** • Kindly modify the title ***"A randomized control study"*** in place of ***"Randomized control trial"*** ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 127th ECM IIA/P19***
6.	Clarification of research proposal entitled ***"Development of an efficient post mortem interval (PMI) estimation method using RNA degradation pattern and gene expression in human dental pulp tissue under varied temperature & time intervals"*** submitted by Ms. Amita Sangwan, Ph.D. Scholar under the guidance of Prof. Shalini Gupta, Head,

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	Department of Oral Pathology & Microbiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 3081/OP/24 dated 22nd March, 2024. **Previous comment:** • Hypothesis not provided. • In the consent form (both Hindi and English) it is mentioned that it is and in vitro study. • However, on going through the methodology it is not clear what in vitro studies are to be performed. • RNA isolation protocol not provided. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 127th ECMIIB-Ph.D/P1***
7.	Clarification of research proposal entitled ***"Usefulness of receiving prepared cytology smears over those prepared under direct vigilance of a Pathologist"*** under supervision of Prof. Riddhi Jaiswal, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 591/24 dated 1st May, 2024. **Previous comment:** • As title of the study suggests usefulness of a method over other but criteria or definition of usefulness is not defined. It should be clearly defined. • Study type and design is not clearly mentioned in the proposal under respective headings though it has been declared as retrospective study in the covering letter of EC review and clearance. • There is ICF form in the proposal. The PI should fill the form of consent waiver form. • After reading whole proposal it seems to be done already. The proposal should be revised in a manner that it reflect that the study will be done after getting ethical approval. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** • **The project may kindly be approved and waiver granted as requested since the study does not have any patient/subject identifying data.** **Decision:** Approved ***Ref. code: 128th ECM IIA/P5***
8.	Clarification of research proposal entitled ***"Centre of Excellence for adolescent Health and Development in KGMU, Lucknow"*** submitted to NHM (National Health Mission) under supervision of Prof. Sujata Deo, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/1001/23 dated 12th April,

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	2024. **Previous comment:** • Title should be "Justification for establishment of Centre of Excellence for adolescent Health and Development in KGMU, Lucknow." • Identify one primary objective and the rest should be clustered into secondary objectives. • Identify study variables and population parameters. • Convert the primary objective into "research hypothesis" using the study variables and parameters of step 3. • Sample size calculation is arbitrary. It should be specific to the research hypothesis of Step 4. • The statistical analysis section is very general. It should be in tune with the research hypothesis and other objectives of the study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 128th ECM IIA/P10***
9.	Clarification of research proposal (Expedited review) entitled ***"Uncovering the gene expression profile of programmed cell death ligand 1 (PD-L1) gene and its polymorphism and its association in regulation to platinum drug resistance in head and neck squamous cell carcinoma"*** submitted by Prof. Navin Singh, Department of Radiotherapy, K.G's Medical University, U.P., Lucknow vide letter no. 279/RT/2023 dated 7th March, 2024. **Previous comment:** • Annexure 1 point 10 still needs to be rectified. • Annexure 1 point 8 (ii) needs to be mentioned as YES or No. • The information sheet mentions inclusion criteria for healthy subjects as having cancer while inclusion criteria of cases as having no cancer. Kindly correct • Statement 10.i you did specify that there will be no risk to both the case and the control; kindly correct it. • Please Hindi ICF should be in layman language. ***The aforementioned comments were reviewed by the Member-Secretary, IEC.*** Provisionally Approved **Decision:** Approved ***Ref. code: 129th IEC IB/P5***
10.	Clarification of research proposal entitled ***"Development implementation and evaluation of protocolized cardio-obstetric care in improving maternal cardiac, obstetric and fetal outcomes of pregnant women with heart diseases in India"*** funded by ICMR, New Delhi submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 11/Cardio/Res/24 dated 12th April, 2024.

Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	Previous comment: • This is a comprehensive study consisting of many objectives. • The study must be split into different parts. • Each part requires formulation of research hypotheses, identification of outcome measure, calculation of sample size etc. • The research hypothesis will be in terms of study parameters (Such as mean, standard deviation, prevalence etc.). • This is a multi-centric study. • There are certain guidelines for multi-center studies. These must be followed. Only a list of potential sites is given. The name of participating centres is required. • What will be the common protocol? • Which will be a coordinating center to collect, process and analyze the data? • The number of field sites varies greatly across studies according to their size, complexity and purpose. How will this be handled? • Sample size calculation is arbitrary. Only tentative numbers are mentioned. This is due to the fact that the aim/objective is not clearly defined. The outcome event should be clearly defined. The primary objective should be converted into a proper research hypothesis in terms of the study variables and parameters. • Sample size calculation (using appropriate formula) will be required. • Data analysis plan is very general. It should be specific to the research hypothesis. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P1***
11.	Clarification of research proposal entitled ***"Influenza vaccine to reduce cardiovascular events in patients with recent myocardial infarction: a multicentric randomized, double-blind, placebo-controlled trial"*** submitted by Prof. Sharad Chandra, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 60/Cardio/Res/24 dated 30th April, 2024. **Previous comment:** • This is a multi-center randomized controlled trial (RCT). • This is a multi-centric study. • There are certain guidelines for multi-center studies. These must be followed. Only a list of potential sites is given. The name of participating centres is required. • What will be the common protocol? • Which will be a coordinating center to collect, process and analyze the data? • The number of field sites varies greatly across studies according to their size, complexity and purpose. How will this be handled? • Sample size calculation is arbitrary. Only tentative numbers are mentioned. This is due to the fact that the aim/objective is not clearly defined. The outcome event

Chairman, IEC

	should be clearly defined. The primary objective should be converted into a proper research hypothesis in terms of the study variables and parameters. • Sample size calculation (using appropriate formula) will be required. • Data analysis plan is very general. It should be specific to the research hypothesis. • The method of randomization is not given. • A mere statement that so many patients with such and such diagnosis were randomized is unsatisfactory. • The method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.) is required. • Was there any blinding procedures used? • Was there any randomization blinding? • Was there any blinding of patients? • How is the handling of withdrawal done? ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P4***
12.	Clarification of research proposal entitled ***"Effect of stress management and resilience training through meditation (SMART-Me) (Soft Skill Development) programme on psychological resilience and well-being of paramedical students: A case control experimental study"*** submitted by Dr. Bhupendra Singh, Additional Professor, Department of Geriatric Mental Health, King George's Medical University, U.P., Lucknow vide letter no. 163/DGMH/24 dated 27th April, 2024. **Previous comment:** • The design of the study needs clarification; it can either be a "case-control" or an "experimental" study. • Has this SMART-Me technique been implemented before? • Kindly mention the reference for SMART-ME technique of medication and it will be better to include a Co-Investigator qualified for implementing yoga technique. • Has this SMART-Me technique been implemented before? • Is the risk not reasonable compared to benefit? (Annexure 1 point 10) • Information sheet & ICF need to be customized for controls & cases separately. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P5***
13.	Clarification of research proposal entitled ***"Antenatal myomectomy: A surgical challenge"*** submitted by Prof. S. P. Jaiswar, Head, Department of Obstetrics &

	George's Medical University, U.P., Lucknow vide letter no. 465/24 dated 9th April, 2024. **Previous comment:** • In the consent form it is mentioned that there will be no any complication associated with the study. However, there may be transfusion related adverse reactions or events associated with immune-mediated reactions which may be mentioned. ***The aforementioned comment was sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P13***
17	Clarification of research proposal entitled ***"Study of stigma and discrimination among people living with HIV AIDS (PLHIV) and key population in Uttar Pradesh"*** submitted by Dr. Rajeev Misra, Assistant Professor, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 72/CM/24 dated 13th April, 2024. **Previous comment:** • The title should be more explicit defining the target population exclusively. • The present study looks like to be multi-stage stratified random sampling. • It should be accordingly planned. • The sample size calculation will use stratified sampling methods, may be proportional allocation. • Nothing is said about the reliability of the instrument. • Nothing is said about the face validity and content validity of the instrument. • What is the construct validity of the instrument? • Research hypothesis should be defined in term of the population parameters involved in the study. • The population parameters will be derived from the quantitative evaluation of the instrument being used. ***The aforementioned comment was sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P16***
18.	Clarification of research proposal entitled ***"Identifying host-protein biomarkers for predicting infectious disease in low resource health care settings; and experimental study to enhance infectious disease surveillance"*** submitted by Prof. Avinash Agarwal, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/1155/2024 dated 3rd April, 2024. **Previous comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

Dated 13th May, 2024

	• Grant of waiver of consent is being approved with the understanding that all analyses shall be performed in house and none will be transported outside the campus. ***The aforementioned comments were reviewed by the Member-Secretary, IEC.*** **Decision:** Approved ***Ref. code: 130th ECMIIA/P18***
19.	Clarification of research proposal entitled ***"Acceptability of value added courses in Pathology for phase 2 MBBS students"*** submitted by Prof. Riddhi Jaiswal, Department of Pathology, King George's Medical University, U.P., Lucknow vide letter no. 529/24 dated 16th April, 2024. **Previous comment:** • Nothing is said about the reliability and validity of the instrument. • How be the instrument converted into quantitative score? • Research hypothesis will be in terms of the study parameters (mean, proportion etc.) derived from the quantitative scores. • Sample size calculation is not given. • Statistical analysis (quantitative as well as qualitative) has to be more specific. At present, it is unclear. ***The aforementioned comment was sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 130th ECMIIA/P21***
20.	Clarification of research proposal entitled ***"Identification of novel metabolic biomarkers in drug resistant pulmonary tuberculosis patients using metabolomics"*** submitted by Ms. Sushma Yadav, Ph.D. Scholar, under the guidance Prof. Surya Kant, Head, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 986/Res/24 dated 2nd May, 2024. **Previous comment:** • Unrelated project information is mentioned in the IEC under the sponsor information. • Role of investigators to be redefined? • IEC proforma to be filled properly. There is a mismatch in no. of subjects in the proposal and IEC. proforma • Inclusion criteria should mention subjects/ patient age groups. • Who will be the control? Inclusion and exclusion criteria of control to be mentioned. • Who will be responsible for investigations of the control group? • Who will take the responsibility for extracting blood sample, storage etc. • Methodology to be checked thoroughly and written properly. • ICF and patient information sheet to be written properly.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• As mentioned in the form, this study has already been conducted; hence, retrospectively ethical approval cannot be granted. • Kindly provide evidence of funding for metabolomics study. • Prospective nature? • Check the ICMR project/proposal. • Source of funding/Medicine-Metabolomics ***The aforementioned comment was sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** Provisionally Approved **Decision:** Approved ***Ref. code: 130th ECMIIB-Ph.D/P1***
21.	Clarification of research proposal entitled ***"Evaluation of ctDNA/cfDNA ratio as a biomarker of oral squamous cell carcinoma progression through high throughput sequencing data analysis and real-time PCR"*** submitted by Ms. Ekta Anthony, Ph.D Scholar, under the guidance Prof. Shalini Gupta, Head, Department of Oral Pathology & Microbiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 3148/OP/24 dated 8th May, 2024. **Previous comment:** • There are too many objectives. • Methodology to be written sequentially. • Who will be responsible for extracting blood and tissue samples as well as their storage and analysis? • Who is going to bear the cost of investigation(s). • The consent form is to be written in simple language. • Prospective nature? • Check the ICMR project/proposal. • Source of funding: Patients/PI ***The aforementioned comment was sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** • The investigator responded to all the queries. But, I don't understand why the waiver form is attached along with informed consent form. That too, the waiver form is of a different study with a sign of different investigator (Please check the attachment here). **Decision:** Approved ***Ref. code: 130th ECMIIB-Ph.D/P2***
22. 	Provisionally Approved **Decision:** Defer to the next meeting because quorum was incomplete. ***Ref. code: 130th ECMIIC/P12***
IC	**Expedited review**
	Expedited review of the research proposal entitled ***"Reducing C sections by Continuous education (ReSCuE) and implementation of strategic models for improvement-A quality improvement study"*** Prof. S.P. Jaiswar, Head, Department of Obst. & Gynaecology, K.G's Medical University, U.P., Lucknow vide letter no. OG/1060/24 dated 19th April, 2024. ***The above research proposal was forwarded to two reviewers.*** ***Recommendation of First reviewer:-*** • The PI/Co-PI of the project can not be part of the scientific review committee. Hence, it is recommended to identify a member outside the investigating to be member of scientific review committee and become the chairperson as well. • Kindly refer to the point number 10.i of IEC proforma. The response should be YES (as the risk is reasonable [i.e minimal in comparison to the benefits]). • Kindly refer to the undertaking of the PI form: Under the point number 3 (Other members of the research team) only the name of three Co-Investigators are mentioned however, there are six co-investigators as mentioned the proposal. Kindly clarify it. Similarly, the document mentioning the roles and responsibilities of the investigators also mentions the names of three Co-PIs. It is required to confirm whether there are three Co-PIs or six Co-PIs. • There is mismatch of the project title in multiple places. • In the IEC proforma point no. 10.iii, the investigators mentioned there is direct benefit to the patient. However, in the patient information sheet (point number 2), the investigators mentioned that there is no direct benefit to the patient. It is a contradicting statement and needs clarification. • The patient information sheet also mentions (point number 3), there is no involvement of patient directly in the study and information will be taken from the case sheets. If there is no direct involvement of the patients, what is the need of taking consent from the patient? The investigator may ask for waiver of consent by attaching appropriate forms with IEC proforma. • There is no information about sample size estimation in the protocol. Kindly mention it. ***Recommendation of secondary reviewer:-Pending*** ***Ref. code: 131st ECMIC/P1***
II-A	**New Proposal**
1.	Research proposal entitled ***"Post burn scars and contractures: A Hospital based study of the burden of disease, socioeconomic and clinical factors affecting the outcome, and steps to mitigate them"*** submitted by Prof. Vijay Kumar, HOD, Department of Plastic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 238/24 dated 17th February, 2024.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	Recommendation of reviewer: • Control arm is lacking • Need Ascent from adolescent because all age group will be included • Consent from legal guardian of children will also be required **Comment:** • IEC form to be corrected as per study design • ICD & PID contact details to be added • Clarification required on 'Multicentric study' **Decision:** • Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P1***
2.	Research proposal entitled ***"Selective antibiotics when symptoms develop versus universal antibiotic therapy for neonates at-risk of early-onset sepsis: A multicentric, randomized, controlled, non-inferiority trial (The SAUNA Trial)"*** submitted by Prof. Mala Kumar, Head, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 263/Ped/24 dated 22nd February, 2024. ***Recommendation of reviewer:*** • Risk shall be explained more clearly, particularly for those who will not receive antibiotics at birth, in informed consent form. • Patient information sheet, Q20 shall not be written as "NO" because it is a drug trial • Sample size: 7% of non-inferiority margin for 20% of outcome is equal to almost 35% increased risk, which I feel is too much of a risk for newborns • How SNOSE technique will be used in a multicentric study??Whether random number sequence will separately be generated in each center? **Comment:** • ICMR sanction letter. • Vulnerable subjects to be marked specifically • Patient Information Document (PID) • Justification of increased risk • Clarify DSMB clearance • Clarification required on compensation and insurance details • Undertaking that they are a part of the proposal/project, is to be annexed. **Decision:** • Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P2***
3.	Research proposal entitled ***"Evaluation of clinic-pathological characteristics, prognostic factor and treatment outcomes in Children with osteosarcoma"*** submitted by Dr. Nishant Verma, Additional Professor, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 320/Ped/24 dated 28th February, 2024. ***Recommendation of reviewer:*** It is a single center study or multicentric study as shown in Google form

