Sub: Proposal – MyLOFT mobile web app for accessing subscribed digital eResources

Dear Sir,

MyLOFT (My Library on Finger Tips) is a Mobile Web app that allows patrons to discover-access-organize-share digital content of their personal & professional interests seamlessly across mobile and web platforms including access to their libraries subscribed eResources anywhere & anytime. MyLOFT is developed considering key factors that promote learning environment & user interaction; Research output and International outlook.

Our cost-effective cloud-based service model has freed institutions from investing and maintaining IT infrastructure such as central servers, bandwidth costs, IP address registrations etc. Due to this Institutions will be facilitated in focusing on core-academic-activities and use saved funds aptly.

MyLOFT will empower institutions in systematically imbibing research values among faculty, researchers & students and take the right steps in creating a knowledge-base of their own.

We look forward to discussing the project further with a promise to extend our support to this noble cause of knowledge & resource sharing amongst patrons that will benefit the community and society at large.

Please find attached with this letter, estimated proposal for full-scale implementation of the proposed solution for your kind reference. Kindly feel free to get in touch with us in case you require any further information.

Your's Truly,
Ankur Pandey

3	Date/ Day wise usage statistics	Resource & user category wise reports available
VI	System Availability & user experience	
1	Uptime	99.9%
2	Hosting Infrastructure	Amazon AWS Cloud

3	User Experience	Superior and won't depend upon Institute infrastructure
4	IT knowledge required to run the system	Library staff needs minimal IT skills to maintain the system
5	IT infrastructure requirement	Minimal. Actually, since the service is offered on cloud hosting model, Library doesn't need any dedicated IT infrastructure

MyLOFT Features

- **Voice Enabled Universal Search**

Discover content using voice-command in search engines recommended by your institutes.

- **Offline Reading**

Save contents from your favorite websites, blogs, news feeds or institute's subscribed eResources and read them offline.

- **Access to Subscribed eResources**

Easy access to latest journals articles, databases, eBooks or any other digital resources subscribed by your institute.

- **Tag and Organize**

Find saved articles and research papers by tagging and organizing them into collections.

- **Highlight and Listen (TTS)**

The built-in article viewer allows clutter free text reading, highlighting, listening and more

- **Auto-Synchronization**

Seamlessly access, organize, share and sync eContent between PC and Mobile while multitasking using Web App.

- **MyLOFT features for Administrators:**

1. Single window dashboard to administer user accounts and manage content.
2. Bulk upload facility for user data, databases and journals.
3. Detailed user category wise, resource wise and day wise Usage statistics : This will allow you to track the usage of all the subscribed e-resources and find the usage behavior of your users enabling you to take systematic management decision on providing better services and products to them.
4. MIS Reports generated can very well help in optimizing budget allocations towards eResources and eSubscriptions.

5. Allows administrators to easily send system generated email messages (like welcome email, password reset, custom messages, usage statistics etc) to all or select user categories and publishers.
6. Assign user category based per day data download limit to monitor robotic downloads.

MyLOFT Access

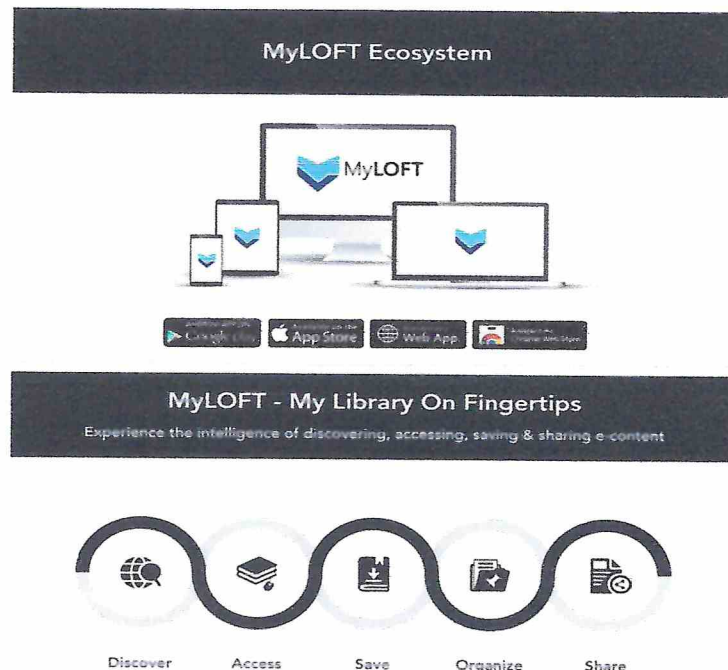

MyLOFT can be accessed on any device using a) Mobile App and b) Web App

● Mobile App

1. Install MyLOFT app on your mobile device from [Play store](#) (for Android) or [App store](#) (for iPhone)

MyLOFT launch feedback at VIT, Vellore -

<https://www.youtube.com/watch?v=b3llj51--gs>

“I am extremely happy with the RemoteXs team which has created a new platform - MyLOFT, mobile app to provide remote access to eligible users for the library resources from JIPMER, Pondicherry (Puducherry). The team has spent almost a week with us and they are extremely helpful going around meeting people helping them to access this new application. We are hopeful that this will be a major trendsetting application to help more users to make best use of all our facilities of the institution”.

Dr. Rajesh Nachiappa Ganesh

Associate Professor – JIPMER, Pondicherry

(Department of Pathology)

“I am very happy to launch MyLOFT, a product of Eclat Engineering Pvt. Ltd.” Commenting on the importance and relevance of the applications like MyLOFT, he said, “MyLOFT will not only become a great value addition to the knowledge center but also create a paradigm change in the behavior of user’s content consumption.”
