Lucknow U.P – (226003)**

Nursing theory is “the creative and rigorous structuring of ideas that project tentative, purposeful and systematic view of phenomenon”.

Nursing profession requires lifetime learning and nursing theories provide frame work for nursing interventions and predict outcomes in the impact of nursing practice.

THEME

Integration of Theories in

Clinical Practice& Research

Nursing Science is an identifiable discrete body of knowledge comprising paradigms, frameworks and theories. The integration of nursing theories into practice demonstrates an evolutionary pathway for introducing a paradigm shift in the essence of the science of nursing. Patient safety and quality initiatives as well as magnet status continue to mandate that nurse’s practice from a framework of professionalism. A sound evidence-based practice advances the overall nursing administration too. Nurse leaders guided by a conceptualized practice have an opportunity to transform health care.

We feel immense pleasure inviting you to the national workshop on application of theories in nursing practice. “This workshop will be memorable for you as academics and hospitality is concerned”. The workshop invites the experts in the field of application of nursing practice. We request for your gracious presence to make this workshop memorable as an organizing committee is working hard to make the workshop grand success.

Learning objectives:

- ❖ To learn new advancement in nursing fields
- ❖ To use in communication with other health professionals
- ❖ To generate further knowledge and indicate in which direction nursing should develop in the future
- ❖ To describe link between nursing theory and continuing development of nursing profession.