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	It is a retrospective study as stated by the investigator. Considering the retrospective nature of the study, investigators shall clarify the following • How they will track the participants for consent • How they will collect blood sample and bone marrow sample from the participants? • How they will meet the expenses needed for genetic analysis? **Comment:** • Funding of the project is missing in the IEC form. **Decision:** • Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P3***
4.	Research proposal entitled ***"Effectiveness of self directed learning in Physiology for phase 1 undergraduate Medical Students"*** submitted by Prof. Archna Ghildiyal, Department of Physiology, King George's Medical University, U.P., Lucknow vide letter no. 3792/PHY/24 dated 1st March, 2024. ***Recommendation of reviewer:*** Approved **Decision:** Approved ***Ref. code: 131st ECM IIA/P4***
5.	Research proposal entitled ***"Lymph node yield in classical Glenn's versus extended lymph node dissection of cancer gall bladder: observation from an endemic area"*** submitted by Prof. Abhinav Arun Sonkar, Head, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 526/24 dated 29th February, 2024. ***Recommendation of reviewer:*** Though the investigators have submitted this study as a retrospective study and have asked for waiver of consent but actually it is a prospective study. In last paragraph of page 9, it is mentioned that the participants will be followed quarterly and repeated CT will be done every 6 monthly. In my opinion, this study has a few major ethical issues (consent, risk of radiation with repeated CT, cost of follow-up, and cost of repeated CT). Proposal is grossly incomplete and shall be resubmitted with more details for being considered in next meeting. **Comment:** • Clarification on whether the same patients would be followed or there would be another set of patients, is required. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P5***
6.	Research proposal entitled ***"Bile leak following surgery for hydatid cyst of liver: when to intervention?"*** submitted by Prof. Abhijit Chandra, Head, Department of Surgical Gastroenterology, King George's Medical University, U.P., Lucknow vide letter no.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	SG/173/24 dated 1st March, 2024. ***Recommendation of reviewer:*** Approved **Comment:** The design of the study needs clarification, along with how the data would be captured (prospective versus any other method) **Decision:** Level 2: Revision with minor modifications/amendments for resubmission. ***Ref. code: 131st ECM IIA/P6***
7.	Research proposal entitled ***"Progressive familial intrahepatic cholestasis in Indian Children-establishing an Indian PFIC Registry"*** submitted by Dr. Sanjeev Kumar Verma, Additional Professor, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 280/Ped/24 dated 22nd February, 2024. ***Recommendation of reviewer:*** Investigators have written that no blood sample will be collected but the primary objectives include genetic analysis. How they will do genetic testing without blood sample, this need to be clarified. Further, they have also asked that no specimen will be stored for future research. **Comment:** As above **Decision:** • Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: 131st ECM IIA/P7***
8.	Research proposal entitled ***"Comparative outcomes of intramedullary nailing for diaphyseal forearm fracture in Paediatric and adolescent age group"*** submitted by Dr. Syed Faisal Afaque, Assistant Professor, Department of Paediatrics Orthopaedics, King George's Medical University, U.P., Lucknow vide letter no. 2902/PaedOrtho/24 dated 7th March, 2024. ***Recommendation of reviewer:*** The proposal is full of major mistakes and shall be resubmitted after revision. • Page 4- it is written that it is not a trial but study design is written as RCT. • Sample size calculation is not given. • Arms proposed in this RCT are not acceptable because the participants are of different age groups but treatment are same. In my opinion, the investigator shall take help of someone who has experience in writing a protocol because major components of RCT are missing in the proposal. **Comment:** • Sponsor information and funding letter is required • MOU details are missing • Details of Insurance and compensation mechanism are not available • ICD and PID to be added/revised

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• Assent forms to be added **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P8***
9.	Research proposal entitled ***"To decipher the immunomodulatory potential of the blue-green algae and algal nano-formulation"*** submitted by Prof. D. Himanshu, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 573/MED/24 dated 12th March, 2024. ***Recommendation of reviewer:*** Approved **Comment:** • Sponsor information and funding letter is required • MOU details are missing • Annexure 9: Add contact details • PID is required for all the groups included as participants in the study • It is unclear how the blood samples would be handled? • Role of Co-PIs is missing **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P9***
10.	Research proposal entitled ***"Elucidating the role of long non-coding RNSs (Inc RNAs) in HIV latency"*** submitted by Prof. D. Himanshu, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 572/MED/24 dated 12th March, 2024. ***Recommendation of reviewer:*** Approved **Comment:** • Sponsor information and funding letter is required • MOU details are missing • Annexure 9: Add contact details • PID is required for all the groups included as participants in the study • It is unclear how the blood samples would be handled? • IEC: Vulnerable groups/Elderly information is required • Kindly clarify on the median age-40. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P10***
11.	Research proposal entitled ***"Knowledge, attitude and perception of medical students regarding implementation of elective modules"*** submitted by Prof. Rakesh Kumar Dixit, Department of Pharmacology & Therapeutics, King George's Medical University, U.P., Lucknow vide letter no. 185/Pharma/24 dated 6th March, 2024. ***Recommendation of reviewer:*** Approved

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	As above **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P14***
15.	Research proposal entitled ***"Long term outcome of esophageal replacement in Children"*** submitted by Prof. J. D Rawat, Head, Department of Paediatric Surgery, King George's Medical University, U.P., Lucknow vide letter no. 279/PedSy/24 dated 13th March, 2024. ***Recommendation of reviewer:*** **Comment:** • How the growth assessment will be performed. • 2.What questionnaire will be used to assess the "any problem" in these patients. • 3.Please define the age group of study participant. • 4.What will be the retrospective study duration. • Please include child assent form & guardian information sheet **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: 131st ECM IIA/P15***
16.	Research proposal entitled ***"Evaluation of lectin-like oxidized low-density lipoprotein receptor-1 (Lox-1) insulin resistance and lipoprotein a in the patients of obstructive sleep apnea"*** submitted by Dr. Jyoti Bajpai, Assistant Professor, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 774/24 dated 15th March, 2024. ***Recommendation of reviewer:*** • There is change of title at various places, please ensure uniformity. • 2.How insulin resistance will be measured. • In the budget estimate summary (page no.15) and prototype development section there is mention of (endoscopy/biopsy) are required. • Please clarify it. **Comment:** • Funding details are required • Define-Controls • Kindly provide UPCST-Letter. • The title should included the study design • Please review the authorship guidelines • Details of blood samples to be furnished **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECM IIA/P16***
17.	Research proposal entitled ***"Morphometric analysis of the lateral mass of atlas vertebrae and its clinical significance in craniovertebral junction surgeries"*** submitted by Dr. Noor Us Saba, Assistant Professor, Department of Anatomy, King George's Medical University, U.P., Lucknow vide letter no. 04/ANAT/24 dated 1st April, 2024.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	Comment: • IEC form 5 vii-Special groups. • Will this be a single Centre study? • Co-PI? • Please note that the consent is to be taken by an independent person where special groups are involved. **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: 131st ECM IIA/P11***
12.	Research proposal entitled ***"Bowel-bladder dysfunction in adults: our initial experience with Biofeedback-based pelvic floor relaxation exercises"*** submitted by Dr. Madhur Anand, Assistant Professor, Department of Urology, King George's Medical University, U.P., Lucknow vide letter no. 176/URO/24 dated 12th March, 2024. ***Recommendation of reviewer:*** Approved **Comment:** Clarification is required whether the PI wishes to process the proposal for 'waiver of consent' or otherwise. Exclusion criteria. Language-Data collection **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: 131st ECM IIA/P12***
13.	Research proposal entitled ***"To assess the knowledge, attitude and practices regarding disposal practices of unused and expired medicines among rural population of sarojininagar, Lucknow"*** submitted by Dr. Saurabh Kashyap, Assistant Professor, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 1304/CM/24 dated 14th February, 2024. ***Recommendation of reviewer:*** Approved **Decision:** Approved ***Ref. code: 131st ECM IIA/P13***
14.	Research proposal entitled ***"Laparascopic extraperitoneal ventral suture rectopexy (LEVR)"*** submitted by Prof. Abhijit Chandra, Head, Department of Surgical Gastroenterology, King George's Medical University, U.P., Lucknow vide letter no. SG/175/24 dated 4th March, 2024. ***Recommendation of reviewer:*** • The proposal involved surgery with a novel technique which is not the standard of care. Hence, the proposal shall be resubmitted as a single center trial instead of observational study. • It shall meet all the requirements of a clinical trial. **Comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

D Scholar, under the guidance Dr. Gyanendra Kumar Sonkar, Additional Professor, Department of Biochemistry, King George's Medical University, U.P., Lucknow vide letter no. Bio/1319/24 dated 19th March, 2024. ***Recommendation of reviewer:*** • Sample Size has been calculated on the basis of prevalence of GDM(total no.= 225), not seems to be based on objectives • Objectives can se divided into primary and secondary • Not group wise numbers have been given(GDM, Non diabetics or Type 2 DM) • Direct identifier has been ticked **Comment:** • Groups wise division of sample not done. • Sample size estimates erratic **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: 131stECMIIB-Ph.D/P2***
3.	Research proposal entitled ***"Breaking the silence: utilizing documentary media to understand, support, and prevent suicide attempts"*** submitted by Mr. Rohit Kumar Singh, Ph.D Scholar, under the guidance Prof. Anoop Kumar Verma, Head, Department of Forensic Medicine & Toxicology, King George's Medical University, U.P., Lucknow vide letter no. 104/FMT/24 dated 13th March, 2024. ***Recommendation of reviewer:*** • Direct identifier in the study can be of ethical concern. • Inclusion of a psychiatrist is suggested. • Statistical analysis can be mentioned appropriate to primary objective. **Comment:** • Role & responsibilities of investigators is missing. • Department/s of Co-PI need correction

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• Co-PI from medicine should be added • Qualitative analysis plan is missing. • Clarification on suicide risk assessment scale is required. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131stECMIIB-Ph.D/P3***
4.	Research proposal entitled ***"To decipher the role of hepcidin through STAT and SMAD proteins in determining status of β-thalassemia"*** submitted by Ms. Kirti Upadhyay, Ph.D Scholar, under the guidance Dr. Nitu Nigam, Additional Professor, Department of Centre for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 1426/CFAR/24 dated 21st March, 2024. ***Recommendation of reviewer:*** • In the form sample size is 66, 22 in three subgroups to Thalassemia while in methodology described as case control study – 45 cases and 90 controls • No clarification/definition of controls • Separate PIS and ICF for controls will be needed • Since age less than 18 years so assent forms and LAR or ICF from parents should be enclosed **Comment:** • Sample size discrepancy (distribution) • Source of control (definition) • Information sheet for Assent form missing. • Patient information sheet to be added/modified.. **Decision:** Level 2: Revision with minor modifications/amendments for resubmission. ***Ref. code: 131stECMIIB-Ph.D/P4***
5.	Research proposal entitled ***"To study the molecular mechanism of drug resistance in pneumocystis jirovecii from infected patients admitted in a tertiary care centre in North India"*** submitted by Mr. Vivek Kumar, Ph.D Scholar, under the guidance Prof. Prashant Gupta, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 56/24 dated 16th April, 2024. ***Recommendation of reviewer:*** • If patients age will be >5 years then assent form, parent information sheet and informed consent form for parent is required. **Comment:** • Assent form missing. • Parent information sheet missing. **Decision:** Level 2: Revision with minor modifications/amendments for resubmission. ***Ref. code: 131stECMIIB-Ph.D/P5***
6.	Research proposal entitled ***"Effect of psychological intervention on traumatic stress, coping self-efficacy and quality of life in trauma patients"*** submitted by Ms. Sussana

