To whomsoever it may concern

SUB: Declaration of price & Non-Availability on the GEM portal

Dear Sir,

Admetec, a renowned manufacturer of TTL (Through-The-Lens) loupes, offers a variety of magnification options to cater to the diverse needs of professionals. Among their offerings, the Ergo 10x stands out as the highest magnification available, designed to provide exceptional clarity and detail. This advanced model is priced with internal & external vision corrections at 2,42,000, reflecting its superior features and precision engineering. Additionally, the Orchid-F light set is priced at ₹73,000. This set includes an in-built yellow filter with an intensity of 80,000 lux and an approximate weight of 8 grams.

Despite its advanced specifications and the significant investment it represents, the Ergo 10x is not currently listed for sale on the Government e-Marketplace (GEM) portal. The absence of this high-end product on the GEM portal means that interested buyers may need to seek alternative purchasing channels directly through Admetec or authorized distributors.

Dr. Vinayak Mohan Inbavalli from Kings Dental Academy in Tiruchirapalli, Tamil Nadu, purchased the Admetec Ergo 10x Magnification loupes in the year February 2024. The loupes, which cost 2,30,000, were obtained from our authorized dealer in Chennai, Cube Dental. With the change in the financial year from 1st April and a subsequent price hike, the current price of the Admetec Ergo 10x Magnification loupes is now *2,42,000.

Thanks & Regards,

Yours Faithfully,

MR. Mehul Nagar - Director