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	Yarusha John, Ph.D Scholar, under the guidance Prof. Samir Misra, Department of Trauma Surgery, King George's Medical University, U.P., Lucknow vide letter no. TS/330/24 dated 19th April, 2024. ***Recommendation of reviewer:*** • Study looks a Qualitative study but Statistical analysis –quantitative analysis • Past tense has been used in statistical analysis. • Sample size calculation rationale/basis can be added. **Comment:** • Everything described in past tense. (It means study is already conducted) • Analysis plan qualitative component missing. **Decision:** Level 2: Revision with minor modifications/amendments for resubmission. ***Ref. code: 131stECMIIB-Ph.D/P6***
7.	Research proposal entitled ***"Integrated transcriptomics and metabolomics analysis of rewired triple negative breast cancer"*** submitted by Mr. Ankit Pateriya, Ph.D Scholar, under the guidance Dr. Ashutosh Shrivastava, Additional Professor, Department of Centre for Advance Research, King George's Medical University, U.P., Lucknow vide letter no. 311/CFAR/24 dated 18th April, 2024. ***Recommendation of reviewer:*** • Study deign has not been mentioned. • Definition of control patients and their number are missing. From where this control tissue/sample will be obtained needs clarification. • PIS and consent form for control is required. • Co-PI from pathology department/can be added. **Comment:** • Exclusive funding for project (Declaration by PI) • Details about control missing. • Consist form for control missing. **Decision:** Level 2: Revision with minor modifications/amendments for resubmission. ***Ref. code: 131stECMIIB-Ph.D/P7***
8.	Research proposal entitled ***"Transcriptional dysregulation of homeobox gene family in oral potentially malignant disorders and oral cancer"*** submitted by Mrs. Jaya Singhal, Ph.D Scholar, under the guidance Prof. Amiya Agrawal, Department of Oral & Maxillofacial Surgery, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. DHR/MRU/4769/24 dated 22nd April, 2024. ***Recommendation of reviewer:*** • PIS and consent form for control is required. • Whether tissue samples will be collected from the control is not clear. **Comment:** • Healthy control • tissue biopsy • How it will be done? • Source of healthy controls

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• Selecting criteria of healthy controls. • Consent form & Information sheet for healthy controls. • Funding justification? **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECMIIB-Ph.D/P8***
9.	Research proposal entitled ***"Post traumatic stress disorder in patients with maxillofacial trauma and rehabilitation"*** submitted by Dr. Amiya Agrawal, Ph.D Scholar, under the guidance Prof. Anil Kumar Gupta, Department of Physical Medicine & Rehabilitation, King George's Medical University, U.P., Lucknow vide letter no. 5859/DPMR/24 dated 29th April, 2024. ***Recommendation of reviewer:*** No scientific/ethical issue **Comment:** • Assessment sheet: Is it freely available? • If no, kindly declare the source and cite; it must be mentioned that no special permission is required for using the tool. • There is discrepancy in the assessment & work plan. • Cognitive assessment: Where will this be done? **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 131st ECMIIB-Ph.D/P9***
II-C	**Review of New Drug Trial**
1.	Research protocol no. CXXB750A12201 entitled ***"A multi-center, randomized, placebo-and active-controlled, parallel-group, 24 week proof of concept and dose-finding study to evaluate efficacy, safety, and tolerability of XXB750 in patients with heart failure"*** sponsored by M/s Novartis Healthcare Private Limited submitted by Prof. S. K. Dwivedi, Department of Cardiology, King George's Medical University, U.P., Lucknow, vide letter no. 753/Cardio/Res/2024 dated 27th February, 2024 & 17/Cardio/Res/24 dated 16th April, 2024. ***Recommendation of reviewer:*** DCGI Letter Received **Decision:** Defer to the next meeting because quorum was incomplete. ***Ref. code: 131st ECMIIC/P1***

IA	**Action Taken**
1	Clarification of research proposal entitled ***"Assessment of midterm estimated GFR (EGFR) by different formula (24 hrs. CREATININE CLEARANCE, MDRD, CKD-EPI & NANRA) in patients of hypertensive disorders of pregnancy and its association with fetomaternal outcomes"*** submitted by Dr. Priya Agarwal, JRI, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/2082/22 dated 3rd October, 2022. **Previous Comment:** • The study variables and study parameters should be identified. • The research hypothesis should be properly formulated in terms of study parameters. • The sample size calculation is arbitrary. It can be done only after defining the research hypothesis. Statistical Analysis section is missing. • The study design is mentioned as "prospective case control study".

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• It should be properly mentioned as case-control study is retrospective study. • Statistical analysis section is missing. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XIV-PGTSC-II***
2	Clarification of research proposal entitled ***"Role of diet and lifestyle in colorectal cancer (CRC) - A case control study in Lucknow"*** submitted by Dr. Christopher James, JRI, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 1457/CM/24 dated 13th March, 2024. **Previous Comment:** • Identify one primary objective; the rest should be put into secondary objectives. • Convert the primary objectives into a proper research hypothesis using the parameters of the study population. • The sample size is arbitrary. Mention the formula used. • How the cases will be matched with controls? • What will be the ratio of matching (1:1 or 1:K)? • The statistical analysis will be for matched study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XVII-PGTSC-II***
3	Clarification of research proposal entitled ***"A comparative study of ozone therapy and photodynamic therapy as an adjunct to scaling and root planning in chronic periodontitis"*** submitted by Dr. Shilpi Mangal, JRI, Department of Periodontology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 4242/P-24 dated 19th April, 2024. **Previous Comment:** • As indicated in annexure 1: is the risk reasonable? Please indicate. • The design of study is Randomized controlled trial. No method of randomization or allocation is indicated. • Sample size calculation needs to be detailed- the formula used and step wise calculation. • The clinical outcomes need further detailing in context with analysis. Kindly list all the anticipated outcomes (Clinical and microbiological). • Arrange the description of proposal in PICO format with emphasis on comparison and outcome, the anticipated STATISTICAL ANALYSIS needs to be

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	summarised. • Being randomised controlled trial involving PDT, the other formalities need to be completed as per RCT. • Patient information sheet in both English and Hindi needs to be submitted as per the SOP of EC KGMU. • Who will fund the project? Kindly indicate? ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **PGT Declaration received.** **Decision:** Approved ***Ref. code: XIX-PGTSC-II***
4	Clarification of research proposal entitled ***"Effect of USG guided intra-articular prolotherapy versus steroid injection for sacroiliac joint dysfunction- A randomized controlled trial"*** submitted by Dr. Ruth Kikon, JRI, Department of Physical Medicine & Rehabilitation, King George's Medical University, U.P., Lucknow vide letter no. 5816/24 dated 16th April, 2024. **Previous Comment:** • Please attach properly filled Patient Information Sheet ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Previous decision:** • It is unclear whether the desired interventions are approved interventions/standard-of-care, if yes; please include a statement in the proposal. **PGT Declaration received.** **Decision:** Approved ***Ref. code: XIX-PGTSC-IIA/P27***
5	Clarification of research proposal entitled ***"Roles of preoperative and early postoperative electrodiagnosis in brachial plexus injury patients undergoing nerve transfer operations"*** submitted by Dr. Gourav Jain, SR, Department of Plastic & Reconstructive Surgery, King George's Medical University, U.P., Lucknow vide letter no. 50/23 dated 23rd April, 2024. **Previous Comment:** The scientific committee's decision statement needs to be ticked. • The role of investigators is not defined. • The aim and objectives of this study seem to be interchanged. ***role of preoperative and early postoperative electrodiagnosis in brachial plexus injury patients undergoing nerve transfer operations and its association with***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	electrodiagnostic parameters. • The duration of the study is written as January 2023 to October 2025 • Will the researcher get 34 months for the study? • Is the study started? • Variable no of sample size is written 20 (Checklist & protocol -see materials and methods)/ 31 (in protocol on same pg)? • Hindi ICF may be written in a more comprehensive language. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XIX-PGTSC-IIA/P57***
6	Clarification of research proposal entitled ***"To assess the efficacy of platelet rich plasma (PRP) in patients with partial thickness facial burns as compared to conventional facial burn care"*** submitted by Dr. Shrivats Mishra, SRI, Department of Plastic & Reconstructive Surgery, King George's Medical University, U.P., Lucknow vide letter no. 427/2024 dated 30th March, 2024. **Previous Comment:** • The study design is retrospective as well as prospective. • It cannot be both. Each type of study uses different methodology and analysis and sample size calculation. • It has to be split into two different parts. • Each type shall use different subjects. • Sample size calculation is missing. • From the Case series form, it is not clear: How the disease free survival shall be measured. • Statistical analysis section is very general. It should be specific to the objectives of the study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XIX-PGTSC-IIA/P73***
7	Clarification of research proposal entitled ***"To study the effect of curcumin on inflammatory markers and microbial flora in hemimaxillectomy patients with obturator prosthesis: A randomized controlled trial"*** submitted by Dr. Yangchin Drema, JRI, Department of Prosthodontics Crown & Bridges, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 995/24 dated 30th March, 2024. **Previous Comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• As stated in Annexure 1 this study involves a (herbal) medicine of Indian system of medicine. So it would be better to include an ayurvedic co investigator. • This is stated to be double blind RCT. Kindly mention the technique of allocation, randomization & double blinding. Is placebo not indicated here? • Who will bear the cost of curcumin & tests. Do you plan to register this RCT.?? • Summarize the anticipated outcome variables and anticipated statistical analysis of the same. • Kindly mention the dose, duration , brand and mode of administering curcumin. • No need to submit the SOP guidelines of Pt information sheet. Instead kindly submit the actual patient information sheet both in English & Hindi accordingly. • Kindly revise "purpose of study" & "Study procedure" in ICF in such a language that the patient may understand. • In annexure 1 regarding use of biological specimen it is indicated as "NA" while lower down 'Yes' in indicated for the use of infectious & biohazardous specimen. This is contrasting statement. Also no indication of blood collection is mentioned for IL &TNF? • Kindly refer to CONSORT guidelines for RCT before resubmitting ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXI-PGTSC-IIA/P3***

Methodology incomplete Biochemical estimations (oxidative stress parameters) protocol not provided. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXI-PGTSC-IIA/P72***
21	Clarification of research proposal entitled ***"An observational study to estimate the efficacy of statins for LDL-C reduction in acute coronary syndrome and non-acute coronary syndrome patients Indian population"*** submitted by Dr. Saket Ramraika, SRI, Department of Cardiology, King George's Medical University, U.P., Lucknow vide letter no. 870/Cardio/24 dated 16th March, 2024. **Previous Comment:** • In annexure 1. the duration of study in 18 m as well as 2yr. Kindly resolve and finalize. • Kindly submit the steps of sample size calculation. • In undertaking by PI, the other members of research team are missing. • In plan of study the follow-up at one place is after 3 months (as per NICE

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	guidelines) While at other place it is stated as monthly for 3 months. Kindly make this clear. • Summarize the anticipated outcome variables. • The ICF does not mention the contact of investigator. • The Hindi version of ICF should be retyped and hind text needs to be corrected. • The patient information sheet should be as per SOP of EC KGMU only. • No need to attached SOP guidelines for patient information sheet. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved *Ref. code: XXI-PGTSC-IIA/P78*
22	Clarification of research proposal entitled ***"Outcome analysis and clinic-radiological profile of patients with intraventricular tumours treated at KGMU"*** submitted by Dr. Mohit Mangla, SRI, Department of Neurosurgery, King George's Medical University, U.P., Lucknow vide letter no. 560/NS/24 dated 15th March, 2024. **Previous Comment:** • Kindly define the roles of guides & co guides as per protocol . • If no side effects are expected then what is the role of DSMB, or reporting of adverse events and interim analysis as per annexure 1. • If the aim is to study patients of last 12 years then how can it be a prospective study and how will the consent be obtained - Will the patient be called to decide his/her participation? and rest others excluded ?. • Pt information sheet indicates that it is both retrospective & prospective. Kindly indicate the inclusion of patients (retrospective & prospective) in methodology preferably via flow chart. • Ethical approval is primarily for prospective intervention and not for past procedures. • What is the anticipated sample size (not indicated in annexure 1)-kindly show sample size calculation. • Kindly rectify language for points 5,6,13,15,17 in patient information sheet. • Kindly rectify language in ICF for patient participation as per design of study (prospective or retrospective.) ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved *Ref. code: XXI-PGTSC-IIA/P80*
23	Clarification of research proposal entitled *"Effect of mindful meditation an anxiety,*

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	haemodynamic parameters and inflammatory markers on patients undergoing surgery for varicose veins" submitted by Dr. Chaitanya Gahlot, JRI, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/627/24 dated 5th March, 2024. **Previous Comment:** • The project is written in a sketchy way. To write a proposal a proper description of the problem statement along with a relevant review of literature, existing research gap, relevance of the study along with objectives to be there, which is missing? Further, there is a need for suitable methods to address the concerns. The introduction of the study barely talks about the research gap as per the topic chosen for the study. Methodology also not gives any clue about the strategy that is to be adopted for mindful meditation. • Who will guide modification techniques? ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** According to the clarification, the Sr. Chief PI will be responsible for the mediation procedure. Approval to the study may be provided in consensus with the learned committee members. **Decision:** To be put-up in the IEC Meeting scheduled on 13-05-2024. *Ref. code: XXI-PGTSC-IIA/P81*
24	Clarification of research proposal entitled ***"A retrospective study of epidemiology, clinical presentation, surgical intervention and outcome of patients who underwent surgery for aneurysmal SAH from 2015 till 2023"*** submitted by Dr. Shubhrit Tyagi, SRI, Department of Neurosurgery, King George's Medical University, U.P., Lucknow vide letter no. 531/NS/24 dated 24th February, 2024. **Previous Comment:** • The Study design indicates that it is a retrospective study & ethical approval is primarily for prospective interception & not for post procedures. • Kindly define the roles of guides & co guides as per protocol . • If no side effects are expected then what is the role of DSMB, or reporting of adverse events and interim analysis as per annexure 1. • If the aim is to study patients of last 8 years then how can it be a prospective study and how will the consent be obtained - Will the patient be called to decide his/her participation? and rest others excluded ?. • Kindly rectify language for points 5,7,13,15,16,17 in patient information sheet. • Kindly rectify language in ICF for patient participation as per design of study (prospective or retrospective.) ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-***

Chairman, IEC

	• Kindly correct points 7 & 14 in patient information sheet. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved *Ref. code: XXII-PGTSC-IIA/P49*
35	Clarification of research proposal entitled ***"The role of T-Cell TH 17 levels in patients undergoing laparoscopic/open cholecystectomy and its effect on gastro-intestinal immunity- A prospective cross-sectional study"*** submitted by Dr. Akash Nikhil Srivastav, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 632/SY/24 dated 18th March, 2024. **Previous Comment:** • Several sections of the IEC form are incomplete. • Title of the study does not adequately reflect the aim of the study. • Sample size calculated has been split between cases and controls. • Kindly clarify the study design; is it a "cross-sectional study" or a "prospective case-control" or a "prospective cohort design". ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved *Ref. code: XXIII-PGTSC-IIA/P2*
36	Clarification of research proposal entitled ***"Assessment of quality of life after reduction of limb volume by compression therapy in lower limb lymphedema patients: A prospective observational study"*** submitted by Dr. Mithlesh Kumar, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 742/SY/24 dated 12th March, 2024. ***Previous Comment:*** • Kindly complete the left out blanks in Annexure 1. • Seal of Chairperson in scientific review committee is missing. • Is the risk not reasonable compared to benefits? (See annexure 1 point 10) • If there is a plan to report adverse events (Annexure 1 point 11) then incorporate them in ICF & patient information sheet. • Kindly incorporate statistical analysis mentioning the various anticipated outcome measures. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	Ref. code: XXIII-PGTSC-IIA/P3
37	Clarification of research proposal entitled *"Early onset neonatal sepsis in neonates born through preterm pre-labor rupture of membrane: A prospective cohort study"* submitted by Dr. Anita Gautam, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 350/Ped/24 dated 2nd March, 2024. ***Previous Comment:*** • The objective of the study should be mentioned in the title. • There are too many objectives. Identify one primary objective and the rest should be clubbed into secondary objectives. • Make a list of the study variables and population parameter. • Convert the primary objective into research hypothesis using the population parameters. • Sample size is not given. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation** of reviewer:-* Provisionally approved **Decision:** Approved *Ref. code: XXIII-PGTSC-IIA/P4*
38	Clarification of research proposal entitled *"Prevalence of ionized hypocalcaemia in trauma patients and its role in predicting mortality at level I trauma center - A prospective observational study"* submitted by Dr. Mohd Tahir, JRI, Department of Trauma Surgery, King George's Medical University, U.P., Lucknow vide letter no. TS/270/24 dated 29th February, 2024. **Previous Comment:** • In SOP-Checklist point no.-7 (use of biological samples) -ticked as 'NO' but samples will be taken, Point no.-10 (Risk & benefit)-ticked as not reasonable-PI to correct or revise SOP-Checklist. • Informed consent form /Guardian consent form -English/Hindi versions not similar -please resend and as all age group patients will be recruited therefore Child Assent form should also be submitted • Case record form not included ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation** of reviewer:-* Provisionally approved **Decision:** Approved *Ref. code: XXIII-PGTSC-IIA/P5*
39	Clarification of research proposal entitled *"A comparison of treatment decision for adhesive restorations using different clinical diagnostic criteria in high caries risk children"* submitted by Dr. Simran Shivhare, JRI, Department of Paediatrics & Preventive Dentistry, Faculty of Dental Sciences, King George's Medical University,

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	U.P., Lucknow vide letter no. Pedo/80/24 dated 16th March, 2024. **Previous Comment:** • What is the meaning of treatment decision? • Make a list of the study variables and population parameter • Convert the primary objective into research hypothesis using the population parameters. • Sample size calculation is arbitrary. It should be specific to the research hypothesis. • Statistical analysis section is very general. It should be specific to the research hypothesis. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P15***
40	Clarification of research proposal entitled ***"Comparison of clinical outcome in Doppler guided hemorrhoidal artery ligation versus laser hemorrhoidoplasty in symptomatic hemorrhoids: A randomized controlled study"*** submitted by Dr. Lalit Pandey, JRI, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 1403/SY/23 dated 25th September, 2023. **Previous Comment:** • Is the risk not reasonable compared to benefits? (See annexure 1 point 10)- Kindly clarify. • What are the anticipated adverse events that are planned to be reported to IEC. Kindly state then in ICF/Patient information sheet. • It is expected that sample size consideration are finalized with the help of a statistician. • Kindly incorporate the questionnaire used in study as stated in check list of annexure 1. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was reviewed by the Member-Secretary, IEC.*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P16***
41	Clarification of research proposal entitled ***"Comparative evaluation of clinical and Radiographic success of lesion sterilization tissue repair (LSTR), modified LSTR with triple antibiotic paste and metapex pulpectomy in primary molars: A randomized controlled study"*** submitted by Dr. Ayisha Beevi T P, JRI, Department of Paediatric & Preventive Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. Pedo/69/2024 dated 1st March, 2024. **Previous Comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• The numbers of objective are 6 in number (synopses) at one place & only 2 at other. Kindly consolidate 6 to 2. • The 'Study procedures" in ICF needs to be in a patient friendly language. • Annexure 1 point 8 indicate that healthy volunteers will be recruited. This is not indicated in the text. Kindly clarify. • Kindly complete left over blanks in annexure 1. • It is expected that sample size allocation in each group has been finalized by a statistician. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P21***
42	Clarification of research proposal entitled ***"Clinical and radiographic evaluation of three different indirect pulpcapping materials in primary molars: A randomized clinical study"*** submitted by Dr. Bhawana Kumari, JRI, Department of Paediatric & Preventive Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. Pedo/68/24 dated 1st March, 2024. **Previous Comment:** • In Title the study design mentioned as Randomized Controlled Clinical Study, but in Protocol it is mentioned as Randomized Controlled Clinical Trial -PI to clarify. • If this is RCT study then outcome measures should also be included in Protocol apart from method of randomization, blinding and flow chart of the study. • In Inclusion criteria heading -Age and sex of the patients not mentioned (age and sex mentioned in Participants heading)-PI to include it in Inclusion criteria as well. • As 4-9 yrs. age group patients to be recruited in the study therefore, Guardian consent form should also be submitted. • If this is RCT study then Clinical trial registry document should be submitted (after ethical approval)-PI to clarify about study design. • In Tools- FRANKL rating criteria should be attached. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P23***
43	Clarification of research proposal entitled ***"Factors associated with acute kidney injury in Children with diphtheria and its impact on outcome: An observational study"***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	submitted by Dr. Vanshika, JRI, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no.350/Ped/24 dated 9th March, 2024. **Previous Comment:** • The consent is to be taken from the parent or the guardian and that need to be written accordingly. Patient information sheet also needs modification accordingly. • In both languages consent and assent forms for children to be written with similar content. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P25***
44	Clarification of research proposal entitled ***"Evaluation of use of fresh frozen plasma and cryoprecipitate in surgical patients"*** submitted by Dr. Rajeev Kumar, JRI, Department of Transfusion Medicine, King George's Medical University, U.P., Lucknow vide letter no. 735/24 dated 29th February, 2024. **Previous Comment:** • The scientific committee report should be in a proper prescribed format with specific decision and countersigned by Chairman with proper seal. • If anticipated adverse events are planned to be reported to IEC then kindly state those adverse events in IEC & patient information sheet. • Kindly include age in inclusion criteria. • Enumerate the anticipated outcome measures used in statistical analysis. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P29***
45	Clarification of research proposal entitled ***"Assessment of bedside blood transfusion practices in hematological disorder patients"*** submitted by Dr. Manigandan S, JRI, Department of Transfusion Medicine, King George's Medical University, U.P., Lucknow vide letter no. 582/24 dated 13th March, 2024. **Previous Comment:** • Signature, name of the chairperson is not there on the SRC. • As the topoc of the study is to assess bedside blood transfusion practices in hematological disorder patients which is to be followed at each step. However, details are not provided accordingly. The protocol need to be reviewed thoroughly for aim, objectives and methodology. Also, the pt information sheet and ICF to be written accordingly.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• IEC needs to be filled properly. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P31***
46	Clarification of research proposal entitled ***"Therapeutic drug monitoring of anti-fungal drug voriconazole in cases of invasive aspergillosis among adult hemato-oncological patients"*** submitted by Dr. Saurabh Kumar Nande, JRI, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 428/23 dated 23rd October, 2023. **Previous Comment:** • In SOP-Checklist, Point no.-10 (Risk & benefit) -ticked as not reasonable -PI to correct. • Study design should be elaborated as Prospective observational study • In inclusion /Exclusion criteria Sex specification and pregnant & lactating women criteria not mentioned • In Tools- EORTC/MSG revised guidelines should be included • Where TDM for Voriconazole concentrations will be performed-PI to clarify. • In addition, details of TDM have not been appropriately provided in the proposal. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P32***
47	Clarification of research proposal entitled ***"Low dose emicizumab prophylaxis in patients with hemophilia a with or without inhibitors - A single center, prospective observational study"*** submitted by Dr. Gaurav Datta, SRI, Department of Clinical Hematology, King George's Medical University, U.P., Lucknow vide letter no. 158/CH/24 dated 11th March, 2024. **Previous Comment:** • Scientific review committee should be revised as the name and signature of three Co-investigators (Dr. S P Verma, Dr. A K Tripathi and Dr. Swasti Sinha) are present. • In SOP-Checklist-Point no. 6 (confidential handling of data) ticked as No and Point no.-10 (Risk & benefit) -ticked as not reasonable -PI to correct. • Sample size calculation not done (only total no. of patients-36 is given) • In Inclusion /Exclusion criteria Sex specification and pregnant & lactating women criteria not mentioned

(Hardeep Singh Malhotra)

(J.S. Srivastava)
Chairman, IEC

	• As the age of recruited subjects are from 2 years onwards, the Child Assent form (in English /Hindi versions) should also be submitted. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P35***
48	Clarification of research proposal entitled ***"Comparative evaluation of effectiveness of green tea polyphenoles, triphala, Morinda citrifolia and 5% sodium hypochorite as intracanal irrigants against isolated microorganisms from infected root canal - An interventional study"*** submitted by Dr. Daulat Kumar, JRI, Department of Paediatric & Preventive Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. Pedo/103/24 dated 2nd April, 2024. **Previous Comment:** • In scientific committee report the seal of chairperson is missing. • Since this study includes testing of an ayurvedic product i.e. Triphala, an ayurvedic Co-Investigator may be added. • Regarding preparation of test solutions the references concerning recommended concentration for endodontic irrigation need to be added. • If samples for bacterial load assessment from root canal is to be collected then it should be indicated in annexure 1 (point 7) • Annexure 1 indicates that healthy volunteers will be recruited but this is not indicated in the plan. • Is the risk not reasonable compared to benefits (annexure 1 point 10) • In ICF the 'Study procedure' & 'Benefits from study' sections need to be in a more patient-friendly language. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P37***
49	Clarification of research proposal entitled ***"Prognostic utility of ratio of central venous-to-arterial carbon-dioxide tension difference to arterial-to-venous oxygen content difference combined with arterial lactate clearance rate in early resuscitation of septic shock"*** submitted by Dr. Rahul Kanjilal, SRI, Department of Critical Care Medicine, King George's Medical University, U.P., Lucknow vide letter no. DCCM/1184/2024 dated 15th April,2024. **Previous Comment:** • The protocol is incomplete. • Actually, the title itself is not clear.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• The primary objectives and secondary objectives give a list of study variables. • Make a list of the study variables and population parameters required for adherence, therapeutic outcomes, quality of life etc. • Convert the primary objective into research hypothesis using the population parameters. • There is no methodology section. • There is no study design. • Sample size calculation has no meaning in the absence of properly defined objectives. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P39***
50	Clarification of research proposal entitled ***"Diagnostic utility of contrast enhanced ultrasonography along with grey scale ultrasound and real time elastography in predicting the malignancy risk in Bethesda 3,4,5 lesions - An interventional study"*** submitted by Dr. Meghana V. Shetty, SR, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. EndoSurg/141/2024 dated 21st March, 2024. **Previous Comment:** • Section on Biological materials has been answered as 'No' but cytopathology and excision biopsy of the lesion is being done. This needs to be corrected. • Kindly defend the title of the study "an interventional study" vis-à-vis "an exploratory analysis" as the type of study. Actually, the denotation "Diagnostic utility" is sufficient to define the type of study. • Title does not include the site of evaluation; kindly correct. • Should be in ICF corrections. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P40***
51	Clarification of research proposal entitled ***"Reliability of on-site surgeon performed fine needle aspiration cytology with toluidine blue staining in thyroid and breast diseases - An interventional study"*** submitted by Dr. Asiya Zehra, SR, Department of Endocrine Surgery, King George's Medical University, U.P., Lucknow vide letter no. EndoSurg/142/2024 dated 21st March, 2024. **Previous Comment:** • In Inclusion /Exclusion criteria pregnant & lactating women criteria not

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	mentioned. • How PI will assess the learning curve of surgeon performing FNAC across the study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P41***
52	Clarification of research proposal entitled ***"Outcome assessment after surgical intervention (Angioplasty with catheter guided thrombolysis and stenting) in infra-inguinal peripheral arterial vascular disease – a prospective observational study"*** submitted by Dr. Kumar Kaushik, JR, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 743/SY/24 dated 12th March, 2024. **Previous Comment:** • In scientific committee report the seal of chairperson is missing. • In annexure 1 point 8. What will be the role of healthy volunteers as stated? • In the risk not reasonable compared to benefits (see annexure 1 point 10) • If there is a plan of reporting adverse events to the IEC, kindly include them in ICF & patient information sheet. • Kindly eneumerate the outcome variables as per the objectives & the methodology to assess them. • In ICF, kindly detail the 'Study procedure' section in a patient friendly language. Make similar correction in Hindi version. • Point 7 of patient information sheet seems out of context indicating 'Students'. Kindly clarify. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P43***
53	Clarification of research proposal entitled ***"A study of sleep difficulties in children with autism spectrum disorder"*** submitted by Dr. Sonu Maddheshiya, JR, Department of Psychiatry, King George's Medical University, U.P., Lucknow vide letter no. 2520/Psy/24 dated 5th March, 2024. **Previous Comment:** • Vulnerable subjects section is ticked as 'No' but children are being used as subjects. • ICF is not signed by the Investigator. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	Previous Comment: • This is basically observational study to find the prevalence of depressive and anxious symptomatology in cancer patients. • Since a cross-sectional study can only measure a distribution at a single time point, demographic, anthropometric, paraclinical, bioimpedance and genetic variables (not parameters) centered on dynamic or time-dependent quantities will introduce detection bias. • In view of the above comments, the title of the proposal may be revised suitably. • This cannot be used for making causal inference (risk factors). • Statisticians generally prefer to make causal inferences from randomized controlled experiments. • Data analysis section is incomplete. It just mentions the name of software to be used. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIA/P41***

	barriers regarding vasectomy among male population residing in a selected rural area of Lucknow" submitted by Mr. Mohammad Aquib Ansari through her guide Mr. Rohitash Kumar, Department of Community Health Nursing, College of Nursing, King George's Medical University, U.P., Lucknow vide letter no.595/24 dated 10th April, 2024. **Previous Comment:** • Kindly modify the title of the study to "Assessment of the awareness…." • The study uses direct identifiers and confidential handling is ticked as 'No' • Sections on consent-all boxes are not ticked. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIC/P12***
99	Clarification of research proposal entitled ***"Assessment of intimate partner violence, coping and psychological distress among spouses of patient with alcohol use disorder"*** submitted by Ms. Smriti through her guide Miss. Sudha Mishra, Assistant Professor, Department of Mental Health Nursing, College of Nursing, King George's Medical University, U.P., Lucknow vide letter no.4058/X.51/24 dated 1st January, 2024. **Previous Comment:** • The sample size formula is inappropriate. It is for prevalence study. • The sample size formula shall be based on "reliability coefficient", since this is an assessment of an instrument on violence, coping and psychological distress. • The statistical analysis section is very general. It should be specific to the objective of the study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIV-PGTSC-IIC/P14***
100.	Clarification of research proposal entitled ***"Prevalence of AKI in neonates, with birth weight below 1800 grams, receiving nephrotoxic drugs in NICU"*** submitted by Dr. Abhay Singla, JRII, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 624/Ped dated 4th April, 2024. **Previous Comment:** • The proposal needs discussion during the meeting. • The title of the proposal may be revised to avoid the use of abbreviations and include the design of the study. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-***

(Hardeep Singh Malhotra)

Previous comment:

- Sponsor is Ophirex Inc. Contract research organization is Syneos Health. CDSCO approval has been sought by M/S InVentiv International Pharma Services Pvt. Ltd. CTA is with Syneos?
- CDSCO letter does not mention KGMU site.
- Insurance policy is lapsing in June 2024. Please get it renewed & inform the IEC.
- It is unclear who would fund the project and how expenses would be managed.

The aforementioned comment was sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

6. Clarification of research protocol no. EX601/-4979 entitled ***"ARTEMIS Effects of ziltivekimab versus placebo on cardiovascular outcomes in patients with acute myocardial infarction"*** sponsored by M/s Novo Nordisk submitted by Prof. Rishi Sethi, Department of Cardiology, King George's Medical University, U.P., Lucknow, vide letter no. 35/Cardio/Res/24 dated 22nd April, 2024.

Previous comment:

- In sponsor information on IEC form, UN Agencies has been ticked.
- Contact address of sponsor is missing from IEC form. Send the contact address to IEC
- Details of 'organs and body fluids' mentioned under section on Biological materials not given.
- Adverse events reporting are being done to DSMB as per the IEC form. This needs to be corrected.
- DCGI application has been attached, not approval. Kindly submit the approval letter to IEC.
- Insurance cover is expiring in April, 2024.
- Sample size is mentioned as 10,000 in protocol and as 20 in the IEC form.
- Has the study been approved at any other site? If yes, kindly submit the same.

The aforementioned comment was sent to the Principal-Investigator, the response to which was forwarded to the reviewer.

	SAE detected on-06-03-2024 **SAE (Death) occurred on date:** Expired on 06-03-2024 **Follow up visit remaining:** No **24 hours, notified to EC, Sponsor**-Yes **14 days analysis report submitted to EC**-No **Subject History:-** A letter was received in the Office of the Ethics Committee on 6th March, 2024 from PI. The above mentioned patient was recruited in this clinical trial after fulfilling due checklist and informed consent. His clinical details are as follows patients with subject ID-S-45-3-3031, 42 years /Male admitted on 03.03.2024 in Neurology emergency with case of sudden onset weakness of left side of the body diagnosed to have right interacerebral (basal ganglia)bleed, volume approximately 19.87 ml. He was randomized to the control arm and was given standard treatment. The patients had h/o of hypertension and presented with uncontrolled blood pressure. The patient recived treatment as follows -Labetalol infusion Indepamide 2.5mg/BD infusion and Telmisarten +Amlodepin 40/5mg/BD. He was also on inj. Manitol. Despite of the mentioned treatment,patient had uncontrolled Blood pressure. On 05.03.2024,around 11 am the patient was transferred to Neurology ICU for close monitoring of Blood pressure.There patient received treatment for Blood pressure management, he was put on inj. Labetalol continuous infusion and metoprolol 25mgBD was also started, along with antibiotics Ceftriaxone 1gm/BD. On 06.03.2024, patient's condition gradually deteriorated despite the treatment, the patient developed sudden onset respiratory distress,on examination he had feeble pulse, decreased oxygen saturatioiin and anisocoria, GCS fell to EIVIMI for that patient was intubated. Despite all these efforts, the patient's condition worsened. Patient landed into sudden cardiac arrest on 06.03.2024 at 11.45 pm, CPR was given according to ACLS protocol. Despite all methods of CPR the patient couldn't be received. The patient was declared dead at 01.30 am on 06.03.2024. *Recommendation of Primary reviewer:* **a-Enrolment date**-03-03-2024 **b-Patient enrolment arm-Control arm-** Control arm. **c-SAE detected on 06-03-2024** **d-Notification to IEC 06-03-2024.14 day causality assessment is not attached in the documents.** **e. Subject History:-
A letter was received in the Office of the Ethics Committee on 30th March, 2024 from PI. The above mentioned patient was recruited in this clinical trial after fulfilling due checklist and informed consent. His clinical details are as follows. Patient with subject ID-S-45-3-2638, 74 years/Male, was admitted on 0101.2024 in the Neurology emergency ward with c/o sudden weakness of right side of the body diagnosed to have Left Thalamic bleed with Intraventricular Extension, volume approximately 10.75 ml. He was randomized in the control arm and was given standard treatment. The patient had no h/o of HTN, no h/o of T2DM, no h/o of Seizure, no h/o of fever. On admission patient GCS was E4V5M6, BP - 180/110 mmhg, PR-86 min, SPO2 was 98% CNS Pupil-NSNR B/L Plantar Flexion on the left side, extensor on right side Power 1/5 on right side and 5/5 on left side. Patient was admitted for 10 days (01.01.2024 to 10.01.2024). Patients was treated with antihypertensive medicines and other supportive treatment, the patient had responded to the treatment and was treatment and was discharged with stable vitals on 10.01.2024. On discharge patients GCS was E4V5M5, BP -124/86 mmhg, PR-86/ min, SPO2 was 98%,CNS pupil - NSNR B/L plantar Flexion in the left side flexor right side Power 1/5on right side. Patient's condition during discharge was stable. As the patient was in INTRINSIC TRAIL, the randomized patient's follow -up was due on day 90th (10 days +/-) i.e 3 months on telephone. Hence, was called on 26.03.2024 for the follow-up visit reminder due on 01.04.2024 but we came to know that the patient had already **expired** on 10.02.2024 at his home. Reason for death is UNKNOWN.
Recommendation of Primary reviewer:
a. Enrolment date-01-01-2024
b- Patient enrolment arm-Control arm.
c-SAE occurred on -10-12-2024
d-SAE detected on 26-03-2024.
e. Notification to IEC by letter on 30-03-2024. 24-hour notification and 14-day causality assessment is not attached in the documents.
f- The SAE (death) doesn't appear to be related to the study and appears to be an outcome of the disease process. The patient died at home; no autopsy reports are available.
g. Number of patients in the study-58. Number of SAE-13. Number of deaths-8
Comments:

- Discrepancy in typing

The subject was last called on 30th September for a 9 month telephonic follow-up call. But, the subject didn't answer the call. The subject was again contacted on 12th December, 2023 for 12 months actual site visit reminder call. The contact numbers provided by the subject were not reachable. Despite repeated reminder calls the subject did not answer the calls. The subject was again contacted on 7th March, 2024 for a reminder call, where the subject's LAR informed that she had complaints of breathlessness and discomfort and she passed away on 1st July 2023 around 2:00 P.M. at home. A local practitioner came and confirmed the patient's death and no autopsy was done. As per the information given by the patient's LAR, it seems to be a case of worsening of heart failure. Despite multiple reminders the subject's LAR was unable to provide the death certificate of the subject. The SAE is not related to the investigational drug. *Recommendation of reviewer:* a) **Enrolment date** – 17-12-2022 b) **SAE (death) occurred on**– 01-07-2023 c) **SAE detected date** – 07-03-2024

	Patient enrollment date: 28-04-2015 **Patient follow up under study**-Randomization visit, Month 1.5, Month 3, Month 6, Month 12, Month 18, every month telephonic Follow up till 5 year. **Follow up visit completed**-Randomization visit, Month 1.5, Month 3, Month 6, Month 12, Month 18 **Planning on visit-** Telephonic Follow-up Visit of month of March, 2024. **SAE detected on date:** 22-Mar-2024 **Follow up visit remaining:** Telephonic Visits (Every Month) till 2025 **Date of death:** 14-Feb-2024 **24 hours, notified to EC, Sponsor**-22-Mar-2024 **14 days analysis report submitted to EC**- 05-04-2024 **Subject History:** A letter was received in the office of the Ethics Committee on 4th April, 2024 by PI. Subject was randomized in Invasive Arm. Study Coordinator made a scheduled monthly follow up call to the subject on 22nd March, 2024 at 11:30 AM. After several calls, Subject's son picked the call and informed to PI that the subject passed away on 14th February, 2024 at around 01:10 AM in night. LAR informed to PI that one day prior to the death, the subject had dry cough and the next day in the afternoon he complained of chest pain, Subject's son took him to the hospital (SGPGI) and the Doctors there informed about the subject's death. Since there was no medical care given, PI has no documents related to the Patient's death. No autopsy was done. **Death Certificate provided by LAR.** *Recommendation of reviewer:* • The patient enrollment date was 28-04-2015. The study is having a follow-up period of 5 years. The SAE occurred in the year 2024 (9 years after enrollment to study) which is outside the study period. What is the relevance of reporting it? Mismatch of dates (14th-day report submitted to EC on 4th April or 5th April 2024?) As the project has been extended, the patient's follow up under study may be amended appropriately. • The death seems unrelated to the adverse effect of the intervention. **Comments:** As above **Decision:** To clarify from the PI. ***Ref. code: 60th ECM II-A/P13***

Institutional Ethics Committee Meeting,

OFFICE OF THE ETHICS COMMITTEE

Administrative Block

Minutes of 133rd ECM held on 15th June, 2024

(Registration No.: ECR/262/Inst/UP/2013/RR-19)

Minutes of the 133rd Institutional Ethics Committee Meeting held on **15th June, 2024 from 02:30 P.M. till 05.00 P.M.** in the Medical Education, Administrative Block, King George's Medical University, U.P., Lucknow ***in hybrid mode.***

The following Members were present in the Meeting:-

- Dr. J.S. Srivastava -Chairman
- Hon'ble Justice K.L.Sharma -Member
- Dr. Ritu Karoli -Member
- Dr. Pradeep Maurya -Member
- Mr. Jayant Krishna -Member
- Dr. Rahul Kumar -Member
- Dr. Rajeev Kumar Singh -Member
- Dr. Mohammad Kaleem Ahmad -Member
- Dr. Riddhi Jaiswal -Member
- D.N. Upadhyaya -Additional Member-Secretary
- Dr. Sujita Kumar Kar -Member & Vice Dean
- Dr. Hardeep Singh Malhotra -Member-Secretary, ex-officio

The following Members were not present in the Meeting:-

- Dr. Amit Goel -He has given his written comment
- Dr. G.G. Agarwal
- Dr. Meenakshi Pawha

I-	Action taken
a	Clarification of research proposal entitled "***Multidimensional analysis of pain in burning mouth syndrome: A questionnaire based study***" submitted by Dr. Akhilanand Chaurasia, Additional Professor, Department of Oral Medicine & Radiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 314/OMSR/24 dated 2nd May, 2024. **Previous comment:-**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IEC

	• The design of the study lacks clarity. The proposal should clearly define the study design and whether the evaluation would be prospective or not. • IEC Proforma to be filled properly. • Sample size is to be calculated and written as per the study requirement. The protocol-related details are to be given in a sequence. • Methods to be written properly and tense of sentences to be checked. • ICF to be prepared in an understandable language. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** • Provisionally approved **Decision:** Approved ***Ref. code: 130th ECM IIA/P8***
b.	Clarification of research proposal entitled "***Analysis of expression and polymorphism in miRNA target genes associated with gall bladder cancer***" submitted by Prof. Navin Singh, Department of Radiotherapy, King George's Medical University, U.P., Lucknow vide letter no. 1052/RT/24 dated 3rd June, 2024. **Previous comment:-** • Sample size calculation not provided. • Methodology and references page missing • Name of micro RNA genes not mentioned. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:*** • Provisionally approved **Decision:** Approved ***Ref. code: 124th ECM IIA/P4***
II-	**New Proposal**
1.	Research proposal entitled "***The Indian sjogren's syndrome registry: A metabolic syndrome registry: A multicentre observational study of sjogren's syndrome in India***" submitted by Dr. Kriti Kishor, Assistant Professor, Department of Clinical Immunology & Rheumatology, King George's Medical University, U.P., Lucknow vide letter no. Rh/505/24 dated 7th May, 2024. ***Recommendation of reviewer:*** • Reply awaited **Comment:** • It is unclear if the registry complies with the Government of India's "The Digital Personal Data Protection Act, 2023". • The methodology suggests that a "Biorepository" would be formed. It may be noted that a biorepository and registry are by nature & design entirely different and have different set of rules. Kindly clarify. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 133rd ECM IIA/P1***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

Dated 15th June, 2024

2.	Research proposal entitled "***The annual cost of illness in Indian systemic lupus erythematosus patients: A cross-sectional study***" submitted by Dr. Kriti Kishor, Assistant Professor, Department of Clinical Immunology & Rheumatology, King George's Medical University, U.P., Lucknow vide letter no. Rh/506/24 dated 7th May, 2024. ***Recommendation of reviewer:*** • Sample size calculation not provided to justify the scientific need. Approximately 500 subjects to be recruited in a duration of 12 months. • It is unclear how the 3-monthly cost would translate into an annual estimate. Kindly clarify. • How would the PI standardize exacerbations/intercurrent illness and admission cost vis-à-vis the cost estimate in stable patients? **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 133rdECM IIA/P2***
3.	Research proposal entitled "***Management of pancreatic trauma at tertiary care centre in North India- single centre experience***" submitted by Prof. Abhijit Chandra, Head, Department of Surgical Gastroenterology, King George's Medical University, U.P., Lucknow vide letter no. SG/333/24 dated 6th May, 2024. ***Recommendation of reviewer:*** • Objective of the study is not mentioned in the protocol submitted to IEC.. • Outcome has not been defined what her survival or otherwise.. • It seems from the documents that the study has already been completed and now the investigators are asking for the IEC approval before publication. • Waiver of consent documents mentions a different topic for the study. • Past tense used in project especially in statistical analysis. • Project name-discordant in the consent waiver form. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 133rdECM IIA/P3***
4.	Research proposal entitled "***Unlocking the secrets of age: exploring elbow joint fusion for accurate estimation***" submitted by Dr. Mousami Singh, Additional Professor, Department of Forensic Medicine & Toxicology, King George's Medical University, U.P., Lucknow vide letter no. 178/FMT/24 dated 7th May, 2024. ***Recommendation of reviewer:*** • Objective of the study is not clear. • How the outcome (objective of the study) will be measured and defined? Kindly clarify. • Mode of recruitment/inclusion? Reason for students to come for age estimation • Most participants would fall below 18 years category. Need consent from parents and assent from subjects. • The proposal has been written in the past tense; the same is reflected in the title of the study. It seems that the approval is being sought after the study has been performed/conducted/completed. Thus, retrospective approval of the proposal

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	cannot be granted. **Comment:** As above **Decision:** Level 4: Not approved ***Ref. code: 133rd ECM IIA/P4***
5.	Research proposal entitled "***Single stage nasolabial flap reconstruction for carcinoma of oral cavity- An institutional experience***" submitted by Dr. Naseem Akhtar, Additional Professor, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/955/24 dated 16th April, 2024. ***Recommendation of reviewer:*** • Objective of the study is not clear. • How the cosmetic outcome (objective of the study) will be measured and defined. **Comment:** • Retrospective study design: Should be submitted for "waiver of consent" or it should be explicitly defined how consent would be obtained. • No ROL or recent publications are available in the proposal. Kindly review the study by Ganguly et al; (2023) in Oral Oncology report. Where the technique was described in 1833 • SPSS-23: Is it available with the PI? • It is unclear what this study would add to the existing literature Why would a 13 year-retrospective data collection need a sample number? This is simply a duration-based data collection; thus, all available patients' records have to be included. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 133rd ECM IIA/P5***
6.	Research proposal entitled "***Surgical outcomes of penile cancer- An institutional experience***" submitted by Dr. Naseem Akhtar, Additional Professor, Department of Surgical Oncology, King George's Medical University, U.P., Lucknow vide letter no. SONC/953/24 dated 16th April, 2024. ***Recommendation of reviewer:*** **Comment:** • Retrospective study: Should be submitted for "waiver of consent" or it should be explicitly defined how consent would be obtained. • Outcome criteria regarding recurrence versus disease-free survival versus with-disease survival should be clearly defined. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 133rd ECM IIA/P6***
7.	Research proposal entitled "***Fetomonitoring- to develop and validate an artificial***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

Dated 15th June, 2024

	intelligence based voice application to support delivery room staff in documenting fetal heart rate readings, improving intrapartum care*"** submitted by Prof. Anjoo Agarwal, Head, Department of Obstetrics & Gynaecology, King George's Medical University, U.P., Lucknow vide letter no. OG/1253/24 dated 10th May, 2024. ***Recommendation of reviewer: Approved **Decision:** Approved ***Ref. code: 133rd ECM IIA/P7***
8.	Research proposal entitled **"*A double blinded single centered study for the evaluation of synergistic herbal formulation versus conventional treatment for gout*"** submitted by Dr. Shah Waliullah, Additional Professor, Department of Orthopedic Surgery, King George's Medical University, U.P., Lucknow vide letter no. 972/OS/24 dated 11th May, 2024. ***Recommendation of reviewer:*** • In SOP-Checklist, point no.-10 (Risk & benefit) - ticked as not reasonable. • 15-60 years patient will be included in the study. But in SOP checklist, children not ticked in vulnerable patients. Sample size calculation to be justified.. • Children Assent form not provided. **Comment:** • SRC does not have ~~a~~ an expert related to the intervention. • Co-Investigators do not include an expert related to the intervention. • Phase-I data should be provided to document the safety of the ~~study~~ product/formulatio **Decision:** Level 4: Not approved ***Ref. code: 133rd ECM IIA/P8***
9.	Research proposal entitled **"*The diagnostic and prognostic role of vascular endothelial growth factor-A in patients with early sepsis*"** submitted by Prof. Zia Arshad, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. 132/CCU/24 dated 13th May, 2024. ***Recommendation of reviewer:*** *Reply awaited* **Comment:** • Definition of early sepsis not clear. When early sepsis occurs.? • The proposal contains analysis of samples. It seems that the approval is being sought after the study has been performed/conducted/completed. Thus, retrospective approval of the proposal cannot be granted. • Criteria for prognostic value evaluation. • Patient information sheet. Amount of blood and frequency to be given. • Separate Guardian sheet needed. **Decision:** Level 4: Not approved ***Ref. code: 133rd ECM IIA/P9***
10.	Research proposal entitled **"*Resuscitation & Amp; survival analysis of cardiac arrest***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	practices in India: prospective observational multicenter study (RESUSCITATE Study)*"** submitted by Dr. Ankit Kumar, Assistant Professor, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 1050/ResP/24 dated 16th May, 2024. ***Recommendation of reviewer: *Reply awaited* **Comment:** • Their seems to be an error in the title "Resuscitation & Amp…". Kindly review. What does Amp. mean? Budgetary break-up is required. • PIS and LAR consent: It is unclear at what time-point consent process will ~~this~~ be done. Is it possible to predict cardiac arrest and take consent? • Vulnerable subject listing needs revision • Sponsor information is incorrect. • Co-investigators-Different centres: Is there an existent MoU? **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: 133rd ECM IIA/P10***
11.	Research proposal entitled **"*Prevalence and pattern of infertility in India: A multicentric nationwide Hospital-based cross-sectional study (India "FertiHope" Study)*"** submitted by Prof. Anjoo Agarwal, Head, Department of Obstetrics & Gynaecology, King George's Medical University, U.P., Lucknow vide letter no. OG/1271/24 dated 13th May, 2024. ***Recommendation of reviewer:*** *Reply awaited* **Comment:** • It is suggested that the Hindi word "banjh/banjhpan" be substituted by "nisantaan" to avoid stigmatized referral to the state of being "infertile". • List of investigators and budgetary break-up is required. • Define the diagnostic criteria of "infertility" • It is not clear which tests would be used to assess infertility and who and how the financial burden be borne. • It is unclear of PI would be able to fulfil the committed sample size. **Decision:** Level 3: Revision with major modifications for resubmission. ***Ref. code: 133rd ECM IIA/P11***
12.	Research proposal entitled **"*A prospective cohort observational study to evaluate the project on breastfeeding and newborn care*"** submitted by Dr. Shalini Tripathi, Additional Professor, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 874/Ped/24 dated 17th May, 2024. ***Recommendation of reviewer:*** *Reply awaited* **Comment:** • Is there a MoU with the Sponsor/PI's institute? Whether IECs of those centers approved? • Is there an agreement where KGMU is listed as a collaborating centre? A Foreign collaborator from RICE, Austin, USA HMSC clearance may be needed. • Role & responsibilities of Co-PI • Program evaluation at the Co-PI level is unclear

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

Dated 15th June, 2024

	• Funding/financial implications are unclear. It seems there is no provision of funding to the KGMU but PI is from KGMU. **Decision:** Level 3: Revision with major modifications for resubmission. ***Ref. code: 133rd ECM IIA/P12***
13.	Research proposal entitled "***Glycogen storage diseases (GSDs) in Indian children-establishing an Indian GSD (I-GSD0 registry)***" submitted by Dr. Sanjeev Kumar Verma, Additional Professor, Department of Paediatrics, King George's Medical University, U.P., Lucknow vide letter no. 911/Ped/24 dated 25th May, 2024. ***Recommendation of reviewer:*** *Reply awaited* **Decision:** Defer to the next meeting because the primary reviewer is yet to submit his recommendation. ***Ref. code: 133rd ECM IIA/P13***
14.	Research proposal entitled "***Evaluation of the safety & efficacy of Ganga Water phage therapy plus standard medical therapy as compared to standard medical therapy alone for helicobacter pylori-related dyspepsia: a randomized control trial***" submitted by Prof. Ajay Kumar Patwa, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 14445/MED/24 dated 24th May, 2024. ***Recommendation of reviewer:*** • What is the evidence to support that GWPT is effective against HP? In lack of preliminary data, it will be unethical to conduct an RCT. • It is written as a multicentric study- please mention all the study centers. • Why it is a phase II study? Kindly provide DCGI OR ayush approval along with data generated from the phase I study. • Sample size calculation is grossly wrong. • Mention the name, dose, dosing frequency, and duration of antibiotics included in intervention. • Though the title talks about safety but no data/information are collected on safety. • If safety of GWPT is in doubt then it is unethical to conduct an RCT. • How the GW will be collected, transported, and stored without compromising its quality. • How it will be ensured that the used GW contained bacteriophage? • How the nature and quantity of bacteriophage in GW will be ascertained? • Outcome is assessed at 2 weeks after starting the therapy. The common practice in HP therapy is to assess the eradication at 4-6 weeks after stopping the therapy. **Comment:** • Phage therapy? Is this approved by CDSCO? • Are there Co-PIs from IITR-Co/PI or other departments who would assess heavy metals/bacteriology? **Decision:** Level 3: Revision with major modifications for resubmission.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

Ref. code: 133rd ECM IIA/P14

15. Research proposal entitled "***Comparison of clinic-radiological outcome of supracndylar fracture humerus with well perfused hand and supracondylar fracture humerus with pink-pulseless hand-A retrospective study***" submitted by Dr. Syed Faisal Afaque, Assistant Professor, Department of Padeatrics Orthopaedics, King George's Medical University, U.P., Lucknow vide letter no. 3015/PaedOrtho/24 dated 11th May, 2024.

Recommendation of reviewer:

- When it is a retrospective study, how will the consent be obtained from the patient? Waiver of consent is applicable here. The investigator needs to attach the waiver of the consent form (appropriately filled).
- In this retrospective study, how advertisement will be done to recruit the patients? The investigator ticked YES for the item number 9 in IEC proforma.
- If it is a retrospective study, then why the investigators are limiting the sample to 40?
- Statistical analysis segment need to be improved. As there are two groups and as per the objective of the study two groups will be compared for the outcome measures. For this appropriate statistical test need to be discussed as the data is likely to be non-parametric (due to small sample size).

Comment:

- The SRC needs to review this study afresh and the proposal too needs a fresh submission.

Decision: Level 4: Not approved

Ref. code: 133rd ECM IIA/P15

16. Research proposal entitled "***Comparative evaluation of intensified short course regimen and standard regimen for adults TB meningitis: Open label randomized controlled trial (INSHORT trial)***" submitted by Dr. Imran Rizvi, Associate Professor, Department of Neurology, King George's Medical University, U.P., Lucknow vide letter no. 274/Neuro/24 dated 3rd June, 2024.

Recommendation of reviewer:

- IEC proforma: Sponsor information: Budget amount is not mentioned.
- IEC proforma: 5.vi: Vulnerable subjects are ticked NO. And the inclusion criteria mentions enrollment of patients above 18 years of age with no upper cut off. It indicates that vulnerable subjects like elderly and seriously ill will be included. Kindly do appropriate corrections.
- IEC proforma: item number 8 (Consent): Kindly tick all the relevant items.
- IEC proforma: Checklist items are not ticked.
- The investigator has mentioned that the pharmacokinetic parameters of ATT regimen in plasma and CSF will estimated. It means that biological sample will be taken from the patient. However, the investigator has not mentioned about it in the IEC proforma item number 7 (all the elements under use of biological material is ticked NO).

Agarwal -Member • Dr. Rajeev Kumar Singh -Member • Dr. Rahul Kumar -Member • Dr. Riddhi Jaiswal -Member • Dr. Kaleem Ahmad -Member • Dr. D.N. Upadhyaya -Member & Additional Member-Secretary • Dr. Sujita Kumar Kar -Member & Vice Dean • Dr. Hardeep Singh Malhotra -Member-Secretary, ex-officio
I-A	**Action Taken**
1.	Clarification of research proposal entitled ***"A pilot randomized controlled trial comparing visually aided nicotine replacement therapy and standard nicotine replacement therapy in smokeless tobacco users"*** submitted by Dr. Aman Rajput, JRI, Department of Public Health Dentistry, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 360/PHD/24 dated 18th May, 2024. **Previous Comment:** • It seems to be well planned study. Why it is being called pilot study? • If it is really, RCT, all the fundamentals are missing. • For example, (i) proper formulation of research hypotheses, (ii) study variables, (iii) primary and secondary outcome measures, (iv) method used to generate the random allocation sequence, including details of any restrictions (blocking, stratification etc.), (v) How double blinding is done, (vi) how the success of masking assessed.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	• The sample size calculation is arbitrary in the absence of proper research hypothesis. The different quantities used in the formula are not clear. There is no design effect for this study. It is for cluster-randomized trial. • The statistical methods used to compare groups for primary outcomes, methods for additional analyses, such as subgroup analyses and adjusted analyses. • How the results will be presented: (i) Participants flow, (ii) baseline data, (iii) outcomes and estimation, (iv) adverse events, etc. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXI-PGTSC-IIA/P13***
2.	Clarification of research proposal entitled ***"The expression of prevotella ORIS, neissera flava, neisseria flavescens/subflava, fusobacterium nucleatum, aggregatibacter segnis, streptococcus mitis, porphyromonas and candida albicans in oral potential malignant disorder and oral cancer - A histopathological correlation"*** submitted by Dr. Hrithik Kaushal Jain, JRI, Department of Oral Medicine & Radiology, Faculty of Dental Sciences, King George's Medical University, U.P., Lucknow vide letter no. 315/OMSR/24 dated 2nd May, 2024. **Previous Comment:** • The PI is investigating correlation of eight pathogens with oral potentially malignant disorder. This may be scientifically unsound since the minimum sample size will be distributed amongst all these sub-types of patients and correlation of result will be difficult. It is suggested that the PI choose one pathogen and observe its association with OPM lesions for the study to be scientifically relevant. • Project is REJECTED till it is suitably modified. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **Decision:** Approved ***Ref. code: XXIII-PGTSC-IIA/P59***
3.	Clarification of research proposal entitled ***"Role of simvastatin as an adjunct to non-surgical periodontal therapy in chronic peridontitis patients"*** submitted by Dr. Jayant Gupta, JRI, Department of Peridontology, Faculty of Dental Sciences King George's Medical University, U.P., Lucknow vide letter no. 4288/P/24 dated 14th May, 2024. **Previous comment:-** • Kindly fill in the blanks (Annexure-1 point 3 (iii) & point II) • Kindly eneumerate the specific objectives point wise & don't describe methodology in 'aims' section.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	• The title of the proposal may be revised to include the design of the study. • Regarding exclusion criteria how you will exclude the suspected allergy to simavastin. • In patient information sheet kindly exclude the initial guidelines. • Is the risk not reasonable compared to anticipated benefits? • Kindly provide PGT declaration form. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved **EC Decision:** Approved ***Ref. code: XXIV-PGTSC-IIA/P44***
4	Clarification of research proposal entitled ***"Assess the quality of life of patients diagnosed with idiopathic generalized epilepsy at KGMU Hospital, Lucknow"*** submitted by Ms. Mansi Verma through her guide Dr. Suchana Ray Bhawmik, Assistant Professor, Department of Medical Surgical, College of Nursing, King George's Medical University, U.P., Lucknow vide letter no.630/24 dated 13th April, 2024. **Previous Comment:** • Kindly modify the title of the study to "Assessment of the quality…." • The sample size formula is inappropriate. It is for prevalence study. • The sample size formula shall be based on "reliability coefficient", since this is an assessment of an instrument on quality of life. • The statistical analysis section is missing. ***The aforementioned comments were sent to the Principal-Investigator, the response to which was forwarded to the reviewer.*** ***Recommendation of reviewer:-*** Provisionally approved. **EC Decision:** Approved ***Dr. Hardeep Singh Malhotra did not take part in the discussion & making decision.*** ***Ref. code: XXIV-PGTSC-IIC/P7***
II-A	**New Thesis-Resident**
1.	Research proposal entitled ***"Prevalence of trauma patients in ICU at level one trauma center: A prospective observational single centre study"*** submitted by Dr. Mahek Verma, JRI through her guide Dr. Vaibhav Jaiswal, Additional Professor, Department of Trauma Surgery, King George's Medical University, U.P., Lucknow vide letter no. TS/195/24 dated 28th February, 2024. ***Recommendation of reviewer:-*** • Sponsor information: Inaccurate • As the study includes patients above 15 years of age and there is no upper limit. • In the vulnerable subjects category, children and elderly need to be ticked.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	• IEC proforma. point number 8 (consent): Information provided are incorrect. Why would a counsellor obtain consent for the study of the PG resident? • The checklist is incomplete. • Consenting below the age of 18 years is not clear. The investigator need to enclose assent form and guardian consent form for participants below 15 years of age. • The title of the study may be modified to incorporate the specific outcome of interest **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: XXVI-PGTSC-IIA/P1***
2.	Research proposal entitled ***"Comparison of purse-string wound closure vs conventional closure in reducing the risk of wound infection after stoma reversal-A prospective comparative study"*** submitted by Dr. Mohd. Nasir, JRI through his guide Dr. Saumya Singh, Additional Professor, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 479/24 dated 27th February, 2024. ***Recommendation of reviewer:-*** • The title of the study should not include abbreviations • Data collection heading starts with "be sharply taken...." The sentence started from an incomplete sentence. Kindly check it. • Kindly mention whether these techniques are approved techniques of stomal closure. • The investigator need to mention the points of assessment as it is a prospective study. • What will be end point of assessment, in case of death need to be mentioned? • In timeline, why six month is taken for review of literature? • How the outcome variables will be measured? • **Kindly provide the PGT declaration.** **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/P2***
3.	Research proposal entitled ***"Non invasive assessment of liver fibrosis using bard score, FIB 4 score and elastography in type 2 diabetes mellitus patients"*** submitted by Dr. Rajat Agarwal, JRI through his guide Prof. K. K. Sawlani, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 608/MED/24 dated 15th March, 2024. ***Recommendation of reviewer:-*** • Subjects include elderly, but there is no tick on vulnerable patients • Case report form is not attached • Sample size is different in IEC proforma and Method section **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P3***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

4.	Research proposal entitled ***"Study of comparison of prognostic efficacy of log odds ratio of lymph nodes vs lymph node ratio in oral cancers"*** submitted by Dr. Simon Batta, JRI through his guide Dr. Parijat Suryavanshi, Additional Professor, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 483/24 dated 27th February, 2024. ***Recommendation of reviewer:-*** • Case report form is not attached **Comment:** • The methodology, including the design of the study, needs more clarity. Defining the flow of the study in the form of an algorithm would be beneficial. • Sample size calculation needs a review • The follow-up period does not seem to do justice with the mean survival observed in patients with oral cancers. Kindly clarify. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P4***
5.	Research proposal entitled ***"Impact of renal replacement therapy on serum ammonia levels in patients of acute liver failure and acute on chronic liver failure"*** submitted by Dr. Kanishka Bharti, JR through her guide Dr. Medhavi Gautam, Associate Professor, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 609/MED/24 dated 15th March, 2024. ***Recommendation of reviewer:-*** • Annexure 1 Q5, In the subject selection point vi, you have marked vulnerable subjects as No and elderly subjects as Yes. Please explain. • Annexure 1 Q7ii, please specify the details and the mark the appropriate option. • In the informed consent, elaborate the study procedures, in both English and Hindi consent. • In the patient information sheet, re-answer Q4, Q7, and Q8, in both English and Hindi. • Please attach Q4 of Annexure 1. • The executive summary for the proposal is missing • How can you consider the prevalence to be 50% for calculating the sample size for the study? • Why is the margin of error 10%, instead of 5%? **Comment:** • Kindly clarify sample size calculation **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P5***
6.	Research proposal entitled ***"Plasma exchange in acute or acute on chronic liver failure: A systematic review and meta-analysis of randomized controlled studies"*** submitted by Dr. Tarun Chauhary, JR through his guide Prof. D. Himanshu,

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no..690/MED/24 dated 14th March, 2024. ***Recommendation of reviewer:-*** • As the investigator mentioned that the proposed study will be an systematic review and meta-analysis, what is the relevance sample size, study design, subject selection, exclusion criteria of the subjects as the study is not going to recruit subjects directly. It is a secondary research, the investigator should focus more on the nature of studies to be included for analysis. • Kindly refer to the study type. The investigators have ticked single centre study. What is its relevance in a systematic review and meta-analysis? • Statistical analysis should discuss about the analysis planned in meta-analysis • What is the relevance of consent form here? • What side effects the investigator is going to report to IEC (it is ticked in the IEC proforma)? • Going through the IEC preform and proposal, it looks that the investigator is doing a study on independent sample than doing a secondary research. I would recommend the investigators to refer to EQUATOR network - PRISMA guideline and checklist for developing the proposal. The proposal is grossly is erratic and need to be re-written. • Waiver of consent form to be attached. • Roles and responsibilities of the investigator page contains grossly erratic information. **Comment:** • Kindly refer to ICMR's "National Ethical Guidelines for Biomedical and Health Research involving Human Participants" whose scope is applicable to ***primary research*** pertaining to all biomedical, social and behavioural science involving human participants. Thus, the grant of approval to the submitted proposal seems to be out of purview of the Institutional Ethics Committee. To be put-up in full IEC scheduled on 15th June 2024 for further discussion. **Decision:** ***Dr. Hardeep Singh Malhotra did not take part in the discussion & making decision.*** ***Ref. code: XXVI-PGTSC-IIA/ P6***
7.	Research proposal entitled ***"Serial Electrophysiological Changes in Peripheral Nerves in Newly Diagnosed Patients with Drug Sensitive and Drug Resistant Pulmonary Tuberculosis"*** submitted by Dr. Dheeraj Kumar, JR through his guide Prof. Rajiv Garg, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 683/Res/24 dated 28th February, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P7***
8.	Research proposal entitled ***"Feasibility analysis of early stoma closure in trauma***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	patients: A prospective observational study at level 1 trauma centre" submitted by Dr. Prajjwal Gupta, JRI through his guide Dr. Narendra Kumar, Additional Professor, Department of Trauma Surgery, King George's Medical University, U.P., Lucknow vide letter no. TS/193/24 dated 27th February, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P8***
9.	Research proposal entitled ***"Prevalence of Rhesus(Rh) antigen and Kell(K1) antigen among blood donors in northern India"*** submitted by Dr. Vijay Pratap, JRI through his guide Prof. Ashutosh Singh, Department of Transfusion Medicine, King George's Medical University, U.P., Lucknow vide letter no. 805/24 dated 22nd February, 2024. ***Recommendation of reviewer:-*** • It is not clear whether the consent is for blood donation alone or participation in the study as the sample size is 56,000 • 'Yes' is the answer to data monitoring in point no 11, but to whom, is not mentioned **Comment:** • Use of "98% CI" needs justification • Sample size calculation needs clarification • The proposal should include a statement as to which guidelines they would comply, including those for the storage of samples **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P9***
10.	Research proposal entitled ***"To study the impact on ovarian reserve by laparoscopy vs open surgery in benign ovarian cysts"*** submitted by Dr. Shivani Rai, JR-1 through her guide Dr. Pushp Lata Sankhkwar, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. 805/24 dated 22nd February, 2024. ***Recommendation of reviewer:-*** • Title is inappropriate. It looks as if it is the aim. The title should be "A study on the impact of laparoscopy vs open surgery on ovarian reserve in benign ovarian cysts". In addition, abbreviations are best avoided in the title of the study. • Scientific review form is not signed by all the members. • In the IEC form the investigator has ticked that no biological material, blood and tissue sample will be taken. However, the first aim of the study is to serially measure serum anti-mullerian hormone... How this will be done without biological sample? • Inclusion criteria is inaccurate. What do you mean by all patients? Exclusion criteria are mentioned under inclusion criteria. • Patient information sheet: item number 8 to 13: Inaccurate. Mention the appropriate responses for it. **Comment:**

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	• The proposal needs a review by a formal statistician including a statement on the use of stated version of SPSS. This should range from sample size calculation to statistical methodology, used achieve the stated outcomes. • There is lack of clarity on the cut-off for AMH; will this be a post-hoc assessment. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P10***
11.	Research proposal entitled ***"Deciphering the Molecular Landscape of MexA and MexC Genes in Burkholderia cepacia complex from Clinical and Environmental Sources"*** submitted by Dr. Shiv Sundar Kumar, JRI through his guide Dr. Sheetal Verma, Department of Microbiology, King George's Medical University, U.P., Lucknow vide letter no. 1546/24 dated 22nd February, 2024. ***Recommendation of reviewer:-*** • Annexure Q5ii b Duration of subject participation • Annexure 1 Q5vi, please mark the vulnerable subject as yes. • In the informed consent, the purpose of the study is answered as the title of the study? Please re-answer it. Along with it, re-answer the study procedures that you can explain to patients while enrolling them in you study. • In the patient information sheet, re-answer Q4, Q13 and Q14, in both English and Hindi. • In the informed consent sheet, while stating the benefits of the study, could you elaborate how MexA and MexC notable presence will provide benefit to patient? • Provide the reference for 11% prevalence used for calculating the sample size. Also, how have you decided to enroll 30 isolates from environmental sources? • Annexure 1 Q7ii, how will you perform molecular experiments without any use of body fluids? • Please attach Q4 of Annexure1. • The executive summary for the proposal is missing **Comment:** As above **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P11***
12.	Research proposal entitled ***"A Study to estimate circulating level of serum osteoprotegerin and analysis of it's gene expression in type 1 diabetes mellitus among children"*** submitted by Dr. Sadia Nomani, JRI through her guide Dr. Kalpana Singh, Department of Biochemistry, King George's Medical University, U.P., Lucknow vide letter no. Bio/1230/24 dated 21st February, 2024. ***Recommendation of reviewer:*** • Please clarify compensation to injury as it is ticked in both points no. 8 and 12. • Sample size calculated is 58, taken is 35+35=70 with 20% dropouts; kindly clarify

Dated 15th June, 2024

	• Point no 10; will there be direct benefit to the patient with this study? **Comment:** • Healthy Controls: Forms are missing • Follow-up: Kindly provide the detail • Why have been drop-outs calculated? Is there a provision of follow up estimation that the PI wishes to perform? Please clarify. **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Dr. Mohammad Kaleem Ahmad did not take part in the discussion and making decision.*** ***Ref. code: XXVI-PGTSC-IIA/ P12***
13.	Research proposal entitled ***"Exploring the role of Lipid metabolizing genes in Non-Alcoholic Fatty Liver Disease (NAFLD)"*** submitted by Dr. Sana Shareefa, JRI through her guide Dr. Shweta Kumari, Department of Biochemistry, King George's Medical University, U.P., Lucknow vide letter no. Bio/1231/24 dated 21st February, 2024. ***Recommendation of reviewer:-*** • In the IEC proforma the sample size mentioned is 54, whereas in the proposal it has been mentioned as 124 (62 cases and 62 controls). Kindly clarify it. • Clarify the subject age-range selection and whether they qualify as vulnerable subjects? • IEC proforma point no 10.i (Risks and benefits): The response should be yes. The investigator has ticked "No". Similarly point number 1 (sponsorer information), why the investigators ticked government? Are you getting any sponsorship from any government agency? **Comment:** • How would the cost of investigations be handled? Kindly submit details of funding. **Decision:** Level 2: Revision with minor modifications/amendments for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P13***
14.	Research proposal entitled ***"Prospective study of patients satisfaction in Thyroid Surgical patients using PSAQ score"*** submitted by Dr. Niharika Kusawatia, JRI through her guide Dr. Kushagra Gaurav, Associate Professor, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 448/24 dated 22nd February, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P14***
15.	Research proposal entitled ***"Prognostic role of Serum CEA, CA 125, AFP, CA"-3 & CA 19-9 in patients of Carcinoma Breast and its correlation with known IHC marke"*** submitted by Dr. Priyansh Tandon, JRI through her guide Prof. Surender Kumar, Department of General Surgery, King George's Medical University, U.P., Lucknow vide letter no. 450/24 dated 23rd February, 2024.

	Recommendation of reviewer:- • Annexure1 Q5ii and Q5vii, Q6i please mark the appropriate boxes. • In the patient informed consent, please write the answers keeping in mind the perspective to explain patients about the study. Re-answer the purpose of the study, study procedures that you will follow, and benefits the volunteered patient will have after participating the study, in both English and Hindi. • In the patient information sheet, re-answer Q2, 13,14, and 17, in both English and Hindi. • Re-calculate the sample size using the recent prevalence data provided by Globocan or any internationally accepted site. • The referencing in the proforma -introduction does not match with the references provided in the end. The references in the introduction start from 32. • Please attach Q4 of Annexure1. • The executive summary for the proposal is missing **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P15***
16.	Research proposal entitled ***"Comparative Analysis of Metabolic Syndrome in PRISm VS COPD Patients"*** submitted by Dr. Garima Mishra, JR through her guide Dr. Anand Srivastava, Department of Respiratory Medicine, King George's Medical University, U.P., Lucknow vide letter no. 242/24 dated 21st February, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P16***
17.	Research proposal entitled ***"Comparative Autopsy Based study of Skull Fracture Pattern among Pedestrians, Bike Riders and Car Drivers in Road Traffic Accidents"*** submitted by Dr. Mushir Ahmad, JR through his guide Prof. Anoop Kumar Verma, Department of Forensic Medicine, King George's Medical University, U.P., Lucknow vide letter no. 69/FMT/24 dated 22nd February, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P17***
18.	Research proposal entitled ***"Comparison of Central Corneal Thickness Measured by Corneal Topography and Anterior Segment Optical Coherence Tomography"*** submitted by Dr. Purushottam Gupta, JRI through his guide Dr. Pramod Kumar, Department of Ophthalmology, King George's Medical University, U.P., Lucknow vide letter no. nil dated 29th February, 2024. ***Recommendation of reviewer:-*** • Scientific review form is not signed by all the members. • Chairperson should be a member of scientific review committee. • The investigator and co-investigator of the study cannot be a part of scientific review committee of the given study.

Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	• Co-supervisor Dr. Sandeep Saxena has not signed the proposal. • Checklist IEC incomplete. • Patients above 40 years of age are included in the study, then in IEC proforma vulnerable group need to be ticked and elderly population to be ticked under it. • Why 5ml blood will be taken? In IEC proforma under biological material it has been mentioned that 5 ml blood will be taken. **Comment:** • The title should include the design of the study. • Methodology is grossly incomplete. Kindly clarify the sample size and whether an absolute or a pilot assessment is planned. • There is no mention of outcome measures, outcome assessment and what statistical methods would be used. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P18***
19.	Research proposal entitled ***"Randomized Comparative Study to Assess the Efficacy of 0.5%, Hyperbaric Bupivacaine, 0.5% Hyperbaric Levobupivacaine and 0.5% Isobaric Levobupivacaine for Spinal Anaesthesia in total Knee Replacement Surgery"*** submitted by Dr. Ankita Rai, JRI through his guide Dr. Aparna Shukla, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/230/24 dated 21st February, 2024. ***Recommendation of reviewer:-*** • Checklist incomplete, • Sample size mentioned in IEC proforma is incorrect. It is also important to clarify the denotation used for "k" in sample size calculation. What do drop-outs mean in your study; kindly specify? • Sample size calculation should be referenced. • Participants up to the age of 70 years are included. So, the investigator should tick elderly in the vulnerable group. • Objectives are not clear and too many. • Patient information sheet is incorrect (in most places the investigator had mentioned NA or None). Appropriate responses to be mentioned for each question. • Procedure and statistical analysis plan are complete missing in the proposal. **Comment:** • The title of the study can be shortened by generalizing the intervention. • Kindly submit PGT declaration form. **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P19***
20.	Research proposal entitled ***"Evaluation of Optic nerve Sheath Diameter/Eyeball Transverse Diameter (ONSD/ETD) Ratio for Predicting Neurological outcome in patients undergoing Supratentorial Craniotomy: Comparison of use and CT***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)

	Measurements" submitted by Dr. Arun Unnithan, JRI through his guide Dr. Hemlata, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/222/24 dated 21st February, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P20***
21.	Research proposal entitled ***"Factors associated with road traffic injuries among the adults admitted in tertiary care hospital: A hospital based study"*** submitted by Dr. Akhilesh Kumar Patel JRII through his guide Dr. Anish Khanna, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 1483/CM/24 dated 19th March, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P21***
22.	Research proposal entitled ***"Status of newborn care services at government primary and secondary level delivery facilities in Lucknow district"*** submitted by Dr. Vivek Singh JRI through his guide Dr. Monika Agarwal, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 1354/CM/24 dated 22nd February, 2024. ***Recommendation of reviewer:-*** • IEC proforma, point no.8 consent form: Why nurse/counsellor will take consent? • Is it a qualitative study? • How the data will be analysed? Analysis plan is missing. • How did you arrive at the given sample size? Kindly clarify. • What will be the structure and content of interview? **Comment:** As above **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P22***
23.	Research proposal entitled ***"Spectrum of Congenital anomalies in fetus at a tertiary care center"*** submitted by Dr. Somya Singh, JR through her guide Dr. Shalini Singh, Associate Professor, Department of Obstetrics & Gynecology, King George's Medical University, U.P., Lucknow vide letter no. OG/521/24 dated 22nd February, 2024. ***Recommendation of reviewer:-*** • Inappropriate answers in PIS • Minimal sample size is 150? **Comment:** • The title of the study may be modified to ***"Spectrum of "fetal congenital anomalies at a tertiary care center".***

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	Decision: Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P23***
24.	Research proposal entitled ***"Determinants of utilization antenatal care services among recently delivered women residing in Urban slums of Lucknow: A cross sectional study"*** submitted by Dr. Preeti Kumari JR-II through her guide Prof. Anish Khanna, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 1461/CM/24 dated 14th March, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/ P24***
25.	Research proposal entitled ***"A Cross-sectional study of Age-Related Changes in Symphysial Surface of pubis observed in patients undergoing 3D Computed Tomography Scan"*** submitted by Dr. Rahul Mishra, JRI through his guide Dr. Shiuli, Department of Forensic Medicine & Toxicology, King George's Medical University, U.P., Lucknow vide letter no. 65/FMT/24 dated 22nd February, 2024. ***Recommendation of reviewer:-*** • EC proforma point no 10.i (Risks and benefits): The response should be yes. The investigator has ticked "No". • Data analysis segment is insufficient. • In the IEC proforma under the heading of vulnerable subjects, children and elderly need to be ticked. • As the investigator is including participants below 18 years of age, there is a need to submit additional forms for Guardian as well as children differently (both in English and Hindi). **Comment:** • It is unclear how outcome measures are related to FMT department. • A justification of (200) sample size is required • Financial implications need to be elaborated • Pregnancy? • Data collection method does not seem to match the cross-sectional design of the study **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P25***
26.	Research proposal entitled ***"Comparison of Erector Spine Plane Block with Intercostal Nerve Block for Post-Operative Analgesia in patient Undergoing Thoracotomy for Decortication: A Randomised Comparative Study"*** submitted by Dr. Ajay Kumar Gautam JRI through his guide Dr. Sateesh Verma, Department of Anaesthesiology, King George's Medical University, U.P., Lucknow vide letter no. Anaes/200/24 dated 21st February, 2024. ***Recommendation of reviewer:-*** • Decision of scientific review committee is not marked.

(Hardeep Singh Malhotra)
Member-Secretary, IEC

(J.S. Srivastava)
Chairman, IE

	• Relevant details under clinical trials to be filled (IEC proforma) as it is an interventional study. • Items included under consent form and Patient information Sheet are not ticked in the IEC form. • IEC form point no 10.i: Risk & benefits: It should be yes. • IEC proforma checklist is incomplete. • Undertaking of the principal investigator is not signed by the PI. • Patient information sheet is grossly erratic. • Objectives are poorly written. They should be specific, measurable and self-explaining. • Patients with age more than 60 years are included under the point number 5 of IEC proforma, the investigator should tick the vulnerable subjects and elderly. • Statistical analysis: Paired t test is not a test for inter-group comparison. Kindly correct it. For inter-group comparison of categorical variables chi-square test or Fisher's exact test is used and for continuous variables, unpaired t test is used. **Comment:** • Kindly submit PGT declaration • K=1 needs elaboration • How do you mean by drop-outs? Do you plan a follow-up estimation? It seems that the PI is referring to "potential errors related to total testing process". **Decision:** Level 3: Revision with major modifications for resubmission ***Ref. code: XXVI-PGTSC-IIA/ P26***
27.	Research proposal entitled ***"Co-Relation of Serum Adropin Level in Type 2 Diabetes Mellitus with and without Diabetic Nephropathy and also with Chronic Heart Failure"*** submitted by Dr. Madhusudan Agarwal JRII through his guide Prof. Satyendra Kumar Sonkar, Department of Medicine, King George's Medical University, U.P., Lucknow vide letter no. 786/MED/24 dated 3rd April, 2024. ***Recommendation of reviewer:-*** • There are two co-supervisors outside KGMU. Kindly enclose their CVs as per the format given in the SoP of IEC proforma (available at KGMU website). • Section 4 of IEC: Missing • Section 5 of IEC proforma: due to cutting and overwriting it is not clear, what is the sample size and duration of study. • There is no information about study, methodology, review of literature, aims & objectives, selection criteria, design of the study, sample size estimation, statistical analysis plan. • IEC proforma is grossly incomplete. • Patient information sheet in Hindi and English are inaccurate. **Comment:** • Algorithm of the study should be added in the proposal. • The title of the study needs modification with appropriate mention of the study design (Case-control, as per details)

(Hardeep Singh Malhotra)
Member-Secretary, IEC

64.	Research proposal entitled ***"Evaluation of the efficacy of concurrent versus sequential administration of rifaximin and probiotics in patients with irritable bowel syndrome: an observational prospective study"*** submitted by Dr. Vishal Tiwari, JR through his guide Prof. Rahul Kumar, Department of Pharmacology, King George's Medical University, U.P., Lucknow vide letter no. 366/Pharm/24 dated 30th May, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Dr. Rahul Kumar did not take part in the discussion & making decision.*** ***Ref. code: XXVI-PGTSC-IIA/P64***
65.	Research proposal entitled ***"Prevalence of atherosclerotic changes in coronary arteries in young population – An autopsy based study"*** submitted by Dr. Himanshu Patel, JR through his guide Dr. Mausami Singh, Additional Professor, Department of Forensic Medicine & Toxicology, King George's Medical University, U.P., Lucknow vide letter no. 208/FMT/24 dated 29th May, 2024. **Decision:** Defer to the next meeting because primary reviewer is yet to submit his recommendation. ***Ref. code: XXVI-PGTSC-IIA/P65***
66.	Research proposal entitled ***"Assessment of physical and psychological health status of children living in orphanage homes in Lucknow"*** submitted by Dr. Vedika Singh, JR through her guide Prof. Reema Kumari, Department of Community Medicine & Public Health, King George's Medical University, U.P., Lucknow vide letter no. 293/CM/24 dated 29th May, 2024. ***Recommendation of reviewer:-*** • IEC proforma: As there is no sponsor, why the investigator has marked GOVT/National under sponsor information? • Participants are children in orphanages, then why the investigator mentions under the patient information sheet that you are a caretaker of orphanage so you are included in the study? • Who will give consent for the study? Elaborate more in details as the participants are below 18 years of age. • Include assent form for the participants and guardian/caregiver consent form. • As the participants are orphans, who will be legally held responsible to give consent? Kindly elaborate about it. • Source of participants is orphanage homes. Do you have access to 294 sample between 11 to 18 years of age at Lucknow? • Statistical analysis plan is missing. • Elaborate more about study tools. **Comments:** • There are multiple objectives. It is suggested to identify one primary objective and the rest should be clubbed into secondary objectives. • The algorithm used does not reflect true multistage sampling. It is unclear what extra meaning does it convey.
